

Report No. 509(61/1.0/2)

Household Consumption of Various Goods and Services in India, 2004-05

NSS 61st Round
(July 2004 - June 2005)

Vol. I: Major States and All-India

National Sample Survey Organisation
Ministry of Statistics and Programme Implementation
Government of India

April 2007

Preface

The National Sample Survey Organisation (NSSO) conducts socio-economic surveys covering various subjects on regular basis. Subjects are selected keeping in view their importance. As part of the NSS 61st round during the period July 2004 – June 2005, the Household Consumer Expenditure survey was conducted on large sample basis and this was the seventh quinquennial survey on the subject.

The report is one of a series of seven reports to be brought out on the basis of the data collected through the survey. Report No.508 (the first of the series) gave the break-up of per capita consumption expenditure in 2004-05 by 32 broad groups (14 food groups and 18 non-food groups) of items of consumption. The present report studies consumption patterns in greater detail, using the item classification adopted in the household consumer expenditure schedule. Monthly per capita expenditure estimates are presented here for all items of consumption for which data was separately recorded in the schedule, along with the estimated proportions of households consuming each item during the last 30 days. All estimates are provided separately for rural and urban sectors of each State and Union Territory. For food, fuel, clothing and footwear, estimates of per capita quantity of consumption are also provided.

Chapter One of the report serves as the introduction. Chapter Two explains the concepts and definitions used in the survey. Chapter Three gives the main findings of the survey. Detailed tables at the State/UT and all-India level are given in Appendix A, while the sample design and the estimation procedure are explained in Appendix B. A facsimile of the schedule used for data collection is given as Appendix C. The report has been divided into two volumes. Volume I is the main report and includes the text portion as well as Appendices B and C, and part of the Appendix A relating to the major States. The term 'major States' here refers to the 17 States of India which had a population of 20 million or more according to the Census of 2001. Volume II contains the remaining part of Appendix A relating to the minor States and Union Territories.

Development of sampling design and survey instruments, and preparation of the report, was undertaken by the Survey Design and Research Division of the NSSO. The field work was handled by the Field Operations Division and the data processing and table generation by the Data Processing Division. The Coordination and Publication Division was responsible for overall coordination of all activities of NSSO, including the data dissemination and release of the reports. The Chairman and Members of the then Governing Council of NSSO, along with the Chairman and Members of the Working Group set up for this round, provided the technical directions and guidance at every stage of the survey. I am grateful to all of them.

The report, I hope, will be useful to planners, policy makers and researchers. Comments and suggestions are most welcome.

New Delhi

National Sample Survey Organisation

Highlights

A sample of 79298 rural households and 45346 urban households spread over the entire country was surveyed in the Consumer Expenditure Survey of the 61st round of NSS (the seventh of the quinquennial series), carried out in 2004-05.

CONSUMPTION IN PHYSICAL TERMS AND INCREASE SINCE 1993-94

- Between 1993-94 and 2004-05, consumption of *jowar* and its products has dropped by over 40% in both rural and urban areas.
- For the commonly consumed pulses – *arhar*, *moong*, *masur* and *urad*, the percentage of households reporting consumption has risen by 1 to 4 percentage points between 1993-94 and 2004-05. For split gram the percentage has risen by 8 points in both rural and urban areas.
- The percentage of households reporting milk consumption has grown in both rural and urban areas between 1993-94 and 2004-05 by 5 percentage points – 66% to 71% in rural areas and 80% to 85% in urban areas.
- Per capita egg consumption in rural India – about 1 egg per month in 2004-05 – has increased by nearly 60% since 1993-94. The percentage of rural households consuming any eggs in a 30-day period has risen from 22% to 33%.
- Per capita consumption of goat meat and mutton has definitely declined, more so in urban India, and the proportion of households consuming such meat in a 30-day period has declined too (by 2-3 percentage points between 1993-94 and 2004-05).
- The proportion of households consuming chicken during a 30-day period has, between 1993-94 and 2004-05, increased three-fold in urban areas and two and a half times in rural areas, and the increase in per capita consumption levels appears to be of the same order. Per capita consumption of chicken has outstripped that of goat meat and mutton not only in urban but also in rural India.
- Per capita consumption of edible oil has risen over the eleven years following 1993-94 by as much as 30% in rural India and about 18% in urban India. In both rural and urban India, per capita consumption of oil other than groundnut oil, mustard oil, *vanaspati* and coconut oil has more than doubled. Such oil would include sunflower oil, soyabean oil, other vegetable oil and rice bran oil.
- The percentage of urban households using groundnut oil dropped in 2004-05 to 21%, one-half of what it was in 1993-94 (40%). Among rural households the percentage in 2004-05 fell to 14% from a 1993-94 level of 30%.
- The percentage of urban households consuming apples in a 30-day period remained, in 2004-05 as in 1993-94, nearly three times the corresponding percentage for rural households.
- The prevalence of consumption of groundnuts, as measured by the proportion of households consuming them in a 30-day period, has gone up by about 50% in both rural and urban areas between 1993-94 and 2004-05.
- While per capita consumption of brinjal (eggplant) has declined distinctly – by about 70 gm per month in both sectors – per capita consumption of onions has risen by 100 gm per month in the rural and more than 150 gm in the urban sector between 1993-94 and 2004-05.

- The percentage of households consuming a particular vegetable in a 30-day period has grown in the eleven years after 1993-94 by 3-6 percentage points for potatoes, onions and brinjal, 8-10 percentage points for cabbages and nearly 12 percentage points for cauliflowers and tomatoes in urban areas, and 15 percentage points for tomatoes in rural areas.
- The proportion of households having at least one *bidi* smoker has declined by 26% in rural India and 35% in urban India between 1993-94 and 2004-05.
- Per capita consumption of cigarettes in urban areas has dropped by 30% in the eleven years since 1993-94.
- The proportion of households using LPG doubled in urban India from 29.5% in 1993-94 to 59% in 2004-05, and increased five- or six-fold in rural India from about 2% to 11.7%.
- Households using electricity formed about 54% of rural households in 2004-05 compared to 34% in 1993-94. In urban areas they formed 90% of households in 2004-05 compared to 74% in 1993-94.
- Between 1993-94 and 2004-05, the proportion of households purchasing readymade garments during a 30-day period increased in both rural and urban areas by about 75%, while the proportion purchasing hosiery articles showed a three-fold increase.

CONSUMPTION IN RUPEES AND INCREASE AT CURRENT PRICES SINCE 1999-2000

- The share in educational expenditure of “tuition and other fees”, its major component, is on the rise. Between 1999-2000 and 2004-05, this share rose in urban India from 45% to 57% and, from 29% in rural India, reached a level of 44%.
- Medicine (non-institutional) formed as much as 63-64% of total medical expenditure in rural India and 56-57% in urban India in both 1999-2000 and 2004-05.
- While the share of institutional medical expenditure (incurred in connection with hospitalisation) in total medical expenditure by households in urban India (28%) was a little higher than in rural India, the gap between the two has narrowed in 2004-05, the share for rural India having risen from 23% to 26%.
- Telephone expenditure per person per month, at current prices, has soared to six times its level in 1999-2000 (increase of 515%) in rural India and to 3.3 times its level (increase of 230%) in urban India. Total consumer expenditure levels per capita rose, by comparison, by 19% in rural India and by 29% in urban India. The proportion of households incurring expenditure on telephone has jumped from 5% to 32% for rural areas and from 25% to 63% for urban areas.
- Per capita expenditure on tuition and other educational fees has, at current prices, risen to nearly 3 times its 1999-2000 level (increase of 188%) in rural areas, and in urban areas reached two and a half times its earlier level.
- Tailoring expenses per person have registered a fall of 26% (at current prices) in the rural sector and 33% in the urban sector between 1999-2000 and 2004-05. At the same time, per capita expenditure on readymade garments has risen in both sectors by about 63% at current prices between these two years.

POSSESSION OF DURABLE GOODS

- The percentage of households with TV sets increased since 1999-2000 by about 7 percentage points in both sectors to stand at 26% in the rural sector and 66% in the urban sector in 2004-05.

- Electric fans were found in 38% of rural households and 82% of urban households in 2004-05, showing an increase of 12-13 percentage points in each sector since 1999-2000.
- Refrigerators were used by 32% of urban households and 4% of rural households in 2004-05. In 1993-94, eleven years earlier, they had been found in 12% of urban households and 1% of rural households.
- Motorcycles or scooters were possessed by over one-fourth of urban households and 7.7% of rural households in 2004-05. In 1993-94, they were possessed by less than one-eighth of urban households and only 2% of rural households.
- About 4.6% urban households owned motor cars in 2004-05 compared to 1.2% in 1993-94. Even in rural areas 0.8% households owned motor cars, compared to 0.2% in 1993-94.

Vol. I

Table 1R and 1U

Monthly per capita quantity and value of consumption for each major State and all-India, by sector: food items A-1 – A-144

Table 2R and 2U

Monthly per capita quantity and value of consumption for each major State and all-India, by sector, from data collected for “last 30 days”: non-food items except durables A-145 – A-288

Table 3R and 3U

Monthly per capita quantity and value of consumption for each major State and all-India, by sector, from data collected for “last 365 days”: clothing, footwear, education, institutional medical care and durable goods A-289 – A-396

Table 4R and 4U

Number per 1000 households possessing specific durable goods in five fractile classes of MPCE for each major State and all-India, by sector A-397 – A-408

Table 5R and 5U

20th, 40th, 60th and 80th percentiles of distribution of rural/urban population by MPCE for each State/UT and all-India A-409 – A-410

Table 6R and 6U

Estimated population (00) in for each State/UT and all-India, by sector A-411

Major States: The 17 States of India which had a population of 20 million or more according to the Census of 2001. The States are: Andhra Pradesh, Assam, Bihar, Chhattisgarh, Gujarat, Haryana, Jharkhand, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Orissa, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh and West Bengal. Together, these States accounted for nearly 94.7% of India’s population in 2001.

Detailed tables for the remaining States of India, and for the Union Territories, form Volume II of this report.

Appendix A

Detailed Tables

Vol. II

Table 1R and 1U

Monthly per capita quantity and value of consumption for each minor State/ UT, by sector: food items A-413 – A-556

Table 2R and 2U

Monthly per capita quantity and value of consumption for each minor State/ UT, by sector, from data collected for “last 30 days”: non-food items except durables A-557 – A-700

Table 3R and 3U

Monthly per capita quantity and value of consumption for each minor State/ UT, by sector, from data collected for “last 365 days”: clothing, footwear, education, institutional medical care and durable goods A-701 – A-808

Table 4R and 4U

Number per 1000 households possessing specific durable goods in five fractile classes of MPCE for each minor State/ UT, by sector A-809 – A-820

Minor States: The 12 States of India which had a population of less than 20 million according to the Census of 2001. The States are: Arunachal Pradesh, Delhi, Goa, Himachal Pradesh, Jammu & Kashmir, Manipur, Meghalaya, Mizoram, Nagaland, Sikkim, Tripura and Uttaranchal.

Union Territories (UTs): Andaman & Nicobar Islands, Chandigarh, Dadra & Nagar Haveli, Daman & Diu, Lakshadweep and Pondicherry.

Detailed tables for the major States of India, and for all-India, are placed in Volume I of this report.

**Variation in rural per capita milk
consumption among the major States,
2004-05**

range	State	monthly per capita consn. (litres)
<1 litre per month	Chhattisgarh	0.67
	Orissa	0.78
1-2 litres	Assam	1.31
	Jharkhand	1.44
	West Bengal	1.45
2-3 litres	Tamil Nadu	2.48
	Maharashtra	2.73
	Kerala	2.82
	Bihar	2.98
3-4 litres	Andhra Pradesh	3.05
	Karnataka	3.30
	Madhya Pradesh	3.41
all-India		3.87
4-5 litres	Uttar Pradesh	4.64
	Gujarat	4.98
9-10 litres	Rajasthan	9.50
11-12 litres	Punjab	11.55
13-14 litres per month	Haryana	13.13

The text of this report is confined to a discussion of the all-India results. Nevertheless, to induce interested readers to go through the State-level tables given in Appendix A, we present without comments the table above showing inter-State variation in per capita milk consumption in rural areas of India's major States.

Chapter One

Introduction

1.0.1 This is a report on household consumer expenditure in India based on a nationwide sample survey of the National Sample Survey Organisation.

1.0.2 The NSSO conducts regular consumer expenditure surveys as part of its "rounds", each round normally of a year's duration and covering more than one subject of study. The surveys are conducted through household interviews, using a random sample of households covering practically the entire geographical area of the country. The present report is based on data collected through the 61st round of NSS (July 2004-June 2005). It is the second report of the consumer expenditure survey of that round.

1.0.3 Nowadays every round of NSS includes a consumer expenditure survey (CES), giving rise to an annual series of consumption data. Every 5 years or so, a larger-than-usual-scale CES is conducted as the main enquiry of a round. This gives rise to a "quinquennial series" of CES's. The sixth quinquennial CES was conducted in 1999-2000 in the 55th round of NSS and the 61st round CES is the seventh.

1.0.4 The household consumer expenditure schedule used for the survey collected information on quantity and value of household consumption with a reference period of last 30 days preceding the date of interview. To minimise recall errors, a very detailed item classification was, as usual, adopted to collect information, including 142 items of food, 13 items of fuel, 27 items of clothing, bedding and footwear, 17 items of educational and medical expenses, 52 items of durable goods, and about 90 other items. For items of clothing, footwear, and durable goods, on which consumption expenditure by individual households varies widely from month to month, data with a reference period of "last 365 days" was also collected. The indicator of overall living standards of the household called MPCE (monthly per capita expenditure) was built up using "last 30 days" data for all goods and services. The schedule also collected some other household particulars including age, sex and educational level of each household member.

1.0.5 The first report¹ on consumer expenditure based on the 61st round survey released information on (a) distribution of households and persons over MPCE classes for each State/UT and all-India (b) averages (State/UT and all-India) of MPCE (c) break-up of these average values by important heads of consumption (d) break-ups of both quantity and value of per capita consumption of cereals and pulses by cereal/pulse type.² All average values were provided not only for the population as a whole but for 12 different groups of population demarcated by MPCE level. All the data were provided separately for rural and urban sectors.

1.0.6 In Report No.508, consumption expenditure break-up by 32 broad groups (14 food groups and 18 non-food groups) of items of consumption was given, the groups being: cereals; gram; cereal substitutes; pulses and pulse products; milk and milk products; edible oil;

¹ *NSS Report No. 508: Level and Pattern of Consumer Expenditure, 2004-05*

² The effect of alternative reference periods ("last 30 days" and last "365 days") on the estimates of consumption of certain categories of less frequently purchased items was, in addition, examined.

egg, fish and meat; vegetables; fruits (fresh); fruits (dry); sugar; salt; spices; beverages and processed food; *pan*; tobacco; intoxicants; fuel & light; clothing; footwear; education; medical (institutional); medical (non-institutional); entertainment; minor personal effects; toilet articles; other household consumables; conveyance; other consumer services; rent, taxes and cesses; and durable goods.

1.0.7 Contents of the present report: In the present report an attempt has been made to study consumption patterns in greater detail, using the item classification adopted in the household consumer expenditure schedule. Monthly per capita expenditure estimates are presented here (Appendix A) for all items of consumption for which data was separately recorded in the schedule (see paragraph 1.0.4 above and Annexure C: Schedule 1.0), along with the estimated proportions of households consuming each item during the last 30 days. All estimates are provided separately for rural and urban sectors of each State and Union Territory. *For food, fuel, clothing and footwear, estimates of per capita quantity of consumption are also provided.* (For these detailed items, estimates are not, however, generated separately for different MPCE classes of the population as such estimates would be subject to much wider margins of sampling error.)

1.0.8 Table 1 (R & U) of Appendix A gives these estimates for food items and Table 2, estimates for non-food items, based on “last 30 days” consumption data. For those categories of items for which both “last 30 days” and “last 365 days” data were collected (see paragraph 1.0.4 above), the “last 30 days” estimates are expected to be considerably inferior to the “last 365 days” estimates, as these categories consist of items which are purchased less frequently and are reported by much smaller numbers of households for any given reference period. For these items, therefore, the estimates based on the “last 365 days” recall period are also presented, in Table 3 (R & U) of Appendix A. For durable goods, estimates based on last 30 days have been omitted from Table 2 (except for the category “durable goods” as a whole), as, for most of these items, the numbers of reporting households during the last 30 days is so small, even at the all-India level, that the sampling errors of the estimates are expected to be very high.

1.0.9 All estimates are provided separately for rural and urban sectors of each State and Union Territory. In case estimates of per capita consumption are required for rural and urban combined (for a State/UT or all-India), the two estimates for rural and urban sectors will have to be aggregated using the estimates of rural population and urban population as weights. These estimates are provided in Table 6 of Appendix A.

1.0.10 In the concluding section of Chapter Three of the report, a study has been made of the possession of certain common durable goods in the population, based on information collected in the schedule on whether the household possessed each such durable on the date of survey. There were ten such durable goods: radio, television set, electric fan, air conditioner, air cooler, sewing machine, refrigerator, bicycle, motorcycle/scooter, and motor car/jeep. For each State/UT, Table 4 (R & U) in Appendix A provides estimates of the proportion of rural and urban households in the State/UT possessing each durable. Further, estimates are provided of the same proportion separately for five fractile groups of population of the State/UT ranked by MPCE: the bottom 20%, the next 20%, and so on up to the top 20%. These estimates throw light on disparities in the possession of these durables among the population of each State/UT.

1.0.11 Appendix B gives details of the sample design and estimation procedure followed and Appendix C is a facsimile of the consumer expenditure schedule (“Schedule 1.0”) that

was canvassed in the surveyed households. The report has been divided into two volumes. Volume II contains the part of Appendix A which relates to the minor States and Union Territories. Volume I consists of the rest of the report, and includes the text portion as well as Appendices B and C, and the part of Appendix A that relates to the major States. (See paragraph 2.11 on page 7.) Tables 5 and 6 of Appendix A are, however, placed wholly in Volume I because they consist of only three pages altogether.

1.1 Some details of the survey

1.1.1 *Geographical coverage:* The survey covered the whole of the Indian Union *except* (i) Leh (Ladakh) and Kargil districts of Jammu & Kashmir, (ii) interior villages of Nagaland situated beyond five kilometres of a bus route and (iii) villages in Andaman and Nicobar Islands which remain inaccessible throughout the year.

Table P0: Number of villages/blocks allotted and surveyed for Schedule 1.0 and number of households and persons surveyed: Central sample

State/UT	no. of villages		no. of urban blocks		no. of sample households		no. of sample persons	
	allotted	surveyed	allotted	surveyed	rural	urban	rural	urban
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
Andhra Pradesh	556	556	308	307	5555	2876	22860	11835

A & N Islands	52	28	36	36	268	359	1215	1432
Chandigarh	8	8	32	32	80	300	365	1136
Dadra & N. Haveli	16	16	8	8	160	80	770	346
Daman & Diu	8	8	8	8	80	80	400	354
Lakshadweep	8	7	16	16	70	129	373	822
Pondicherry	16	16	56	56	160	560	640	2292
All-India	8128	7999	4660	4602	79298	45346	403207	206529

*Note that as many as 98 out of 129 allotted villages that could not be surveyed belonged to the disturbed areas of Jammu and Kashmir.

1.1.2 *Population coverage*: The following rules were followed:

1. Under-trial prisoners in jails and indoor patients of hospitals, nursing homes etc., were excluded, but the residential staff of these institutions were included. Convicted prisoners undergoing sentence were outside the coverage of the survey.
2. Floating population, i.e., persons without any normal residence, was excluded. But persons residing in open space, roadside shelter, under a bridge, etc., more or less regularly in the same place, were covered.
3. Foreign nationals were excluded, as well as their domestic servants, if by definition the latter belonged to the foreign national's household (see Chapter Two). A foreign national who had become an Indian citizen for all practical purposes was, however, covered.
4. Persons residing in barracks of military and paramilitary forces (like police, BSF etc.) were kept outside the survey coverage. However, the civilian population residing in their neighbourhood, including the family quarters of service personnel, was covered.
5. Orphanages, rescue homes, ashrams and vagrant houses were outside the survey coverage. However, the persons staying in old age homes, the students staying in ashram/hostels and the residential staff (other than monks/nuns) of these ashrams were covered. Although orphans living in orphanages were excluded, the persons looking after them and staying there were covered.

1.1.3 *Sample size – first-stage units*: As is usual in the regular NSS rounds, most States and Union Territories participated in the survey: a “State sample” was surveyed by State Government officials in addition to the “Central sample” surveyed by NSSO. For rural India, 8128 villages formed the Central sample for this round. Of these, 7999 villages were ultimately surveyed. In the urban sector, the allocation for the Central sample was 4660 blocks, of which 4602 were surveyed. This report is based on the estimates obtained from the Central sample alone.

1.1.4 Table P0 shows the numbers of villages and urban blocks allotted for survey and actually surveyed, the numbers of rural and urban sample households in which the consumer expenditure schedule, “Schedule 1.0”, was canvassed, and the corresponding numbers of sample persons covered.

Chapter Two

Concepts and Definitions

2.1 **Household:** A group of persons normally living together and taking food from a common kitchen constitutes a household. The word "normally" means that temporary visitors are excluded but temporary stay-aways are included. Thus, a son or daughter residing in a hostel for studies is excluded from the household of his/her parents, but a resident employee or resident domestic servant or paying guest (but not just a tenant in the house) is included in the employer/host's household. "Living together" is usually given more importance than "sharing food from a common kitchen" in drawing the boundaries of a household in case the two criteria are in conflict; however, in the special case of a person taking food with his family but sleeping elsewhere (say, in a shop or a different house) due to space shortage, the household formed by such a person's family members is taken to include the person also. Each inmate of a mess, hotel, boarding and lodging house, hostel, etc. is considered as a single-member household except that a family living in a hotel (say) is considered as one household only; the same applies to residential staff of such establishments.

2.2 **Adult:** A person who has completed 15 years of age.

2.3 **Household size:** The size of a household is the total number of persons in the household.

2.4 **Household consumer expenditure:** The expenditure incurred by a household on domestic consumption during the reference period is the household's consumer expenditure. Household consumer expenditure is the total of the monetary values of consumption of various groups of items, namely (i) food, *pan* (betel leaves), tobacco, intoxicants and fuel & light, (ii) clothing and footwear and (iii) all other goods and services, including durable articles.

2.5 For groups (i) and (ii), the total value of consumption is derived by aggregating the monetary value of goods actually consumed during the reference period. An item of clothing and footwear is considered as consumed at the moment when it is brought into maiden or first use. The consumption may be out of (a) purchases made in cash or credit during the reference period or earlier; (b) home-grown stock; (c) receipts in exchange of goods and services; (d) any other receipt like gift, charity, borrowing and (e) free collection. Home produce is evaluated at the ex farm or ex factory rate. For evaluating the consumption of the items of group (iii), a different approach is followed. In this case, the expenditure made during the reference period for the purchase or acquisition of goods and services is considered as consumption. However, for a few items of expenditure such as rent, telephone charges, consumer taxes and railway season tickets, expenditure during the month is recorded as the amount that was last paid divided by the number of months to which the payment related.

2.6 It is pertinent to mention here that the consumer expenditure of a household on food items relates to the actual consumption by the members of the household and also by the guests during ceremonies or otherwise. To avoid double counting, transfer payments like charity, loan advance, etc. made by the household are not considered as consumption for items of groups (i) and (ii), since transfer receipts of these items have been taken into account.

However, the item "cooked meals" is an exception to this rule. Meals prepared in the household kitchen and provided to the employees and/or others would automatically get included in domestic consumption of employer (payer) household. There is a practical difficulty of estimating the quantities and values of individual items used for preparing the meals served to employees or others. Thus, to avoid double counting, cooked meals received as perquisites from employer household or as gift or charity are not recorded in the recipient household. As a general principle, cooked meals purchased from the market for consumption of the members and for guests and employees will also be recorded in the purchaser household.

2.7 This procedure of recording cooked meals served to others in the expenditure of the serving households leads to bias-free estimates of average per capita consumption as well as total consumer expenditure. However, donors of free cooked meals are likely to be concentrated at the upper end of the per capita expenditure range and the corresponding recipients at the lower end of the same scale. Consequently, the derived nutrition intakes may get inflated for the rich (net donors) and understated for the poor (net recipients). This point has to be kept in mind while interpreting the NSS consumer expenditure data for studies relating to the nutritional status of households.

2.8 **Value of consumption:** Consumption out of purchase is evaluated at the purchase price. Consumption out of home produce is evaluated at ex farm or ex factory rate. Value of consumption out of gifts, loans, free collections, and goods received in exchange of goods and services is imputed at the rate of average local retail prices prevailing during the reference period.

2.9 **Monthly per capita consumer expenditure (MPCE):** For a household, this is the total consumer expenditure over all items divided by its size and expressed on a per month (30 days) basis. A person's MPCE is understood as that of the household to which he or she belongs.

2.10 **Reference periods:** The reference periods used for collection of consumption data for different groups of items are given below:

category	item of consumption	reference period
I	clothing, footwear, education, medical care (institutional) and durable goods	"last 30 days" and "last 365 days"
II	all other items (viz all food, pan, tobacco & intoxicants, fuel and light, miscellaneous goods and services including non-institutional medical care, rents and taxes)	"last 30 days"

For items of category I, two estimates of aggregate or per capita consumption are possible, one based on "last 30 days" expenditure and the other on "last 365 days" expenditure. In this report, estimates based on both reference periods have been provided for all items of Category I except durable goods. For durable goods, only estimates based on "last 365 days" have been provided. For computation of MPCE, which is used as a classificatory variable in some tables, only data with reference period "last 30 days" were used.

2.11 **Major States:** This refers to the 17 States of India which had a population of 20 million or more according to the Census of 2001. The States are: Andhra Pradesh, Assam, Bihar, Chhattisgarh, Gujarat, Haryana, Jharkhand, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Orissa, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh and West Bengal. Together, these States accounted for nearly 94.7% of India's population in 2001.

2.12 **Detailed items:** The schedule of enquiry used for recording data from each sample household had an elaborate list of consumption items. Some of these items were group sub-total items (such as "clothing: sub-total", or "conveyance: sub-total"). Against sub-total items, entries were made by totalling the entries against the various items of the group. Against all items other than these sub-total items, entries were made by asking direct questions to the informant. These items are referred to in this report as detailed items.

2.13 The coverage of various categories of consumption items used in presenting the results of the survey in this report is explained below.

NOTES ON COVERAGE OF DIFFERENT CONSUMPTION ITEMS³

103-106 Rice products: Rice products are foods like *chira*, *khoi*, *lawa*, *muri*, rice powder, etc. which are obtained by splitting, frying, powdering, or parching of the grain.

114 Other wheat products: Does not include wheat preparations like biscuits, cakes, etc., which are shown separately in "beverages, etc."

117 Maize products: This includes cornflakes, popcorn, etc., made of maize.

118 Barley products: This includes *sattu* prepared by frying and powdering of barley.

129 Cereals: Note that household consumption of cereals does not include consumption of cereals by livestock belonging to the household. Such expenditure, being part of farm expenditure, is excluded from household consumer expenditure altogether.

139 Cereal substitutes: Cereals are usually a person's staple food in India. But sometimes, by choice or due to scarcity, a person may consume little or no cereal. The food requirement is partially or wholly met in such cases by consumption of food items which could be treated as substitutes for cereals. Tapioca, for example, is consumed in some parts of the country as a substitute for cereals. Similarly, jackfruit seed, *mahua*, etc. are also consumed as substitute for cereals. Potato or sweet potato consumed as substitutes for cereals are not, however, shown here. These are included in "vegetables".

151 Gram products: This includes gram products such as *sattu* obtained by frying and powdering of gram (whole grain). *Besan* made out of gram is, however, a separate item (152).

160 Milk: liquid: This covers milk as directly obtained from cow, buffalo, goat or any other livestock. Milk sold in bottle or polypack, as well as readily drinkable flavoured and bottled

³ The number at the start of each paragraph is the code used for the item in the schedule used for data collection (see Appendix C: Schedule 1.0).

milk is included. Milk transformed at home into curd, casein, *ghee*, butter, etc. for the purpose of household consumption is also included. Milk used in home preparation of sweetmeats, etc., is also accounted here.

161 Baby food: This covers only those baby foods of which the principal constituent is milk.

166 Ice-cream: This category covers only ice-cream of which the major component is milk. Ice with syrup but without milk sold under the name of ice-cream is not included.

170-174, 179 Edible oil: Edible oils used for toilet purpose by the household are not included here. Oilseeds are sometimes purchased or grown by a household for extracting edible oil (by crushing) for consumption. The value of oilseeds so used is included in "edible oil".

229 Vegetables (sub-total): This includes ginger and garlic. In Table P1 of Chapter Three, however, the definitions used (see Chapter Two, Concepts and Definitions, of NSS Report No.508, from which the table is taken) exclude ginger and garlic from vegetables and include them in "spices". As a result, the estimates of value of vegetable consumption appearing in Table P1 are lower than what is shown against item 229 in Table 1, Appendix A.

247 Other fresh fruits: This includes sugarcane consumed like fruits.

289 Spices (sub-total): This excludes ginger and garlic, which are accounted in "vegetables". In Table P1 of Chapter Three, however, the definitions used (see Chapter Two, Concepts and Definitions, of NSS Report No.508, from which the table is taken) exclude ginger and garlic from vegetables and include them in "spices". As a result, the estimates of value of consumption of "sugar, salt and spices" shown in Table P1 are higher than what they would be if the estimates of spice consumption are taken from Table 1 of Appendix A without making this adjustment.

294 Ice: This includes only ice *purchased* for household consumption.

298 Other beverages (cocoa, etc.): This also includes mineral water, soda water, etc.

300 Biscuits: This includes all kinds of biscuits, other confectionery such as chocolate, toffee, lozenge, etc., and sugar substitutes like saccharine.

301-308 Pickles, sauce, jam, jelly, prepared sweets, etc.: If these items are prepared at home, consumption is shown not against the item but against the ingredients (flour, sugar, vegetables, oil, etc.). If these items are purchased, consumption is shown against "pickles", "sauce", etc., as the case may be. Similarly, "fruit juice" refers to purchased fruit juice.

303 Cooked meals: This refers to cooked meals purchased from the market (e.g., from hotels, restaurants and canteens).

309 Beverages, etc.: Short for "beverages, refreshments and processed food".

322 Leaf tobacco: Includes all leaf tobacco consumed in any form, and also tobacco leaf burnt and powdered for brushing teeth.

- 330 Ganja:** Includes *ganja* consumed in the form of cigarettes.
- 332 Country liquor:** Excludes country liquor prepared at home from its ingredients and consumed. For such liquor, consumption is accounted against the ingredients.
- 342 Electricity:** Includes meter rent and surcharge for electricity.
- 352 Gobar gas:** The value of gobar gas is imputed on the basis of value of inputs used for manufacturing gobar gas.
- 379 Clothing:** Excludes raincoats. Expenditure on tailor-made clothing excludes tailoring charges, which are shown against “tailor” under “consumer services”. Consumption of an article of clothing is considered to take place when it is brought into first use. However, clothing purchased second-hand is considered as consumed as soon as it is purchased. Imported ready-made garments, even if purchased second-hand, are shown as first-hand purchase. Livery supplied by the employer is taken into account in household consumption of clothing even if used during duty hours only.
- 389 Bedding:** Apart from bedding proper such as bed sheets, pillows and mosquito nets, this includes rugs, curtains, towels, mats, cloth for upholstery, etc.
- 390-394, 399 Footwear:** This includes charges paid to a cobbler for getting a pair of shoes or other footwear made. It excludes the cost of straps purchased separately.
- 409 Education:** This includes expenditure on goods purchased for the purpose of education, viz., books and journals, newspapers, paper, pen, pencil, etc., and also magazines, novels and other fiction. Expenditure on Internet other than telephone charges is included here. All compulsory payments collected by educational institutions at the time of admission or along with the regular fees are regarded as part of the expenditure for education and included in “education”, even if termed “donations” by the institution collecting them. True donations to the school made voluntarily on account of charities are not included here, as they are regarded as transfer payments.
- 410-429 Medical: institutional and non-institutional expenditure:** The distinction between institutional and non-institutional medical expenses lies in whether the expenses were incurred on medical treatment as an in-patient of a medical institution (institutional), or otherwise (non-institutional). Medical institution here covers private as well as Government institutions such as hospitals and nursing homes.
- 439 Entertainment:** This includes expenditure on cinemas, theatres, *melas*, fairs and picnics, expenditure incurred on processing, developing, etc., of photographic film, charges paid for hiring of video cassette/VCR/VCP, and charges for viewing a video show. Expenses incurred on subscription to dish antenna, cable TV facilities, etc. are also included. Club fees are included here.
- 449 Minor personal effects:** In the consumer expenditure schedule, this group was called “goods for personal care and effects”. Examples are spectacles, torches, locks, umbrellas, raincoats and gas lighters. Though these are, strictly speaking, durable goods, they are, by convention, accounted in the “miscellaneous goods and services” block.

- 468 Other washing requisites:** This includes brushes, utensil cleaners, steel wool, etc.
- 479 Other household consumables:** In the consumer expenditure schedule, this group was called "sundry articles".
- 513 Other conveyance expenses:** Includes animal feed for animal-drawn carriage or vehicle. Does not include driver's or cleaner's salary, or garage rent.
- 519 Conveyance:** This includes expenditure incurred on account of journeys undertaken and/or transportation of goods made by any means of conveyance. The expenditure is the actual fare paid except in case of railway season tickets, for which expenditure is calculated as the cost of the ticket divided by the number of months for which it is valid. Expenditure on journeys undertaken by household members as part of official tours is not considered as consumer expenditure of the household. But journeys to commute to and from place of work are included here. The expenditure incurred on journeys undertaken under Leave Travel Concession, etc., even if reimbursed, is included. In case of owned conveyance, the cost of fuel (petrol, mobile oil, diesel, etc.) for power-driven transport and animal feed for animal-drawn carriage is considered.
- 520-522, 529 Rent:** For government accommodation, the portion of monthly emoluments forfeited on account of occupation of government quarters is included in monthly house rent expenditure. *Salami/pugree* is not included in "rent". Hire charges of video cassettes, VCR and VCP are not accounted in consumer rent but under "amusement".
- 539 House rent, garage rent (imputed):** For a household that resides in a house (or uses a garage) which it either owns or otherwise occupies without paying any rent, the value of this is imputed on the basis of prevailing rate of rent for similar houses in the locality or surrounding areas. This information is obtained for urban households only. "Imputed rent" is defined as zero for households which occupy hired accommodation. Estimate of per capita imputed rent (for non-hired accommodation) is, however, computed taking both non-zero and zero figures in the calculation. Note also that imputed rent is not included in the computation of household consumer expenditure and MPCE.
- 540 Water charges:** Water charges last paid to the municipality or other local bodies divided by the number of months for which the amount was charged may be recorded against this item. This item does not include the cost of water purchased through tanker, etc.
- 541 Other consumer taxes and cesses:** This category includes road cess, *chowkidari* tax, municipal rates, other taxes and cesses paid by the household as a domestic consumer, and consumer license fees such as fees paid for possession of firearms, vehicles, etc. It does not include income tax or sales taxes.
- 550-649, 659 Durable goods:** Items included here all have a lifetime of one year or more. However, some petty durables such as spectacles, torches, locks, umbrellas, etc., are excluded. Note that glassware, earthenware and plastic goods such as buckets are excluded from durable goods and included in "other household consumables". Consumption expenditure on durable goods includes both expenditure on purchase and expenditure on repair and construction of household durables. For land and residential building, only expenditure on repair and construction is included.

Chapter Three

Summary of Findings

3.0.0 The survey estimates presented in this report are of three kinds:

- (a) Estimates of per capita consumption (quantity and value) of detailed items
- (b) Estimates of proportions of households incurring consumer expenditure on different items during a 30-day or 365-day period
- (c) Estimates of proportions of households possessing specific durable goods on the date of survey (for 10 common consumer durables)

Of the three kinds of estimates, (a) and (b) will be discussed together in Sections 3.1 and 3.2 below, and (c) in Section 3.3.

3.0.1 As mentioned in Chapter 1, the NSS 61st round results released prior to this report use an item classification with 32 broad item groups to describe the pattern of consumer expenditure in India and its States and Union Territories. The 32 groups include 14 food groups and 18 non-food groups. The table below, reproduced from NSS Report No.508⁴ (61st round), gives a broad break-up using 20 item groups. The present report makes use of the detailed item classification adopted in the schedule of enquiry to study consumer expenditure patterns in much greater detail. In this report, per capita expenditure estimates are presented for more than 300 different items of consumption, including 142 items of food, 13 items of fuel, 27 items of clothing, bedding and footwear, 17 items of education and medical care, 52 items of durable goods, and about 90 other items. These estimates are given separately for rural and urban areas of all 35 States and UTs of India.

Table P1: Break-up of MPCE by 20 broad item groups: all-India, 2004-05

item group	monthly per capita exp. (Rs.)		item group	monthly per capita exp. (Rs.)

3.0.1 Estimates of quantity and estimates of value

3.0.1.1 For detailed items, estimates of consumption in quantity terms are available from the 61st round survey for most items of food, clothing, bedding and fuel, but not for durables and

⁴ *Level and Pattern of Consumer Expenditure, 2004-05*. There is, however, a slight difference between the estimates in Table P1 and the corresponding estimates given in Table 1, Appendix A, in case of (i) vegetables, and (ii) spices. For the reason, see Chapter Two, paragraph 2.13 (Notes on Coverage), items 229 and 289.

a large number of minor “miscellaneous” articles, nor for services of any kind (including educational and medical services). Estimates of value of consumption in rupees per person per month are, however, available for every kind of item, and have been presented for every item, for rural and urban sectors of each State and UT.

3.0.2 Estimates of proportion of households consuming an item within a period

3.0.2.1 For each detailed item, estimates of the proportion (number per 1000) of households in any sector of any State/UT that consumed the item in a 30-day period are given alongside the estimates of per capita consumption. For categories of infrequently purchased items – clothing, footwear, education, institutional medical care, and durables – estimates for a 365-day period are also provided (alongside the estimates of per capita consumption based on a 365-day recall period). These estimates provide an alternative way of studying patterns of consumption by indicating the spread of consumption of an item among the population, or the shrinking of the population consuming the item relative to the entire population.

3.0.3 Data from 50th and 55th rounds

3.0.3.1 Estimates at detailed item level are, conventionally, not generated by NSSO from consumer expenditure surveys of the “annual series”, but only from the larger-scale surveys of the quinquennial series (see paragraph 1.0.3). Even for the quinquennial series surveys, the practice of preparing a report presenting estimates at detailed item level came into being only from the 50th round (1993-94) onwards. Only two sets of data are, therefore, available for a study of trends in consumption of detailed items over the last decade. These are available in NSS Reports 404 and 461, both bearing the name “Consumption of Some Important Commodities in India”, and relating respectively to 1993-94 and 1999-2000.

3.0.3.2 While the present report gives estimates of per capita consumption (and proportion of consuming households) for each detailed item listed in the schedule of enquiry, a similar report (Report No.461) based on of the 55th round, relating to 1999-2000, excluded items on which the estimated proportion of consuming households was less than 10% and estimated value of per capita consumption expenditure was less than Rs.0.50. Though no such specific criteria were followed for Report No.404 (50th round), it, too, was selective in the sense that estimates were presented for only 55 items of food (out of 190 used in the schedule of enquiry for that survey), 6 items of fuel, 10 items of clothing and footwear, 6 items of education and medical care, and 14 other “miscellaneous” items. In the 55th round report, a special feature was that the *all-India* estimates of both kinds – per capita consumption and proportion of consuming households - were presented not only for the entire rural and urban population but also for households in 12 different monthly per capita expenditure classes.

3.0.3.3 The estimates for the items whose consumption was reported by very few sample households, though presented for the sake of completeness, should obviously be used with more caution than estimates for items reported by a substantial number of households.

3.0.3.4 This chapter attempts to discern trends in per capita consumption of detailed items at the all-India level by comparison with estimates from the 50th and 55th rounds, where available. State-level results for a few major items appear in Statements 1 and 2 (pages 32-38).

3.1 CONSUMPTION OF DETAILED ITEMS: FOOD

3.1.0.1 Table 1 of Appendix A gives quantity and value of per capita consumption, over a 30-day period, of 142 items of food. It also shows the estimated percentages of households that consumed these items during a 30-day period of the reference year.

Table P2: Consumption of rice, wheat/atta and total cereals between 1993-94 and 2004-05
all-India

cereal	year	per capita qty (kg) consumed in 30 days		percentage of hhs consuming in a 30-day period **

*excludes rice products ®excludes other wheat products #includes all cereal products ^only atta

**consumption of rice and wheat/atta out of PDS not considered in tabulating these percentages

3.1.1 Cereals

3.1.1.1 The overall decline in cereal consumption over the past decade was studied in NSS Report No.508. It was seen that cereal consumption per person per month has declined from 13.4 kg to 12.1 kg (by nearly 10%) between 1993-94 and 2004-05 in rural India and from 10.6 kg to 9.9 kg in urban India (by 6-7%). Table P2 shows that though rice and wheat, individually, experienced a fall in consumption per capita since 1993-94, the decline was less marked than for cereals as a whole. On the other hand, consumption of *jowar* and its products appears to have dropped by over 40% in both rural and urban areas. In rural areas, consumption of *bajra* and its products, too, has fallen since 1993-94, the absolute fall in monthly per capita consumption being of the order of 0.1 kg. From the fact that *jowar* is not consumed all over India but only in certain regions, one can conclude that (a) the fall in consumption of *jowar* per consuming person is presumably much higher, and (b) the fall in *jowar* consumption cannot explain the fall in the national per capita cereal consumption, which in fact has affected all the regions of the country (see NSS Report No.508). The consumption of *bajra* and maize per person has also undergone a noticeable decline in rural areas over the eleven years between 1993-94 and 2004-05.

3.1.1.2 In comparing the contents of this report with those of NSS Report No.508 (*Level and Pattern of Consumer Expenditure, 2004-05*) based on the same survey, it should be noted that in the tables and discussion relating to cereals in Report No.508, "rice" was used as a short form for "rice and rice products", "wheat" for "wheat and wheat products" and so on. In this report, however, "rice" is not inclusive of rice products such as *chira*, etc., and wheat/*atta* excludes all wheat products other than *atta*, such as *maida*, bread, noodles, etc.

Table P3: Consumption of major pulses between 1993-94 and 2004-05

pulse type	year	all-India			
		per capita qty (kg) consumed in 30 days		percentage of hhs consuming in a 30-day period

	99-00	0.84	1.00	96.7	94.3
	04-05	0.71	0.82	97.3	94.4

3.1.2 Pulses

3.1.2.1 Table P3 shows all-India consumption levels between 1993-94 and 2004-05 of five common varieties of pulses accounting for about 80% of total pulse consumption in rural and urban India. In most cases, there appears to have been a rise in consumption between 1993-94 and 1999-2000 and a subsequent fall. This, however, appears rather unlikely and a more plausible explanation is that the collection of data with the usual reference period of "last 30 days" might have, in the 55th round (1999-2000), been affected by the collection of data with an extra reference period of "last 7 days" immediately before it. This effect appears to have been strongest in case of such items as pulses, fruits and vegetables, where the monthly consumption of individual items is not as well known to most informants as it is in case of cereals. If we assume, therefore, that the 1999-2000 data are not comparable with

those of the other years, the picture is simplified, with the figures showing a small reduction in per capita consumption of 5-10% for most varieties of pulses between 1993-94 and 004-05. In respect of percentage of consuming households, split gram shows a substantial increase of 8 percentage points in both sectors. With the percentage of consuming households having gone up (by 1-4 points) for the other varieties of pulses, while the overall percentage of households consuming any kind of pulse or pulse product has not increased much, the average household's consumption of pulses appears to be getting more diversified.

Table P4: Consumption of milk, eggs, fish and meat between 1993-94 and 2004-05

commodity	year	all-India			
		per capita qty consumed in 30 days		percentage of hhs consuming in a 30-day period	
		rural	urban	rural	urban
(1)	(2)	(3)	(4)	(5)	(6)
milk: liquid (litre)	93-94	3.94	4.89	66.3	80.0
	99-00	3.79	5.10	67.8	82.9
	04-05	3.87	5.11	71.3	85.0
eggs (no.)	93-94	0.64	1.48	22.0	34.9
	99-00	1.09	2.06	29.3	38.7
	04-05	1.01	1.72	33.0	41.2
fish (kg)	93-94	0.18	0.20	30.7	27.1
	99-00	0.21	0.22	33.6	28.5
	04-05	0.201	0.206	34.2	27.8
goat meat/ mutton (kg)	93-94	0.06	0.11	20.3	28.0
	99-00	0.07	0.10	20.3	28.0
	04-05	0.047	0.070	17.9	25.2
chicken (kg)	93-94	0.02	0.03	7.5	9.0
	99-00	0.04	0.06	13.8	20.7
	04-05	0.050	0.085	19.6	27.8

Note: Estimates of quantity expressed in kg are available to 3 decimal places for the 61st round.

3.1.3 Milk (liquid), eggs, fish, mutton and chicken

3.1.3.1 There appears to have been a slight fall (less than 2%) in per capita consumption of "milk (liquid)" in rural India and a slight rise (over 4%) in urban India as a whole between 1993-94 and 2004-05 (Table P4). Note that consumption of milk products such as curd and butter prepared from milk at home is accounted against "milk (liquid)" by convention. This means that if a household that used to prepare the butter it consumed switches to purchase of butter from the market, aggregate consumption of "milk (liquid)" would fall. The percentage of households reporting milk consumption has grown in both rural and urban areas by 5 percentage points (rural: 66% to 71%, urban: 80% to 85%). Rural per capita egg consumption has apparently increased by nearly 60% in the eleven years following 1993-94, the percentage of rural households consuming eggs in a 30-day period having risen from 22% to 33%. In urban areas the increase in per capita egg consumption between 1993-94 and 2004-05 is about 16%. As in case of pulses, the evidence of the 55th round is frequently in

conflict with the rest of the data. Per capita consumption of goat meat and mutton has definitely declined, more so in urban India, and the proportion of households consuming such meat has declined too (by 2-3 percentage points). The proportion of households consuming chicken during a 30-day period has, between 1993-94 and 2004-05, increased three-fold in urban areas and two and a half times in rural areas, and the increase in per capita consumption levels appears to be of the same order. Per capita consumption of chicken has outstripped goat meat and mutton not only in urban but also in rural India.

Table P5: Consumption of edible oil between 1993-94 and 2004-05

edible oil	year	all-India			
		per capita qty (kg) consumed in 30 days		percentage of hhs consuming in a 30-day period	
		rural	urban	rural	urban

edible oil: all	93-94	0.37	0.56	97.8	92.5
	99-00	0.50	0.72	98.0	94.6
	04-05	0.48	0.66	98.0	94.5

*includes margarine in 1999-2000

**excluding coconut oil

3.1.4 Edible oil

3.1.4.1 Per capita consumption of edible oil has definitely been rising over the eleven years following 1993-94. Table P5 shows the extent of increase to be as much as 30% in rural India and about 18% in urban India. In rural areas, there has been a fall of about 50 gm per person per month in the consumption of groundnut oil, offset by a corresponding rise for mustard oil. In urban India the decline in per capita consumption of groundnut oil is about 80 gm per month, which is more than the rise in mustard oil consumption. In both rural and urban India, per capita consumption of oil other than groundnut oil, mustard oil, *vanaspati* and coconut oil has more than doubled, increasing steadily both before and after 1999-2000. Such oil would include sunflower oil, soyabean oil, other vegetable oil and rice bran oil. The prevalence of use of groundnut oil among urban households dropped in 2004-05 to 21%, one-half of what it was in 1993-94 (40%). Among rural households the percentage in 2004-05 fell to 14% from a 1993-94 level of 30%.

Table P6: Consumption of common fruits and nuts between 1993-94 and 2004-05

fruit/ nut	year	all-India			
		per capita qty consumed in 30 days		percentage of hhs consuming in a 30-day period	
		rural	urban	rural	urban

	04-05	0.03	0.115	11.0	31.6
groundnut (kg)	93-94	0.03	0.04	13.9	22.0
	99-00	0.05	0.06	15.7	22.3
	04-05	0.05	0.08	21.2	31.2

3.1.5 Fruits and nuts

3.1.5.1 Table P6 shows consumption levels of five of the most commonly consumed fruits and nuts over the period between 1993-94 and 2004-05. Slight increases over this period in per capita consumption of the four fresh fruits – bananas, coconuts, mangoes and apples – considered here are indicated, except for apples in rural India. The percentage of rural households consuming mangoes appears to have gone up by about 6 percentage points (5 for bananas), and the percentage of urban households consuming apples, by about 5. (Note that for a seasonal fruit like mango, the consumption levels in most calendar months will be quite different from the annual averages that the estimates shown here represent.) The percentage of households consuming coconuts has grown by about 4 percentage points in both rural and urban areas. It is also worth noting that while the prevalence of consumption of apples has increased in both sectors, the proportion of consuming households in rural India remains, in 2004-05 as in 1993-94, only a little over one-third of the proportion of consuming households in urban India. In case of bananas, the rural-urban differential in percentage of consuming households is 20 percentage points, and for groundnuts, it is 10. Per capita consumption of groundnuts has risen appreciably in both rural and urban India. The prevalence of consumption of groundnuts, as measured by the proportion of households consuming them in a 30-day period, has gone up by about 50% in both rural and urban areas.

Table P7: Consumption of common vegetables between 1993-94 and 2004-05

vegetable	year	all-India			
		per capita qty (kg) consumed in 30 days		percentage of hhs consuming in a 30-day period	
		rural	urban	rural	urban
(1)	(2)	(3)	(4)	(5)	(6)
potato	93-94	1.24	1.08	88.3	85.3
	99-00	1.61	1.32	91.3	90.2
	04-05	1.33	1.14	91.7	90.7
onion	93-94	0.46	0.56	90.1	86.5
	99-00	0.58	0.72	93.2	91.3
	04-05	0.56	0.72	96.5	92.6
brinjal (eggplant)	93-94	0.41	0.39	72.4	73.9
	99-00	0.39	0.38	70.7	73.5
	04-05	0.34	0.32	77.1	77.3
cauliflower	93-94	0.16	0.20	24.8	34.1
	99-00	0.19	0.26	25.7	39.2
	04-05	0.18	0.23	30.9	45.8
cabbage	93-94	0.15	0.22	31.3	49.0
	99-00	0.18	0.26	34.0	50.4
	04-05	0.17	0.23	41.4	57.6
tomato	93-94	0.29	0.46	58.9	75.6
	99-00	0.35	0.55	64.4	79.9
	04-05	0.34	0.53	74.2	87.2

3.1.6 Vegetables

3.1.6.1 Table P7 shows levels of consumption of some common vegetables between 1993-94 and 2004-05. While the per capita consumption of brinjal (eggplant) has declined distinctly – by about 70 gm per month in both sectors – per capita consumption levels of the other vegetables listed have increased. The largest increase is shown by onions (100 gm per month in the rural sector and more than 150 gm in the urban). Consumption of tomatoes per person per month appears also to have increased by at least 50 gm between 1993-94 and 2004-05. For potatoes, cauliflowers, cabbages and tomatoes, the 55th round estimates (1999-2000) suggest an increase in per capita consumption in the period before 1999-2000 and a fall subsequently, which is unlikely. (See also paragraph 3.1.2.1.) The percentage of households consuming each vegetable has, however, grown appreciably both before and after 1999-2000, rising by 3-6 percentage points over the entire period for potatoes, onions and brinjal, 8-10 percentage points for cabbages and nearly 12 percentage points for cauliflowers and tomatoes in urban areas, and 15 percentage points for tomatoes in rural areas.

3.2 CONSUMPTION OF DETAILED ITEMS: NON-FOOD

3.2.0 Table 2 (R & U) of Appendix A gives details of consumption of 147 non-food (detail) items during a 30-day period. The items include 20 items and ingredients of *pan*, tobacco and intoxicants, 13 items of fuel, 27 items of clothing, 17 items of educational and medical goods and services, and 70 other items. Estimated value of per capita expenditure on each of these items is shown in Table 2, along with estimated percentage of households incurring expenditure during a 30-day period. For some items of *pan*, tobacco, intoxicants, fuel, clothing, bedding and footwear, for which quantity of consumption was recorded in the schedule of enquiry, estimates of per capita quantity consumed during a 30-day period are also shown.

3.2.1 For items of clothing, bedding, footwear, education, institutional medical care, and durable goods, consumption data were collected not only with a reference period of 30 days but also with a reference period of 365 days. The estimates based on 365 days' data are shown in Table 3 (R & U).

3.2.2 In case of durable goods, the number of sample households reporting expenditure during a reference period of 30 days is, in case of most items, so small that the estimates based on 365 days are expected to be much more acceptable. In case of durable goods, therefore, the detailed items are omitted from Table 2 and appear only in Table 3 (where estimates based on 365 days' data are shown). Only the estimates for durable goods as a whole appear in Table 2, towards the end of the table.

Table P8: Consumption of *pan*, *bidi* and cigarettes between 1993-94 and 2004-05

commodity	year	all-India			
		per capita qty (no.) consumed in 30 days		percentage of hhs consuming in a 30-day period	
		rural	urban	rural	urban
(1)	(2)	(3)	(4)	(5)	(6)
<i>pan</i> (finished)	93-94	0.64	1.39	9.6	11.8
	99-00	0.83	1.20	7.6	8.9
	04-05	0.81	1.05	9.8	8.5
<i>bidi</i>	93-94	45.7	32.4	44.5	27.4
	99-00	38.2	22.1	36.4	19.9
	04-05	31.5	18.8	32.8	17.7
cigarettes	93-94	0.80	3.65	4.0	11.1
	99-00	0.96	3.24	3.7	9.6
	04-05	0.79	2.52	3.5	8.4

3.2.1 *Pan*, *bidis* and cigarettes

3.2.1.1 Table P8 shows per capita consumption of *bidis* as having dropped substantially in rural and urban areas both before and after 1999-2000, the overall fall in the eleven years following 1993-94 being about 31% in rural India and 42% in urban India. The proportion of households having at least one *bidi* smoker has also declined, by 26% in rural India and 35% in

urban India; thus the data appear to indicate that a fall in the number of *bidi* smokers has been the more important factor behind the decline in per capita consumption, rather than a reduction in the number of *bidis* smoked per smoker. Per capita cigarette consumption in urban areas has also registered a sharp fall, about 30%; again, the decline in the proportion of urban households containing at least one smoker, about 24%, appears to be mainly responsible for the fall. In rural areas, there is a slight fall in the proportion of households with non-zero cigarette consumption from 4% to 3.5%, but no fall in per capita consumption. In urban areas per capita consumption of finished *pan* has declined by about 18% and the proportion of consuming households by 28%. But rural per capita consumption of finished *pan* has risen by nearly 28%, with the percentage of consuming households practically unchanged in 2004-05 compared to 1993-94.

Table P9: Consumption of important household fuels between 1993-94 and 2004-05

		all-India			
fuel	year	per capita qty consumed in 30 days		percentage of hhs consuming in a 30-day period	
		rural	urban	rural	urban
(1)	(2)	(3)	(4)	(5)	(6)
firewood and chips (kg)	93-94	17.27	6.09	86.9	37.3
	99-00	17.70	5.34	86.5	30.3
	04-05	21.44	6.29	86.4	30.7
LPG (kg)	93-94	0.04	0.88	1.9	29.5
	99-00	0.14	1.31	6.2	44.6
	04-05	0.22	1.60	11.7	58.9
kerosene (litre)	93-94	0.68	1.42	41.1*	36.4*
	99-00	0.82	1.34	37.3*	38.5*
	04-05	0.62	0.62	27.4*	24.1*
electricity (kwh)	93-94	2.27	9.67	34.5	73.8
	99-00	4.54	20.89	46.1	81.5
	04-05	5.67	19.96	54.5	90.2

*consumption of kerosene out of PDS not considered in tabulating these percentages

3.2.2 Fuel and light

3.2.2.2 Significant changes in use of fuels have taken place in rural and urban India between 1993-94 and 2004-05. Table P9 clearly shows the prevalence of LPG use as having doubled in urban India from 29.5% (percentage of consuming households) in 1993-94 to 59% in 2004-05. In rural India the increase in use of LPG from a smaller base level of about 2% to 11.7% of households may be considered even more spectacular. A five- or six-fold increase in per capita LPG consumption is also indicated in the rural sector, while in the urban sector the increase is about 80%. While the rise of LPG in urban areas appears to be at the expense of kerosene, per capita consumption of which has dropped from 1.42 litres per month to 0.62 litres, no such decline is seen in rural India. Rural electricity consumption in kwh per person per month has increased to two and a half times its level in 1993-94 (from 2.27 to 5.67). In urban areas, too, per capita consumption of electricity has more than doubled. Households using electricity formed about 34% of rural households in 1993-94 and as much as 54% in 2004-05. In urban areas the proportion of households using electricity rose from 74% to 90% during the same period.

Table P10: Consumption of selected clothing items between 1993-94 and 2004-05

clothing item	year	all-India			
		monthly per capita qty of consn. based on 30-day (365-day) recall		percentage of hhs consuming in a 30-day (365-day) period

(1)	(2)	(3)	(4)	(5)	(6)
cloth for shirt, pyjama, salwar, etc. (m)	93-94	0.11	0.10	10.6	9.1
	99-00	-	-	-	-
	04-05	(0.17)	(0.18)	(84.8)	(85.4)
cloth for coat, trousers, overcoat, etc. (m)	93-94	0.02	0.02	3.8	4.8
	99-00	-	-	-	-
	04-05	(0.04)	(0.06)	(52.0)	(64.5)
hosiery articles (no.)	93-94	0.018	0.022	3.9	4.2
	99-00	(0.042)	(0.054)	(62.5)	(72.2)
	04-05	0.03	0.03	4.9	4.3
readymade garments (no.)	93-94	-	-	-	-
	99-00	(0.11)	(0.15)	(82.8)	(86.0)
	04-05	0.083	0.093	14.5	13.5
	93-94	(0.16)	(0.20)	(90.5)	(94.2)
	93-94	0.05	0.07	7.8	9.3
	99-00	-	-	-	-
04-05	(0.05)	(0.07)	(67.3)	(74.3)	
04-05	0.064	0.092	13.5	16.2	
		(0.068)	(0.092)	(76.1)	(83.7)

Figures in parentheses are based on a reference period of "last 365 days".

3.2.3 Clothing

3.2.3.1 Table P10 shows physical consumption levels of four items of clothing most commonly reported by rural and urban households. Two sets of estimates from the 61st round (2004-05) are available – those based on 30 days' recall and those based on 365 days' recall. It may be observed that the estimates of per capita consumption of cloth based on 365 days' data are in most cases roughly double those based on 30 days' data, and this is also true of hosiery articles, but not of readymade garments, where the two sets of estimates are of the same order. This suggests that inter-temporal comparisons are best restricted to estimates based on reference periods of the same length. Bearing this in mind, it is seen that per capita consumption of cloth purchased for garments has, since 1993-94, generally registered a slight fall, and the consumption of readymade garments a corresponding increase, while per capita consumption of hosiery articles has increased about three-fold in urban India and only slightly less in rural India. Between 1993-94 and 2004-05, the proportion of households purchasing readymade garments during the last 30 days has increased in both rural and urban areas by about 75%, while the proportion purchasing hosiery articles during the last 30 days shows a three-fold increase. The increase in these proportions since 1999-2000 (based on 365 days' recall), however, appears to have occurred at a slower pace.

3.2.4 Education

3.2.4.1 Expenditure on education was recorded for the “last 30 days” and “last 365 days” in the 50th and 61st rounds, but for “last 365 days” only in the 55th round of NSS. The “last 365 days” data of the 50th round were not, however, tabulated in detail.

3.2.4.2 The salient fact about educational expenditure that emerges from Table P11 below is that “tuition and other fees”, which form the major component of educational expenditure, are commanding a progressively larger share of educational expenses in both rural and urban India. In urban India the share of this category has increased from 42% in 1993-94 to 45% in 1999-2000 and then to 57% in 2004-05. In rural India it reached 29% in 1999-2000 and climbed further to a level of 44% of educational expenditure during the same period.

Table P11: Household educational expenditure between 1993-94 and 2004-05

item	year	all-India			
		per capita expenditure (Rs.) in 30 days@		percentage of hhs incurring expenditure in reference period*	
		rural	urban	rural	urban
(1)	(2)	(3)	(4)	(5)	(6)
books, journals, etc.	93-94	0.98 (24%)	2.56 (13%)	7.7*	12.8*
	99-00	2.87 (31%)	6.87 (19%)	46.0	55.5
	04-05	3.56 (20%)	8.22 (11%)	45.7	54.3
stationery	93-94	-	-	-	-
	99-00	1.51 (16%)	3.05 (8%)	46.1	53.7
	04-05	2.80 (16%)	5.36 (7%)	55.8	60.4
tuition & other fees	93-94	0.82 (20%)	8.15 (42%)	10.0*	22.6*
	99-00	2.74 (29%)	16.71 (45%)	27.8	44.1
	04-05	7.90 (44%)	42.37 (57%)	41.3	52.5
pvt. tutor/ coaching centre	93-94	-	-	-	-
	99-00	1.28 (14%)	6.00 (16%)	7.3	15.2
	04-05	2.22 (12%)	10.92 (15%)	8.3	15.5
education: total	93-94	4.07 (100%)	19.41 (100%)	49.2*	52.7*
	99-00	9.37 (100%)	37.05 (100%)	53.7	68.1
	04-05	18.06 (100%)	73.70 (100%)	59.2	70.0

@Figures in parentheses indicate percentage to total expenditure on education in the relevant year.

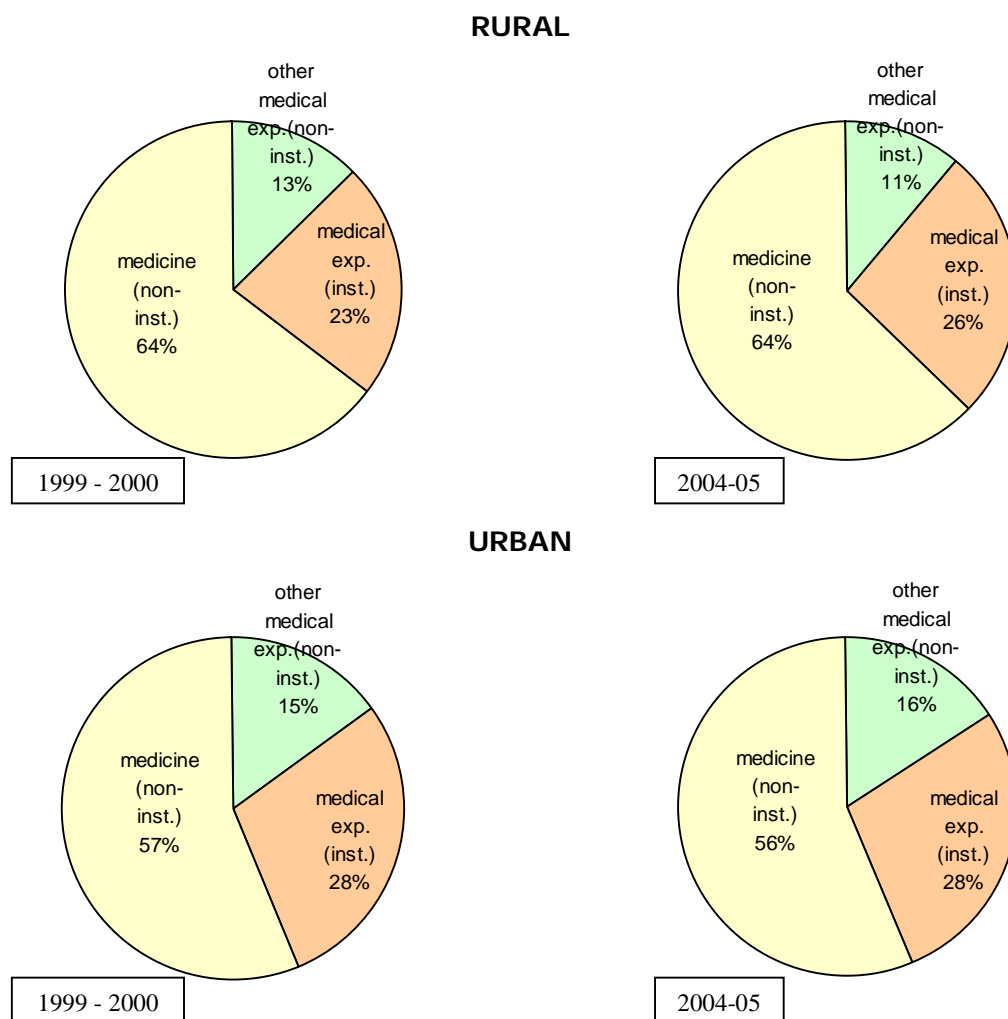

*Reference period is 30 days for 1993-94, but 365 days for other years.

3.2.4.3 The share of “books, journals, etc.” shows a definite fall in 2004-05 from its level in 1999-2000 six years previously – from 31% to 20% in rural areas and from 19% to 11% in urban areas. In part, this is, of course, simply a reflection of the rise in the share of fees. But it is clear that of the four categories of educational expenditure considered above, the increase in absolute expenditure has been slowest for books and journals. On the other hand, increases in “stationery” and “private tutor/ coaching centre” have, more or less, kept pace with the increase in educational expenditure as a whole.

3.2.5 Medical care

3.2.5.1 Information on medical expenditure is collected in two parts: institutional medical care (received as in-patient of a hospital or nursing home) and non-institutional care. In the 50th and 61st rounds, institutional medical expenses were recorded for “last 30 days” as well as “last 365 days”, while the more frequently incurred non-institutional expenses were recorded for “last 30 days” only. In the 55th round (1999-2000), however, all medical expenses were recorded for “last 365 days” only. The 50th round data for “last 365 days” were not tabulated in detail and hence could not be used for comparison.

Fig 1
Broad break-up of medical expenditure, 1999-2000 and 2004-05

3.2.5.2 Figure 1 shows, from the data of the 55th and 61st rounds, that medicine (non-institutional), which is by far the largest component of non-institutional medical expenditure, also formed as much as 63-64% of total medical expenditure in rural India and 56-57% in urban India in both 1999-2000 and 2004-05. While the share of institutional medical expenditure in urban India (28%) was a little larger than in rural India, the gap between the two has narrowed in 2004-05, the share for rural India having risen from 23% to 26%.

3.2.6 Other changes over time

3.2.6.1 The broad groups food, pan, tobacco, intoxicants, fuel, clothing, bedding, footwear and durable goods accounted for about 77% of household consumer expenditure in rural India and about 63% in urban India in 2004-05 (see NSS Report No.508). The remaining items of consumer expenditure formed a category which is usually referred to as “miscellaneous goods and services”. From the 50th round of NSS onwards, education and medical care were separated out from the “miscellaneous” category though, in tables showing changes over rounds, the “miscellaneous” category was often inclusive of education and medical care. The miscellaneous category includes goods and services (excluding durables) for conveyance, entertainment, housekeeping, home maintenance and toilet, rent, and consumer services of all kinds. A common feature of most of these goods and services is that they are not amenable to measurement of quantities consumed. This makes it extremely difficult to separate out changes in physical consumption from changes in prices – as can be done to a reasonable extent for food and clothing – and make meaningful comparisons over time of such data.

3.2.6.2 The “miscellaneous” category as a whole has been registering a progressive increase over the years in share of household consumer expenditure. Its share has risen from 19.6% to 23.0% in rural India and from 31.3% to 37.6% in urban India between 1999-2000 and 2004-05. *(For comparison with the 55th round (1999-2000), the MPCE figures of the 61st round (2004-05) using a 365-day reference period for the categories of less frequently purchased items, as was used in the 55th round, are used instead of the MPCE figures based on a uniform reference period of 30 days.)*

3.2.6.3 Now, at current prices, the increase in average MPCE over this 6-year period was 19% in rural India and 29% in urban India. In Table P12, detailed items of the “miscellaneous” category on which per capita expenditure has registered an increase (at current prices) of 30% or more in the rural sector and 40% or more in the urban sector between 1999-2000 and 2004-05 are shown. Also shown are items that show a decline in per capita expenditure at current prices (indicating a sharper fall at constant prices) or in percentage of households incurring expenditure. Very minor items (per capita expenditure at 2004-05 prices less than Rs.1.00 for rural and less than 2.00 for urban) have, however, been omitted from the table.

3.2.6.4 The most spectacular increase since 1999-2000 is in telephone charges paid per person per month, which have soared to six times their level in 1999-2000 (increase of 515%) in rural India and to 3.3 times their level (increase of 230%) in urban India. The proportion of rural households incurring expenditure on telephones has jumped from 5% to 32% (25% to 63% for urban households). Expenditure on tuition and other educational fees has, in rural areas, risen to nearly 3 times its 1999-2000 level (increase of 188%) and in urban areas reached two and a half times its earlier level. Rural petrol expenditure has doubled, while taxi/autorickshaw expenditure (though small) has more than doubled in rural areas and risen by 78% in urban areas. Per capita expenditure on private tutors and coaching centres has gone up by 73% in the rural sector and 82% in the urban.

3.2.6.5 Tailoring expenses per person have registered a dramatic fall by 26% (at current prices) in the rural sector and 33% in the urban sector, the number of households per 1000 households incurring tailoring costs during a 30-day period shrinking in both sectors by about one-third since 1999-2000. The rise to prominence of readymade garments was noted in Section 3.2.3; the fall in tailoring costs should therefore come as no surprise.⁵ A small drop in percentage of households incurring expenditure on books or journals is seen in both sectors.

⁵ Per capita expenditure on readymade garments has risen by about 63% at current prices since 1999-2000 – from Rs.4.19 to Rs.6.84 in rural India and from Rs.9.12 to Rs.14.84 in urban India.

Table P12: Changes over time observed in consumption of selected detailed items (other than items of food, fuel, clothing, bedding, footwear and durable goods)

item	per capita exp. (Rs.) in 2004-05	% increase in per capita exp. (at current prices) over 1999-2000	all-India

No. per 1000 of households incurring expenditure during a 365-day period, instead of a 30-day period, has been shown for items marked with an asterisk ().

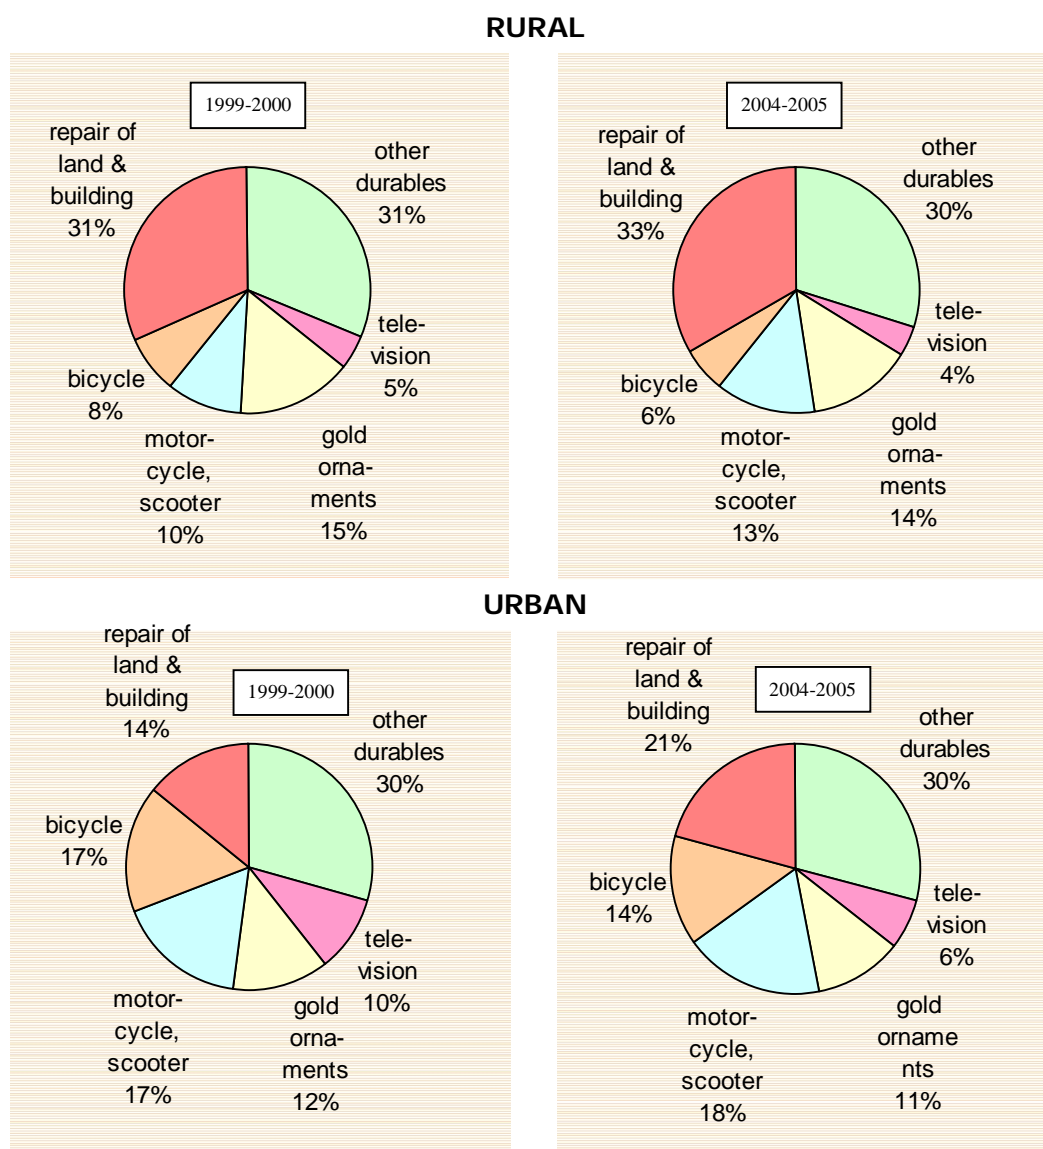

3.2.6.6 Per capita expenditure on newspapers and periodicals in urban areas, which in 2004-05 was twice its level in 1999-2000, was, in addition, 8 times that in rural areas (rural figure not shown in Table P12). Telephone charges and railway expenditure per person in urban areas were about 7 times as high as in rural areas, expenditure on petrol was about 6 times as high,

tuition and other educational fees were about 5 times as high, and cable TV expenses (a new item created since the 55th round survey) were about 9 times as high as in rural areas.

3.2.7 Durable goods

3.2.7.1 For this category, it is better to go by estimates based on “last 365 days”, especially as comparison with the 55th round (1999-2000) estimates, which are based only on “last 365 days” data for durable goods, are important. Durable goods formed only 3.75% (Rs.21.74 out of Rs.579.17) of average per capita consumer expenditure in rural areas and only 4.27% (Rs.47.17 out of Rs.1104.60) in urban areas in 2004-05. In 1999-2000 their share was 2.62% in the rural sector and 3.61% in the urban. Note that consumer expenditure on each article of durable goods is defined to include any expenditure on repair or construction of the article.

Fig 2
Major components of per capita expenditure on durable goods,
1999-2000 and 2004-05

3.2.7.2 The NSS consumer expenditure schedule in 2004-05 divided durable goods into 52 detailed items. The important contributors among these to per capita expenditure on the durable goods category are shown in Figure 2 above.

3.2.7.3 The five items “repair of land and building”, “bicycle”, “motorcycle/scooter”, “gold ornaments”, and “television” together accounted for about 70% of expenditure on durables in both 1999-2000 and 2004-05, and in both rural and urban India. The major change during the intervening period seems to have taken place in the share of “repair of land and building” in urban India, which increased from 14% to 21%, but still remained far less than the share of this category in rural India (33% in 2004-05). The share of television, interestingly, fell in both rural and urban areas, no doubt due to a fall in television set prices, along with a rise in prices of the other durables. (That the possession of television sets by households registered a rise will be seen in the next section.) The share of expenditure on motorcycles and scooters rose appreciably in rural areas, while in both rural and urban areas, the share of expenditure on bicycles fell.

3.3 POSSESSION OF DURABLE GOODS

3.3.0.1 Table 4 (R & U) of Appendix A give, separately for rural and urban areas of each State/UT, the estimated proportions (numbers per 1000) of households possessing each of ten different durable goods, common but of the relatively expensive kind: radio, television, electric fan, refrigerator, air conditioner, air cooler, refrigerator, sewing machine, bicycle, motorcycle/ scooter, and motor car.

3.3.0.2 Further, the estimated proportions are given separately for five different fractile groups of households in the relevant sector of the State/UT concerned: the bottom 20%, the next 20%, and so on up to the top 20%, ranked by MPCE. This enables one to study the inequality among rural or urban households within a State in respect of possession of any particular durable, or, in a more dynamic context, the extent to which an increase in overall expenditure level makes the possession of a particular durable good more probable.

3.3.0.3 Table P13 below shows estimates, from the 50th, 55th and 61st rounds of NSS, of percentages of households possessing a specific durable good, for each of nine durables. The 55th round estimates are taken from NSS Report No.461, which bears the same name as the present report except for the year (1999-2000). The 50th round estimates are taken from NSS Report No.426 (*Use of Durable Goods by Indian Households, 1993-94*).

3.3.0.4 In NSS Report No.426 (1993-94), estimates of percentage of possessor households were given for ten fractile groups of households (instead of five) in each sector of each State/UT, for each of 36 durable goods. In NSS Report No.461 (1999-2000), estimates were given for 23 durable goods, but for households in twelve different MPCE ranges (the MPCE classes used being the same for each State/UT), and not for households in different fractile groups of a State/UT. In this report the MPCE ranges represented by the (State/UT-specific) fractile groups are shown in Table 5 of Appendix A.

3.3.1 Changes over time: entertainment and “comfort” goods

3.3.1.1 Possession of durable goods is seen to be on the increase for all the nine durables considered in Table P13 with the important exception of the radio, which has been giving way to television in both rural and urban India. In the rural sector, the proportion of households with radios rose between 1993-94 and 1999-2000 but then fell again to its 1993-94

level of about 26%. In urban areas, the prevalence of radios has declined both before 1999-2000 and after, but the decline appears to have slowed down in the later period.

Table P13: Percentages of households having specific durable goods, 1993-94 to 2004-05
all-India

Year	% of rural/urban households possessing a specific durable good					
	R	U	R	U	R	U
	BICYCLE		MOTORCYCLE/ SCOOTER		MOTOR CAR/ JEEP	
1993-94	32.7	37.1	2.1	11.6	0.2	1.2
1999-2000	40.5	39.0	4.5	18.4	0.4	2.7
2004-05	47.1	41.7	7.7	26.0	0.8	4.6
	RADIO		TELEVISION		REFRIGERATOR	
1993-94	26.8	41.8	7.0	40.5	0.9	12.3
1999-2000	30.4	35.1	18.7	59.5	2.7	22.9
2004-05	26.3	33.6	25.6	66.1	4.4	31.9
	SEWING MACHINE		ELECTRIC FAN		AIR COOLER	
1993-94	5.6	18.4	15.9	56.6	0.5	6.4
1999-2000	7.4	20.3	26.3	68.5	1.7	10.9
2004-05	9.5	23.8	38.4	81.8	2.9	18.2

3.3.1.2 The percentage of households with TV sets increased since 1999-2000 by about 7 percentage points in both sectors to stand at 26% in the rural sector and 66% in the urban sector in 2004-05.

3.3.1.3 Electric fans were found in 38% of rural households and 82% of urban households in 2004-05, showing an increase of 12-13 percentage points in each sector since 1999-2000. About 18% of urban households in 2004-05 had air coolers, compared to 11% in 1999-2000.

3.3.1.4 Refrigerators were used by 32% of urban households and 4% of rural households in 2004-05. In 1993-94, eleven years earlier, they had been found in 12% of urban households and 1% of rural households.

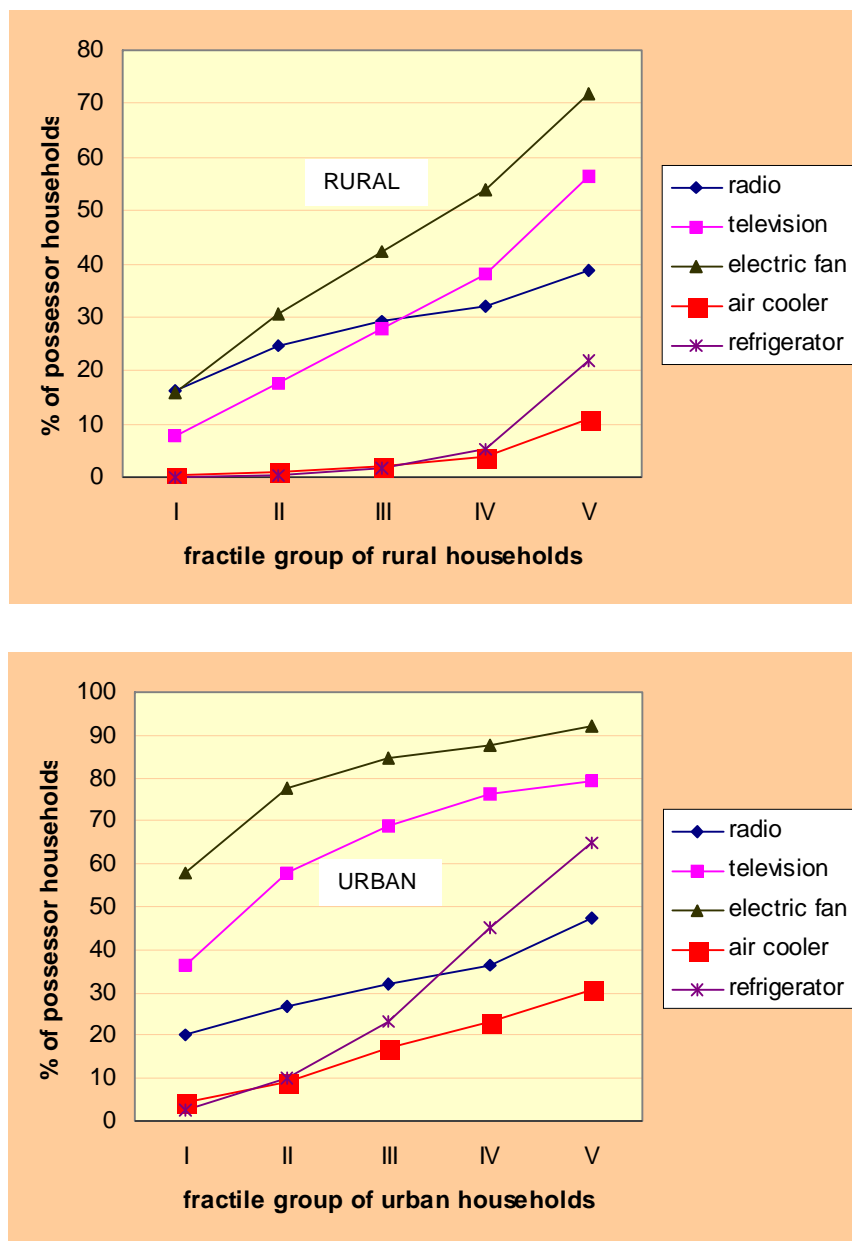

3.3.2 Changes over time: personal transport

3.3.2.1 For bicycles in urban areas, the percentage of possessor households grew from 39% to only 41% between 1999-2000 and 2004-05. Bicycles were found in 47% of rural households. In 1999-2000, too, they had been more common among rural than among urban households.

3.3.2.2 Motorcycles or scooters were possessed by over one-fourth of urban households and 7.7% of rural households in 2004-05. In 1993-94, eleven years ago, they were possessed by less than one-eighth of urban households and only 2% of rural households.

3.3.2.3 Motor cars (or jeeps) were owned by 4.6% of urban households and 0.8% of rural households in 2004-05, which practically amounts to a four-fold increase since 1993-94.

Fig 3
Percentages of households possessing specific durable goods, 2004-05:
radio, television, electric fan, air cooler, refrigerator
all-India

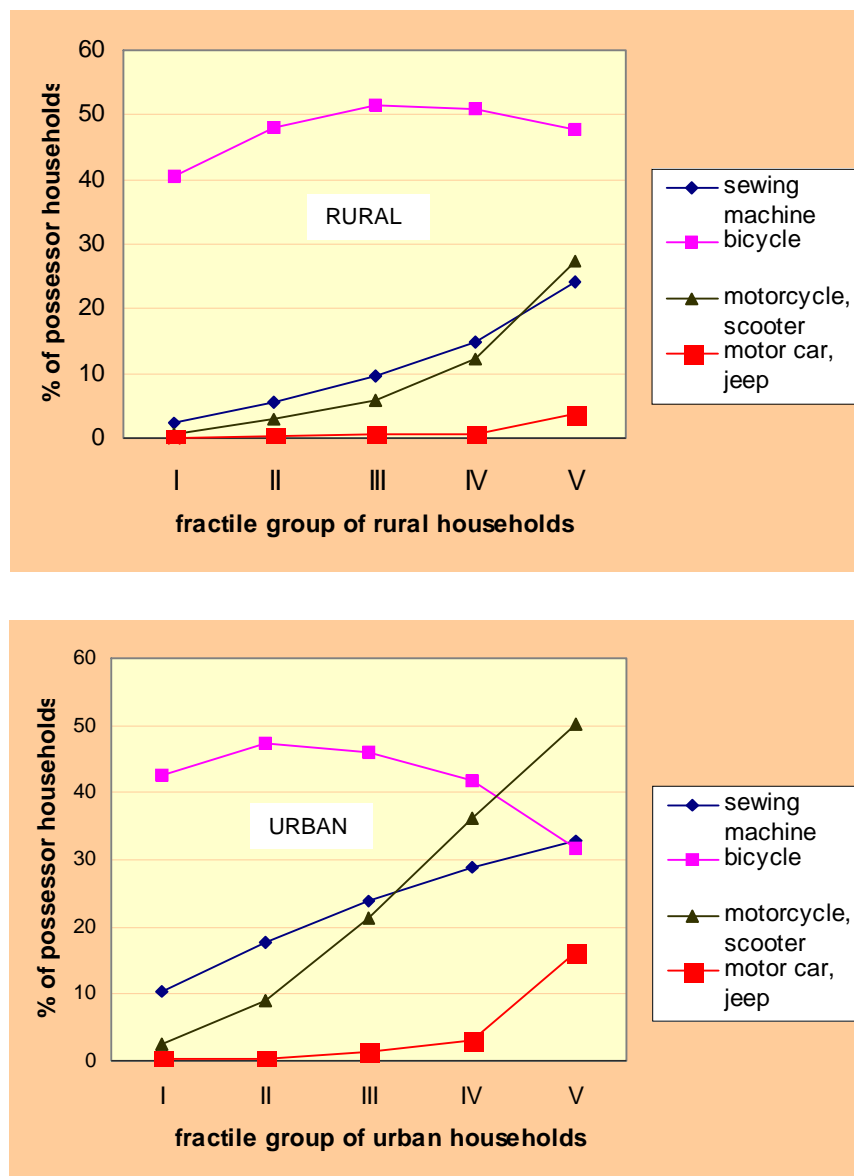

3.3.3 Ownership of durables across levels of living

3.3.3.1 Figures 3 and 4 show percentages of rural and urban households in each of five fractile groups (all-India) possessing specific durable goods. "I" denotes the bottom 20%, "II" the next 20%, and so on up to "V", denoting the top 20% of population ranked by MPCE.

3.3.3.2 Practically all the graphs are upward-sloping, suggesting that financial constraints prevent most households from the poorer sections from acquiring the durable concerned.

Fig 4
Percentages of households possessing specific durable goods, 2004-05:
sewing machine, bicycle, motorcycle/scooter, motor car
all-India

3.3.3.3 The only “inferior” durable is the bicycle. In the rural sector the prevalence of this possession falls as one moves from Group IV (60th-80th percentile) to Group V. In the urban sector the bicycle is most common in fractile groups II and III and appears to become increasingly unwanted as levels of living rise further, edged out, no doubt, by more expensive and comfortable means of travel. In the urban sector about a fifth of households in the top 20% bracket owned motor cars in 2004-05 and 50% owned motorcycles or scooters. Among the households forming the richest 20% of population in rural India, less than 3 in 10 owned a motorcycle or scooter and less than 1 in 20 owned a motor car.

Appendix B

Sample Design and Estimation Procedure

Sample Design and Estimation Procedure

1. Outline of Survey Programme

1.1 **Subject Coverage:** 'Consumer Expenditure' and 'Employment and Unemployment' were the two subjects of enquiry of the 61st round (July 2004-June 2005) of NSS. These two subjects are covered together in the quinquennial series of NSS surveys. The 61st round survey was the seventh in this series, the last one having been conducted in the 55th round (1999-2000) of NSS.

1.2 **Geographical coverage:** The survey covered the whole of the Indian Union *except* (i) Leh (Ladakh) and Kargil districts of Jammu & Kashmir, (ii) interior villages of Nagaland situated beyond five kilometres of a bus route and (iii) villages in Andaman and Nicobar Islands which remain inaccessible throughout the year.

1.3 **Period of survey and work programme:** The period of survey was of one year's duration starting on 1st July 2004 and ending on 30th June 2005. The survey period of this round was divided into four sub-rounds of three months' duration each as follows:

sub-round 1 :	July - September 2004
sub-round 2 :	October - December 2004
sub-round 3 :	January - March 2005
sub-round 4 :	April - June 2005

An equal number of sample villages/blocks (FSUs) was allotted for survey to each of these four sub-rounds with a view to ensuring uniform spread of sample FSUs over the entire survey period. Each FSU was surveyed during the sub-round to which it was allotted. *Because of the arduous field conditions, this restriction was not strictly enforced in Andaman and Nicobar Islands, Lakshadweep, and rural areas of Arunachal Pradesh and Nagaland.*

1.4 **Schedules of enquiry:** There were three schedules of enquiry:

Schedule 0.0	: list of households
Schedule 1.0	: consumer expenditure
Schedule 10	: employment and unemployment

1.5 **Participation of States:** In this round all the States and Union Territories except Andaman & Nicobar Islands, Dadra & Nagar Haveli and Lakshadweep participated at least on an equal matching basis. The scale of the survey conducted by a State /UT relative to the Central sample survey in the State/UT was as follows:

Nagaland (U)	: triple
J & K , Manipur & Delhi	: double
Goa, Maharashtra (U)	: one and a half
Remaining States/UTs	: equal

2. Sample Design

2.1 Outline of sample design: A stratified multi-stage design was adopted for the 61st round survey. The first-stage units (FSU) were the 2001 Census villages in the rural sector and Urban Frame Survey blocks in the urban sector. The ultimate stage units, in both sectors, were households. In the case of large villages/ blocks requiring formation of hamlet-groups (hg)/ sub-blocks (sb), the selection of two hg's/ sb's from each FSU formed an intermediate stage of sampling.

2.2 Sampling Frame for First-Stage Units: *For the rural sector*, the list of 2001 Census villages (*panchayat* wards for Kerala) constituted the sampling frame. *For the urban sector*, the list of latest available Urban Frame Survey (UFS) blocks was considered as the sampling frame.

2.3 Stratification: Within each district of a State/UT, two basic strata were formed: i) rural stratum comprising all rural areas of the district and (ii) urban stratum comprising all urban areas of the district. However, if there were one or more towns with population 10 lakhs or more as per population census 2001 in a district, each of these also formed a separate basic stratum and the remaining urban areas of the district was considered as another basic stratum. There are 27 towns with population 10 lakhs or more at all-India level as per Census 2001.

2.4 Sub-stratification:

2.4.1 Rural sector: If 'r' be the sample size allocated for a rural stratum, the number of sub-strata formed was 'r/2'. The villages within a district as per frame were first arranged in ascending order of population. Then sub-strata 1 to 'r/2' were demarcated in such a way that each sub-stratum comprised a group of successive villages of the arranged frame and had more or less equal population.

2.4.2 Urban sector: If 'u' be the sample size for an urban stratum, 'u/2' sub-strata were formed. The towns within a district, except those with population 10 lakhs or more, were first arranged in ascending order of population. Next, UFS blocks of each town were arranged by IV unit no. × block no. in ascending order. From this arranged frame of UFS blocks of all the towns, 'u/2' sub-strata were formed in such a way that each sub-stratum had more or less equal number of UFS blocks.

2.4.3 For towns with population 10 lakhs or more, the urban blocks were first arranged by IV unit no. × block no. in ascending order. Then 'u/2' number of sub-strata were formed in such a way that each sub-stratum had more or less equal number of blocks.

2.5 Total sample size (FSUs): 12784 FSUs were allocated at all-India level on the basis of investigator strength in different States/UTs for the Central sample and 14992 FSUs were allocated for the State sample.

2.6 Allocation of total sample to States and UTs: The total number of sample FSUs was allocated to the States and UTs in proportion to population as per Census 2001 subject to the availability of investigators ensuring more or less uniform work-load.

2.7 Allocation of State/UT level sample to rural and urban sectors: State/UT level sample size was allocated between the two sectors in proportion to population as per Census 2001 with 1.5 weightage to urban sector subject to the restriction that urban sample size for bigger

States like Maharashtra, Tamil Nadu etc. should not exceed the rural sample size. A minimum of 8 FSUs was allocated to each State/UT separately for rural and urban areas.

2.8 Allocation to strata: Within each sector of a State/UT, the sample size was allocated to the different strata in proportion to the stratum population as per Census 2001. Allocations at stratum level were adjusted to a multiple of 4 with a minimum sample size of 4.

2.9 Selection of FSUs: Two FSUs were selected from each sub-stratum of a district of the rural sector with Probability Proportional to Size With Replacement (PPSWR), size being the population as per Population Census 2001. For the urban sector, two FSUs were selected from each sub-stratum by using Simple Random Sampling Without Replacement (SRSWOR). Within each sub-stratum, samples were drawn in the form of two independent sub-samples in both rural and urban sectors.

2.10 Selection of hamlet-groups/sub-blocks/households: important steps

2.10.1 Criterion for hamlet-group/sub-block formation: Large villages/blocks having approximate present population of 1200 or more were divided into a suitable number (say, D) of 'hamlet-groups' (hg) in the rural sector and 'sub-blocks' (sb) in the urban sector. The number of hg's/ sb's to be formed was decided as shown below.

approximate present population of the sample village/block	no. of hgs/sbs to be formed (D)
less than 1200*	1
1200 to 1799	3
1800 to 2399	4
2400 to 2999	5
3000 to 3599	6
.....and so on	

* i.e., no hamlet-group/sub-block formation

2.10.2 For rural areas of Himachal Pradesh, Sikkim and Poonch, Rajouri, Udhampur, Doda districts of Jammu and Kashmir and Idukki district of Kerala, the number of hamlet-groups formed was as follows.

approximate present population of the sample village	no. of hgs to be formed
less than 600	1
600 to 899	3
900 to 1199	4
1200 to 1499	5
.....and so on	

2.11 Each hamlet-group/sub-block was formed by grouping contiguous areas so that the hg's/ sb's had more or less equal population content. To form the sampling frame for selection of households, two hamlet-groups/sub-blocks were selected by SRSWOR from those formed in a large village/block. Listing and selection of the households was done independently in the two selected hamlet-groups/sub-blocks.

3. Formation of Second Stage Strata and allocation of households

For both Schedule 1.0 and Schedule 10, households listed in the selected village/block/hamlet-groups/sub-blocks were stratified into three second-stage strata (SSS) as given below.

3.1 **Rural:** The three second-stage strata (SSS) in the rural sector were formed as follows:

- SSS 1: relatively affluent households
- SSS 2: from the remaining households, households having principal earning from non- agricultural activity
- SSS 3: other households

3.2 **Urban:** In the urban sector, the three second-stage strata (SSS) were formed using information collected on the Monthly Per Capita Expenditure (MPCE) of households, as follows:

- SSS 1: households with MPCE more than A (i.e. $MPCE > A$)
- SSS 2: households with MPCE equal to or less than A but equal to or more than B (i.e. $B \leq MPCE \leq A$)
- SSS 3: households with MPCE less than B (i.e. $MPCE < B$)

where A and B were values of MPCE chosen separately for each NSS Region such that, according to data collected in the 55th round of NSS, the top 10% of households in the region had MPCE more than A and the bottom 30% had MPCE less than B.

3.3 Schedule 1.0 was surveyed in 10 households in each FSU. The allocation of sample households to second-stage strata was as follows:

SSS	composition of SSS	no. of hhs to be surveyed	
		without hg/sb formation	with hg/sb formation (for each hg/sb)
rural			
SSS 1:	relatively affluent households	2	1
SSS 2:	of the rest, households having principal earning from non- agricultural activity	4	2
SSS 3:	other households	4	2
urban			
SSS 1:	households with $MPCE > A$	2	1
SSS 2:	other households with MPCE equal to or less than A but equal to or more than B (i.e. $B \leq MPCE \leq A$)	4	2
SSS 3:	households with MPCE less than B	4	2

4. **Selection of households for Schedule 1.0:** From each SSS the sample households for Schedule 1.0 were selected by SRSWOR.

5. Estimation Procedure

5.1 Notations:

s = subscript for s-th stratum

t = subscript for t-th sub-stratum

m = subscript for sub-sample (m = 1, 2)

i = subscript for i-th FSU [village (panchayat ward) / block]

d = subscript for a hamlet-group/sub-block (d = 1, 2)

j = subscript for j-th second stage stratum in an FSU/ hg/sb (j = 1, 2 or 3)

k = subscript for k-th sample household under a particular second stage stratum within an FSU/ hg/sb

D = total number of hg's/sb's formed in the sample village (panchayat ward) / block

$D^* = 1$ if $D = 1$

= $D / 2$ for FSUs with $D > 1$

N = total number of FSUs in any urban sub-stratum

Z = total size of a rural sub-stratum (= sum of sizes for all the FSUs of a rural sub-stratum)

z = size of sample village used for selection.

n = number of sample village / block surveyed including zero cases but excluding casualty for a particular sub-sample and sub-stratum.

H = total number of households listed in a second-stage stratum of a village/block/hamlet-group/sub-block of sample FSU

h = number of households surveyed in a second-stage stratum of a village/block/hamlet-group/sub-block of sample FSU

x, y = observed value of characteristics x, y under estimation

\hat{X} , \hat{Y} = estimate of population total X, Y for the characteristics x, y

In terms of the above symbols,

$y_{stmidjk}$ = observed value of the characteristic y for the kth household in the jth second-stage stratum of the dth hg/sb (d = 1, 2) of the ith FSU belonging to the mth sub-sample for the tth sub-stratum of sth stratum;

However, for ease of understanding, a few symbols are suppressed in the following paragraphs where they are obvious.

5.2 Formulae for estimation of aggregates based on Schedule 1.0 for a particular sub-sample and stratum in rural/ urban sector:

5.2.1 Rural:

Estimation formula for a sub-stratum:

(i) For households selected in jth second stage stratum:

$$\hat{Y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} D_i^* \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

(ii) For all selected households:

$$\hat{Y} = \sum_j \hat{Y}_j$$

5.2.2 Urban:

Estimation formula for a sub-stratum:

(i) For households selected in j^{th} second stage stratum:

$$\hat{Y}_j = \frac{N}{n_j} \sum_{i=1}^{n_j} D_i^* \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

(ii) For all selected households:

$$\hat{Y} = \sum_j \hat{Y}_j$$

5.2.3 Estimate for a stratum:

$$\hat{Y}_s = \sum_t \hat{Y}_{st}$$

5.3 Overall Estimate for Aggregates:

Overall estimate for aggregates for a stratum (\hat{Y}_s) based on two sub-samples is obtained as:

$$\hat{Y}_s = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{sm}$$

5.4 Overall Estimate of Aggregates at State/UT/all-India level:

The overall estimate \hat{Y} at the State/ UT/ all-India level is obtained by summing the stratum estimates \hat{Y}_s over all strata belonging to the State/ UT/ all-India.

5.5 Estimates of Ratios:

Let \hat{Y} and \hat{X} be the overall estimate of the aggregates Y and X for two characteristics y and x respectively at the State/ UT/ all-India level.

Then the combined ratio estimate (\hat{R}) of the ratio ($R = \frac{Y}{X}$) is obtained as.

$$\hat{R} = \frac{\hat{Y}}{\hat{X}}$$

5.6 **Estimates of Error:** The estimated variances of the above estimates are as follows:

5.6.1 **For aggregate \hat{Y} :**

$$V\hat{a}r(\hat{Y}) = \sum_s V\hat{a}r(\hat{Y}_s)$$

where $V\hat{a}r(\hat{Y}_s)$ are as given below.

5.6.1.1 For strata with PPSWR selection at first stage:

$$V\hat{a}r_{ppswr}(\hat{Y}_s) = \left[\sum_t \frac{1}{n_{st}(n_{st}-1)} \sum_{i=1}^{n_{st}} \left(\frac{Z_{sti}\hat{Y}_{sti}}{Z_{sti}} - \hat{Y}_{st} \right)^2 \right],$$

$$\text{where } \hat{Y}_{sti} = \sum_j Y_{stij},$$

$$\hat{Y}_{stij} = D_{sti}^* \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

5.6.1.2 For strata with SRSWOR selection at first stage:

$$V\hat{a}r_{srswor}(\hat{Y}_s) = \sum_t \frac{1}{4} (\hat{Y}_{st1} - \hat{Y}_{st2})^2,$$

where \hat{Y}_{st1} and \hat{Y}_{st2} are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's' and sub-stratum 't'.

5.6.2 **For ratio \hat{R} :**

$$M\hat{S}E(\hat{R}) = \frac{1}{(\hat{X})^2} \left[\sum_s M\hat{S}E_s(\hat{R}) + \sum_{s'} M\hat{S}E_{s'}(\hat{R}) \right]$$

where s, s' indicate respectively the strata with PPSWR and SRSWOR selection at first stage.

5.6.2.1 For strata with PPSWR selection at first stage:

$$M\hat{S}E_s(\hat{R}) = \sum_t \frac{1}{n_{st}(n_{st}-1)} \sum_{i=1}^{n_{st}} \left[\frac{Z_{sti}}{Z_{sti}} (\hat{Y}_{sti} - \hat{R}\hat{X}_{sti}) - (\hat{Y}_{st} - \hat{R}\hat{X}_{st}) \right]^2$$

where

$$\hat{Y}_{sti} = \sum_j \hat{Y}_{stij}, \quad \hat{X}_{sti} = \sum_j \hat{X}_{stij},$$

$$\hat{Y}_{stij} = D_{sti}^* \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right],$$

$$\hat{X}_{stij} = D_{stii}^* \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} x_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} x_{i2jk} \right]$$

5.6.2.2 For strata with SRSWOR selection at first stage:

$$M\hat{S}E_{s'}(\hat{R}) = \sum_t \frac{1}{4} \left[\left(\hat{Y}_{s't1} - \hat{Y}_{s't2} \right)^2 + \hat{R}^2 \left(\hat{X}_{s't1} - \hat{X}_{s't2} \right)^2 - 2\hat{R} \left(\hat{Y}_{s't1} - \hat{Y}_{s't2} \right) \left(\hat{X}_{s't1} - \hat{X}_{s't2} \right) \right]$$

where $\hat{Y}_{s't1}$ and $\hat{Y}_{s't2}$ are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's' and sub-stratum 't'.

5.6.3 Estimates of RSE:

$$R\hat{S}E(\hat{Y}) = \frac{\sqrt{\text{Var}(\hat{Y})}}{\hat{Y}} \times 100$$

$$R\hat{S}E(\hat{R}) = \frac{\sqrt{M\hat{S}E(\hat{R})}}{\hat{R}} \times 100$$

6. Multipliers:

The formulae for multipliers for a sub-sample are given below for Schedule 1.0:

sub-stratum	formula for multipliers	
	hg / sb 1	hg / sb 2
rural	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times D_{stmi}^* \times \frac{H_{stmi1j}}{h_{stmi1j}}$ j = 1, 2, 3	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times D_{stmi}^* \times \frac{H_{stmi2j}}{h_{stmi2j}}$ j = 1, 2, 3
urban	$\frac{N_{st}}{n_{stmj}} \times D_{stmi}^* \times \frac{H_{stmi1j}}{h_{stmi1j}}$ j = 1, 2, 3	$\frac{N_{st}}{n_{stmj}} \times D_{stmi}^* \times \frac{H_{stmi2j}}{h_{stmi2j}}$ j = 1, 2, 3

Note: (i) For estimating any characteristic for any domain not specifically considered in sample design, indicator variable is used.

(ii) Multipliers are computed on the basis of information available in the listing schedule irrespective of any misclassification observed between the listing schedule and detailed enquiry schedule.
