

HOUSEHOLD CAPITAL EXPENDITURE IN INDIA
DURING 1.7.2002 to 30.6.2003

ALL-INDIA DEBT AND INVESTMENT SURVEY

NSS FIFTY-NINTH ROUND

January - December 2003

NATIONAL SAMPLE SURVEY ORGANISATION
MINISTRY OF STATISTICS AND PROGRAMME IMPLEMENTATION
GOVERNMENT OF INDIA
April 2006

Preface

The National Sample Survey Organisation (NSSO) has been conducting All-India surveys on Debt and Investment decennially since its 26th round (1971-72) in both the rural and urban areas. These surveys generate basic quantitative information on assets, liabilities and capital expenditure in the household sector of the economy. The All-India Debt and Investment Survey (AIDIS), which was carried out as part of the 59th round of the National Sample Survey (NSS) during the period January to December 2003, was the sixth such survey conducted at the all-India level. Prior to 1971-72, two surveys namely 'All-India Rural Credit Survey' and 'All-India Rural Debt and Investment Survey' had been conducted in 1951-52 and in 1961-62 respectively, by the Reserve Bank of India (RBI) for rural areas only.

The present report is the last in the series of five reports planned on the basis of data collected in NSS 59th round. This report inter-alia gives the estimates of number and percentage of households reporting capital expenditure and also of those reporting sale and loss of assets. It also provides estimates of amount of capital expenditure incurred by the households according to various characteristics at the State/U.T and all-India level, for the rural and urban areas. The report consists of three chapters and three appendices. Chapter one deals with the introduction and Chapter two with concepts and definitions that have been used in the survey. Chapter three deals with summary results of the survey and their comparison with the results of the previous surveys.

The Survey Design and Research Division of NSSO was responsible for designing the survey and preparing this report. The fieldwork for the survey was carried out by the Field Operations Division of NSSO while the data processing and tabulation work were handled by the Data Processing Division of NSSO. The Coordination and Publication Division of NSSO was responsible for the over-all coordination.

I sincerely thank the Chairman and Members of the Working Group for NSS 59th round survey for their valuable guidance at various phases of the work – from designing of the schedule of enquiry to the preparation of this report. I also thank the Chairman and Members of the Governing Council of NSSO for providing technical guidance at various stages of survey work.

I hope the report will be useful to the planners, policy-makers and researchers. Comments and suggestions on the report are most welcome.

HIGHLIGHTS

Magnitude of Household Capital Expenditure during 1.7.2002 – 30.6.2003

The report presents the features of household capital expenditure, i.e. fixed capital expenditure on farm and non-farm business, expenditure on purchase of land, and expenditure on normal repairs and maintenance, during the period 1.7.2002 to 30.6.2003. It also covers some aspects of sale and loss of household assets.

About 73% of the households in the country belonged to the rural areas. They accounted for roughly one-half of the aggregate fixed capital expenditure of Rs. 73,086 crores and three-fourths of the expenditure on purchase of land of Rs. 7,714 crores. About three-fourths of the total expenses of Rs. 13,650 crores on normal repairs and maintenance were incurred by the rural households too.

Capital Expenditure by Occupational Category during 1.7.2002 – 30.6.2003

About 13% of the rural and 8% of the urban households reported incurring some expenditure towards formation of fixed capital. The purchase of land was a very rare phenomenon particularly among the urban households - only 3 to 5 per 1000 households reported expenditure on purchase of land.

According to major household occupation categories, about 16% of rural *cultivator* households and 12% of urban *self-employed* households incurred expenditure on fixed assets, while 0.6% of *cultivator* households and 0.4% of *self-employed* households did so on purchase of land.

Average capital expenditure: On an average, *cultivator* households in the rural areas and *self-employed* households in the urban areas spent more on fixed capital expenditure as well as on purchase of land than other rural or urban households. The average fixed capital expenditure incurred by *cultivator* households in rural areas was Rs 3,237 compared to Rs. 2,719 by *all* households. In the urban areas, *self-employed* households spent, on an average, Rs. 6,596 on fixed capital expenditure compared to Rs. 5,925 by *all* households.

Capital Expenditure by Assets Holding Class (AHC)

During 1.7.2002 – 30.6.2003, the proportion of households reporting fixed capital expenditure and expenditure on purchase of land, in general, increased with their asset holdings. The average fixed capital expenditure, as well as expenditure on purchase of land, also increased with household assets holding.

The rich-poor differentiation was clearly manifested in terms of fixed capital expenditure incurred by the households. In the rural areas, while the households in the lowest AHC (less than Rs.15,000) incurred expenditure, on an average, of Rs. 468 on formation of fixed assets, the households in the highest AHC (Rs. 8 lakhs or more) incurred, on an average, a hefty Rs. 12,914 on fixed capital formation. Similarly in the urban areas, the households in the lowest AHC and households in the highest AHC incurred, on an average, Rs. 217 and Rs. 17,560, respectively, on fixed capital expenditure.

Capital Expenditure by Broad Heads of Expenditure

In both the rural and urban areas, during 1.7.2002 – 30.6.2003, a major portion of fixed capital expenditure was on ‘residential plots and buildings’. The share of fixed capital expenditure on ‘residential plots and buildings’ was nearly 64% in rural areas and was as high as 83% in the urban areas. The next in importance was ‘farm business’ in the rural areas and ‘non-farm business’ in the urban areas. In respect of expenditure on purchase of land, the share of expenditure on ‘farm business’ was highest (63%) in the rural areas and on ‘residential plots and buildings’ (89%) in the urban areas.

Sources of Financing Capital Expenditure

A higher proportion of households resorted to borrowings from non-institutional agencies for financing fixed capital expenditure – be it on ‘residential plots and buildings’ or on ‘farm business’ or on ‘non-farm business’.

In the rural areas, about 12% of total fixed capital expenditure on ‘residential plots and buildings’ was financed from the non-institutional agencies and the share of institutional agencies was nearly 22% in the case of ‘farm business’. The share of borrowings met from institutional agencies, in the urban areas, was nearly 26% for ‘residential plots and buildings’ and nearly 29% for ‘non-farm business’.

Sale and Loss of Household Assets during 1.7.2002 – 30.6.2003

In India, more than three-fourths of all assets sold and more than four-fifths of all assets lost, in terms of value, were from the rural areas.

Broad heads of assets: In the rural areas, among the four broad heads of assets, viz. ‘residential plots and buildings’, ‘farm business’ and ‘non-farm business’ and ‘other’, two-thirds of all sales and a half of all losses had been from the assets of ‘farm business’. In the urban areas, ‘residential plots and buildings’ and ‘other’ each accounted for around one-third of the total sales, whereas ‘non-farm business’ and ‘other’ each accounted for around one-third of the total loss of assets.

MPCE	Monthly per Capita Consumer Expenditure
NRME	Normal Repairs and Maintenance Expenditure

Chapter One

Introduction

1.1 The Report in Perspective

1.1.1 The All-India Debt and Investment Survey (AIDIS) was carried out as a part of the 59th round survey of the National Sample Survey Organisation (NSSO) during January to December 2003. This was the sixth such survey conducted at the all-India level. The main objective of the AIDIS is to generate reliable estimates on assets, liabilities and capital expenditure of the household sector. At present, the decennially conducted AIDIS is the only nation-wide enquiry providing data on household assets, indebtedness and capital expenditure. In the 59th round, information on assets and liabilities of the households as on 30.6.2002, amount of capital expenditure incurred by the household during the agricultural year 2002 – 03 (July 2002 – June 2003), cash borrowings and repayments made by the households, sale and loss of assets of the households during the agricultural year 2002 – 03 was collected through the Debt and Investment Schedule (Schedule 18.2). The present report contains the survey results of the 59th round on capital expenditure, sale and loss of assets by the rural and urban households during the agricultural year 2002-03 (i.e. during the period 1.7.02 to 30.6.03).

1.2 Background

1.2.1 In order to study both the demand and supply sides of credit in the household sector, the Reserve Bank of India (RBI) had conducted the "All-India Rural Credit Survey", in 1951-52. Information on assets, economic activities, particulars of credit operations and incidence of indebtedness in the rural areas was collected in the survey to assess the demand for rural credit. Further, data on the extent and mode of operations of different credit agencies were also collected to examine the supply side of the credit.

1.2.2 The first Rural Credit Survey was followed by a similar survey in 1961-62 by the RBI. The scope of the survey was extended to include capital expenditure in the household sector and other associated indicators of the rural economy. The second survey was, therefore, called "All-India Rural Debt and Investment Survey".

1.2.3 The responsibility of conducting the third such survey was given to the National Sample Survey Organisation (NSSO). The NSSO undertook the All-India Debt and Investment Survey (AIDIS), after integrating it with the Land and Livestock Holding Survey (LHS), in its 26th round survey during July 1971-September 1972. During this survey, for the first time since its inception, the scope of the Debt and Investment Survey was extended by including urban areas as well. Since then, NSSO has been regularly conducting AIDIS once in ten years. The fourth decennial survey on Debt and Investment was conducted in NSS 37th round survey during the calendar year 1982, followed by the fifth survey in NSS 48th round

during the calendar year 1992. In the 26th round survey, the LHS and AIDIS had many items of information in common and an integrated schedule was designed and canvassed in the same set of sample households in both the rural and urban areas. Data for AIDIS and LHS were collected through independent schedules in the 37th round survey but from the same set of sample households in the rural as well as urban areas. Whereas, in the 48th round survey, information for AIDIS and LHS was collected from the independent sample of households in rural areas but from the same set of sample households in the urban areas.

1.2.4 The present AIDIS was also carried out along with the LHS in the NSS 59th round (January – December, 2003). Although the objectives of the survey remained the same as those of the earlier surveys, an independent sample of households was selected exclusively for the AIDIS in both the rural and urban areas, to ensure better representation of the indebted households.

1.3 Scope

1.3.1 In the present AIDIS (2003), information on the assets and liabilities of the households was collected as on 30.6.2002. Along with the liabilities of the households, the details of all financial transactions, particularly cash borrowings and repayments, made by the household, during the agricultural year 2002-03 (AY 02-03) were also collected. Besides, the survey gathered information on the amount of capital expenditure incurred by the households during the AY 02-03, under different heads, like residential plots, houses and buildings, farm business and non-farm business. Data on sale and loss of assets during this period were also collected in this survey.

1.3.2 The 59th round survey covered the whole of the Indian Union except (i) Leh (Ladakh) and Kargil districts of Jammu & Kashmir, (ii) interior villages of Nagaland located beyond five kilometres of any bus route, and (iii) villages in Andaman & Nicobar Islands which remain inaccessible throughout the year.

1.4. Method of data collection

1.4.1 The Debt and Investment Schedule (Schedule 18.2) was canvassed in a sample of 14 households selected randomly in each village/ block. The field workers paid two visits to each sample household during the period of survey with a gap ranging from 4 to 8 months. Two separate and slightly different schedules of enquiry were used for collection of data in the two visits. The schedules for visit I and visit II were slightly different in the sense that in visit I certain information like, demographic particulars of household members as on the date of survey, and stock of household assets and situation of indebtedness as on 30.6.2002 was collected, which was not collected in visit II. On the other hand, in both visit I and visit II, information in respect of transaction of loans, its purpose, credit agency, etc. and household capital expenditure, sale and loss of assets were collected, with the same set of questions, for the periods 1.7.2002 to 31.12.2002 and 1.1.2003 to 30.6.2003, respectively.

1.4.2 The survey period for the 59th round was the calendar year 2003. In order to reduce recall error, particulars relating to the entire agricultural year 2002 - 03 were collected by visiting each sample household twice during the survey period. The first visit to the sample households was made during the first 8 months of the survey period, i.e. from January 2003 to August 2003, while the second visit was made during the next 4 months, i.e. during September 2003 to December 2003.

1.4.3 During the first visit to a sample household, the investigator collected information on assets owned on the date of survey as well as acquisition and disposal of assets during the period from 1.7.2002 to the date of survey. These data were used to get the estimates of assets owned by the households as on 30.6.2002. The survey used the same procedure for assessing the indebtedness position of households as on 30.6.2002 (see NSS Report No. 501(59/18.2/2): Household Indebtedness in India as on 30.06.2002). The estimates of cash dues outstanding as on 30.6.2002 are based on the first-visit data on dues outstanding on the date of survey and borrowings and repayments made between 1st July 2002 and the date of survey, both days inclusive.

1.4.4 In addition, the schedule canvassed during the first visit provided for collection of data on the amount and other particulars of borrowings and repayments made during the first half of the AY 2002-03, i.e. during 1.7.2002 to 31.12.2002. The data on capital expenditure and sale and loss of assets of the households during 1.7.2002 to 31.12.2002 were also collected in the first visit.

1.4.5 During the second visit to the sample households, data were collected to assess the borrowing and repayments made and loans written off during the second half of the AY 2002-03, i.e. during 1.1.2003 to 30.6.2003. Similarly, data on capital expenditure and sale and loss of assets, during 1.1.2003 to 30.6.2003, were collected in the second visit. No provision was kept for the collection of information on physical assets, except durable assets, in the schedule of the second visit.

1.5. Reference Period

1.5.1 All estimates pertaining to fixed capital expenditure, expenditure on purchase of land, normal repairs and maintenance expenditure, amount financed from borrowings, sale and loss of assets, etc., presented in this report are based on a fixed reference period - from 1.7.2002 to 30.6.2003. The data were collected from each sample household in two visits. In the first visit information was collected in respect of transactions during the period 1.7.2002 to 31.12.2002 and in the second visit, during the period 1.1.2003 to 30.6.2003.

1.5.2 However, as in the earlier NSS Report Nos. 500 (Household Assets and Liabilities in India as on 30.06.2002) and 501 (Household Indebtedness in India as on 30.06.2002), estimates of assets provided in this report continue to refer to the fixed reference date of 30.6.2002 and are based entirely on the data collected during the first visit to the sample households. As stated earlier, the position of assets of the sample households as on 30.6.2002

was derived from the stock data on the date of survey and the data on transactions during the intervening period.

1.5.3 As in the earlier reports in this series, the estimates of number of households given in this report are based on data with a moving reference point, which spans a period of eight months, from 1.1.2003 to 31.8.2003. These estimates, therefore, may be taken to represent the households existing as on 30.4.2003, the mid-point of the eight-month period. The estimates for number of households given in this report are based on data of sample households where Schedule 18.2 was canvassed for both the visits.

1.6 Sample Design

1.6.1 The sample design adopted for the survey was essentially a stratified two-stage one for both rural and urban areas. The census villages and urban blocks were the first-stage units (FSUs) for the rural and urban sectors respectively, while households were the second-stage sampling units (SSUs) in both the sectors. The selection of villages was done with probability proportional to size with replacement (PPSWR), size being the population as per population Census 1991 in all the strata for rural sector except stratum 1. In stratum 1 of rural sector and in all the strata of urban sector, selection was done using simple random sampling without replacement (SRSWOR). For the AIDIS, 14 households - 2 from each second-stage stratum (SSS) - were planned to be surveyed in every sample village/ urban block. Selection of SSUs in each SSS of a FSU was done by SRSWOR. The details of the sample design and estimation procedure adopted for the survey are given in Annexure B of this report. In the 59th Round, 10,309 FSUs (6,552 in rural sector and 3,757 in urban sector) and 1,43,285 SSUs (91,192 in rural sector and 52,093 in urban sector) were surveyed in the country for the AIDIS. Out of these, the Debt and Investment Schedule (Schedule 18.2) could be canvassed for both the visits in 1,39,039 SSUs (89,718 in rural sector and 49,321 in urban sector) of 10,297 FSUs (6,551 in rural sector and 3,746 in urban sector).

1.7 Contents of the Report

1.7.1 This report contains three chapters, including the present introductory chapter, and three appendices. Chapter Two describes the concepts and definitions used for the survey. Chapter Three discusses the main findings on household capital expenditure obtained from the survey data. The discussions in Chapter Three have been confined to the major states and all-India while the detailed results, on which this report is based, are presented for all the states and union territories in Appendix - A. The sample design and estimation procedure followed in the survey are presented in Appendix B and a facsimile of the Debt and Investment schedule is given in Appendix C.

1.7.2 The Appendix A of the report contains tables providing estimates of capital expenditure on various items, estimates of amount borrowed to finance capital expenditure, estimates of normal repair and maintenance expenditure and estimates of sale and loss of assets of the households during the agricultural year 1.7.02 to 30.6.03 at the state and all-India level, separately for rural and urban areas.

1.7.3 All the estimates presented in this report are based on the central sample data only and also based on combined estimate of the 2 sub-samples. It would be in order to mention here that the cell figures in any of these detailed tables, when added up, may not exactly equal the figure shown against the 'total' column (or line) due to (i) rounding off and/or (ii) presence of non-response cases. Footnotes have been given in the Appendix Tables wherever the non-response cases arise but are not shown separately in the tables.

1.8 Plan for release of results

1.8.1 The first report (NSS Report No.500: Household Assets and Liabilities in India as on 30.06.2002) gave the survey estimates on assets and liabilities (cash loans) of rural and urban households as on 30.6.2002.

1.8.2 The second report (NSS Report No.501: Household Indebtedness in India as on 30.06.2002) of the series covered several aspects of household indebtedness like number of households reporting cash loans and current liabilities, average amount of current liabilities, estimated number of households reported having kisan credit card and amount of credit received through it, distribution of cash loans by various characteristics, such as rate of interest, duration of loan, credit agency, etc.

1.8.3 The third report (NSS Report No.502: Household Borrowings and Repayments in India during 1.7.2002 to 30.6.2003) examined different aspects of the related flow variables by tabulating the number of households reporting borrowings and repayments during the agricultural year 2002-03 (1.7.02 to 30.6.03) and the corresponding average amount per household, amount of borrowings by different variables like credit agency, scheme of lending, purpose of loan, type of security, etc.

1.8.4 The fourth report (NSS Report No. 503: Household Assets Holding, Indebtedness, Current Borrowings and Repayments of Social Groups in India as on 30.06.2002) dealt with selected aspects of household assets and liabilities for different social groups.

1.8.5 The present report is the last in a series of five reports to be brought out on the AIDIS conducted in the NSS 59th round. This report gives the survey estimates on capital expenditure as well as sale and loss of assets of rural and urban households during the agricultural year 1.7.2002 to 30.6.2003. In general, the estimates are provided separately for rural and urban areas - for the country as a whole, as well as for all the states and union territories.

Chapter Two

Concepts and Definitions

2.0 Major concepts and definitions of important terms used in this survey and relevant to this report are explained below:

2.1 *Household*: A group of persons who normally lived together and took food from a common kitchen constituted a household. The adverb “normally” means that temporary visitors were excluded but temporary stay-aways were included. Thus, a child residing in a hostel for studies was excluded from the household of his/ her parents, but a resident employee or a resident domestic servant or paying guest (but not just a tenant in the house) was included in the employer’s/ host’s household. “Living together” was given more importance than “sharing food from a common kitchen” in drawing the boundaries of a household in case the two criteria were in conflict. However, in the special case of a person taking food with his family but sleeping elsewhere (say, in a shop or a different house) due to space shortage, the household formed by such a person’s family members was taken to include the person also. Each inmate of a hotel, mess, boarding-lodging house, hostel, etc., was considered to be a single-member household except that a family living in a hotel (say) was considered one household only. The same principle was applicable for the residential staff of such establishments.

2.2 *Household Type*: Households have been classified into two different types for the rural and urban areas.

2.2.1 *Classification of rural households*: The rural households are initially classified into two types namely, *cultivator* households and *non-cultivator* households.

Cultivator households: All rural households operating at least 0.002 hectare of land during the last 365 days preceding the date of survey are treated as '*cultivator* households'.

Non-cultivator households: All rural households operating no land or land less than 0.002 hectare are considered to be *non-cultivator* households. They are further classified into 'agricultural labour', 'artisan' and 'other' households according to the *principal household occupation* as per the National classification of occupations (NCO), 1968. Out of the occupations pursued by the members as their principal or subsidiary (on the basis of income) occupations, that accounting for the maximum earnings of the household in the reference year was considered to be the principal household occupation.

Agricultural labour: A person was considered to be an *agricultural labourer* if he/she followed one or more of the following agricultural occupations in the capacity of a manual labourer:

- (a) farming,
- (b) dairy farming,
- (c) production of any horticultural commodity,
- (d) raising of livestock, bees or poultry,

- (e) any practice performed on a farm as incidental to, or in conjunction with, farm operations (including forestry and timbering) and the preparation for market and delivery to storage or to market of farm produce.

Artisans: Own-account skilled workers and handicraftsmen engaged in any of the following occupations were considered to be *artisans*:

- (a) spinners, weavers, knitters, dyers, winders, wrappers, carpet makers, etc.,
- (b) tailors, dress makers, upholsterers, sewers, etc.,
- (c) shoe makers, repairers and cutters and other leather workers, etc.,
- (d) carpenters, cabinet makers, wood working machine operators, cart builders, wheelwrights, coach & body builders, ship-wrights & boat builders and related workers,
- (e) stone cutters & carvers,
- (f) blacksmiths, tool-makers, and machine-tool operators,
- (g) sheet metal workers,
- (h) jewelry & precious metal workers and metal engravers,
- (i) glass formers, potters and related workers,
- (j) printers, compositors, type-setters and photo-type setters, printing press man, stereotypers, electro-typers, engravers, book binders, photographic & dark-room workers,
- (k) construction painters,
- (l) makers of musical instruments, turners basketry and brush makers, non-metallic mineral product makers, doll makers, etc.,
- (m) brick layers, stone masons, plasterers, tile-setters, cement finishers, roofers, insulators, glaziers, hut builders, thatchers and other construction workers.

Own-account workers were those who operated their enterprises without hiring anyone on salary or wages except occasionally.

Other rural households: All the remaining households were considered to be '*other*' households.

2.2.2 *Classification of urban households*: In urban areas, each household was first categorised in one of the following four groups, namely, *self-employed*, *regular wage/salaried employee*, *casual labour* and *other* as per the definitions given below :

Self-employed household: Persons engaged in the farm or non-farm enterprises of their households are called *self-employed* workers. In urban areas, a household was regarded as *self-employed*, if the major source of its income during the 365 days preceding the date of survey was *self-employment* of its members. The *self-employed* urban households are further sub-classified into seven occupational groups.

These groups are:

1. professional, technical and related workers,
2. administrative, executive and managerial workers,
3. clerical & related workers,
4. sales workers,
5. service workers,
6. farmers, fishermen, hunters, loggers and related workers,
7. production and related workers, transport operators and labourers.

Regular wage/salaried household: Persons working in farm or non-farm enterprises not run by their own households and, in return, getting wages or salary on a regular basis (i.e. not on daily basis or on periodic renewal of work contract) are treated as *regular wage/salaried* employees. Urban households reporting that major source of its income during the 365 days preceding the date of survey was regular wage/salaried employment of members were treated as '*regular wage/ salaried*' households.

Casual labour household: Persons working in farm or non-farm enterprises not run by their own households and, in return, getting wages under terms of daily or periodic work contract are treated as *casual wage labourers*. Urban households reporting that the major source of its income during the 365 days preceding the date of survey was casual wage employment of members were treated as '*casual labour*' households.

Other urban household: All the remaining urban households were treated as '*other*' households.

2.3 Major household type: The term refers to *cultivator* and *non-cultivator* (i.e. other than *cultivator*) households for the rural areas. For the urban areas, *self-employed* and *other* households (i.e. households with household type codes either 2 or 3 or 9) are the two major household types.

2.4 Household consumer expenditure: It is the expenditure of a household on domestic consumption only. It is the same as the expenditure covered in the consumer expenditure survey of the NSSO. Any expenditure incurred by the household on its enterprise account was excluded from consumer expenditure. Unlike the regular Consumer Expenditure Survey of the NSSO, the present survey collected data on the household consumer expenditure through two direct questions on household consumption under two broad categories, viz. (i) out of purchases and (ii) out of home grown, home produced stock, free collection, transfer receipts, etc.

2.5 Household monthly per capita consumer expenditure (MPCE): This was obtained from the household's total consumer expenditure during last 30 days divided by the household size and recorded to two places of decimal.

2.6 Household assets: Household assets represented all physical and financial assets that were owned by the household and had money value. These included physical assets like land, buildings, livestock, agricultural machinery and implements, non-farm business equipment, all transport equipment, durable household goods and financial assets, like dues receivable on loans advanced in cash and in kind, shares in companies and cooperative societies, banks, etc., national saving certificates and the like, deposits in companies, banks, post offices and with individuals. The AIDIS did not include crops standing in the fields and stock of commodities held by the household in the household assets. As in the 48th round of NSS, in the present AIDIS also, currency notes and coins in hand were considered to be assets. The estimates of household assets, presented in this report, included the amount of cash held by the households as on the date of survey.

2.7 Household durable assets: Major infrequently purchased articles used for domestic current consumption and had a long expected life, say, one year or more and which cannot be purchased at a nominal price were defined as household durables. However, minor articles

like bottles, knives, etc., though expected to last for a long period, were excluded from household durable assets.

2.8 *Valuation of assets*: The survey evaluated a physical asset acquired prior to 30.6.2002 at the current market price of such an asset in its existing condition prevailing in the locality. An asset acquired prior to 30.6.2002 that was disposed of during the reference period (i.e. during 1.7.2002 to the date of survey) in a manner other than by sale was also evaluated at the current market price. If an asset acquired prior to 30.6.2002, was disposed of through sale during the reference period, the sale price was considered to be the disposal value of the asset.

2.8.1 On the other hand, if a physical asset was acquired by way of purchase or construction during the reference period, the purchase price or the total expenditure incurred on construction, including the value imputed at current market price of labour and materials supplied from household stock, was considered to be its value.

2.8.2 For evaluation of an asset acquired in a manner other than by purchase or construction during the reference period, the current price of the asset, as on the date of survey, in its existing condition prevailing in the locality was considered to be its value.

2.8.3 If an asset acquired during the reference period was owned on the date of survey, value of acquisition was considered to be the value of the asset on the date of survey. Similarly, if an asset acquired during the reference period was disposed of during the same period, the value considered for acquisition was also considered for disposal of the asset.

2.9 *Household asset holding class*: Ten household asset holding classes have been formed by examining the distribution of sample households over the asset holding classes for all-India. Total value of assets owned as on 30.6.02 was derived for each of the sample households by adding the values of different items of assets. One of the household asset holding classes has been assigned to each of the households depending upon the class in which the total value of assets so derived and rounded off (to Rs. thousand) falls.

2.10 *Cash loans*: All loans taken in cash were considered to be cash loans, irrespective of whether those loans were repaid or proposed to be repaid in cash or in kind. Cash loans, generally, covered borrowings at specific rates of interest for specific periods of time. However, if a loan was taken even at 'nil' rate of interest from relatives and friends, it was considered to be a cash loan. The loans may have been taken against a security or without any security. Dues payable by the household owing to purchase of goods under a hire-purchase scheme were treated as cash loans.

2.11 *Borrowings*: The amount of cash loans taken by a household during 1.7.2002 to 30.6.2003 was referred to as its borrowings. For sample households covered during the first visit, such loans were those that were taken between 1.7.2002 and 31.12.2002, while for those covered during the second visit, borrowings referred to loans taken between 1.1.2003 and 30.6.2003.

2.12 *Credit agency*: The agency from which a loan was taken was treated as the credit agency. The credit agencies were either 'institutional agencies' or 'non-institutional agencies'. The various agencies which were treated as 'institutional agencies' were: government, co-operative agencies, commercial banks including regional rural banks, insurances, provident funds, financial Corporations/ institutions, financial companies and 'other institutional agencies'. The agencies which were treated as 'non-institutional agencies' were: landlords,

agriculturist money lenders, professional money lenders, traders, relatives and friends, doctors, lawyers and other professionals, and 'others'. The various credit agencies are described below:

- (a) *Government*: The Central or a state government may act as an agency for advancing loans. Government may advance loans through Departments like Revenue, Agriculture, Industries or Rural Development, etc. Finance from Government may also be channeled through Khadi and Village Industries Commission. All loans received from the above sources have been treated as loans from 'Government'.
- (b) *Cooperative Society/Bank*: Loans may be obtained from agencies such as cooperative society/banks, like primary cooperative credit societies, primary cooperative marketing societies, district or central cooperative banks, primary or central loan development banks, handloom weavers cooperative societies and other industrial or other types of cooperative societies, etc. Such societies/banks have been treated as 'cooperative society/bank'.
- (c) *Commercial Banks including Regional Rural Bank*: All loans taken from commercial banks, including nationalised banks, regional rural banks, State Bank of India and its associates like State Bank of Rajasthan, State Bank of Mysore, etc., and foreign commercial banks operating in India have been considered to be loans taken from 'commercial banks'.
- (d) *Insurance*: All loans taken from Life Insurance Corporation, Postal Life Insurance and other insurance funds have been considered to be loans taken from 'insurance'.
- (e) *Provident Fund*: Loans taken from a Provident Fund account, such as a Contributory Provident Fund, a General Provident Fund, a Public Provident Fund or any other provident fund in the public/private sector offices and companies, by the employees of the respective concerns, or account holders in case of a Public Provident Fund, have been classified as loans taken from 'Provident Fund'.
- (f) *Financial Corporations/ Institutions*: Institutions such as State Financial Corporations, Small Industries Development Bank of India (SIDBI), Small Industries Development Corporation (SIDC), etc., which play promotional and developmental role through extending finance, have been grouped under this head.
- (g) *Financial Companies*: A financial company is an institution which has to be (i) a company under companies act, (ii) which is engaged in financial activity and (iii) whose principal business is not agricultural, industrial or trading activity or real estate business.
- (h) *Other Institutional Agencies*: Loans taken by the households from institutions other than those listed above have been treated as loans from 'Other Institutional Agencies'.
- (i) *Landlord*: The credit agency landlord is defined for loans given by landlord to his/ her own tenants. If the tenant took a loan from a person who was not his landlord, but belonged to the landlord class, the credit agency in such cases has been taken as 'agriculturist money lender' or 'professional money lender', etc., depending upon the type of money lending business done by the landlord.
- (j) *Agriculturist money lender*: An agriculturist money lender was defined as one whose major profession is agriculture and whose money lending business is, comparatively, of minor importance. When a landowner or a cultivator derives the major part of his

income from money lending, he/she is not classified as an 'agriculturist money lender' but as a 'professional money lender'.

- (k) *Professional money lender*: A professional money lender is a person who earned a major part of his income from money lending.
- (l) *Trader*: A trader here is defined as a person whose principal occupation has been trading.
- (m) *Relatives & friends*: If a loan has been received from one of the relatives or friends free of interest, it has been considered to be a loan taken from 'relatives and friends'. If the loan has carried an interest, it has been considered to be taken from an 'agriculturist money lender', 'trader', etc., depending upon the type of business carried on by the relative or friend.
- (n) *Doctors, lawyers & other professionals*: This credit agency has been assigned when the loans are taken by the households from doctors, lawyers and other professionals.
- (o) *Others*: Any non-institutional credit agency not covered above has been considered under this category.

2.13 *Expenditure*: A physical asset may be purchased or constructed or improved upon (including major repairs, additions, etc.) by the sample household. The household may also carry out normal repairs and maintenance of existing physical assets. When a new physical asset is purchased, the purchase price of the physical asset is considered to be the expenditure on account of that physical asset, irrespective of whether the full amount is paid or not during the reference period. In other cases, the expenditure means the value of actual construction, improvement and maintenance work done during the reference period. All items of expenditure fall under three groups, viz. "residential plots or buildings", "farm business" and "non-farm business", depending on where they were put to use. The composition of each of these groups is stated below:

2.13.1 *Residential plots and buildings*: Expenditure under this group comprises such items as purchase of plots, improvement to plots and purchase of house or building or other construction for residential purpose. Details of each of these items are stated below:

- (a) *Purchase of plots*: This relates to the purchase of full ownership rights or improvement in the tenurial status of the plots meant for residential purposes alone or along with farm and/or non-farm business.
- (b) *Improvement of plots*: This refers to only that expenditure which is incurred for various land improvement works like fencing, etc., on residential plots only.
- (c) *Purchase of houses, buildings or other residential constructions*: If any expenditure is incurred during the reference period for purchase of a new residential building or other construction of the existing residential structure for the purpose of the household's own use or for use of others (and not meant for sale), this was included in this item.
- (d) *Construction of houses, buildings or other residential constructions*: This refers to any expenditure which is incurred during the reference period for construction of a new residential building or other construction for the purpose of the household's own use or for the use of others (and not meant for sale).

- (e) *Additions / major repairs and alterations / improvements/normal repairs and maintenance of houses, buildings or other constructions:* This relates to any expenditure which is incurred during the reference period for major repairs and alterations of the existing residential house / building or any addition involving increase in the floor area of the existing residential structure for the purpose of the household's own use or for the use of others (and not meant for sale).

2.13.2 *Farm business:* Farm business comprises household economic activities like cultivation, including cultivation of plantation and orchard crops, and processing of produce on the farm, e.g., paddy hulling and *gur* making. Although *gur* making is a manufacturing activity, this is covered under farm business only when such activity is carried on in the farm by indigenous method. Farm business also includes activities ancillary to agriculture, like livestock raising, poultry, fishing dairy farm activities, bee keeping and other allied activities coming under Tabulation Categories A and B of the National Industrial Classification 1998. Expenditure under this group comprises several items, viz. purchases of land or land rights, building and other land improvements, reclamation of land, orchards and plantations, wells, other irrigation resources, agricultural implements and machinery, transport equipment, farm houses, barns and animal sheds, purchase of livestock, furniture and fixture and other capital expenditure. The terms are explained below.

- (a) *Purchase of land:* This includes any expenditure which is incurred for purchasing land for farm business.
- (b) *Purchase of land rights:* Purchase of land rights means expenditure for improving tenurial status. Instalment payment made to government towards purchase price of land settled on tenants in terms of land reform legislations is also be covered here.
- (c) *Bunds and other land improvement works:* Bunds are generally constructed to demarcate one field from other or to sub-divide a field into plots to facilitate irrigation and moisture conservation or for prevention of soil erosion or for protecting the crops in the low lying fields from flood. Any expenditure which is incurred towards this item is included here.
- (d) *Reclamation of land:* The reclamation of land may take place for either (a) bringing new land under cultivation or (b) for bringing land under cultivation which has been under cultivation but temporarily gone out of cultivation. The reclamation of jungle land or other uncultivated land by removing trees and shrubs, the reclamation of marshy or low lying uncultivated land by draining out, etc., are the cases of new land brought under cultivation.
- (e) *Orchard and plantations:* The term 'orchard' means garden of fruit plants and trees, like orange, fig, betel, vines, apples, etc., while the term 'plantation' means garden of coconut, cashew nut, tea, coffee, rubber, cardamom, etc. The cost of annual replanting (in place of plants or trees which have ceased to yield due to the process of aging), and new plantations and additions during the reference period have been considered here. In case of new orchards and plantations, expenditure incurred up to the time they start yielding produce has been considered.
- (f) *Purchase/construction/addition /major repair & alteration /improvement/ normal repairs and maintenance of farm houses, barns and animal sheds:* Any

expenditure which is incurred for (new) purchase, construction, additions and improvements or for normal repairs and maintenance of the farm houses, barn (grain golas) and animal sheds is considered.

- (g) *Wells*: Any expenditure incurred for constructions, major repairs and alterations of wells is considered here.
- (h) *Other irrigation resources*: This includes irrigation resources other than wells such as small tanks, water channels, etc.
- (i) *Other construction in the farm business*: Any construction work other than those listed already is covered under this item, e.g. hedges, fences, paths, etc., for the purpose of permanent protection or improvement of the farm.
- (j) *Livestock used as fixed asset*: When adult livestock is used for repeated use such as for milking, work purpose, etc., they are deemed as fixed assets.
- (k) *Purchase /addition/major repair & alteration /improvement / normal repairs and maintenance of agricultural machinery and implements*: Any implement or machinery including those for processing agricultural produce, viz. cane crushers, oil crushers, etc., used in farm business are included under this item.
- (l) *Purchase /addition/major repair & alteration/improvement of transport equipment*: The transport equipment which are used for farm business are considered here.
- (m) *Furniture and fixtures*: The item covered all furniture and fixtures used exclusively for farm business or for both farm and non-farm business.
- (n) *Other expenditure on farm business*: Expenditure incurred on any other item of farm business which is not covered by any of the items discussed above is considered here. Expenditure incurred for converting a sugarcane field into a paddy field, orchard land into wheat land is also to be covered.

2.13.3 *Non-farm business*: Non-farm business is defined as any household economic activity other than those covered in farm business. This covers manufacturing, mining & quarrying, trade, hotel & restaurant, transport, construction, repairing and other services. For the purpose of this survey, non-farm business excludes such activities when they are carried on in non-household enterprises. Non-farm business enterprises, which are registered under section 2m(i) or 2m(ii) and section 85 of factories Act, 1948 and Bidi and Cigar manufacturing establishments registered under Bidi and Cigar Workers (condition of employment) Act, 1966 were kept outside the coverage of the survey. Expenditure under this group includes purchase of land, improvement of land, purchase of workshop, shop, construction of workshop, shop, purchase of non-farm business equipment and accessories, transport equipment, furniture and fixtures and other capital expenditure incurred for non-farm business purpose. The detailed components of these items have already been explained under 'farm business' and 'residential plots and buildings'.

2.14 *Types of expenditure*: Data on three types of expenditure were collected from the survey. These were fixed capital expenditure, expenditure on purchase of land and expenditure on normal repairs and maintenance. Details of coverage of each of these are given below:

2.14.1 *Fixed capital expenditure*: This expenditure on capital account reflects increase in the productive capacity or utility of an existing item of asset, thereby providing a measure of

capital formation. All such expenditure leading to capital formation could be incurred by way of new purchase, construction for own use, additions, alterations, improvement and major repairs of physical assets, which help in their further production. Thus, all expenditure on land development work and on fixed assets used in farm and non-farm business and on residential plots and buildings are considered to be fixed capital expenditure. Moreover, the value of assets and materials used out of home produced stock as well as value of work done by the household members during the reference period also included under this type. However, fixed capital expenditure excludes any expenditure incurred towards certain items of assets. These items are:

- for residential plots and buildings : purchase of plots
- for farm business : purchase of land and land rights
- for non-farm business : purchase of land.

2.14.2 *Expenditure on purchase of land:* This includes expenditure on the following items:

- for residential plots and buildings : purchase of plots
- for farm business : purchase of land and land rights
- for non-farm business : purchase of land.

2.14.3 *Normal repairs and maintenance expenditure:* This includes expenditure of a recurring nature on fixed assets necessary to keep them in good working order. Replacement of parts and adjustment of fixed assets which are short-lived (i.e. with an expected usage/life of up to one year) and/or relatively low value are also included here. It excludes expenditure on certain items like purchase or improvement of plots under 'residential plots and buildings' and purchase/improvement of land rights under farm or non-farm business.

2.15 *Valuation of expenditure:* Amount of expenditure during the period 1.7.02 to 31.12.02 was collected during the first visit and during the second visit amount of expenditure during the period 1.1.03 to 30.6.03 was collected. The method of valuation of different categories of expenditure are as follows:

2.15.1 For any new physical asset purchased, its purchase price - irrespective of whether the entire amount was paid or not during the reference period - was taken as its value. For construction, improvement and maintenance work, the value of actual work done during the reference period was considered. However, all expenditure in kind was evaluated at the current market price prevailing in the locality or its neighbourhood.

2.15.2 For materials purchased during or before the reference period for own construction (including improvement, etc.) or normal maintenance and repairs of the physical assets, the value of the materials used in the construction/maintenance was taken. Such expenditure could be in cash or in kind. Similarly, payments made to labour hired during the reference period for construction, improvement, etc. or normal maintenance of the physical assets could be partly in cash and partly in kind. All expenditure in kind was evaluated at current market price in the locality or its neighbourhood.

2.15.3 For credit purchases, the value of the materials used during the reference period was considered, whether or not the payment was made during the reference period.

2.15.4 For collection of data on expenditure incurred by the households on specified items, the part relating to labour inputs was classified into two categories, namely, hired labour, if any, used for the purpose and household labour (contributed by household members) including the regular workers engaged by the household for work in their farm or non-farm business. The second category also included free labour and exchange labour. The work done should be manual or non-manual in nature for the first category, but manual only for the second category. The payments made to the hired labours, either in cash or in kind, were recorded against the first category, whereas, the imputed cost of the labour, evaluated using the average wage paid to the hired labour for such work done, were recorded against the second category.

2.15.5 The value of the home produced assets and materials actually used for the construction, improvement, etc., of any particular item of asset during the reference period was taken into consideration. This, however, does not include the value of commodities paid to the hired labour as their payment in kind, which are considered as part of wages paid to them. The home-produced assets and materials used for construction, improvement, etc., of the concerned item of assets could have been purchased during or even before the reference period. Such assets and materials supplied by the household were evaluated at the current market price prevailing in the locality during the reference period.

2.16 *Sale of assets* : The term 'sale' meant all transfer of assets to others in return for payments received in cash or in kind. The payments received in kind was evaluated at the current market prices prevailing in the locality during the period under reference

2.17 *Loss of assets*: This arose from natural calamities or on account of other reasons such as theft, being eaten by termites, etc. The value of the loss could be total or partial and was estimated to be the expenditure required to be incurred to restore it to the same condition in which it was prior to the loss. An asset having no use to the household was deemed to have been discarded during the reference period. The scrap value of such assets was taken into account.

2.18 *Major states*: The discussion on summary of survey results in Chapter Three, besides covering the national level estimates, deals with the estimates for relatively large states - in terms of population - as well. These states are referred to as *major states* in the discussion. They are as follows: Andhra Pradesh, Assam, Bihar, Chhattisgarh, Gujarat, Haryana, Himachal Pradesh, Jammu & Kashmir, Jharkhand, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Orissa, Punjab, Rajasthan, Tamil Nadu, Uttaranchal, Uttar Pradesh, West Bengal and urban Delhi.

Chapter Three

Summary of Findings

3.1 Introduction

3.1.1 In India, the decennial All-India Debt and Investment Survey (AIDIS) carried out by the NSSO constitute the principal source of data on assets, liabilities and capital expenditure of the household sector. The present report pertains to the results obtained from the sixth AIDIS conducted by the NSSO in its 59th round during January – December, 2003. It gives estimates of different types of capital expenditure incurred by households, and sale and loss of assets of households during the agricultural year 2002–03 (July 2002 – June 2003). All estimates are based on central sample data only.

3.1.2 This chapter summarises the important findings of the survey and discusses the salient features of household capital expenditure and of sale and loss of household assets during the period 1.7.02 to 30.6.03 for the rural and urban areas at the state and all-India levels. The discussion is mainly confined to different aspects of capital expenditure at the all-India level and the variation in those features across the major states. The major states that are considered here are those each with a population of one crore or more in respect of the rural or urban areas separately.

3.1.3 The discussion begins with the observation on aggregate expenditure incurred by households by type of expenditure. It is followed by a discussion on capital expenditure by occupational category, and by household asset holding class. The features of capital expenditure incurred under various broad heads, viz. ‘residential plots and buildings’, ‘farm business’ and ‘non-farm business’ are discussed next. Besides, sources of financing capital expenditure have also been studied. Broad features of the sale and loss of physical assets of households have also been examined.

3.1.4 To have an idea of the change of aggregate expenditure incurred by households over the years since 1971, the results of the earlier surveys of the NSSO on Debt and Investment, viz. the 26th (July 1971 – June 1972), 37th (January – December 1982) and 48th (January – December 1992) rounds, wherever possible, are also presented in this report. The estimates for aggregate expenditure for the 26th round, 37th round and 48th round were obtained for the agricultural years (AY) 1971–1972, 1981–1982 and 1991–1992, respectively, and the corresponding estimates for the 59th round have been obtained for the AY 2002–2003. In the 59th round, estimates for the number of households have been obtained from the data of first visit (collected during January – August, 2003) only and, therefore, the estimates refer to the mid-point of the survey period of Visit 1, i.e. 30.4.03. But to indicate survey periods of different rounds in a brief and uniform fashion, summary statements in this chapter refer to the 26th, 37th, 48th and 59th rounds as AY 1971-72, AY 1981-82, AY 1991-92 and AY 2002-03, respectively. Estimates for the 26th round have not been presented in the summary statements for the urban sector, as the results for the urban sector were not released for that round.

3.1.5 For the purpose of this report, the major states, which are relatively large in terms of population, are: Andhra Pradesh, Assam, Bihar, Chhattisgarh, Gujarat, Haryana, Himachal Pradesh, Jammu & Kashmir, Jharkhand, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Orissa, Punjab, Rajasthan, Tamil Nadu, Uttaranchal, Uttar Pradesh, West Bengal and urban Delhi. However, the estimates for all-India presented in the statement tables of this chapter as well as other tables of the report are based on the data of all the states and union territories. Moreover, it is important to note that, generally, the estimates of household, etc., obtained from NSS surveys are found to be lower than those of the censuses or projections. The differences are mainly due to differences in coverage and methods adopted in NSS with those in census operation. However, the ratios obtained from NSS surveys are expected to provide a closer approximation to the true values. Thus, the estimated marginal aggregates of households, expenditure, etc., presented in the detailed tables in the appendix may be used as weights for combining the ratios.

3.2. Aggregate Expenditure

3.2.1 Statement 1 presents the aggregate amounts of fixed capital expenditure (FCE), expenditure on purchase of land (EPL) and normal repair and maintenance expenditure (NRME) incurred by the rural and urban households during the period 1.7.2002 to 30.6.2003 (AY 2002-03) in India, as estimated from the survey. To form an idea about the proportion of households reporting these three types of expenditure, the number of households reporting a particular type of expenditure has also been presented.

Statement 1: Aggregate value of fixed capital expenditure (FCE), expenditure on purchase of land (EPL), and normal repairs and maintenance expenditure (NRME) of households during 1.7.02 to 30.6.03				
estimate	rural	urban	total	all-India
				% share in rural areas
(1)	(2)	(3)	(4)	(5)
no. of households (in 00,000)	1479	555	2034	73
aggregate value of FCE (Rs.crores)	40223	32863	73086	55
no. of households reporting FCE (in 00,000)	195	45	240	81
aggregate value of EPL (Rs.crores)	5786	1928	7714	75
no. of households reporting EPL (in 00,000)	7	2	9	78
aggregate value of NRME (Rs.crores)	10386	3264	13650	76
no. of households reporting NRME (in 00,000)	623	152	775	80

3.2.2 *Fixed capital expenditure*: The statement shows that about 73% of the households in the country resided in the rural areas compared to 27% in the urban areas. Among the households

reporting expenditure on fixed assets (fixed capital expenditure) during 1.7.2002 to 30.6.2003, about 81% had been from the rural areas. In contrast to these rural-urban differences, the rural households accounted for over half (55%) of the entire amount of household fixed capital expenditure. In quantitative terms, the aggregate fixed capital expenditure of the households was Rs. 40,223 crores in the rural areas and Rs. 32,863 crores in the urban areas.

3.2.3 *Expenditure on purchase of land*: Aggregate expenditure on purchase of land, during 1.7.2002 to 30.6.2003, was Rs. 5,786 crores for rural areas and Rs. 1,928 crores for urban areas. In other words, the rural households accounted for nearly three-fourths of the aggregate expenditure on purchase of land in the country, which showed a close parity with the proportion of households reporting expenditure on purchase of land.

3.2.4 *Expenditure on normal repair and maintenance*: During 1.7.2002 to 30.6.2003, the aggregate expenditure on normal repair and maintenance stood at Rs. 10,386 crores for rural areas and Rs. 3,264 crores for urban areas. Like expenditure on purchase of land, the share of expenditure on normal repair and maintenance was, also, nearly three-fourths in the rural areas.

3.2.5 Having formed a broad idea of the different types of expenditure in aggregate terms, it would be useful to point out some interesting features pertaining to them like their incidence among households, average values, etc. by various characteristics such as occupational category, asset holding class, broad head of expenditure, etc.

3.3. Capital Expenditure by Occupational Category

3.3.1 A few important characteristics of household capital expenditure are studied in this section by considering expenditure incurred separately by households belonging to the broad occupational categories: *cultivator* and *non-cultivator* households in the rural areas and *self-employed* and *other* households in the urban areas. Note that information on household type could not be collected for some households in the urban areas. While tabulating the data, these households for which the *household type* could not be classified either as *self-employed* or as *other* have been included in the count of total number of households.

3.3.2 Statement 2 presents the proportion of households that, during 1.7.2002 to 30.6.2003, incurred FCE and EPL - by occupational category separately for rural and urban India. The average values of corresponding expenditure have also been presented in this statement. To get a comparison of the situation that existed during 1991-92 (48th round of NSS), available figures have been put in parentheses.

3.3.3 *Incidence of capital expenditure*: Statement 2 presents the incidence of FCE and EPL, i.e., the proportion of households incurring FCE and EPL during AY 2002-03. In the rural areas, nearly 13.2% households incurred FCE and only 0.5% households incurred EPL. The corresponding shares for the urban areas were 8.1% and 0.3%, respectively. It is observed that the proportion of households incurring FCE or EPL was higher among the *cultivator* households in rural India and among the *self-employed* households in urban India than other rural or urban households respectively. In the rural areas, proportion of *cultivator* households who incurred

FCE or EPL was almost twice as high as that for the *non-cultivator* households. The picture was much the same in the urban areas, where the *self-employed* households exhibited the feature of the *cultivator* households of the rural areas.

3.3.4 From Statement 2, it is seen that, in the rural areas, average value of FCE (AFCE) and that of EPL (AEPL) were Rs. 2,719 and Rs. 391, respectively. The corresponding figures for urban areas were Rs. 5,925 and Rs. 348, respectively. It reveals that average value of fixed capital

Statement 2: Percentage of households reporting (P) fixed capital expenditure (FCE), expenditure on purchase of land (EPL), average values (Rs.) of fixed capital expenditure (AFCE) and average values (Rs.) of expenditure on purchase of land (AEPL) per household by occupation categories during 1.7.02 to 30.6.03

occupational category	P (%)		average expenditure (Rs.) per household		all-India percentage of households

urban					
self-employed	12.1 (13.7)	0.4 -	6596 (1911)	386	36.1
other	5.8 (7.8)	0.2 -	5534 (1629)	326	63.8
all *	8.1 (9.8)	0.3 -	5925 (1726)	348	100

Note:

1. The survey results for the 48th round (AY 1991-92) in brackets. Figures for EPL were not available for the 48th round.

2. In the 59th round, expenditure on 'livestock used as fixed assets' was included in FCE, while expenditure on 'livestock used as fixed assets' was excluded from FCE in the 48th round.

* 'all' includes n.r. cases also.

over time, the corresponding FCE figures obtained from the 48th round of the NSS have also been presented in Statement 2. Since the figures for expenditure on purchase of land were not available from the 48th round survey, the comparison has been restricted to FCE only. It may also be mentioned that, in the 48th round of the NSS, FCE excluded any expenditure on 'livestock used as fixed assets', whereas in the 59th round of the NSS, expenditure incurred on 'livestock

expenditure in the urban areas was almost double the corresponding amount in the rural areas. On the contrary, the rural-urban difference was insignificant in respect of average value of expenditure on purchase of land. Among the household occupational categories, the values of both the AFCE and AEPL were much higher for the *cultivator* households than for the *non-cultivator* households in the rural areas. In the urban areas, the value of AFCE or AEPL is also higher for *self-employed* households than for *other* urban households, though the difference was not as wide as in the case of rural areas.

3.3.5 *Change over time:* To form an idea of the changes in proportions of households incurring FCE and average values of FCE (at current prices),

used as fixed assets' was included in FCE. These changes in coverage have to be kept in view in comparisons across rounds. However, we may note that the proportion of households reporting expenditure on 'livestock used as fixed assets' obtained from the 59th round survey (Table 8: Appendix A, of this report) was very small – 1.4% in rural areas and 0.3% in urban areas. Moreover, the average expenditure on 'livestock used as fixed assets' was Rs. 82 for rural households and Rs. 39 for urban households. In view of this, changes in coverage noted above may not seriously affect comparability of proportion of households reporting FCE and average fixed expenditure per household across rounds. From Statement 2, it is observed that there has been a reduction in the percentage of households reporting FCE for the rural and urban areas. For rural areas, nearly 13.2% households reported FCE during 1.7.2002 to 30.6.2003, which was 15.4% during 1.7.1991 to 30.6.92. The reduction in the percentage of households reporting FCE was also observed for the urban areas – 8.1% households reported FCE during 1.7.2002 to 30.6.2003 as against 9.8% during 1.7.1991 to 30.6.92. It is also seen that, in the rural as well as in the urban areas, the percentage of households reporting FCE declined for all categories of households.

3.3.6 State-Level Variation in Capital Expenditure

3.3.6.1 *In rural areas:* Statement 3 shows the percentage of households (P) incurring FCE and EPL, AFCE and AEPL for *cultivator* and *non-cultivator* households for the rural areas of 20 major states. It is observed that the proportion of households incurring FCE was the highest in Jammu & Kashmir (33.3%) followed by Himachal Pradesh (31.4%). The state with proportion of households incurring FCE was the lowest in Jharkhand (4.3%) preceded by Chhattisgarh (6.6%). Himachal Pradesh also recorded the highest value of AFCE, which was Rs. 13,117. Kerala with an AFCE of Rs. 9,422 followed it. The proportion of households reporting FCE was much higher among *cultivator* households than among *non-cultivator* households for all the major states. In general, the AFCE was also higher among *cultivator* households, with a few exceptions, like Jharkhand, Orissa, Jammu & Kashmir and West Bengal. For Jharkhand, AFCE for *cultivator* household was only Rs. 399 and for *non-cultivator* households the corresponding amount was Rs. 1,430. For Orissa, the AFCE for *cultivator* households was Rs. 1,615 and for *non-cultivator* households the AFCE was Rs. 3,126. For Jammu & Kashmir, the AFCE for *cultivator* households was Rs. 5,124 and for *non-cultivator* households the AFCE was Rs. 5,349. For West Bengal, the AFCE for *cultivator* households was Rs. 1,931 and for *non-cultivator* households the AFCE was Rs. 2,128. It is observed that proportions of households reporting EPL was insignificant. Of the 20 major states, only in case of 6 states the proportion of households reported EPL was more than 0.5%. Punjab recorded the highest proportion with 1.5%, closely followed by Himachal Pradesh (1.1%).

3.3.6.2 *In urban areas:* Statement 4 shows the percentage of households (P) incurring fixed capital expenditure and expenditure on purchase of land, AFCE and AEPL for *self-employed* and *other* households for the urban areas of 21 major states. In the urban areas, the proportion of households reporting fixed capital expenditure was the highest, again, in Jammu & Kashmir (19.5%), followed by Kerala (16.7%). The proportion was the lowest in the case of Delhi (1.1%), preceded by Jharkhand (3.3%). In the urban areas, Kerala had the highest average fixed capital expenditure (AFCE), which was Rs. 15,337, followed by Haryana with an AFCE of Rs.

13,454. It was observed that, in general, the proportion of households reporting FCE was much higher among *self-employed* households than among *other* households with a few exceptions like Chhattisgarh and Uttaranchal. As in the rural areas, the proportion of households incurring expenditure on purchase of land was insignificant – 0.3% at the all-India level

Statement 3: Percentage of rural households (P) reporting fixed capital expenditure (FCE), expenditure on purchase of land (EPL), average values (Rs.) of fixed capital expenditure (AFCE) and of expenditure on purchase of land (AEPL) by occupation category during 1.7.02 to 30.6.03

* 'all' includes n.r. cases also.

3.4 Capital Expenditure by Asset Holding Class (AHC)

3.4.1 Statements 5 and 6 present the incidence, i.e. the proportion of households reporting FCE and EPL for rural and urban areas, respectively, for different asset holding classes (AHCs). The average values of fixed capital expenditure (AFCE) and expenditure on purchase of land (AEPL) are also presented side by side in these statements.

3.4.2 *In rural areas:* Statement 5 shows that incidence of incurring FCE among the rural households, during 1.7.2002 to 30.6.2003, rose almost steadily over all the AHCs – from 5.6% in the lowest AHC (less than Rs. 15,000) to 30.8% in the highest AHC (Rs 8 lakhs and more). Such a feature was also observed in the proportions of households reporting EPL, though for some AHCs the proportions plummeted compared to the previous AHCs. Indeed, the proportion

Statement 5: Percentage of rural households (P) reporting fixed capital expenditure (FCE), expenditure on purchase of land (EPL), average values (Rs.) of fixed capital expenditure (AFCE) and average values (Rs.) of expenditure on purchase of land (AEPL) per household by asset holding classes (AHC) during 1.7.02 to 30.6.03

all classes	8.1	5925	0.3	348

was around 0.3% for the lowest three AHCs, hovered around 0.4% for the middle AHCs and thereafter gradually increased reaching at 1.1% in the highest AHC. From Statement 5 it is seen that, during 1.7.2002 to 30.6.2003, the value of AFCE rose over almost all the AHCs. The rise was particularly sharp for the highest AHC, where the rise in AFCE over the preceding AHC exceeded 100%. The value of AFCE in the highest AHC (Rs. 12,914) was almost 28 times of that in the lowest AHC (Rs. 468). The value of AEPL also rose steadily over all the AHCs. The value of AEPL in the highest AHC (Rs. 2,002) was over 40 times of that in the lowest AHC (Rs. 48).

3.4.3 *In urban areas:* From Statement 6 it is seen that, unlike in rural areas, the proportion of household spending on FCE did not rise steadily over the AHCs in the urban areas, although it showed, in general, an increasing trend with the increase in household asset holdings. The proportion fell for three AHCs as compared to its value in the previous AHCs. In the urban areas, the proportion of households reporting FCE was 2.6% in the lowest AHC and it rose to 12.9% in the highest AHC. On the other hand, no definite pattern was observed in the proportion of households reporting EPL over the AHCs.

The AFCE in the urban areas, during 1.7.2002 to 30.6.2003, rose from Rs. 217 in the lowest AHC to Rs. 17,560 in the highest AHC – a whopping 80 times increase. Compared to this, the AEPL rose from Rs. 75 to Rs. 725 in these two extreme AHCs - a meagre 10 times increase.

3.4.4 State-Level Variation in Capital Expenditure

3.4.4.1 *In rural areas:* Statement 7 presents the percentage of households reporting fixed capital expenditure and average values of fixed capital expenditure over asset holding classes during 1.7.2002 to 30.6.2003 for the rural areas of 20 major states. Similarly, in Statement 8, the percentage of households reporting expenditure on purchase of land and the average values of expenditure on purchase of land are given. In general, for almost all the states, the percentage of households reporting fixed capital expenditure was higher in the higher household asset holding classes. The average fixed capital expenditure was also higher in the higher asset holding classes in almost all the states. As Statement 8 indicates, no such general feature was, however, observed either in respect of the proportion of households reporting expenditure on purchase of land or in respect of the average expenditure on purchase of land.

Statement 7: Percentage of rural households (P) reporting fixed capital expenditure (FCE) and average (Rs.) fixed capital expenditure (AFCE) per household by asset holding classes (AHC) during 1.7.02 to 30.6.03

3.4.4.2 *In urban areas:* Statement 9 presents the percentage of households reporting fixed capital expenditure and average values of fixed capital expenditure over asset holding classes during 1.7.2002 to 30.6.2003 for the urban areas for 21 major states. Similar estimates on purchase of land are shown in Statement 10. In general, for almost all the states, percentage of households reporting fixed capital expenditure as well as the average expenditure rose with the increase in the household asset holdings. The proportion of households, on the other hand, reporting expenditure on purchase of land was very low irrespective of the size of household asset in almost all the states, as seen from statement 10. This observation holds in case of average expenditure on purchase of land, too.

Statement 9: Percentage of urban households (P) reporting fixed capital expenditure (FCE) and average (Rs.) fixed capital expenditure (AFCE) per household by asset holding classes (AHC) during 1.7.02 to 30.6.03

state	household asset holding (Rs. 000)

3.5 Broad Heads of Expenditure (BHEs)

3.5.1 The three broad heads under which various items of capital expenditure were incurred by households were: 'residential plots and buildings', 'farm business' and 'non-farm business'. It would be of interest to examine the relative importance of each of these in the formation of fixed capital in rural and urban India. Towards this end, the percentage of households reporting fixed capital expenditure, expenditure on purchase of land and normal repair and maintenance expenditure during 1.07.2002 – 30.06.2003, have been presented in Statement 11 for rural and urban India and the corresponding average values of expenditure have been given in Statement 12. The percentage shares of the three BHEs for each type of expenditure have been presented in Statement 13.

Statement 11: Percentage of households reporting fixed capital expenditure (FCE), expenditure on purchase of land (EPL) and normal repair and maintenance expenditure (NRME) by broad heads of expenditure (BHE) during 2002-03

BHE (1)	all-India					
	rural			urban		
	FCE (2)	EPL (3)	NRME (4)	FCE (5)	EPL (6)	NRME (7)
residential plots and buildings	5.5	0.2	26.1	4.5	0.2	15.5
farm business	6.8	0.2	19.0	0.9	0.0	2.4
non-farm business	2.1	0.0	7.5	3.2	0.0	13.3
all	13.2	0.5	42.1	8.1	0.3	27.4

Note: In columns 3 and 6, sum of the entries against first three rows may not tally with that against the row 'all', due to rounding.

Statement 12: Average (Rs.) fixed capital expenditure (FCE), expenditure on purchase of land (EPL) and normal repair and maintenance expenditure (NRME) per household by broad heads of expenditure (BHE) during 2002-03

BHE (1)	all-India					
	rural			urban		
	FCE (2)	EPL (3)	NRME (4)	FCE (5)	EPL (6)	NRME (7)
residential plots and buildings	1742	133	311	4921	309	312
farm business	593	245	326	154	25	60
non-farm business	384	14	65	850	14	216
all	2719	391	702	5925	348	589

Note: Sum of the entries against first three rows may not tally with that against the row 'all', in some columns, due to rounding.

Statement 13: Percentage share of fixed capital expenditure (FCE), expenditure on purchase of land (EPL) and normal repair and maintenance expenditure (NRME) per household by broad heads of expenditure (BHE) during 2002-03

BHE (1)	all-India					
	rural			urban		
	FCE (2)	EPL (3)	NRME (4)	FCE (5)	EPL (6)	NRME (7)
residential plots and buildings	64.1	34.0	44.3	83.1	88.8	53.0
farm business	21.8	62.7	46.4	2.6	7.2	10.2
non-farm business	14.1	3.6	9.3	14.3	4.0	36.7
all	100.0	100.0	100.0	100.0	100.0	100.0

Note: Entries against first three rows may not add up to 100, in some columns, due to rounding.

3.5.2 Relative importance of BHEs:

It is seen from Statement 11 that, during 1.7.2002 – 30.6.2003, in the rural areas, two broad heads of expenditure, on which most households reported expenditure were, 'residential plots and buildings', and 'farm business' and in the urban areas, the two broad heads of expenditure, on which higher proportions of households reported expenditure were 'residential plots and buildings', and 'non-farm business'. In the rural areas, the percentage of households reporting FCE was higher for 'farm business' (6.8%) followed by 'residential plots and buildings' (nearly, 5.5%). In the case of normal repair and maintenance, 26.1% of the rural households reported expenditure on 'residential plots and buildings' followed by 'farm business', which was around 19%. In the case of

urban areas, the percentage of households reporting fixed capital expenditure for 'residential plots and buildings' was higher (4.5%), followed by 'non-farm business' (3.2%). For normal repair and maintenance, the percentage of households reporting expenditure on 'residential plots and buildings' was 15.5% and on 'non-farm business' was 13.3%, in urban areas. From Statement 13, it is observed that in both the rural and urban areas, the major portion of the fixed capital expenditure related to 'residential plots and buildings' – 64.1% and 83.1% in the rural and the urban areas, respectively. In the case of expenditure on purchase of land, the major share of expenditure was on 'farm business' (63%) in the rural areas in contrast to 'residential plots and buildings' (89%) in the urban areas. It is also observed, that for all the three types of expenditure, 'non-farm business' in rural areas was least important among the three broad heads of expenditure. In urban areas, for FCE and NRME, 'farm business' was the least important among the three broad heads of expenditure and 'non-farm business' was the least important among the three broad heads of expenditure for EPL.

3.5.3 State-Level Variation in Broad Heads of Expenditure (BHE)

3.5.3.1 *In rural areas:* It is observed from Statement 14 that, during 1.7.2002 – 30.6.2003, of the 20 major states, for which the figures are presented, 11 states showed higher percentages of households reporting FCE on 'farm business'. In the remaining states, higher percentages of households reported FCE on 'residential plots and buildings'. In the case of NRME also, higher percentages of households incurred expenditure on the two BHEs, viz. 'farm business' and 'residential plots and buildings'. The percentages of households reporting NRME were higher on 'residential plots and buildings' in respect of 12 states and on 'farm business' in respect of 8 states. Statement 15 presents the percentage share of each of the three BHEs, viz., 'residential plots and buildings', 'farm business' and 'non-farm business' separately for each type of expenditure, viz., FCE, EPL and NRME. In the case of FCE, the major portion of the expenditure was observed for the BHE 'residential plots and buildings'. For NRME also, a majority of the states incurred more expenditure on 'residential plots and buildings', whereas for EPL the share of 'farm business' was higher in the case of 13 states.

3.5.3.2 *In urban areas:* Statement 16 presents the percentage of households incurring expenditure on each of the three BHEs during 01.07.2002 – 30.06.2003 and Statement 17 gives the share of expenditure separately for each BHE. It is observed from Statement 16 that as expected in the urban areas, the percentage of households reporting expenditure on 'farm business' was lower than that for 'residential plots and buildings', or for 'non-farm business' under each type of expenditure, viz., FCE, EPL and NRME. It is also observed from Statement 17 that in the case of FCE, major portion of the expenditure on 'residential plots and buildings' was observed for 20 major states and in case of NRME, it was for 16 states.

Statement 14: Percentage of rural households reporting fixed capital expenditure (FCE), expenditure on purchase of land (EPL) and normal repairs and normal repair and maintenance expenditure (NRME) during 2002-03 by broad head of expenditure in major states

3.5.4 Changing Importance of BHEs over Time

3.5.4.1 Having studied the relative importance of the BHEs during 1.7.2002 –30.6.2003, a natural question arises: has there been any shift in the importance of these broad heads over time? To address this issue, the average values of FCE and total expenditure (i.e. total of fixed capital expenditure, expenditure on purchase of land and normal repair and maintenance expenditure), during agricultural years 1971-72, 1981-82, 1991-92 and 2002-03, per household have been presented, for the rural areas, in Statement 18 for each of the three BHEs. In the earlier rounds, the term gross capital expenditure (GCE) was used, instead of total expenditure, which included total of fixed capital expenditure, expenditure on purchase of land and normal repair and maintenance expenditure. In Statement 19, the percentage distributions of fixed capital expenditure and of total expenditure by BHE, during agricultural years 1971-72, 1981-82, 1991-92 and 2002-03, for the rural areas, have been presented. Statement 20 gives the average values

of fixed capital expenditure and of total expenditure, during agricultural years 1981-82, 1991-92 and 2002-03 per household in the urban areas for each of the BHEs and the corresponding percentage distributions are given in Statement 21.

3.5.4.2 *In rural areas:* It is evident from Statement 19 that, the relative importance of the BHE 'residential plots and buildings' grew at the expense of 'farm business' for FCE. This observation is valid for total expenditure too. The percentage share of 'residential plots and buildings', in FCE, grew to 64% during AY 2002-03 from 40% during AY 1971-72 and over this period the share of 'farm business' dropped from 49% to 22%. The share of 'non-farm business', in FCE did not change drastically over this period – it was static at 10% in AY 1971-72 and AY 1981-82 and increased to 14% in AY 2002-03 from 8% in AY 1991-92. From Statement 18, it is seen that, the average value of fixed capital expenditure (AFCE) per household on the BHE 'residential plots and buildings', at current prices, grew by 46 times to reach Rs. 1742, during AY 2002-03, from Rs. 38 during AY 1971-72. Compared to this, the AFCE per household on the BHE 'farm business' rose 13 times and on 'non-farm business' the increase was 38 times.

Statement 18: Average values (Rs.) of fixed capital expenditure (AFCE) and total expenditure per household by broad heads of expenditure during agricultural years 1971-72, 1981-82, 1991-92 and 2002-03

broad head of expenditure	rural							
	AFCE				total expenditure

all items	100.0	100.0	100.0	100.0	100.0	100.0

3.5.4.3 *In urban areas:* Statement 21 shows that, the rise in the percentage share in the BHE 'residential plots and buildings', was spectacular between AY 1981-82 and AY 2002-03 – about 30 percentage points - for both FCE and total expenditure. Interestingly, this rise in importance occurred almost entirely at the expense of 'non-farm business', for which the percentage share plummeted by almost 28 percentage points in the case of FCE. From Statement 20 it is seen that, the AFCE per household on the BHE 'residential

plots and buildings', at the current prices, grew by 12 times to reach Rs. 4,921, during AY 2002-03, from Rs. 398 during AY 1981-82. Compared to this, AFCE per household on each of the BHEs 'farm business' and 'non-farm business' rose 3 times during this period.

3.6 Sources of Financing Capital Expenditure

3.6.1 Households financed capital expenditure by borrowing from different sources, termed as credit agencies in Chapter Two. It would be of interest to study the flow of credit from different credit agencies to the households on different types of capital expenditure. It may be mentioned that the various credit agencies have been clubbed into two groups, viz. 'institutional agencies' and 'non-institutional agencies', as defined in Chapter Two, for convenience of discussion in this chapter.

3.6.2. *Incidence of borrowings to finance capital expenditure:* In Statement 22 the percentage of households, for both the rural and urban areas that reported borrowings from credit agencies for FCE and EPL have been presented. It is seen that in the rural areas, a higher proportion of households resorted to borrowings from non-institutional agencies for financing fixed capital expenditure on all the three broad heads of expenditure, viz., 'residential plots and buildings', 'farm business' and 'non-farm business'. The scenario in the urban areas is also the same as that in the rural areas and a higher proportion of households borrowed from the non-institutional agencies to finance fixed capital expenditure. It may be noted that the percentage of households resorted to borrowings to finance expenditure on purchase of land was negligible.

Statement 22: Percentage of households reported borrowings for fixed capital expenditure (FCE) and expenditure on purchase of land (EPL) by broad head of expenditure during 2002-03

type of expenditure	broad head of expenditure								
	residential plots and buildings			farm business			non-farm business		
	inst. agency	non-inst. agency	all	inst. agency	non-inst. agency	all	inst. agency	non-inst. agency	all
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
rural									
FCE	0.4	1.3	1.7	0.4	0.5	0.9	0.1	0.2	0.3
EPL	0.02	0.05	0.07	0.02	0.06	0.08	0.00	0.00	0.00
urban									
FCE	0.7	0.9	1.5	0.1	0.1	0.1	0.2	0.3	0.5

3.6.3 Average amount (Rs.) financed from borrowings for capital expenditure from the institutional and non-institutional agencies

3.6.3.1 *In rural areas:* In Statement 23, the average amount financed from borrowings for FCE and EPL have been presented for each broad head of expenditure – separately for the rural and urban areas. It is seen from Statement 23 that, in the rural areas, average amount, per household, financed from non-institutional agencies for meeting FCE on 'residential plots and buildings' was higher (Rs. 211) than the amount financed from institutional agencies (Rs. 156). This is in sharp contrast to the situation that prevailed in the case of financing FCE for 'farm business' and 'non-farm business' where the households borrowed more from the institutional agencies to finance FCE.

3.6.3.2 *In urban areas:* It is seen from Statement 23 that, in the urban areas, the households borrowed more from institutional agencies to finance FCE on 'residential plots and buildings' and 'non-farm business'. For 'residential plots and buildings', in the urban areas, the average amount financed from institutional agencies was Rs. 1,274 and from non-institutional agencies it was Rs. 273. In the case of 'non-farm business', while the average amount financed, by a household, from institutional agencies was Rs. 245, the average amount financed from non-institutional agencies was Rs. 68. In contrast, households in the urban areas borrowed more from non-institutional agencies to finance FCE on 'farm business'.

Statement 23: Average amount (Rs.) financed from borrowings for fixed capital expenditure (FCE) and expenditure on purchase of land (EPL) per household by broad head of expenditure during 2002-03

type of expenditure	broad head of expenditure								
	residential plots and buildings			farm business			non-farm business		
	inst. agency	non-inst. agency	all	inst. agency	non-inst. agency	all	inst. agency	non-inst. agency	all

EPL	67	17	85	1	11	12	5	1	7

3.6.4 Shares of institutional and non-institutional agencies in the finance of capital expenditure

3.6.4.1 *In rural areas:* In Statement 24, percentage share of capital expenditure on different broad heads, financed from borrowings for FCE and EPL has been given separately for each broad head of expenditure, for the rural and urban areas. It is seen that in the rural areas, nearly 42% of FCE on 'non-farm business' was financed from borrowings, of which the share of institutional agencies was 26 percentage points. For FCE on 'farm business', households borrowed nearly 35% of total expenditure and of this, they borrowed nearly 22 percentage points from institutional agencies. Compared to these, a little over one-fifth of the total FCE on 'residential plots and buildings' was financed through borrowings. For EPL also, a little over one fifth of total expenditure on 'residential plots and buildings' was financed from borrowings. For the expenditure on purchase of land for 'farm business' the households borrowed nearly 15% and it was a meagre 5% for 'non-farm business'.

3.6.4.2 *In urban areas:* From Statement 24 it is seen that, in the urban areas, households borrowed nearly 37% of FCE on 'non-farm business' and nearly 44% on 'farm business' and around 31% for FCE on 'residential plots and buildings'. In the borrowing for FCE on 'non-farm business', the share of institutional agencies was 28.8% and the share of institutional agencies in the borrowings for FCE on 'farm business' was 17.5%. In the case of 'residential plots and buildings' the share of institutional agencies was nearly 26%. For EPL, more than a quarter of the expenditure on 'residential plots and buildings' was from the borrowings, almost half of the expenditure on each of 'farm business' and 'non-farm business' under EPL was financed from borrowings and institutional agencies played the major role in providing credit to the urban households when the purpose of the borrowings had been either 'residential plots and buildings' or 'non-farm business'.

Statement 24: Percentage shares of amount financed from borrowing for fixed capital expenditure (FCE) and expenditure on purchase of land (EPL) by broad head of expenditure during 2002-03

type of expenditure	broad head of expenditure (BHE)								
	residential plots and buildings			farm business			non-farm business		
	inst. agency	non-inst. agency	all	inst. agency	non-inst. agency	all	inst. agency	non-inst. agency	all
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
	rural								
FCE	9.0	12.1	21.1	21.6	13.2	34.6	26.0	15.6	41.7
EPL	9.0	12.9	21.9	8.8	5.9	14.7	5.0	0.0	5.0
	urban								
FCE	25.9	5.5	31.4	17.5	26.0	44.2	28.8	8.0	36.8
EPL	21.8	5.6	27.4	3.7	44.3	48.0	39.5	8.8	48.3

Note: Sum of the percentage shares for 'inst. agency' and 'non-inst. agency' may not tally with that for 'all' for the different BHEs, due to rounding.

3.7 Aggregate Values of Sale and Loss of Household Assets

3.7.1 Till now, various aspects of household capital expenditure and some aspects of normal repair and maintenance expenditure during 1.7.2002 – 30.6.2003 have been looked into. A related issue of interest is: to what extent were the household assets sold and lost during 1.7.2002 – 30.6.2003?

3.7.2 *Proportion of households reporting sale / loss of assets:* Statement 25 shows that the incidence of sale of assets or loss of assets was higher among the rural households than among the urban households. At the all-India level, about 4.5% of rural households and 1.6% of urban households reported sale of assets. In the case of loss of assets, the rural-urban pattern was more uneven – about 6.9% of rural households and 2.2% of urban households reported loss of assets.

Statement 25: Aggregate value of assets sold and lost and percentage of households reporting sale and loss of assets during 1.7.02 to 30.6.03 in rural and urban areas

item	rural	urban	all	all-India
				% share of rural areas
(1)	(2)	(3)	(4)	(5)
value of assets sold (Rs. Crores)	6769	1941	8710	78
no. of households reporting sale (in 00,000)	66	9	75	88
% hh reporting sale	4.5	1.6	3.7	-
value of assets lost (Rs. Crores)	4203	882	5085	83
no. of households reporting loss (in 00,000)	102	12	114	89
% hh reporting loss	6.9	2.2	5.6	-

3.7.3 *Aggregate values of sale and loss of assets*: Statement 25 also presents the aggregate values of sale and loss of assets. It is seen that, at the aggregate level, assets sold and lost were valued at Rs 6,769 crores and 4,203 crores, respectively, for the rural areas and Rs 1,941 crores and Rs. 882 crores, respectively, in the urban areas. Of all households that reported sale of assets, about 88% belonged to the rural areas and they accounted for 78% of the aggregate value of assets sold – a share little less than their numbers. The corresponding proportions in the case of loss of assets were 89% and 83%.

3.8 Sale and Loss of Household Assets by Household Asset Holding Class (AHC)

3.8.1 Statement 26 presents the average amount of sale and loss of assets per household by asset holding class (AHC) for the rural and urban areas, during 1.7.2002 - 30.6.2003. The statement

Statement 26: Average value (Rs.) of sale and loss of assets per household during 2002-03 and average value (Rs.) of assets per household as on 30.6.02 by asset holding class (AHC)

AHC (Rs.000)	all-India

Source of the estimates of average value of assets per household: NSS Report No. 500 (Household Assets and Liabilities in India as on 30.06.2002)

and urban areas, the average value of loss of assets, registered a fall in some of the AHCs. It may be noted that the average value of sale and loss of assets and average value of assets are strictly not comparable as they relate to two different reference periods. But because of the closeness of the two periods, one may observe that, for 'all classes', the average value of sale and loss of assets together was much less than 1% of the average value of assets held by the households in both the rural and urban areas.

3.9 Sale and Loss of Household Assets for Broad Heads of Asset

3.9.1 Having studied the behaviour of average sales and losses of assets over the AHCs for the rural and urban households, it would be interesting to take a look at the distribution of sale and loss of assets over the broad heads of asset, viz. 'residential plots and buildings', 'farm business' and 'non-farm business' and 'other'. In the category 'other' are included the following: 'livestock and poultry kept as inventory', 'financial assets', 'transport equipment for household use', 'bullion / ornaments' and 'household durable goods'. Statements 27 and 28 display the percentage share of sale and loss of assets for households for these broad heads of asset in the rural and urban areas, respectively.

3.9.2 *In rural areas:* It is seen from Statement 27 that, of the different heads of asset, the assets for 'farm business' accounted for a major portion of the value of sale or loss of assets in the rural areas. This broad head of asset accounted for 67% of sales and 51.8% of loss of assets in rural India. It is, moreover, observed that percentage share in total sale or loss of assets for 'farm business' had generally shown an increasing trend with an increase in household asset holding - though the increase has not been uniform for all the AHCs. The survey has revealed, for instance, that of the total value of sale of assets by the households belonging to the lowest AHC (less than Rs. 15,000), 'farm business' accounted for nearly 44% compared to 74% in the case of households belonging to the highest AHC (Rs. 8 lakhs or more). For the broad head of asset 'residential plots and buildings', generally the share in the total value of loss of assets is found to be lower for households in the higher AHCs compared to households in the lower AHCs. For example, the share of loss for 'residential plots and buildings' that was about 42% for the households in the lowest AHC, dropped to 11% for households in the highest AHC.

Statement 27: Percentage distribution of sale and loss of assets of households by broad head of asset for each asset holding class (AHC) during 2002-03

3.9.3 *In urban areas:* As seen from Statement 28, in contrast to the scenario prevailing in the rural areas, 'residential plots and buildings' and 'other' had been almost equally important major heads of asset for sale of assets in the urban areas. They together accounted for about 71% of the total sale of assets and individually 37% and 34% of the total sale. It is, moreover, noticed that the shares of sale of assets relating to 'residential plots and buildings' or 'other' residual heads of assets, did not show any definite pattern with the increase in household asset holding. At the other end, the major loss of assets had been in the case of 'non- farm business' that accounted for nearly 37% of total loss and in the case of 'other' that accounted for nearly one-third of the total loss of assets. It is, moreover, noticed that, among the households in the higher AHCs, generally, loss was prominent for the heads of asset relating to 'non-farm business'. For instance, while the loss of assets of 'non-farm business', for the households belonging to the lowest AHC was a meagre 8%, the loss was as high as 63% for the highest AHC.

Appendix - B

Sample Design and Estimation Procedure

1 Sample Design

1.1 A stratified multi-stage sampling design for rural as well as urban areas was adopted for selection of the sample units for the 59th round survey. The first-stage units (FSU) were the census villages (panchayat wards for Kerala) for rural areas and the NSSO Urban Frame Survey (UFS) blocks for urban areas. The ultimate-stage units (USU) were the households for both rural and urban areas. Hamlet-groups/ sub-blocks constituted the intermediate stage whenever these were formed in the selected FSU.

1.2 *Selection of the first-stage units:* The various steps involved before making the selection of the FSUs are discussed at length in the following few paragraphs before the issue of selection of USUs within an FSU is taken up.

1.2.1 *Sampling frame for first-stage units (FSUs):* For rural areas, the list of villages as per the population census of 1991 constituted the sampling frame for selection of sample FSUs for most of the states. For the rural areas of Kerala, however, the list of panchayat wards was used as the sampling frame for selection of panchayat wards. For Nagaland, the list of villages located within 5 kilometers of a bus route constituted the sampling frame, whereas, the list of accessible villages constituted the sampling frame for Andaman & Nicobar Islands. For the urban areas, the latest UFS frame was used as the sampling frame for selection of FSUs. The Leh (Ladakh) and Kargil districts of Jammu & Kashmir were kept outside the survey coverage.

1.2.2 *Stratification of first-stage units in rural areas:* For formation of strata in the rural areas, village population as per the census of 1991 was considered. From the list of villages of each state/ union territory (u.t.), initially, two *special strata* were formed at the state/ u.t. level as stated below:

Stratum 1: all FSUs with population between 0 and 50

Stratum 2: FSUs with population more than 15,000.

In a state/u.t, special stratum 1 was formed whenever at least 50 such FSUs were found in a state/u.t and special stratum 2 was formed if at least 4 such FSUs were found in a state/u.t. Otherwise, such FSUs were merged with the general strata.

From FSUs other than those covered under special strata 1 & 2, general strata were formed and its numbering started from 3. Each district of a state/u.t was normally treated as a separate stratum. However, if the census rural population of the district was greater than or equal to 2 million as per the population census of 1991 or 2.5 million as per population census of 2001, the district was split

into two or more strata by grouping contiguous tehsils. However, in Gujarat, some districts were not wholly included in an NSS region. In such cases, the part of the district falling in an NSS region constituted a separate stratum.

1.2.3 *Stratification of first-stage units in urban areas*: In the urban sector, strata were formed within each NSS region on the basis of size class of towns as per the population census of 2001. For stratification of towns by size class, provisional population of towns as per the population census of 2001 have been used. The stratum numbers and their composition (within each region) are given below.

stratum number	size class of town
1	all towns with populations of less than 50,000
2	all towns with populations of 50,000 or more but less than 2 lakhs
3	all towns with populations of 2 lakhs or more but less than 10 lakhs
4, 5, 6,...	each city with a population of 10 lakhs or more

The stratum numbers remained as above even if, in some region, some of the strata did not exist.

1.2.4 *Allocation of FSUs among Strata*: A total of 10,608 FSUs (6,784 villages and 3,824 UFS blocks) were allocated at the all-India level on the basis of Investigator strength and this was allocated to the different states and u.t.s in proportion to their provisional population as per the population census of 2001 subject to the availability of Investigator, ensuring more or less uniform workload. The state/u.t. level sample size was then allocated between the rural and urban areas in proportion to their provisional population as per the census of 2001 with 1.5 weightage to urban areas subject to the restriction that urban sample size for bigger states like Maharashtra, Tamil Nadu, etc., would not exceed the rural sample size. The number of FSUs allocated for rural and urban areas of each state/u.t. are given in Table A at the end of this chapter.

Within each of the rural and urban sectors of a state/u.t., the respective sample size was allocated to the different strata in proportion to the provisional population of the stratum as per the census of 2001. Allocation at stratum level was adjusted to a multiple of 2 with a minimum sample size of 2. However, a multiple of 4 FSUs was allocated to a stratum wherever possible.

1.2.5 *Selection of first-stage units*: FSUs were selected with probability proportional to size with replacement (PPSWR), size being the population as per the census of 1991 in all the strata for the rural sector except for stratum 1. In stratum 1 of the rural sector and in all the strata of the urban sector, selection was done using simple random sampling without replacement (SRSWOR). Samples were drawn in the form of two independent sub-samples in both the rural and urban sectors.

1.3 *Selection of ultimate-stage units within an FSU*: The remaining paragraphs of this sub-section outlines the various steps leading to the actual selection of USUs within an FSU.

1.3.1 *Selection of hamlet-groups/sub-blocks:* Each large villages or blocks having an approximate present population of 1200 or more was divided into a suitable number of hamlet-groups and sub-blocks, as given below:

approximate present population of the sample village/block	no. of hamlet-groups/sub-blocks formed
less than 1200	1 @
1200 to 1799	3
1800 to 2399	4
2400 to 2999	5
3000 to 3599	6
.....and so on	

@ In this case no hamlet-group/sub-block was formed.

For rural areas of Himachal Pradesh, Sikkim, Nagaland and Poonch, Rajouri, Udhampur and Doda districts of Jammu and Kashmir, the number of hamlet-groups formed was as follows:

approximate present population of the sample village	no. of hamlet-groups formed
less than 600	1 @
600 to 899	3
900 to 1199	4
1200 to 1499	5
.....and so on	

@ In this case there was no hamlet-group/sub-block formation

Hamlet-groups / sub-blocks were formed by more or less equalising populations. Two hamlet-groups / sub-blocks were selected from a large village or block by SRSWOR. Listing and selection of the households were done independently in the two selected hamlet-groups/sub-blocks so formed.

1.3.2 *Stratification of households:* All the households listed in a village/ UFS block in case there was no hamlet group/ sub-block formation and all the households listed in a hamlet group/ sub-block in case of hamlet group/ sub-block formation were stratified into seven second-stage strata (SSS). Second-stage strata in rural and urban sectors were formed as follows:

(a) *Second-stage strata in rural sector:* The households of a sample village/ hamlet group were classified into seven second-stage strata for the All-India Debt and Investment Survey (AIDIS) on the joint consideration of “land possessed” and “indebtedness status” of the households. First, all the households of the sample village/ selected hamlet group were divided into four second-stage strata

used for the Land Holding Survey (LHS SSS) based on the area of land possessed by them. The composition of the households for the four LHS SSS are as specified below:

LHS SSS number	households with
1	$L < 0.005$
2	$0.005 = L < X$
3	$X = L < Y$
4	$Y = L$

Here L is area of land in hectares possessed by the household and X and Y were determined at the state/ u.t. level in the following ways:

From the data of the NSS 48th round, the households having land area 0.005 hectare or more were considered. Two cut-off points, X and Y, were determined at state/u.t. level in such a way that 40% of these households possess land area less than X, 40% possess land area between X & Y and 20% possess land area greater than Y.

The seven second-stage strata for AIDIS were formed for rural sector with the composition of the households as follows:

AIDIS SSS number	composition of households
1	indebted households belonging to rural LHS SSS 1
2	not indebted households belonging to rural LHS SSS 1
3	indebted households belonging to rural LHS SSS 2
4	not indebted households belonging to rural LHS SSS 2
5	households indebted to institutional agencies with or without being indebted to non-institutional agencies and belonging to rural LHS SSS 3 & 4
6	households indebted to non-institutional agencies only and belonging to rural LHS SSS 3 & 4
7	not indebted households belonging to rural LHS SSS 3 & 4

A household was considered to be indebted on the date of survey if the household had at least one cash loan with outstanding amount Rs. 300 or more.

(b) *Second-stage strata in urban sector:* The households of a sample block/sub-block were classified into seven second-stage strata for AIDIS, considering the monthly per capita consumption expenditure (mpce) and indebtedness status of the households. For this, the households were first grouped into four mpce classes as follows:

LHS SSS number	households with	
1	mpce < A	Three cut-off points, viz. A, B & C, at state/u.t. level were determined using the NSS 55 th round data in such a way that 30% of the households had MPCE less than A, 30% had MPCE more than or equal to A but less than B, 30% had MPCE more than or equal to B but less than C, and the remaining 10% of the households had MPCE more than or equal to C.
2	A = mpce < B	
3	B = mpce < C	
4	C = mpce	

The seven second-stage strata for the AIDIS were formed for urban sector with the composition of the households as follows:

AIDIS SSS number	composition of households
1	indebted households belonging to MPCE class 1
2	not indebted households belonging to MPCE class 1
3	indebted households belonging to MPCE class 2
4	not indebted households belonging to MPCE class 2
5	households indebted to institutional agencies with or without being indebted to non-institutional agencies and belonging to MPCE classes 3 & 4
6	households indebted to non-institutional agencies only and belonging to MPCE classes 3 & 4
7	not indebted households belonging to MPCE classes 3 & 4

1.3.3 *Selection of households:* 14 households were selected from each sample village/ block. Two households were selected from each SSS in case there was no hamlet group/ sub-block formation. In case of hamlet group/ sub-block formation, one household was selected from each hamlet group/ sub-block. The households were selected from each SSS by simple random sampling without replacement (SRSWOR). Each sample FSU was visited twice in the 59th round. Visit 1 and Visit 2 schedules were canvassed in the same set of sample households during the first and second visit, respectively.

1.4 *FSUs and SSUs allocated and surveyed:* A total of 10,608 FSUs (6,784 villages and 3,824 UFS blocks) were allocated at the all-India level, out of which 10,297 FSUs (6,551 in rural sector and 3,746 in urban sector) and 1,39,039 SSUs (89,718 in the rural sector and 49,321 in the urban sector) were surveyed in both visit I and visit II. The number of sample villages/blocks allotted and the number of households surveyed in both visit I and visit II, for different states/u.t.'s and all-India are given in Table A at the end of this chapter.

2 ESTIMATION PROCEDURE

Procedure for obtaining estimates of aggregates, ratios, and their RSEs is briefly indicated below:

2.1 Notations:

s = subscript for stratum

m = subscript for sub-sample ($m = 1, 2$)

i = subscript for FSU [village (panchayat ward) / block]

d = subscript for a hamlet-group/sub-block ($d = 1, 2$)

j = subscript for second stage stratum of an FSU/ hg/sb

k = subscript for sample household under a particular second stage stratum within an FSU/ hg/sb

D = total number of hg's/sb's formed in the sample village (panchayat ward) / block

$D^* = 1$ if $D = 1$

$= D / 2$ for FSUs with $D > 1$

N = total number of FSUs in rural stratum 1 or in any urban stratum

Z = total size of a rural stratum other than stratum 1 (= sum of sizes for all the FSUs of a rural stratum other than stratum 1)

z = size of sample village used for selection.

n = number of sample village / block surveyed including zero cases but excluding casualty for a particular sub-sample and stratum.

H = total number of households listed in a second-stage stratum of a hamlet-group/sub-block of sample FSU

h = number of households surveyed in a second-stage stratum of a hamlet-group/sub-block of sample FSU

x, y = observed values of the characteristics x, y under estimation

\hat{X}, \hat{Y} = estimates of population totals X, Y for the characteristics x, y

Under the above notations,

y_{smidjk} = observed value of the characteristic y for the k -th household in the j -th second-stage stratum of the d -th hg/sb ($d = 1, 2$) of the i -th FSU belonging to the m -th sub-sample for the s -th stratum;

However, for ease of understanding, a few symbols have been suppressed in the following paragraphs where they are obvious.

2.2 Estimation of aggregates for a particular sub-sample(m) and stratum(s) in rural sector:

For an SS;

(a) Estimation formula for stratum 1:

(i) For households selected in j -th second stage stratum:

$$\hat{Y}_j = \frac{N}{n_j} \sum_{i=1}^{n_j} D_i^* \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right] : j = 1(1)7$$

(ii) For all selected households:

$$\hat{Y} = \sum_{j=1}^7 \hat{Y}_j$$

(b) Estimation formula for other strata:

(i) For households selected in j -th second-stage stratum:

$$\hat{Y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} D_i^* \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right] : j = 1(1)7$$

(ii) For all selected households:

$$\hat{Y} = \sum_{j=1}^7 \hat{Y}_j$$

2.3 Estimation of aggregates for a particular sub-sample(m) and stratum(s) in urban sector:

For an SS; estimation formula for a stratum:

(i) For households selected in j -th second stage stratum:

$$\hat{Y}_j = \frac{N}{n_j} \sum_{i=1}^{n_j} D_i^* \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right] ; j = 1(1)7$$

(ii) For all selected households:

$$\hat{Y} = \sum_{j=1}^7 \hat{Y}_j$$

2.4 Overall estimates for aggregates: Overall estimate for the aggregate for a stratum (\hat{Y}_s) based on two sub-samples is obtained as:

$$\hat{Y}_s = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{sm}$$

2.5 Overall estimate of aggregates at state/u.t./all-India level: The overall estimate \hat{Y} at the state/ u.t./ all-India level is obtained by summing the stratum estimates \hat{Y}_s over all strata belonging to the State/ u.t./ all-India.

2.6 *Estimates of ratios:* Let \hat{Y} and \hat{X} be the overall estimates of the aggregates Y and X for two characteristics y and x , respectively, at the state/ u.t./ all-India level.

Then the combined ratio estimate (\hat{R}) of the ratio ($R = \frac{Y}{X}$) will be obtained as

$$\hat{R} = \frac{\hat{Y}}{\hat{X}}$$

2.7 *Estimates of error:*

The estimated variances of the above estimates will be as follows:

A) For aggregate \hat{Y} :

$$V\hat{a}r(\hat{Y}) = \sum_s V\hat{a}r(\hat{Y}_s)$$

where $V\hat{a}r(\hat{Y}_s)$ are as given below.

a) For strata with PPSWR selection at first stage (i.e. for all rural strata except stratum 1):

$$V\hat{a}r_{ppswr}(\hat{Y}_s) = \sum_j V\hat{a}r(\hat{Y}_{sj})$$

$$\text{where } V\hat{a}r_{ppswr}(\hat{Y}_{sj}) = \frac{1}{n_{sj}(n_{sj} - 1)} \left[\sum_{i=1}^{n_{sj}} \frac{Z_s^2 \hat{Y}_{sij}^2}{Z_{si}^2} - n_{sj} \hat{Y}_{sj}^2 \right],$$

$$\hat{Y}_{sij} = D_{si}^* \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1,jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2,jk} \right]$$

b) For strata with SRSWOR selection at first stage (i.e. for rural stratum 1 and all urban strata):

$$V\hat{a}r_{srswor}(\hat{Y}_s) = \frac{1}{4} (\hat{Y}_{s1} - \hat{Y}_{s2})^2,$$

where \hat{Y}_{s1} and \hat{Y}_{s2} are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's'.

B) For ratio \hat{R} :

$$M\hat{S}E(\hat{R}) = \frac{1}{(\hat{X})^2} \left[\sum_s M\hat{S}E_s(\hat{R}) + \sum_{s'} M\hat{S}E_{s'}(\hat{R}) \right]$$

where s, s' indicate respectively the strata with PPSWR and SRSWOR selection at first stage.

a) For strata with PPSWR selection at first stage (i.e. for all rural strata except stratum 1):

$$M\hat{S}E_s(\hat{R}) = \frac{1}{n_s(n_s - 1)} \sum_{i=1}^{n_s} \left[\frac{Z_s}{Z_{si}} (\hat{Y}_{si} - \hat{R}\hat{X}_{si}) - \frac{1}{n_s} \sum_{i=1}^{n_s} \frac{Z_s}{Z_{si}} (\hat{Y}_{si} - \hat{R}\hat{X}_{si}) \right]^2$$

where

$$\hat{Y}_{si} = \sum_j \hat{Y}_{sij} , \quad \hat{X}_{si} = \sum_j \hat{X}_{sij} ,$$

$$\hat{Y}_{sij} = D_{si}^* \left[\frac{H_{si1j}}{h_{si1j}} \sum_{k=1}^{h_{si1j}} y_{si1jk} + \frac{H_{si2j}}{h_{si2j}} \sum_{k=1}^{h_{si2j}} y_{si2jk} \right] ,$$

$$\hat{X}_{sij} = D_{si}^* \left[\frac{H_{si1j}}{h_{si1j}} \sum_{k=1}^{h_{si1j}} x_{si1jk} + \frac{H_{si2j}}{h_{si2j}} \sum_{k=1}^{h_{si2j}} x_{si2jk} \right]$$

b) For strata with SRSWOR selection at first stage (i.e. for rural stratum 1 and all urban strata):

$$M\hat{S}E_{s'}(\hat{R}) = \frac{1}{4} \left[(\hat{Y}_{s'1} - \hat{Y}_{s'2})^2 + \hat{R}^2 (\hat{X}_{s'1} - \hat{X}_{s'2})^2 - 2\hat{R}(\hat{Y}_{s'1} - \hat{Y}_{s'2})(\hat{X}_{s'1} - \hat{X}_{s'2}) \right]$$

C) Estimates of RSE:

$$R\hat{S}E(\hat{Y}) = \frac{\sqrt{\hat{V}ar(\hat{Y})}}{\hat{Y}} \times 100$$

$$R\hat{S}E(\hat{R}) = \frac{\sqrt{M\hat{S}E(\hat{R})}}{\hat{R}} \times 100$$

Table A: Sample villages and blocks allotted and surveyed and households surveyed

APPENDIX – C

Schedule on Debt and Investment

<i>RURAL</i>		*
<i>URBAN</i>		

GOVERNMENT OF INDIA
NATIONAL SAMPLE SURVEY ORGANISATION
SOCIO-ECONOMIC SURVEY

<i>CENTRAL</i>		*
<i>STATE</i>		

FIFTY-NINTH ROUND : JANUARY TO DECEMBER 2003
HOUSEHOLD SCHEDULE 18.2 : DEBT AND INVESTMENT

VISIT NUMBER – 1

[0] descriptive identification of sample household	
1. state/u.t.:	5. hamlet name:
2. district:	6. ward/inv. unit/block**:
3. tehsil/town* :	7. name of head of household:
4. village name:	8. name of informant:

[1] identification of sample household									
item no.	item	code			item no.	item	code		
1.	sl. number of sample village/block				11.	FOD sub-region			
2.	round number	5	9		12.	sample hamlet-group/sub-block number			
3.	schedule number	1	8	2	13.	second stage stratum			
4.	sample (central-1, state-2)				14.	visit number	1		
5.	sector (rural-1, urban-2)				15.	sample household number			
6.	state-region				16.	sl. no. of informant (as in col.1, block 4)			
7.	district				17.	response code			
8.	stratum number				18.	survey code			
9.	sub-round				19.	reason for substitution of original household			
10.	sub-sample								

CODES FOR BLOCK 1

item 17: response code : co-operative & capable-1, co-operative but not capable-2, busy-3, reluctant-4, others-9.

item 18: survey code : household surveyed: original - 1, substitute - 2, casualty - 3.

item 19: reason for substitution of original household : informant busy-1, members away from home-2, informant non-co-operative-3, others-9.

* tick mark (✓) may be put in the appropriate place.

** delete whichever is not applicable.

[2] particulars of field operation											
srl. no.	item	investigator			assistant superintendent			superintendent			
(1)	(2)	(3)			(4)			(5)

1.	sickle, axe, spade & chopper								
2.	plough (wooden / iron)								
3.	harrow, seed-drill, sprayer & duster, chaff-cutter								
4.	power tiller								
5.	tractor (excluding trolley)								
6.	thresher								
7.	combined harvester								
8.	canecrusher- power operated								
9.	canecrusher- others								
10.	oil crusher-power operated								
11.	oil crusher- others								
12.	pump-electric								
13.	pump- others								
14.	other water lifting equipment (viz. persian wheel, dhenki, etc.)	X		X		X		X	
15.	furniture and fixtures	X		X		X		X	
16.	others	X		X		X		X	
17.	total (items 1 to 16)	X		X		X		X	

Note: This block is only applicable for those households in which household member(s) own one or more of the above items.

[9] non-farm business equipment owned by the household as on date of survey and related transactions during 01-07-2002 to date of survey									
srl. no	item	owned as on date of survey		transactions during 01-07-2002 to date of survey				owned as on 30-06-2002	
		no.	value (Rs.)	acquisition		disposal		no.	value (Rs.)
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
	machinery, tools & appliances								
1.	handloom, semi-automatic and power looms								
2.	ginning, pressing and balling equipment								
3.	reeds, bobbins and other accessories used in spinning and weaving and tailoring equipments (viz. sewing machine etc.)								
4.	mills (viz. ghanies, oil-mills (power-driven), rice-milling and pounding equipment, flour-milling and grinding equipment)								
5.	electric motors, oil engines, generators, pumpsets								
6.	casting, melting and welding equipments, furnace, bellows and other equipments used in smithy shop								
7.	saws (manually operated)								
8.	saws (power-driven)								
9	musical instruments								
10.	Kilns								
11.	potter's wheels, scales, weights and measures								
12.	xerox machine, printing press, personal computer, duplicating machine, fax machine								
13.	ISD/STD/PCO equipments								
14.	X- ray machine, other medical equipments								
15.	Ultrasound equipments								
16.	lathes, other machinery tools & appliances								
17	intangible assets like software, artistic originals, manuscripts etc.								
18.	total machinery tools & appliances (items 1-17)	x		x		x		x	
19.	furniture & fixtures	x		x		x		x	
20.	other non-farm business equipment	x		x		x		x	
21.	total (items 18+19+20)	x		x		x		x	

Note: This block is only applicable for those households in which household member(s) own one or more of the above items of non-farm business household enterprise. Information is to be collected irrespective of the enterprise operating from dwelling house or not.

[10] transport equipment owned by the household as on the date of survey and related transactions during 01-07-2002 to date of survey										
srl. no	item	owned as on date of survey		transactions during 01-07-2002 to date of survey				owned as on 30-06-2002		main use of transport equipment owned on 30.6.02 (code)
