Series	The NSSO, since its inception in 1950, has played a major role in providing the socio-economic data needed- from all spheres of life-to formulate of a vibrant plan for social and economic development. In this endeavour, NSS has collected, inter-alia, a series of data on non-agricultural enterprises, particularly those belonging to the unorganised sector. In this series, collection of data on economic and operational characteristics of small manufacturing and repairing enterprises in the unorganised sector was taken up.The field operations of the round commenced in July 1994 and continued up to June 1995.

Abstract

Objective of the Enterprise Survey: The main aim of the survey on unorganised Manufacture sector enterprises was to estimate size in terms of the total number enterprises, employment, fixed assets, operating expenses, receipts, value added, loans, gross value added per worker, etc. Information on other attributes like type of ownership, type of operation, number of months of operation, whether carrying out mixed/multiple activity, whether accounts maintained, etc. was also collected. The results pertaining to size, employment and economic indicators of the enterprises have been brought out in the first report*. This report, second in the series, presents the size and employment in brief, and the characteristics of the enterprises in terms of ownership, social group of owner, type of operation, months of operation, whether accounts maintained, nature of problems faced, etc.

Kind of Data	Sample survey data [ssd]
Unit of Analysis	Randomly selected unorganised service sector enterprises excluding trading and financial enterprises based on sampling procedure

Scope & Coverage

Scope
The manufacturing sector is an important segment of the Indian Economy. Unfortunately,statistics on regular basis, giving, by location, the number of
enterprises, employment, input, output, value added, etc., are not available for the unorganised part of this sector. AS per National Accounts Statistics released by C.S.O. in 1991, percentage share of manufacturing sector (organised & unorganised taken together) in the NDP at factor cost for 1988-89 is 19.6% of which 11.6% is accounted for by organised part and the rest (i.e.,8.0%) by unorganised part. As per provisional results of NSS 45th round survey (July 1989-June 1990), there were an estimated 157.3 lakh manufacturing and repairing enterprises (OAME's and NDME's) in the country, 120.2 lakhs being in the rural areas and 37.1 lakhs in the urban areas. As per the provisional results of the survey on DMEs conducted by CSO during October 1989 - September 1990, there were an estimated 6.2 lakh directory manufacturing establishments (DME's) in the country,2.3 lakh being in the rural areas and 3.9 lakh in the urban areas. The fiftyfirst round of NSS will cover all OAME's, NDME's and DME's. These enterprises/establishments are those which are covered by the two-digit codes (called divisions) 20 to 39 and 97 under the revised National Industrial Classification of All Economic Activities 1987 (henceforth briefly referred to as NIC, 1987).

Keywords	Unorganised Manufacture, Mixed Activity, Broad Activity Group, Segment number, Own account enterprise (OAE), establishment Enterprise, 5-digit code as per NIC-1998, Nature pf operations - seasonal, perennien and casual, Type of ownership, registered under

	companies act, Rent, gross value added, Employment, Worker, Fixed assets owned and hired, Banks, Financial Institutions
Topics	Infrastructure, Social Development, Macroeconomics & Growth, Labor & Social Protection

Geographic Coverage

The survey covers the whole of the Indian Union excepting (i) Ladakh and Kargil districts of Jammu & Kashmir, (ii)768 interior villages of Nagaland (out of a total
of 1232 villages)situated beyond five kilometers of the bus route and (iii) 195 villages in Andaman and Nicobar Islands (out of a total of 549 villages) which remain inaccessible throughout the year. However, in the case of Jammu & Kashmir, the districts Anantnag, Pulwama, Srinagar, Badgam, Baramulla and Kupwara in addition to Ladakh and Kargil districts are kept outside the geographical coverage of central sample.

Universe

Enterprises which are registered under Sections 2m (i) and 2m (ii) of the Factories Act, 1948 (i.e. enterprises employing 10 or more workers using power and those employing 20 or more workers without using power) and bidi and cigar manufacturing enterprises registered under bidi and cigar workers (condition of employment) Act, 1966 will not be covered in this survey. The enterprises mentioned above are supposed to be covered under Annual Survey of Industries(ASI).

In this round all the states and union-territories excepting Andaman & Nicobar Islands, Dadra & Nagar Haveli and Lakshadweep are expected to participate at least on an equal matching basis.

Sampling

Sampling Procedure

As usual, a stratified two-stage sampling design has been adopted. The first-stage units are the villages (Panchayat wards in case of Kerala) in the rural areas and urban
blocks in the urban areas. The second-stage units are the enterprises for the survey of unorganised manufacture and households for the survey on household consumer expenditure.

Sample Size (FSU's) : The total sample size (i.e. total number of villages and blocks to be surveyed) at all-India level has been fixed as 14,072 for the central sample and 16,080 for the state sample.

Allocation of sample FSU's between rural and urban sectors : State/u.t. level total sample size (i.e. total number of villages and blocks to be surveyed) has been allocated between the rural and urban sectors in proportion to population as per 1991 census
with double weightage to the urban sector. All these allocations are rounded off to multiples of 8 in order to facilitate further allocation among different sub-sample and sub-round combinations.

More details on sample design is in external resources.

Deviations from Sample Design
There was no deviation from the original sampling design

Weighting
WGT- Multiplier has been provided for sub-sample and combined. This should be used as multiplier factor for Sub sample and Combined sample.

Data Processing & Appraisal

Data Editing

Data was collected as per the Questionnaire for NSS 51st Round schedule 2.2. There are 10 record blocks. Data
 editing, scrutiny and validation were carried out as per the scrutiny checks and corrected manually.

NOTE: The data set contains 6336997 records for Rural and Urban sector. Therefore for ease of processing, they
 are kept separately for Rural and Urban sector.

Other Processing

1. The data sets are identified by Level No. They are kept separately and processed independently as information
 common to all types of records derived from Block 1 & Block 2 ie Identification blocks have been posted in all the
 data sets along with the multiplier Factor- WGT-SS (Sub sample)and WGt_CS (Combined).

2. As the data is large, data sets are kept separately for Rural and Urban sector. As such all the description and
 recorded for RURAL is also applicable to Urban data sets.

3. These two data sets are labled as RLEVEL for RURAL and ULEVEL for Urban followed by level no.

4. As the survey is for unorganised Manugaturing sector, please see only Manufacturing code be selected for
 processing. There may be records with Service sector enterprise code.

5. In the schedule- Block 8.1 (Level 7) and Block 9 (Level 9), data for quantity and rate per unit is given as (0.0)
 and (0.00) respectively. But in the record layout these are all numeric only.

Other Forms of Data Appraisal

Comparison of results with earlier survey for Unorganised service sector.

Statistics [NW/ W]	[Valid=120191 /-] [Invalid=418 /-] [Mean=34.619 /-] [StdDev=128.322 /-]
Literal question	Act/authority code - act 1966
Interviewer's instructions	In case of registration with more than one agancy, the relevant registration codes may be added to obtain the code which is to be entered here. For instance, if a unit is registered under the State directorate of Industries (code 002) and also with the Development Commissioner, Handlooms (code 016) the code to be given here will be 018. List of codes is provided in the instruction manual.
Notes	Although the code list is available in the schedule, codes are varying too much and so left as it is. In fact there is explanation to fill the Act as under: In case of registration with more than one agancy, the relevant registration codes may be added to obtain the code which is to be entered here. For instance, if a unit is registered under the State directorate of Industries (code 002) and also with the Development Commissioner, Handlooms (code 016) the code to be given here will be 018.

Definition	Fixed assets : Fixed assets are assets held for the purpose of producing or providing goods or services and they are not held for resale in the normal course of business. These cover all goods, new or used, that have a normal economic life of more than one year from the date of purchase. Thus fixed assets for our purpose include (1) assets used for production, transportation, living or other facilities (recreation etc.) (2) full value of assets taken on hire purchase/ instalment (whether fully paid or not) excluding interest. Intangible assets like goodwill etc. are excluded. The assets under construction i.e., construction of building etc., installation of plant and machinery, preparation of bodies of truck etc. (transport equipment) may be reported under the relevant item, since no provision has been made for recording assets under construction in the schedule separately. Advance payment for fixed assets not yet received should not be considered. The information to be recorded here is by physical approach. Fixed assets owned but rented out are not to be accounted for. Additions to fixed assets (as distinct from repair work) during the reference year is to be included. Information should be given separately for land and building. If separate figures are not available, estimated figures may be recorded. For the manufacturing unit which has not started production as yet and is engaged in the process of installation, fixed assets will be duly considered. Fixed assets received from other countries, even if used, put to use to the country for the first time will be classified as new.

Definition	Assets are subject to diminution in working capacity or value with the passage of time. This gradual reduction in the value of an asset due to wear and tear as in the case of physical assets like building, machinery etc.is defined as depreciation.
Literal question	Depreciation
Interviewer's instructions	The depreciation provided for the reference year is to be recorded in col.10. Where the enterprise was following a system of depreciation but provision has not been made for a number of years together, the estimate of the depreciation is to be made on the basis of the system followed. If no depreciation has ever been allowed for an item of fixed asset, annual rate of depreciation may be estimated as (a) - (b), where (a) and (b) are as follows : (a) purchase price + installation cost (or cost of construction)
