## Foreword

The All India Employment and Unemployment surveys conducted by the National Sample Survey Office (NSSO) are the primary source of various indicators of labour force at National and State levels, which are used for planning and policy formulation by various Government organizations as well as researchers. NSS surveys on employment and unemployment with large sample of households are being conducted quinquennially from 27<sup>th</sup> round (October 1972 – September 1973) onwards and the last quinquennial survey was undertaken in NSS 66<sup>th</sup> round (July 2009 - June 2010). The NSS 68<sup>th</sup> round carried out during July 2011 - June 2012 was the ninth quinquennial survey in the series covering the subjects of (i) Household Consumer Expenditure and (ii) Employment and Unemployment.

The results of quinquennial survey on Employment and Unemployment are brought out by the NSSO in a number of reports, based on its central sample. It is also the endeavour of NSSO to bring out its survey results at the earliest to meet the requirements of its users. For this purpose NSSO has started to bring out the estimates of Key Indicators from NSS 66<sup>th</sup> round onwards within one year of completion of field work. The first such endeavour was successfully accomplished in June 2011 on both Employment and Unemployment and Household Consumer Expenditure of NSS 66<sup>th</sup> round survey. Likewise, the estimates of Key Indicators from NSS 68<sup>th</sup> round (July 2011 - June 2012), survey on Employment and Unemployment are being brought out through this document.

The Survey Design and Research Division (SDRD) of the NSSO undertook the development of the survey methodology, survey instruments and the preparation of this document. The field work was carried out by the Field Operations Division (FOD) of NSSO while the data processing and tabulation work was handled by the Data Processing Division (DPD) of NSSO. The Coordination and Publication Division (CPD) coordinated various activities pertaining to the survey.

I am highly thankful to the members of the Working Group for NSS 68<sup>th</sup> round and National Statistical Commission for their valuable guidance provided at various stages of the survey. I also place on record my appreciation of efforts made by officers of different Divisions of the NSSO involved in the preparation of this document. I hope, this document will be found useful by planners, policy makers, academicians and researchers.

New Delhi

# Chapter One

## Introduction

1.1.1 The National Sample Survey Office (NSSO), as a part of its 68<sup>th</sup> round survey programme during the period July 2011 - June 2012, carried out an all-India household survey on the subject of employment and unemployment in India. In this survey, nation-wide enquiry was conducted to generate estimates of various characteristics pertaining to employment, unemployment and labour force at the national and State levels. Information on various facets of employment and unemployment in India was collected in NSS 68<sup>th</sup> round through a schedule of enquiry (Schedule 10) adopting the established concepts, definitions and procedures. Based on the data collected during the entire period of survey, estimates of some key employment and unemployment characteristics for each State/UT and all-India have been presented in this document.

### 1.2 Objective of the Employment and Unemployment surveys of NSSO

1.2.1 The main objective of the employment and unemployment surveys conducted by NSSO at periodic interval is to get estimates of level parameters of various employment and unemployment characteristics at national and State/UT level. These statistical indicators on labour market are required for planning, policy and decision making at various levels, both within the government and outside. The critical issues in the context of labour force enquiries pertain to defining the labour force and measuring participation of labour force in different economic activities. The activity participation of the people is not only dynamic but also multidimensional - it varies with region, age, education, gender, level of living, industry and occupational category. These aspects of the labour force are captured in detail in the employment and unemployment surveys of NSSO and estimates are generated for labour force participation rate, worker population ratio, unemployment rate, wages of employees, extent of underemployment etc. The indicators of the structural aspects of the workforce such as status in employment, industrial distribution and occupational distribution are also derived from these surveys. Besides, from the data collected on the particulars of enterprises and conditions of employment, the aspects of employment in the informal sector and informal employment are reflected through the conceptual framework of the survey.

### 1.3 Genesis of Employment and Unemployment Survey of NSSO

1.3.1 The quinquennial survey on employment and unemployment is one of the important surveys conducted regularly by the NSSO. The first such survey was carried out in the 27<sup>th</sup> round of NSSO during October 1972 - September 1973. The current survey of NSS 68<sup>th</sup> round is similar to a quinquennial survey as far as subjects of enquiry, design, questionnaires and sample sizes are concerned. Including the present employment and

unemployment survey of NSS 68<sup>th</sup> round (July 2011 - June 2012), nine such comprehensive surveys on the employment and unemployment situation in India have so far been conducted by NSSO.

1.3.2 *Past Quinquennial Surveys*: To assess the volume and structure of employment and unemployment, starting with the 9<sup>th</sup> round (May - September, 1955), NSSO conducted a number of surveys on employment and unemployment. To give a firm conceptual framework for conducting the employment and unemployment surveys, the Planning Commission, in the year 1970, set up an “Expert Committee on Unemployment Estimates” (popularly known as the Dantwala Committee). The concepts and definitions recommended by this committee formed the basis of the first quinquennial survey on employment and unemployment conducted in the 27<sup>th</sup> round of NSS (October 1972 – September 1973). Since then, seven comprehensive quinquennial surveys on employment and unemployment situation in India have so far been carried out by the NSSO prior to the present survey of the 68<sup>th</sup> round (July 2011 - June 2012). These were carried out during the 32<sup>nd</sup> round (July 1977 – June 1978), 38<sup>th</sup> round (January 1983 – December 1983), 43<sup>rd</sup> round (July 1987 – June 1988), 50<sup>th</sup> round (July 1993 – June 1994), 55<sup>th</sup> round (July 1999 – June 2000), 61<sup>st</sup> round (July 2004- June 2005) and 66<sup>th</sup> round (July 2009- June 2010), in which concepts, definitions and procedures were based primarily on the recommendations of the Dantwala Committee. The results of these surveys are brought out in the form of NSS reports. Apart from the NSS reports, one document entitled “Key Indicators of Employment and Unemployment in India, 2009-2010” showing the estimates of some key employment and unemployment characteristics for each State/UT and all-India obtained from NSS 66<sup>th</sup> round was brought out within the year of the completion of the field work of NSS 66<sup>th</sup> round.

1.3.3 *Other surveys on employment-unemployment*: Apart from these quinquennial surveys on employment and unemployment, NSSO has been regularly collecting information on certain key items on employment and unemployment, as a part of annual series, from a smaller sample of households in each round since its 45<sup>th</sup> round (July 1989 - June 1990) through the schedule on Household Consumer Expenditure (Schedule 1.0). The objective of data collected in the annual series was to measure employment and unemployment indicators in terms of the usual and current weekly statuses only and study of these indicators in respect of category of employment, industrial distribution of the usually employed, etc. These procedures continued till the 59<sup>th</sup> round (January-December 2003) of NSSO. In the 60<sup>th</sup> round (January-June 2004), a separate schedule on employment and unemployment was canvassed for the first time in an annual round and particulars on employment and unemployment was collected in the same manner as that of the quinquennial rounds. A separate schedule on employment and unemployment, similar to the one canvassed in the 60<sup>th</sup> round, was also canvassed in the 62<sup>nd</sup> round (July 2005 - June 2006) and 64<sup>th</sup> round (July 2007- June 2008) of NSSO.

## 1.4 Reports on Employment and Unemployment survey of NSS 68<sup>th</sup> round

1.4.1 The results of the employment and unemployment surveys of NSSO, generated from the central sample data, are released in the form of reports. It has been planned to bring out the results of the employment and unemployment survey of 68<sup>th</sup> round in seven reports. The tentative titles of these seven reports are:

- (i) *Employment and Unemployment Situation in India,*
- (ii) *Informal Sector and Conditions of Employment in India,*
- (iii) *Participation of Women in Specified Activities along with Domestic Duties,*
- (iv) *Employment and Unemployment situation among Social Groups in India,*
- (v) *Employment and Unemployment situation in Cities and Towns in India,*
- (vi) *Employment and Unemployment situation among Major Religious groups in India,*
- (vii) *Status of Education and Vocational Training in India.*

## 1.5 Contents of this document

1.5.1 This document brings out the results of some key employment and unemployment characteristics of NSS 68<sup>th</sup> round within the year of completion of the field work. It contains Three Chapters and Four Appendices. Following the present introductory chapter (Chapter One), Chapter Two outlines the features of the employment and unemployment survey along with the architecture of the key employment and unemployment indicators. The survey findings corresponding to the key employment and unemployment indicators are presented in Chapter Three. Tables elaborating the results for all-India and State/UTs are appended to this Chapter. The formats for presentation of the results in the Tables are as follows:

- Summary tables, which are numbered like, Table 1, Table 2, and so on and are placed in the write-up of Chapter Three, provide the survey estimates of the key employment and unemployment indicators at the all-India level,
- State/UT tables, which are numbered like, Table S1, Table S2, and so on, provide the survey results of the key employment and unemployment characteristics for each State/UT and all-India,
- detailed tables, which are numbered like, Table P1, Table P2, and so on, give the detailed survey results of the key employment and unemployment characteristics at the all-India level

1.5.2 The concepts and definitions of some important terms used in the survey are explained in Appendix A. An outline of the sample design and estimation procedure is presented in Appendix B. In Appendix C, the Projected Population as on 1<sup>st</sup> January 2012 obtained by using the census population as on 1.3.2011 and the rate of growth of population between census 2001 and 2011 have been presented. The projections have been given for, male and female, separately, for rural and urban for each State/UT. Appendix D gives a facsimile of the schedule canvassed in the survey.

1.5.3 In the NSS reports, the estimates of key employment and unemployment characteristics are generally presented as ratios. The estimates of aggregates are also given in the margin of the detailed tables presented for all-India levels which may be used only to combine the ratios. To estimate an absolute number in any category corresponding to the NSS 68<sup>th</sup> round, the survey estimates of ratios may be applied to the Projected Population as on 1st January 2012 as given in Appendix C. It may also be noted that as the tables are generally presented as ‘per 1000 distribution’ or rates ‘per 1000’, the figures are rounded off. Thus, while using the ratios from the survey results, it is to be noted that the accuracy of these derived aggregates will be limited to the number of significant digits available in such ratios. The estimates presented in this document, in general, refer to the mid-point of the survey period (July 2011 – June 2012) of NSS 68<sup>th</sup> round, i.e., 01.01.2012. The estimates of key indicators of employment and unemployment have been presented for all the States and UTs. While using the estimates for the smaller States, it may be kept in mind that the sample sizes for them may not be adequate enough for getting sufficiently reliable estimates.

## Chapter Two

### Features of the Survey on Employment and Unemployment

2.1.1 The critical issues in the context of labour force enquiries pertain to defining the labour force and measuring participation of labour force in different economic activities. The activity participation of the people is not only dynamic but also multidimensional - it varies over regions, age, education, gender, industry and occupational categories. In NSS surveys, persons are classified into various activity categories on the basis of activities pursued by them during certain specified reference periods. Three reference periods are used in NSS surveys, viz. (i) one year, (ii) one week and (iii) each day of the reference week. Based on these three periods, three different measures of activity status are arrived at. The activity status determined on the basis of the reference period of one year is known as the usual activity status (US) of a person, that determined on the basis of a reference period of one week is known as the current weekly status (CWS) of the person and the activity status determined on the basis of the engagement on each day during the reference week is known as the current daily status (CDS) of the person.

#### 2.2 Outline of NSS 68<sup>th</sup> round survey

2.2.1 *Geographical coverage:* The survey covered the whole of the Indian Union except (i) interior villages of Nagaland situated beyond five kilometres of the bus route and (ii) villages in Andaman and Nicobar Islands which remained inaccessible throughout the year.

2.2.2 *Sub-round:* The fieldwork of the 68<sup>th</sup> round of NSSO started from 1<sup>st</sup> July, 2011 and continued till 30<sup>th</sup> June, 2012. As usual, the survey period of this round was divided into four sub-rounds, each with duration of three months, the 1<sup>st</sup> sub-round period ranging from July to September 2011, the 2<sup>nd</sup> sub-round period from October to December 2011 and so on. An equal number of sample villages/blocks (FSUs) were allotted for survey in each of these four sub-rounds with a view to ensuring uniform spread of sample FSUs over the entire survey period.

2.2.3 Out of the total number of 12,784 FSUs (7,508 villages and 5,276 urban blocks) of the central sample allotted for undertaking survey by NSSO, 12,737 FSUs (7,469 villages and 5,268 urban blocks) could be surveyed at the all-India level for canvassing the Employment and Unemployment schedule (Schedule 10). The number of households surveyed was 1,01,724 (59,700 in rural areas and 42,024 in urban areas) and number of persons surveyed was 4,56,999 (2,80,763 in rural areas and 1,76,236 in urban areas). The sample design and estimation procedure used for the survey is given in Appendix B of this document. Field investigators of NSSO collected data for all members of the sample households by interviewing the informants of the selected households.

## 2.3 Details of information collected in NSS 68<sup>th</sup> round Survey on Employment and Unemployment

2.3.1 In NSS 68<sup>th</sup> round, Schedule 10 captured a range of information on the following aspects:

- i) *Household characteristics*, like household size, household type, religion, social group, land owned, land possessed, land cultivated, etc. For the rural households information was collected, on whether the household has Mahatma Gandhi National Rural Employment Guarantee (MGNREG) job card, number of MGNREG job cards issued to the household and whether any member of such household has any bank/ post office account. Information on household monthly consumer expenditure was also collected through a worksheet to study the employment-unemployment characteristics with the standard of living of the population.
- ii) *Demographic particulars*, like age, sex, educational level, status of current attendance, vocational training received. For rural households with MGNREG job card, information was collected for persons of age 18 years and above, whether the person was registered in any MGNREG job card and whether he/she worked in MGNREG works during last 365 days.
- iii) *Particulars of usual principal activity, subsidiary economic activity, current weekly activity and current daily activity* for all the members of the sample households. For persons engaged in economic activities, information on detailed activity status, industry of work, occupation, wage and salary earnings by the employees was also collected.
- iv) *Particulars of the enterprise* for all the usual status workers (excluding those engaged in growing of non-perennial crops, growing of perennial crops, plant propagation and mixed farming) viz., location of work place, type of enterprises, number of workers in the enterprise etc. and also some *particulars on the conditions of employment* for the employees, like type of job contract, eligibility for paid leave, availability of social security benefits and mode of payment.
- v) Particulars regarding extent of *underutilization of the labour time, nature of employment (permanent/temporary), existence of union/ association in their activity*, etc. were collected for persons who were employed either in principal activity or in subsidiary economic activity.
- vi) Particulars regarding *participation in specified activities* by the household members who were classified as engaged in domestic duties in the usual principal activity status.

## 2.4 Conceptual Framework of Key Employment and Unemployment Indicators

2.4.1 In the employment and unemployment surveys of NSSO, information regarding the activity status of a person is collected in three different approaches viz. usual status approach, current weekly status approach and current daily status approach. In the usual status approach, the broad activity status of a person viz. employed, unemployed and 'not in labour force' is decided by major time criterion. In current weekly status and current daily status approach, the broad activity status of a person is decided by priority-cum-major time criterion where work activity gets priority over unemployment which in turn gets priority over 'not in labour force activities'.

Concepts regarding determination of activity status of an individual under different approaches have been explained in details in Appendix A. The code structure followed for assigning codes for different detailed activity statuses is given in paragraph 1.4.2 of Appendix A. The detailed activity status codes associated with the broad activity statuses 'employed', 'unemployed' and 'not in labour force' are specified below in tabular format along with the method to derive the key Employment and Unemployment Indicators 'LFPR', 'WPR', 'PU' and 'UR'.

activity profile		key indicators
activity status (code)	category of persons	
11, 12, 21, 31, 41, 42, 51, 61, 62, 71, 72	workers	<p><b>1. Labour Force Participation Rate (LFPR):</b> LFPR is defined as the number of persons/ person-days in the labour force per 1000 persons /person-days.</p> <p>i.e. <math>LFPR = \frac{\text{no.of employed persons} + \text{no.of unemployed persons}}{\text{total population}} \times 1000</math></p>
81,82	unemployed	<p><b>2. Worker Population Ratio (WPR):</b> WPR defined as the number of persons/person-days employed per 1000 persons/person-days.</p> <p>i.e. <math>WPR = \frac{\text{no.of employed persons}}{\text{total population}} \times 1000</math></p>
11-82	in labour force	<p><b>3. Proportion Unemployed (PU):</b> It is defined as the number of persons/person-days unemployed per 1000 persons/person-days.</p> <p>i.e. <math>PU = \frac{\text{no.of unemployed persons}}{\text{total population}} \times 1000</math></p>
91, 92 93, 94, 95, 97,98	not in labour force	<p><b>4. Unemployment Rate (UR):</b> UR is defined as the number of persons/person-days unemployed per 1000 persons/person-days in the labour force (which includes both the employed and unemployed).i.e.</p> <p><math>UR = \frac{\text{no.of unemployed persons}}{\text{no.of employed persons} + \text{no.of unemployed persons}} \times 1000</math></p> <p><b>Usual status adjusted UR:</b> Unemployment rate according to <i>usual status (ps)</i> approximates an indicator of chronically unemployed. Some of the persons categorised as unemployed according to the <i>usual principal activity status</i> might be working in a subsidiary capacity. Therefore, another estimate of the unemployed excluding those employed in a subsidiary capacity during the reference period can be derived. The former is called the usually unemployed according to <i>principal status (ps)</i> and the latter, the usually unemployed excluding those employed in <i>subsidiary status</i> is termed as unemployed according to <i>usual status (adjusted)</i>. The number of unemployed according to <i>usual status (adjusted)</i> would conceptually be lower than the former.</p>
<p>Note: *: 1. Activity status codes 42, 61, 62, 71, 72, 82 and 98 are used only in the <i>current status</i> (in CWS and CDS) and the remaining activity status codes are used in both <i>usual</i> in <i>current status</i></p> <p>2. Details of the activity status codes are given in Appendix A (Concepts and Definitions)</p>		

## Chapter Three

### Key Findings of 68<sup>th</sup> round survey on Employment and Unemployment

#### 3.1 Introduction

3.1.1 The key findings presented here are based on the 68<sup>th</sup> round survey on employment and unemployment conducted during July 2011 to June 2012. The survey covered a sample of 12,737 first stage units (7,469 villages and 5,268 blocks). Number of households surveyed was 1,01,724 (59,700 in rural areas and 42,024 in urban areas) and number of persons surveyed was 4,56,999 (2,80,763 in rural areas and 1,76,236 in urban areas). As elaborated in Appendix A, the employment and unemployment indicators are measured in three different approaches, viz. *usual status* (US) with a reference period of one year, *current weekly status* (CWS) with a one-week reference period and *current daily status* (CDS) based on the daily activity pursued by individuals on each day of the reference week. The labour force indicators measured in US and CWS are in persons and those measured in CDS are in person-days. According to the usual status approach, the activity status is determined on the basis of major time criterion while both in CWS and CDS, the activity status is determined on the basis of priority - cum - major time criterion. In respect of US approach, the indicators are measured for the usual principal status (termed as *usual status (ps)*) and usual status considering principal and subsidiary activity together (termed as *usual status (ps+ss)*). Key findings of Employment and Unemployment characteristics according to *usual status (ps)*, *usual status (ps+ss)*, CWS, CDS are discussed below for persons of 'all ages' and for persons of age 15-59 years.

#### 3.2 Demographic Characteristics

- The average household size in India as obtained from employment and unemployment of NSS 68<sup>th</sup> round was 4.3. The household size (4.5) of rural households was higher than that of urban households (4.0). The sex ratio (females per 1000 of males) at the all-India level was 946. Sex ratio in rural areas was 957 compared to 922 in urban areas.

[Ref: Table P3]

- The population in the age group 15-59 years, which is considered to be economically active, comprised about 60 per cent of males and 61 per cent of females in rural areas and about 66 per cent each of males and females in urban areas.

[Ref: Table P3]

### 3.3 Labour force participation rate (LFPR)

3.3.1 Labour force refers to the population which supplies or offers to supply labour for pursuing economic activities for the production of goods and services and, therefore, includes both 'employed' and 'unemployed' persons/person-days. Labour-force participation rate (LFPR) is defined as the proportion of persons/person-days in the labour-force to the total persons/person-days. These ratios are given in per 1000 of persons/person-days. The estimates of LFPR in different approaches provide information on the following aspects:

- i) number of persons in labour-force according to the *usual status (ps)* i.e. by considering usual principal activity only,
- ii) number of persons in labour-force according to the *usual status (ps+ss)* i.e. by considering usual principal and subsidiary economic activity together,
- iii) number of persons in labour-force according to CWS i.e. number of persons either employed or unemployed on an average in a week of 7 days preceding the date of survey,
- iv) number of person-days in labour-force according to CDS i.e., number of days on an average during the reference period of 7 days preceding the date of survey where a person was found either employed or unemployed.

3.3.2 Table 1 presents LFPRs (per 1000) according to *usual status (ps)*, *usual status (ps+ss)*, CWS and CDS for different categories of persons of all ages and of age 15-59.

category of persons		age: all				age: 15-59				all-India
		usual status (ps)	usual status (ps+ss)	CWS	CDS	usual status (ps)	usual status (ps+ss)	CWS	CDS	
(1)		(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	
rural	male	547	553	545	534	827	835	825	809	
	female	181	253	215	180	271	378	321	269	
	person	368	406	383	361	551	609	575	541	
urban	male	560	563	561	555	806	810	807	799	
	female	134	155	148	136	193	222	213	196	
	person	356	367	363	354	510	527	521	509	
rural	male	550	556	549	540	820	827	819	806	
+	female	168	225	196	168	247	331	289	247	
urban	person	364	395	377	359	539	583	558	531	

Reference: State/UT tables S3, S4, S5, S6, S19, S20, S21 and S22.

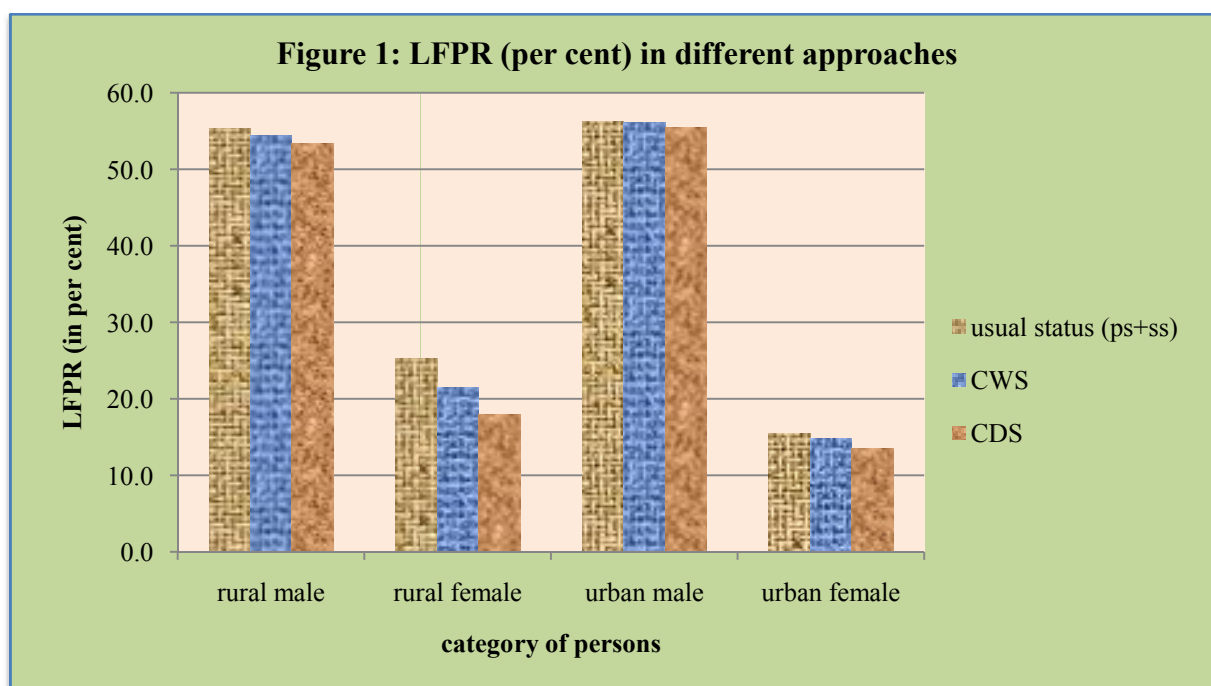

### 3.3.3 LFPR for persons of all ages

- According to the *usual status (ps+ss)*, about 40 per cent of population belonged to the labour force - 41 per cent in rural areas and 37 per cent in urban areas. LFPR was significantly lower for females than for males in both rural and urban areas. It was about 55 per cent for rural males and about 56 per cent for urban males. For females, LFPR was about 25 per cent in rural areas and about 16 per cent in urban areas.
- LFPR in CWS approach was 38 per cent at the all-India level, which was nearly 2 percentage points lower than the LFPR obtained in *usual status (ps+ss)*. In CWS approach, LFPR for rural males was nearly 55 per cent compared to 22 per cent for rural females and in urban areas, LFPR for males was nearly 56 per cent compared to 15 per cent for females.
- LFPR in CDS approach was 36 per cent at the all-India level, which was nearly 4 percentage points lower than the LFPR obtained in *usual status (ps+ss)*. LFPR for rural males in CDS was nearly 53 per cent compared to 18 per cent for rural females and in urban areas, LFPR for males was nearly 56 per cent compared to 14 per cent for females.

### 3.3.4 LFPR for persons of age 15-59 years

- For persons of age 15-59 years, LFPR in *usual status (ps +ss)* was nearly 58 per cent at the all-India level. It was 84 per cent for rural males, 38 per cent for rural females, 81 per cent for urban males and 22 per cent for urban females.
- LFPR, for persons of age 15-59 years, in CWS was nearly 56 per cent at the all-India level - about 2 percentage points less than that in *usual status (ps +ss)*. It was about 83 per cent for rural males, 32 per cent for rural females, 81 per cent for urban males and 21 per cent for urban females.
- For persons of age 15-59 years, LFPR according to the CDS approach was nearly 53 per cent - about 5 percentage points less than that in *usual status (ps+ss)*. Among persons of this age-group, LFPR according to the CDS was nearly 81 per cent for rural males, 27 per cent for rural females, 80 per cent for urban males and 20 per cent for urban females.

3.3.5 Figure 1 placed below shows LFPR (per 100) according to *usual status (ps+ss)*, CWS and CDS for different categories of persons of all ages.

### 3.4. Worker Population Ratio (WPR)

3.4.1 The estimates of employed (or worker) according to the *usual status (ps)* gives the number of persons who worked for a relatively long part of the 365 days preceding the date of survey. The work force according to the *usual status (ps+ss)* includes (a) the persons who worked for a relatively long part of the 365 days preceding the date of survey and (b) those persons from among the remaining population who had worked at least for 30 days during the reference period of 365 days preceding the date of survey. The workforce measured in terms of *current weekly status (CWS)* gives number of persons employed on an average in a week of 7 days during the survey period. The estimate of workforce, according to CWS provides the number of persons worked for at least 1 hour on any day during the 7 days preceding the date of survey. The workforce measured in terms of *current daily status (CDS)* gives the average picture of the person-days where a person was found employed on an average on a day during the survey period. For each person, 7 person-days were assigned for the 7 days preceding the date of survey and the estimate of the number of person-days worked in the reference week was obtained on the basis of the person-days worked according to the CDS approach. The number of person-days worked on a day during the survey period was obtained by dividing the person-days worked in a week by 7.

3.4.2 The *usual status* approach, having the long reference period of last 365 days, adopted for classification of the population is unable to capture changes in the activity pattern caused by seasonal fluctuations. But the estimates obtained by adopting the *current weekly* and *current daily status* approaches are expected to reflect the overall effect caused by intermittent changes in the activity pattern during the year. The latter reflects even the changes that take place during a week and enables to account for person-days in work participation during the survey period.

3.4.3 Table 2 presents WPR (per 1000) according to *usual status (ps)*, *usual status (ps+ss)*, CWS and CDS for different categories of persons of all ages and of age 15-59.

Table 2: WPR (per 1000) according to usual status (ps), usual status (ps+ss), CWS and CDS for persons of all ages and of age 15-59

category of persons		all-India							
		age: all				age: 15-59			
		usual status (ps)	usual status (ps+ss)	CWS	CDS	usual status (ps)	usual status (ps+ss)	CWS	CDS
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	
rural	male	535	543	526	504	808	820	796	762
	female	176	248	207	169	262	372	310	253
	person	359	399	370	340	538	598	555	510

	female	125	147	138	125	179	210	198	180
	person	342	355	347	335	490	508	497	480
rural	male	537	544	530	511	799	809	789	762
+	female	161	219	188	156	237	323	276	231
urban	person	354	386	364	339	523	570	537	501

Reference: State/UT tables S7, S8, S9, S10, S23, S24, S25 and S26.

#### 3.4.4 WPR for all persons

- WPR according to *usual status (ps)* was 35 per cent at the all-India level. WPR in the rural areas (36 per cent) was higher than that in urban areas (34 per cent). Both in rural and urban areas, WPR for males was significantly higher than the corresponding WPR for females - 54 per cent for both rural males and urban males compared to 18 per cent for rural females and 13 per cent for urban females.
- WPR according to *usual status (ps+ss)* was 39 per cent at the all-India level. WPR in rural areas (40 per cent) was higher than that in urban areas (36 per cent). In both rural and urban areas, WPR for females were considerably lower than the WPR for males. In the rural areas, WPR for males and females were nearly 54 per cent and 25 per cent, respectively while in the urban areas, WPR for males and females were nearly 55 per cent and 15 per cent, respectively.

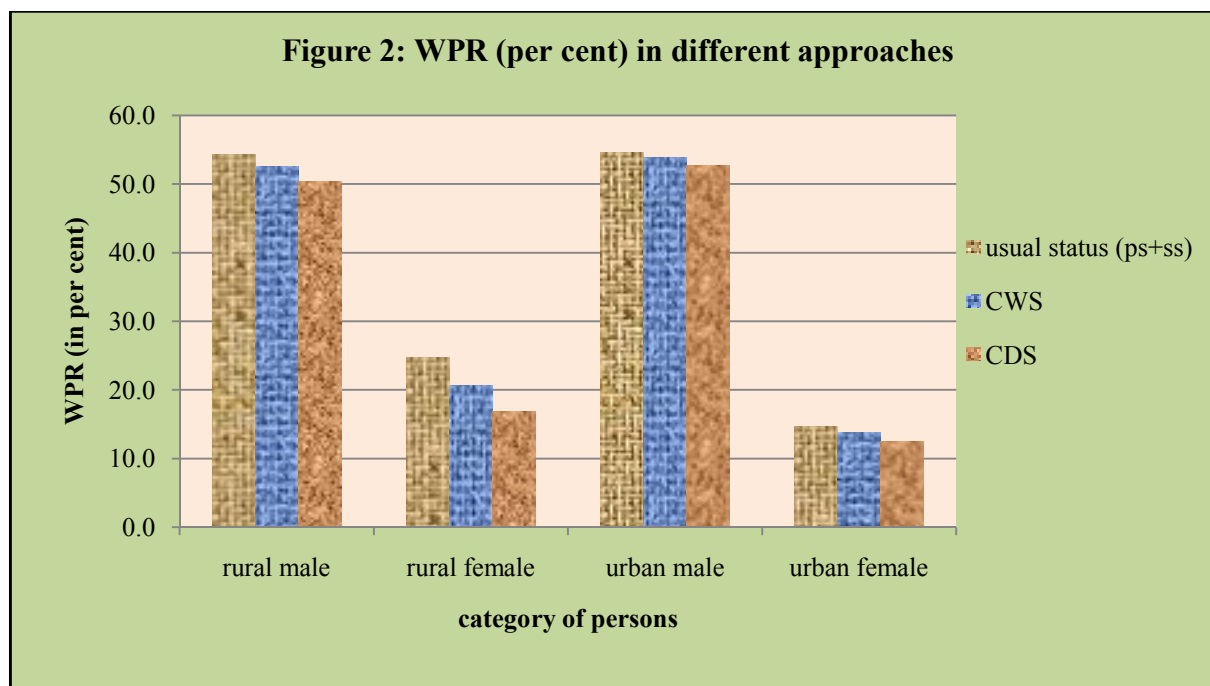

- The WPRs obtained from *usual status (ps)* and *usual status (ps+ss)* reflected higher increase in the WPR for females from *usual status (ps)* to *usual status (ps+ss)* as compared to that of males both in rural and urban areas. This increase was more for rural females compared to urban females implying that higher percentage of females were included in the workforce by their engagement in economic activity in subsidiary status only. For rural females, WPR increased from 18 percent in the *usual status (ps)* to 25 per cent in *usual status (ps+ss)* and for urban females the increase was from 13 per cent in *usual status (ps)* to 15 per cent in *usual status (ps+ss)*.
- In CWS approach, WPR was lower than the WPR obtained in *usual status (ps+ss)* approach. At the all-India level, WPR in CWS was 36 per cent - 37 per cent in rural areas and 34 per cent in urban areas. Gender differentials in WPR in rural areas widened in CWS compared to those observed in *usual status (ps+ss)*. According to CWS approach, WPR for rural males was 53 per cent compared to 21 per cent for rural females. The corresponding figures for males and females in the urban areas were 54 per cent and 14 per cent, respectively.
- Estimates of WPR in CDS were further lower than those obtained in *usual status (ps+ss)*. This decrease in WPR was observed across all four segments of the population and in case of rural females such reduction was sharper. In CDS approach, WPR at the all-India level was about 34 per cent. This was about 50 per cent, 17 per cent, 53 per cent and 13 per cent for rural males, rural females, urban males and urban females, respectively.

#### 3.4.5 WPR for persons of age 15-59 years

- WPR for persons of age 15-59 years in the *usual status (ps+ss)* was 57 per cent at the all-India level. This was 60 per cent in rural areas and 51 per cent in urban areas. Among the four segments of the population, WPR for rural males was the highest (82 per cent) followed by urban males (78 per cent), rural females (37 per cent) and it was the lowest for urban females (21 per cent).
- WPR for persons of age 15-59 years in CWS was 54 per cent at the all-India level. This was 56 per cent in rural areas and 50 per cent in urban areas. The WPR in CWS in the rural areas was 4 percentage points lower compared to that in *usual status (ps+ss)* and it was 1 percentage point lower in the urban areas. WPR for females in both rural and urban areas were much lower compared to their male counterparts. According to CWS approach, WPR for rural males was 80 per cent compared to 31 per cent for rural females. The corresponding figures for males and females in the urban areas were 78 per cent and 20 per cent, respectively.
- Estimates of WPR in CDS were further lower than those obtained in *usual status (ps+ss)* and this happened across all four segments of the population. In CDS approach, WPR at the all-India level was about 50 per cent. This was about 76 per cent, 25 per cent, 76 per cent and 18 per cent for rural males, rural females, urban males and urban females, respectively.

3.4.6 Figure 2 placed below shows WPR (per 100) according to *usual status (ps+ss)*, CWS and CDS for different categories of persons of all ages.

### 3.5 Unemployment rate (UR)

3.5.1 Unemployment Rate (UR) is the ratio of number of unemployed persons/person-days to the number of persons/person-days in labour force. Three sets of estimates of unemployment rates are obtained based on the estimates of unemployment obtained by the three different approaches used for classification of the activity statuses of persons. The different estimates of unemployment are:

- i) number of persons usually unemployed based on '*usual status*' approach,
- ii) number of persons unemployed on an average in a week, based on the *current weekly status* (CWS) approach, and
- iii) number of person-days unemployed on an average during the reference period of seven days preceding the date of survey, based on the *current daily status* (CDS) approach.

Of these three, the first estimate indicates the numerical magnitude of the persons unemployed for a relatively long period during a reference period of 365 days, i.e., in usual *principal status* (*ps*) and approximates an indicator of chronically unemployed. However, some of the unemployed on the basis of this criterion might be working in a subsidiary capacity. One can, therefore, get alternative estimate of the unemployed excluding those employed in a subsidiary capacity during the reference period. The former is called the usually unemployed according to the *principal status* (*ps*) and the latter, the usually unemployed excluding those employed in *subsidiary status* or usual status adjusted i.e., *usual status (adjusted)*, which would conceptually be lower than the former.

The second estimate is based on the *current weekly status* and gives the average weekly picture of unemployment during the survey year. It includes both chronic unemployment and also seasonal unemployment of those categorised as usually employed caused by seasonal fluctuations in economic activity.

The third estimate based on the *current daily status* concept considers person-days and gives average level of unemployment on a day during the survey year.

3.5.2 Three sets of estimates of number of unemployed persons/person-days along with the number of persons/person-days in the labour force using three different approaches give three sets of estimates of the unemployment rates (UR). Table 3 presents UR (per 1000) according to *usual status (adjusted)*, CWS and CDS for different categories of persons of all ages and of age 15-59. Different features of UR according to *usual status (adjusted)*, CWS and CDS approach are discussed below.

Table 3: UR (per 1000) in usual status (*ps*), usual status (*adjusted*), CWS and CDS for persons of all ages and of age 15-59

category of persons		all-India							
		age: all				age: 15-59			
		usual status ( <i>ps</i> )	usual status ( <i>adjusted</i> )	CWS	CDS	usual status ( <i>ps</i> )	usual status ( <i>adjusted</i> )	CWS	CDS
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	
rural	male	21	17	33	55	23	19	35	57
	female	29	17	35	62	30	17	36	63
	person	23	17	34	57	24	18	35	59
urban	male	32	30	38	49	34	31	40	50
	female	66	52	67	80	69	55	70	82
	person	38	34	44	55	40	36	46	55
rural	male	24	21	35	53	26	22	36	55
+	female	37	24	42	66	39	25	43	65
urban	person	27	22	37	56	29	23	38	58

Reference: State/UT tables S15, S16, S17, S18, S31, S32, S33 and S34.

### 3.5.3 UR for all persons

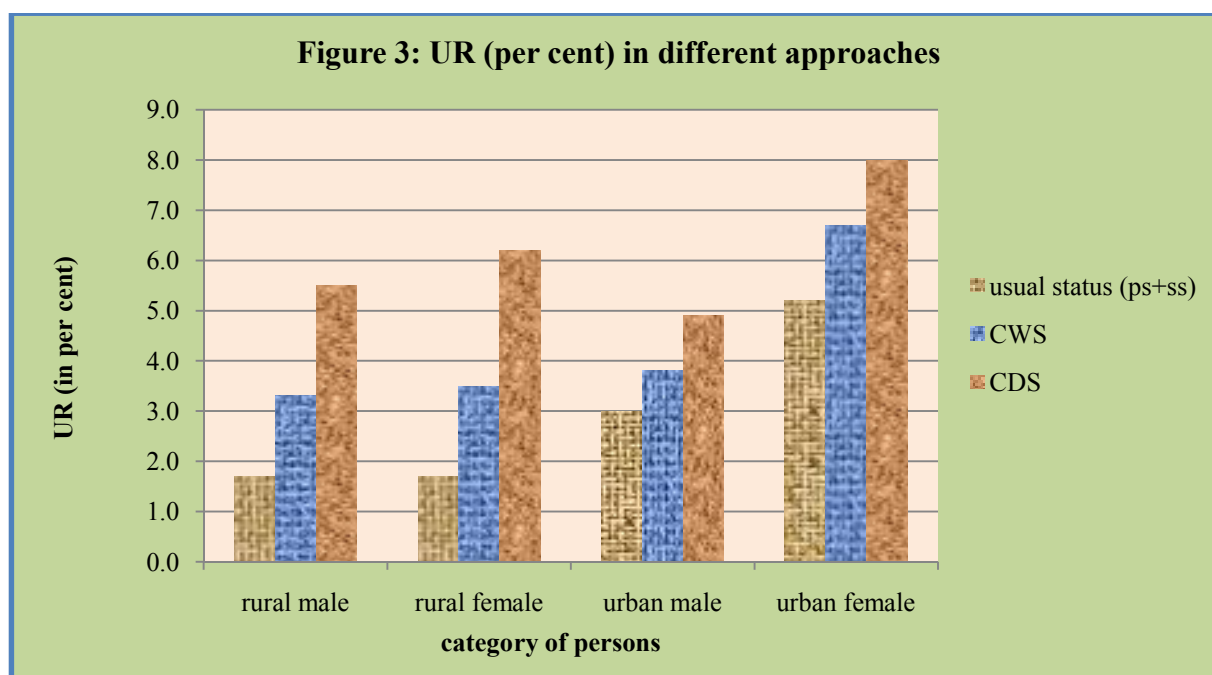

- Among persons of all ages, UR in the *usual status (ps)* was nearly 3 per cent at the all-India level. Compared to the UR observed in the rural areas, UR in urban areas was higher - 2 per cent in rural areas and 4 per cent in urban areas. UR for females in urban areas was the highest (nearly 7 per cent) followed by urban males (3 per cent). In rural areas, the UR for males was 2 per cent and that for females was nearly 3 per cent.
- UR in the *usual status (adjusted)* was nearly 2 per cent with the rate in urban areas higher than that in rural areas (about 3 per cent in urban areas compared to about 2 per cent in rural areas). In the rural areas, UR for both males and females were almost at the same level (nearly 2 per cent) while in urban areas, UR for females was about 5 per cent as compared to 3 per cent for males.
- URs measured in CWS were higher than those obtained in the *usual status (adjusted)* for all categories of persons. At the all-India level, UR in CWS was nearly double of the UR obtained in *usual status (adjusted)* - about 4 per cent in CWS as compared to about 2 per cent in *usual status (adjusted)*. Like in *usual status (adjusted)*, UR in CWS in urban areas was higher than that in rural areas (about 4 per cent in urban areas compared to about 3 per cent in rural areas). UR in CWS was the highest for urban females (7 per cent) followed by urban males (4 per cent).
- UR estimated in CDS was the highest (nearly 6 per cent) compared to those obtained in either in *usual status (adjusted)* or in CWS. Gender differentials in UR in CDS was prominent in urban areas. The UR was 6 per cent for both males and females in the rural areas and it was about 5 per cent and 8 per cent for urban males and urban females, respectively.

### 3.5.4 UR for persons of age 15-59 years

- In the *usual status (adjusted)*, URs for persons of age 15-59 years was at the same level as that for all the persons, nearly 2 per cent at the all-India level. Moreover, for all the four segments of the population, UR for persons of age 15-59 years was also found to be of the same order as that of all persons. Among persons of age 15-59 years, the UR in *usual status (adjusted)* was nearly 2 per cent for both males and females in rural areas while it was 3 per cent for urban males and 6 per cent for urban females.
- The URs in CWS and CDS for persons of age 15-59 years at the all-India level (about 4 per cent in CWS and 6 per cent in CDS) were also almost at the same level as those for persons of all ages. Among persons of age 15-59 years, the UR in CWS was nearly 4 per cent for both males and females in rural areas while it was about 4 per cent for urban males and 7 per cent for urban females. The UR in CDS was nearly 6 per cent for both males and females in rural areas while it was about 5 per cent for urban males and 8 per cent for urban females.

3.5.5 Figure 3 placed below shows UR (per 100) according to *usual status (adjusted)* (i.e. usual status (ps+ss)), CWS and CDS for different categories of persons of all ages.

### 3.6 Distribution of usual status (ps+ss) workers of all ages by employment status

3.6.1 Employed persons are categorized into three broad activity groups according to their status of employment. These broad groups are: (i) *self-employed*, (ii) *regular wage/salaried employees* and (iii) *casual labour*. The distribution of the workers of all ages in different employment statuses are discussed below for the *usual status (ps+ss)*. Table 4 presents percentage distribution of all *usual status (ps+ss)* workers at the all-India level by status in employment.

#### 3.6.2 Distribution of all usual status (ps+ss) workers by status in employment

- In the total workforce of *usual status (ps+ss)* at the all-India level, the share of *self-employed*, *regular wage/salaried employees* and *casual labour* were 52 per cent, 18 per cent and 30 per cent, respectively. In the rural areas, the share of *self-employed*, *regular wage/salaried employees* and *casual labour* were 56 per cent, 9 per cent and 35 per cent, respectively. In the urban areas, the share of *self-employed* and *regular wage/salaried employees* in the total workforce of *usual status (ps+ss)* were 42 per cent and 43 per cent, respectively and the rest (15 per cent) was *casual labour*.

Table 4: Percentage distribution of usual status (ps+ss) worker of all ages by status in employment

all-India

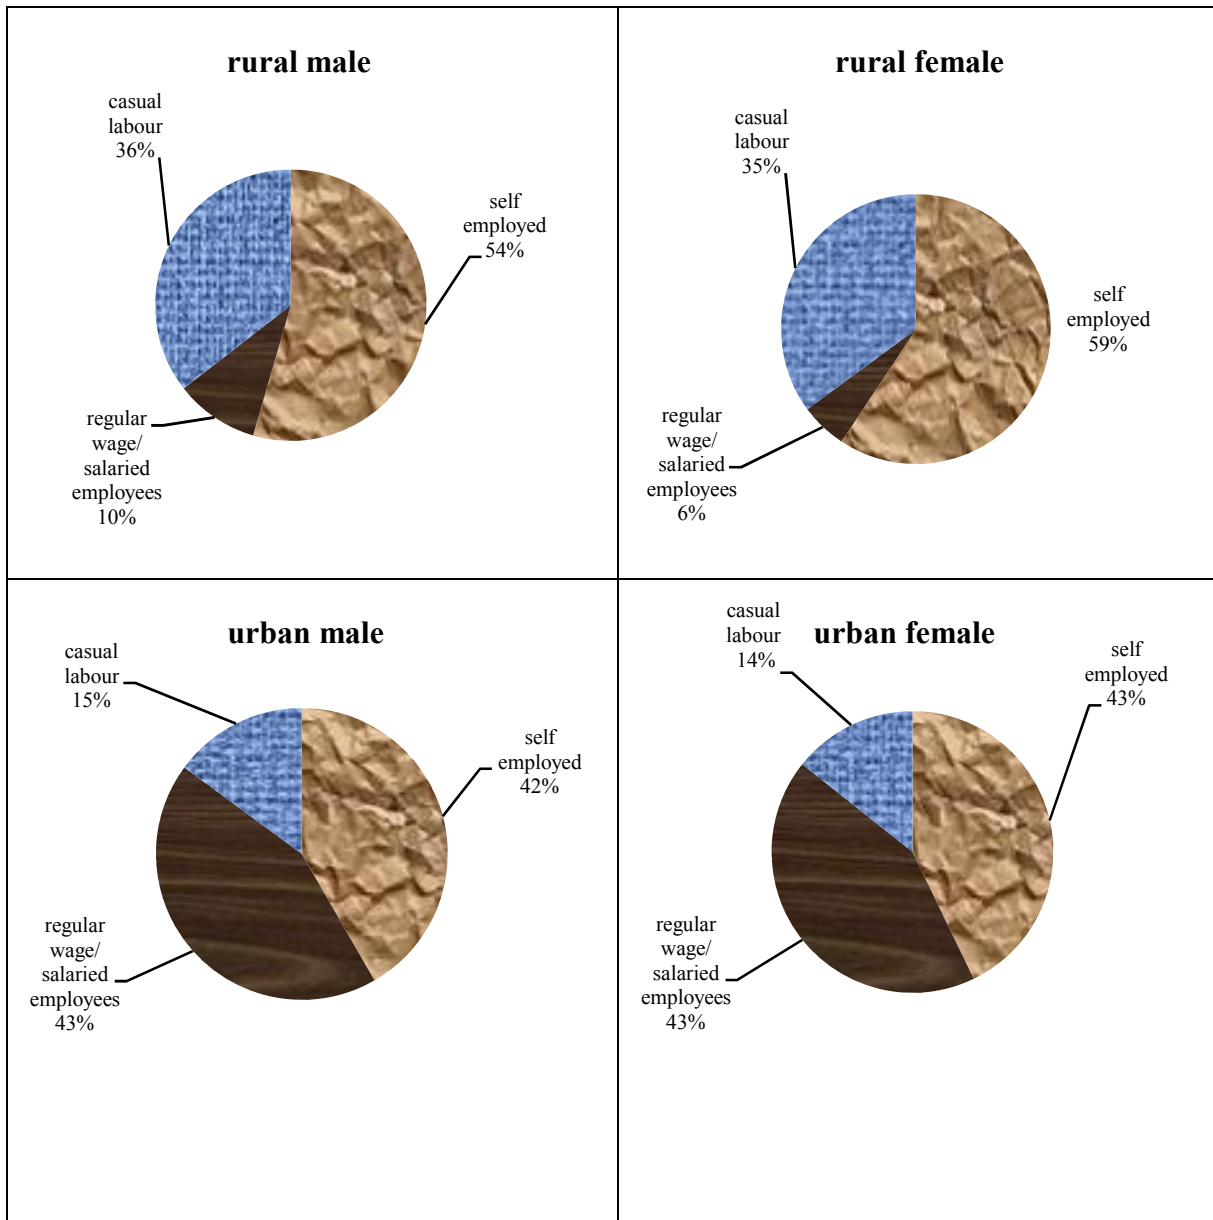

category of persons	status in employment		
	self employed	regular wage/salaried employees	casual labour
(1)	(2)	(3)	(4)
rural male	54.5	10.0	35.5
rural female	59.3	5.6	35.1
rural person	55.9	8.7	35.4
urban male	41.7	43.4	14.9
urban female	42.8	42.8	14.3
urban person	41.9	43.3	14.8
rural + urban male	50.7	19.8	29.4
rural + urban female	56.1	12.7	31.2
rural + urban person	52.2	17.9	29.9

Reference: State/UT table S35.

- The share of *regular wage/salaried employment* in the total workforce of urban areas was much higher as compared to the corresponding share of the rural areas - about 43 per cent in urban areas and about 9 per cent in the rural areas. The share of *casual labour* in the total workforce of rural areas was about 35 per cent as against the corresponding share of 15 per cent in the urban areas.
- For both males and females, majority of the workers were engaged in self-employment - 51 per cent of the male workers and 56 per cent of the female workers. The share of *casual labour* employment in the total workforce of both males and females was significant - 29 per cent among male workers and 31 per cent among female workers. The percentage share in different status in employment in the total workforce of urban males and urban females were almost at the same level. In the rural areas, the share of *casual labour* in the total workforce of males and females was almost the same (36 per cent for males and 35 per cent for females); *self-employment* was higher for females (55 per cent for males and 59 per cent for females) and *regular wage/salaried employment* was higher for males (10 per cent for males and 6 per cent for females).

3.6.3 Figure 4 placed below shows percentage distribution of the total workforce of *usual status (ps+ss)*, at the all-India level, by three broad status in employment for different categories of persons.

**Figure 4: Percentage share of different broad statuses of employment in total workforce according to usual status (ps+ss)**

### 3.7 Industrial distribution of workers according to usual status (ps+ss)

3.7.1 In this survey, information relating to the industry of work in which a person was engaged was collected for each of the *employed* persons. In case of *usually employed*, this information was collected for both the *principal status (ps)* as well as *subsidiary status (ss)* workers. For collection of information on industry of work of the employed persons, the National Industrial Classification: NIC-2008 was followed.

The distribution of *usual status (ps+ss)* workers by broad industry of work viz. agricultural sector, secondary sector including ‘mining and quarrying’ and tertiary sector<sup>1</sup> are discussed here. Table 5 presents percentage distribution of all *usual status (ps+ss)* workers at the all-India level by industry of work.

Table 5: Percentage distribution of usual status (ps+ss) workers of all ages by industry of work

category of persons		all-India		
		industry of work		
		agriculture	secondary	tertiary
(1)		(2)	(3)	(4)
rural	male	59.4	22.0	18.7
	female	74.9	16.7	8.3
	person	64.1	20.4	15.5
urban	male	5.6	35.3	59.1
	female	10.9	34.0	55.1
	person	6.7	35.0	58.3
rural + urban	male	43.6	25.9	30.5
	female	62.8	20.0	17.2
	person	48.9	24.3	26.8

Reference: State/UT table S36.

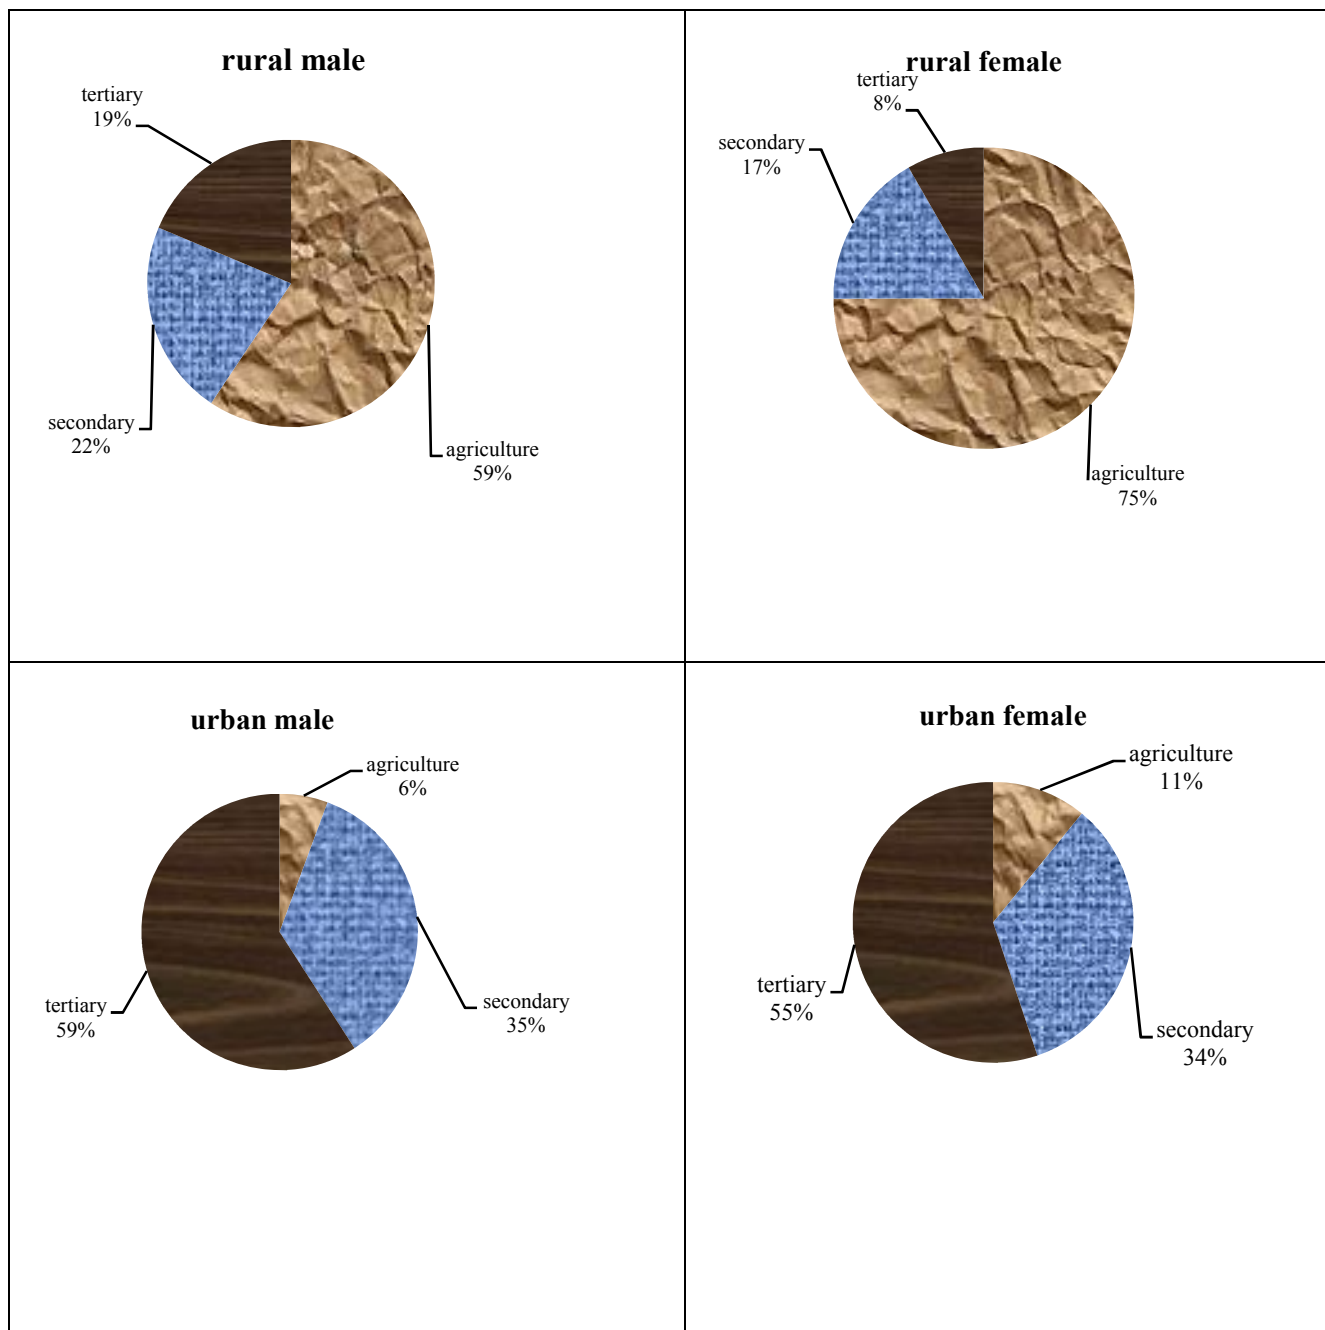

### 3.7.2 Distribution of all usual status (ps+ss) workers by industry of work

- Among the workers in the *usual status (ps+ss)*, about 49 per cent, 24 per cent and 27 per cent were engaged in *agricultural sector*, *secondary sector* and *tertiary sector* respectively. Among the female workers, about 63 per cent were engaged in *agricultural sector* while about 56 per cent of the male workers were engaged either in *secondary sector* and *tertiary sector*.
- In rural areas, nearly 59 per cent of the *usual status (ps+ss)* male workers and nearly 75 per cent of the female workers were engaged in the *agricultural sector*. Among the male workers, 22 per cent and 19 per cent were engaged in *secondary* and *tertiary sectors*. The corresponding proportions for female workers were 17 per cent and 8 per cent, respectively.
- The industrial distribution of the *usual status (ps+ss)* workers in the urban areas was distinctly different from that of rural areas. In urban areas, the share of the *tertiary sector* was dominant followed by that of *secondary sector* while *agricultural sector* engaged only a small proportion of total workers for both male and females. In urban areas, nearly 59 per cent of male workers and 55 per cent of the female workers were engaged in the *tertiary sector*. The *secondary sector* employed nearly 35 per cent of the male and 34 per cent of the female workers. The share of urban workforce in *agricultural sector* was nearly 6 per cent for male workers and 11 per cent for female workers.

<sup>1</sup> The broad groups of industries viz., agriculture, secondary and tertiary refer to the NIC-2008 industry divisions 01-03, 05-43 and 45-99, respectively.

3.7.3 Figure 5 placed below shows percentage distribution of the total workforce of *usual status (ps+ss)*, at the all-India level, by three broad industry of work viz. *agricultural sector*, *secondary sector* including 'mining and quarrying' and *tertiary sector* for different categories of persons.

**Figure 5: Percentage share of the three broad industrial sectors in total workforce in usual status (ps+ss)**

### 3.8 Distribution of usual status (ps+ss) workers by Occupation Division

3.8.1 For the workers in the *usual status (ps+ss)*, information on the type of occupation in which they were engaged was collected using the 3-digit classification of National Classification of Occupation (NCO-2004). Main findings of the occupational structure of the *usual status (ps+ss)* workforce, at the all-India level, are given below for different occupation divisions<sup>2</sup>.

- At the all-India level, about 73 per cent of the *usual status (ps+ss)* workers were engaged in any of the three occupation divisions 6 (skilled agricultural and fishery workers), 7 (craft and related trades workers) and 9 (elementary occupations). Among male workers about 68 per cent and among female workers about 83 per cent were engaged in any of these three occupation divisions.

[Ref: Table S37]

- In rural areas, about 84 per cent of the *usual status (ps+ss)* workers were engaged in three occupation divisions 6 (skilled agricultural and fishery workers), 7 (craft and related trades workers) and 9 (elementary occupations). Among the male workers in the *usual status (ps+ss)* in the rural areas, occupation of nearly 39 per cent was 'skilled agricultural and fishery workers', nearly 31 per cent had 'elementary occupations', while that of another 11 per cent was 'craft and related trades workers'. For rural females also, the occupational structure of the workforce was similar to that of the male workforce. Among the female workers in the rural areas, occupation of nearly 48 per cent was 'skilled agricultural and fishery workers', nearly 33 per cent had 'elementary occupations', while that of another 10 per cent was 'craft and related trades workers'.

[Ref: Table S37]

- Among the *usual status (ps+ss)* workers in urban areas, each of the occupation divisions 1 (legislators, senior officials and managers), 5 (service workers and shop & market sales workers), 7 (craft and related trades workers) and 9 (elementary occupations) had the share of more than 10 per cent of workers. Among the male workers, the share of division 7 (craft and related trades workers) was the highest (19 per cent) followed by that of division 1 (about 17 per cent) and division 5 (about 15 per cent). Among the female workers in the urban areas, the share of division 9 (elementary occupations) was the highest (23 per cent) followed by that of division 7 (about 20 per cent). The occupation divisions 1 (legislators, senior officials and managers), 2 (professionals) and 5 (service workers and shop & market sales workers) each accounted for 10 to 12 per cent share of the *usual status (ps+ss)* female workers.

[Ref: Table S37]

---

<sup>2</sup> The occupation divisions of NCO-2004 are: **Division 1:** Legislators, senior officials and managers, **Division 2:** Professionals, **Division 3:** Technicians and associate professionals, **Division 4:** Clerks, **Division 5:** Service workers and shop & market sales workers, **Division 6:** Skilled agricultural and fishery workers, **Division 7:** Craft and related trades workers, **Division 8:** Plant and machine operators and assemblers, **Division 9:** Elementary occupations and **Division X:** Workers not classified by occupations.

### 3.9 Daily Wage Rates of Regular Wage/Salaried Employees and Casual Labourers of age 15-59 years

3.9.1 Data on wage and salary earnings (received or receivable) for the work done as *casual labour* (activity status code 41, 42 and 51 according to CDS approach) and *regular wage/salaried employees* (activity status code 31, 71 and 72 according to CDS approach) during the reference week were collected in this survey. Data on wages were collected for three categories of casual labours: *casual labour in public works other than MGNREG public works* (activity status code 41), *casual labour in MGNREG public works* (activity status code 42) and *casual labour in works other than public works* (activity status code 51). The wage rates per day received by *casual labourers* and *regular wage/salaried employees* are estimated from these data on wage and salary earnings. For *casual labourers in public works*, the wage rates are presented for rural areas only. It may be noted that *regular wage/salaried employees*, generally, receive bonus and perquisites such as free accommodation, reimbursement of expenditure for medical treatment, free telephones, etc., and those are evaluated at the cost to the employer at retail prices and duly apportioned for the reference week and also included in their earnings. In contrast, *casual labourers* are not entitled to the additional benefits besides the wage/salary that are enjoyed by the *regular wage/salaried workers*. Some findings on daily wages received by *casual labourers and regular wage/salaried employees* are discussed below. Table 6 presents daily wages received by *casual labourers and regular wage/salaried employees* of age 15-59 years at the all-India level.

Table 6: Daily wages (Rs. 0.00) received by *casual labourers and regular wage/salaried employees* of age 15-59 years

category of persons		category of workers				all-India
		regular wage/salaried employees (31, 71 and 72)	casual labour in works other than public works (51)	casual labour in public works other than MGNREG public works (41)	casual labour in MGNREG public works (42)	
(1)		(2)	(3)	(4)	(5)	
rural	male	322.28	149.32	127.39	112.46	
	female	201.56	103.28	110.62	101.97	
	person	298.96	138.62	121.46	106.71	
urban	male	469.87	182.04			
	female	366.15	110.62			
	person	449.65	170.10			
rural + urban	male	417.08				
	female	307.72				
	person	395.82				

Reference: State/UT tables S38, S39, S40 and S41.

### 3.9.2 Daily wages received by regular wage/salaried employees

- At the all-India level, daily wages of *regular wage/salaried employees* of age 15-59 years was Rs. 395.82. This was Rs. 298.96 in the rural areas and Rs. 449.65 in the urban areas. In the rural areas, daily wages received by male *regular wage/salaried employees* was Rs. 322.28 and for females it was Rs. 201.56. In the urban areas, daily wages received by males was Rs. 469.87 and for females it was Rs. 366.15.

### 3.9.3 Daily wages received by casual labours engaged in works other than public works

- Daily wages received by *casual labours engaged in works other than public works* was Rs. 138.62 in rural areas and Rs. 170.10 in urban areas. In the rural areas, wage rate (per day) was Rs. 149.32 for males and Rs. 103.28 for females. In the urban areas, the corresponding rates were Rs. 182.04 and Rs. 110.62 for males and females, respectively.

### 3.9.4 Daily wages received by casual labours of rural areas engaged in public works other than MGNREG public works

- Daily wages received by casual labours of rural areas engaged in public works other than MGNREG public works was Rs. 121.46. This was Rs. 127.39 for males and Rs. 110.62 for females.

### 3.9.5 Daily wages received by casual labours of rural areas engaged in MGNREG public works

- Daily wages received by casual labours of rural areas engaged in MGNREG public works was Rs. 106.71. This was Rs. 112.46 for males and Rs. 101.97 for females.

### **3.10 Number of persons/person-days (in million) in different broad activity statuses corresponding to NSS 66<sup>th</sup> round and 68<sup>th</sup> round at a glance**

3.10.1 The labour force indicators derived from the NSS employment and unemployment surveys are generally presented as ratios. Table 7 presents key employment and unemployment indicators at all-India level obtained from NSS 68<sup>th</sup> round (July 2011-June 2012) and NSS 66<sup>th</sup> round (July 2009-June 2010). Using the employment and unemployment indicators of NSS 68<sup>th</sup> round and the census projected populations as on 1st January 2012 (see Appendix C for details), which is the mid-point of the survey period of NSS 68<sup>th</sup> round, the estimates of labour force, workforce and unemployed in absolute number corresponding to NSS 68<sup>th</sup> round have been derived for males and females in rural and urban areas and presented in Table 8. For comparison purposes, these estimates corresponding to NSS 66<sup>th</sup> round have been derived for the mid-point of the survey period of NSS 66<sup>th</sup> round (i.e, 1<sup>st</sup> January 2010) as well and presented in Table 8.

3.10.2 According to the usual status (ps+ss), at the all-India level, number of persons in the labour force as on 1st January 2010 was about 468.8 millions (rural male: 235.7, rural female:106.2, urban male:102.7 and urban female: 24.2) which increased to 483.7 millions (rural male: 238.8, rural female:103.6, urban male:112.5 and urban female: 28.8) as on 1st January 2012. This indicates an increase of 14.9 millions of labour force at the all-India level between 1st January 2010 and 1st January 2012.

3.10.3 The workforce in usual status (ps+ss), at the all-India level, was about 459.0 millions (rural male: 231.9, rural female:104.5, urban male: 99.8 and urban female: 22.8) as on 1st January 2010 which increased to 472.9 millions (rural male: 234.6, rural female:101.8, urban male:109.2 and urban female: 27.3) as on 1st January 2012 indicating a growth of about 13.9 millions of the workforce at the all-India level between 1st January 2010 and 1st January 2012.

3.10.4 As on 1st January 2010, the number of unemployed persons in the usual status (ps+ss) was 9.8 millions at the all-India level which increased to 10.8 millions as on 1st January 2012.

3.10.5 At the all-India level, the number of person-days in work on a day in current daily status (CDS) was 400.8 millions as on 1st January 2010, which increased to 415.7 millions as on 1st January 2012, thereby showing a growth of 14.9 millions of person-days in work on an average in a day between 1st January 2010 and 1st January 2012.

## **DESCRIPTIONS OF THE SECTIONS OF NIC 2008**

**Section A: Agriculture, forestry and fishing**

**Section B: Mining and quarrying**

**Section C: Manufacturing**

**Section D: Electricity, gas, steam and air conditioning supply**

**Section E: Water supply; sewerage, waste management and remediation activities**

**Section F: Construction**

**Section G: Wholesale and retail trade; repair of motor vehicles and motorcycles**

**Section H: Transportation and storage**

**Section I: Accommodation and Food service activities**

**Section J: Information and communication**

**Section K: Financial and insurance activities**

**Section L: Real estate activities**

**Section M: Professional, scientific and technical activities**

**Section N: Administrative and support service activities**

**Section O: Public administration and defence; compulsory social security**

**Section P: Education**

**Section Q: Human health and social work activities**

**Section R: Arts, entertainment and recreation**

**Section S: Other service activities**

**Section T: Activities of households as employers; undifferentiated goods and services producing activities of households for own use**

**Section U: Activities of extraterritorial organizations and bodies**

# **Appendix A**

## **Concepts and Definitions**

## Appendix - A

### Concepts and Definitions

The concepts and definitions of some important terms used in the survey and relevant to this report are explained in the following paragraphs.

**1.1 Household and household size:** A group of persons who normally lived together and took food from a common kitchen constituted a household. The adverb “normally” means that temporary visitors and guests (whose total period of stay in the household was expected to be less than 6 months) were excluded but temporary stay-aways (whose total period of absence from the household was expected to be less than 6 months) were included. Thus a child residing in a hostel for studies was excluded from the household of his/her parents, but a resident domestic servant or paying guest (but not just a tenant in the house) was included in the employer’s/host’s household. “Living together” was given more importance than “sharing food from a common kitchen” in drawing the boundaries of a household in case the two criteria were in conflict. However, in the special case of a person taking food with his family but sleeping elsewhere (say, in a shop or a different house) due to shortage of space, the household formed by such a person’s family members was taken to include the person also. Each inmate of a hotel, mess, boarding-lodging house, hostel, etc., was considered to be a single-member household except that a family living in a hotel (say) was considered one household only. The same principle was applicable for the residential staff of such establishments. The size of a household is the total number of persons in the household.

**1.2 Age (years):** The age in completed years, as on the date of survey, of the household members were recorded.

**1.3 Economic activity:** The entire spectrum of human activity falls into two categories – economic activities and non-economic activities. Any activity resulting in production of goods and services that add value to national product was considered as an economic activity for the employment and unemployment survey. Such activities included (i) production of all goods and services for market (i.e. for pay or profit) including those of government services, (ii) production of primary commodities for own consumption and (iii) own account production of fixed assets.

1.3.1 The full spectrum of economic activities as defined in the UN system of National Accounts was not covered in the definition adopted for the NSS 68<sup>th</sup> round survey of Employment and Unemployment. Although production of any good for own consumption is considered as economic activity by UN System of National Accounts yet production of only primary goods for own consumption was considered as economic activity by NSSO for the purpose of the survey. While the former considers activities like own account processing of primary products as economic activities, in the NSS surveys, processing of primary products for own consumption was not considered as economic activity.

1.3.2 The term 'economic activity' as defined in the employment and unemployment survey of NSS 68<sup>th</sup> round, therefore, included:

- (i) all the market activities performed for pay or profit which result in production of goods and services for exchange.
- (ii) of the non-market activities,
  - (a) all the activities relating to the agricultural, forestry, fishing; mining and quarrying sector (i.e. industry Divisions 01 to 09 of NIC-2008) which result in production (including free collection of uncultivated crops, forestry, firewood, hunting, fishing, mining, quarrying, etc.) of primary goods for own consumption  
and
  - (b) activities relating to the own-account production of fixed assets, which include production of fixed assets including construction of own houses, roads, wells, etc., and of machinery, tools, etc., for household enterprise and also construction of any private or community facilities free of charge. A person may be engaged in own account construction in the capacity of either a labourer or a supervisor.

As per the practice followed in earlier rounds, certain activities like prostitution, begging, etc., which though fetched earnings, were not considered as economic activities. Activity status of a person was judged irrespective of the situation whether such activity was carried out illegally in the form of smuggling or not.

1.4 **Activity status:** It is the activity situation in which a person was found during the reference period with regard to the person's participation in economic and non-economic activities. According to this, a person could be in one or a combination of the following three broad activity statuses during a reference period:

- (i) working or being engaged in economic activity (work) as defined above,
- (ii) being not engaged in economic activity (work) but either making tangible efforts to seek 'work' or being available for 'work' if 'work' is available and
- (iii) being not engaged in any economic activity (work) and also not available for 'work'.

Broad activity statuses mentioned in (i) and (ii) above are associated with 'being in labour force' and the last with 'not being in the labour force'. Within the labour force, broad activity status (i) and (ii) were associated with 'employment' and 'unemployment', respectively.

1.4.1 Identification of each individual in terms of a unique activity status could pose a problem when more than one of the three broad activity statuses listed above were concurrently obtained for a person. In such an eventuality, the identification uniquely under any one of the three broad activity statuses was done by adopting either *the major time* or *priority criterion*. The former was used for classification of persons according to the 'usual activity status' approach and the latter for classification of persons according to the 'current activity status' approach.

Each of the three broad activity statuses was further sub-divided into several detailed activity categories. If a person categorised as engaged in economic activity by adopting one of the two criteria mentioned above was found to be pursuing more than one economic activity during the reference period, the appropriate detailed activity status code corresponding to the activity in which relatively long time had been spent. A similar procedure was adopted for assigning detailed activity code for persons categorised as engaged in non-economic activity and pursuing more than one non-economic activity.

1.4.2 The detailed activity statuses under each of the three broad activity statuses (viz. 'employed', 'unemployed' and 'not in labour force') and the corresponding codes used in the survey are given below:

<b><u>code</u></b>	<b><u>description</u></b>
<b>working (or employed)</b>	
<i>self-employed</i>	
11	worked in household enterprises (self-employed) as own-account worker
12	worked in household enterprises (self-employed) as an employer
21	worked in household enterprises (self-employed) as helper
<i>regular wage/ salaried employee</i>	
31	worked as regular wage/salaried employee
<i>casual labour</i>	
41	worked as casual wage labour in public works other than Mahatma Gandhi NREG public works
42	worked as casual wage labour in Mahatma Gandhi NREG public works
51	worked as casual wage labour in other types of works
61	did not work owing to sickness though there was work in household enterprise
62	did not work owing to other reasons though there was work in household enterprise
71	did not work owing to sickness but had regular salaried/wage employment
72	did not work owing to other reasons but had regular salaried/wage employment
<b>not working but seeking/available for work (or unemployed)</b>	
81	sought work or did not seek but was available for work (for usual status approach)
81	sought work (for current weekly status approach)
82	did not seek but was available for work (for current weekly status approach)
<b>neither working nor available for work (or not in labour force)</b>	
91	attended educational institutions
92	attended to domestic duties only
93	attended to domestic duties and was also engaged in free collection of goods (vegetables, roots, firewood, cattle feed, etc.), sewing, tailoring, weaving, etc. for household use
94	rentiers, pensioners, remittance recipients, etc.
95	not able to work owing to disability
97	others (including beggars, prostitutes, etc.)
98	did not work owing to sickness (for casual workers only)
99	children of age 0-4 years

It may be noted that codes 42, 61, 62, 71, 72, 82 and 98 were applicable for current weekly status and current daily status approaches only. It may be noted that activity status code 41 in the usual status is used for casual wage labour in all types of public works, whereas in the current activity status, code 41 is for casual wage labour in public works other than MGNREG public works and code 42 is for casual wage labour in MGNREG public works.

**1.5 Workers (or employed):** Persons who were engaged in any economic activity or who, despite their attachment to economic activity, abstained themselves from work for reason of illness, injury or other physical disability, bad weather, festivals, social or religious functions or other contingencies necessitating temporary absence from work, constituted workers. Unpaid helpers who assisted in the operation of an economic activity in the household farm or non-farm activities were also considered as workers. Relevant activity status codes 11 to 72 were assigned for workers. Workers were further categorized as *self-employed* (relevant activity status codes: 11, 12, 21, 61, 62), *regular salaried/wage employee* (relevant activity status codes: 31, 71, 72), and *casual wage labour* (relevant activity status codes: 41, 42 and 51).

**1.6 Seeking or available for work (or unemployed):** Persons who, owing to lack of work, had not worked but either sought work through employment exchanges, intermediaries, friends or relatives or by making applications to prospective employers or expressed their willingness or availability for work under the prevailing conditions of work and remuneration, were considered as those 'seeking or available for work' (or unemployed). Activity status codes 81 or 82 were assigned for unemployed.

**1.7 Labour force:** Persons who were either 'working' (or employed) or 'seeking or available for work' (or unemployed) constituted the labour force. Persons with activity status codes 11 – 82 constituted the labour force.

**1.8 Not in labour force:** Persons who were neither 'working' nor 'seeking or available for work' for various reasons during the reference period were considered as 'not in labour force'. Persons under this category are students, those engaged in domestic duties, rentiers, pensioners, recipients of remittances, those living on alms, infirm or disabled persons, too young persons, prostitutes, etc. and casual labourers not working due to sickness. Activity status codes 91-95, 97 and 98 were assigned for persons belonging to category 'not in labour force'.

**1.9 Self-employed:** Persons who operated their own farm or non-farm enterprises or were engaged independently in a profession or trade on own-account or with one or a few partners were deemed to be self-employed in household enterprises. The essential feature of the self-employed is that they have *autonomy* (decide how, where and when to produce) and *economic independence* (in respect of choice of market, scale of operation and finance) for carrying out their operation. The remuneration of the self-employed consists of a non-separable combination of two parts: a reward for their labour and profit of their enterprise. The combined remuneration is wholly determined by the revenue from sales after netting out value of purchased inputs used in production.

1.9.1 *Categories of self-employed persons*: Self-employed persons were further categorised as follows:

- (i) ***own-account workers***: those self-employed persons who operated their enterprises on their own account or with one or a few partners and who, during the reference period, by and large, ran their enterprise without hiring any labour. They could, however, have had unpaid helpers to assist them in the activity of the enterprise;
- (ii) ***employers***: those self-employed persons who worked on their own account or with one or a few partners and, who, by and large, ran their enterprise by hiring labour; and
- (iii) ***helpers in household enterprise***: those self-employed persons (mostly family members) who were engaged in their household enterprises, working full or part time and did not receive any regular salary or wages in return for the work performed. They did not run the household enterprise on their own but assisted the related person living in the same household in running the household enterprise.

1.10 ***Regular wage/salaried employee***: These were persons who worked in others' farm or non-farm enterprises (both household and non-household) and, in return, received salary or wages on a regular basis (i.e. not on the basis of daily or periodic renewal of work contract). This category included not only persons getting time wage but also persons receiving piece wage or salary and paid apprentices, both full time and part-time.

1.11 ***Casual wage labourer***: A person who was casually engaged in others' farm or non-farm enterprises (both household and non-household) and, in return, received wages according to the terms of the daily or periodic work contract, was a casual wage labourer.

1.12 ***Public works***: 'Public works' are those activities which are sponsored by Government or Local Bodies, and which cover local area development works like construction of roads, dams, bunds, digging of ponds, etc., as relief measures, or as an outcome of employment generation schemes under the poverty alleviation programme such as *Mahatma Gandhi National Rural Employment Guarantee* (MGNREG) public works, Sampoorna Grameen Rozgar Yojana (SGRY), National Food for Work Programme (NFFWP), etc. The coverage of schemes under 'public works' are restricted to those schemes through which the Government generates wage employment under poverty alleviation programme, or relief measures. The types of works that are generally undertaken through these schemes, are watershed development, drought proofing, land levelling, flood control, laying pipes or cables, sanitation, water harvesting, irrigation canal, development of orchard, road construction, building construction / repair, running crèche, etc. To distinguish between '*public works*' and works not classifiable as '*public works*', some broad characteristics of '*public work*' were identified, viz. the primary objective of '*public works*' is generation of wage employment and poverty alleviation, and creation of community asset as an outcome in achieving those main objectives.

It is to be noted that the existing activity status code 41 (casual wage labour in public works) was split into two codes for assigning activity status codes as per current daily activity status and current weekly activity status, as follows:

- (i) worked as casual wage labour in public works other than Mahatma Gandhi National Rural Employment Guarantee (MGNREG) public works – 41
- (ii) worked as casual wage labour in Mahatma Gandhi National Rural Employment Guarantee (MGNREG) public works – 42

*However, in the usual activity status, code 41 was used for casual wage labour in public works, which included all types of public works and code 42 was not applicable in the usual activity status.*

**1.13 Different approaches followed to determine activity status:** The persons surveyed were classified into various activity categories on the basis of the activities pursued by them during certain specified reference periods. There were three reference periods for this survey. These are: (i) one year (ii) one week and (iii) each day of the reference week. Based on these three periods, three different measures of activity status are arrived at. These are termed respectively as usual status, current weekly status and current daily status. The procedures adopted to arrive at the usual status, current weekly status and current daily status are elucidated below.

**1.13.1 Usual principal activity status:** The usual activity status relates to the activity status of a person during the reference period of 365 days preceding the date of survey. The activity status on which a person spent relatively long time (i.e. major time criterion) during the 365 days preceding the date of survey is considered as the *usual principal activity status* of the person. To decide the usual principal activity of a person, first a two stage dichotomous classification was followed for determining the broad usual principal activity status (employed or unemployed or not in labour force) of the person. At the first stage, persons were first categorised as those in the *labour force* (either employed or unemployed) and those *not in the labour force* depending on the major time spent during the 365 days preceding the date of survey. Persons thus adjudged as not belonging to the labour force were assigned the broad activity status 'neither working nor available for work' (*not in the labour force*). At the second stage, for persons belonging to the labour force, the broad activity status of either 'working' (*employed*) or 'not working but seeking and/or available for work' (*unemployed*) was ascertained based on the same criterion viz. relatively long time spent in accordance with either of the two broad statuses within the labour force during the 365 days preceding the date of survey. Within the broad activity status so determined, the detailed activity status of a person pursuing more than one such activity was determined once again on the basis of the relatively long time spent on such activities. In terms of activity status codes, codes 11-51 were assigned to persons classified as workers and codes 91-97 to those 'not in the labour force'. In the usual status approach, a single code 81 was assigned to persons seeking or available for work (unemployed persons) while two separate codes 81 (sought work) and 82 (did not seek but was available for work) were assigned to unemployed persons according to current weekly status and current daily status approach.

**1.13.2 Usual subsidiary economic activity status:** A person whose usual principal status was determined on the basis of the major time criterion could have pursued some economic activity for a shorter time throughout the reference year of 365 days preceding the date of survey or for a minor period, which is not less than 30 days, during the reference year. The status in which such economic activity was pursued was the subsidiary economic activity status of that person. Activity status codes 11 to 51 only were used for the subsidiary economic activity performed by a person. It may be noted that engagement in work in subsidiary capacity may arise out of the two following situations:

- (i) a person may be engaged in a relatively long period during the last 365 days in some economic (non-economic) activity and for a relatively short period (but not simultaneously), which is not less than 30 days (not necessarily for a continuous period), in another economic activity (any economic activity). The economic activity, which was pursued for a relatively short period was considered as his/her subsidiary economic activity.
- (ii) a person may be pursuing an economic activity (non-economic activity) almost throughout the year in the principal status and also simultaneously pursuing another economic activity (any economic activity) for a relatively shorter time in a subsidiary capacity. The economic activity, which was pursued for a relatively short time, was considered as his/her subsidiary economic activity.

**1.13.3 Usual activity status considering principal and subsidiary status taken together:** The usual status, determined on the basis of the usual principal activity and usual subsidiary economic activity of a person taken together, is considered as the usual activity status of the person and is written as usual status (ps+ss). According to the usual status (ps+ss), workers are those who perform some work activity either in the principal status or in the subsidiary status. Thus, a person who is not a worker in the usual principal status is considered as worker according to the usual status (ps+ss), if the person pursues some subsidiary economic activity for 30 days or more during 365 days preceding the date of survey.

**1.13.4 Current weekly activity status:** The current weekly activity status of a person is the activity status obtaining for a person during a reference period of 7 days preceding the date of survey. It is decided *on the basis of a certain priority cum major time criterion*.

1.13.4.1 According to the *priority criterion*, the status 'working' gets priority over the status 'not working but seeking or available for work' that, in turn, gets priority over the status 'neither working nor available for work'. A person was considered 'working' (or employed) if he/she, while pursuing any economic activity, had worked for at least one hour on at least one day during the 7 days preceding the date of survey. A person was considered 'seeking or available for work' (or unemployed) if, during the reference week, no economic activity was pursued by the person but he/she made efforts to get work or had been available for work any time during the reference week though not actively seeking work in the belief that no work was available. A person who had neither worked nor was available for work any time during the reference week was considered as engaged in non-economic activities (or not in labour force).

1.13.4.2 After deciding the *broad current weekly activity status* of a person on the *basis of 'priority' criterion*, the *detailed current activity status* was then decided *on the basis of 'major time' criterion if that person pursued multiple economic activities*. The current weekly activity status of a person could be any of the valid codes within 11 to 98. Of these codes, 11 to 72 pertained to workers, 81 to 82 for unemployed and 91 to 98 for persons 'not in the labour force'.

1.14 **Current daily activity status:** The activity pattern of the population, particularly in the informal sector, is such that during a week, and sometimes, even during a day, a person could pursue more than one activity. Moreover, many people could even undertake both economic and non-economic activities on the same day of a reference week. The current daily activity status for a person was determined on the basis of his/her activity status on each day of the reference week *using a priority-cum-major time criterion* (day to day labour time disposition). Time disposition was recorded for every member of the sample households. This involved recording of different activities pursued by the members along with the time intensity in quantitative terms for each day of the reference week. The different activities were identified and recorded in terms of 'activity status' and 'industry' codes for persons in urban areas and 'activity status', 'industry' and 'operation' codes for persons in rural areas. The description (and codes used) of current daily activity statuses is the same as those of current weekly activity status. The terms 'industry' and 'operation' are explained later. The following points were considered for assigning the time intensity and determining the current daily status of a person:

- i) Each day of the reference week was looked upon as comprising either two 'half days' or a 'full day' for assigning the activity status. For recording time disposition for activities pursued by a person in a day, an intensity of 1.0 was given against an activity that was done for 'full day' and an intensity of 0.5 against the activity which was done for 'half day'.
- ii) A person was considered 'working' (employed) for the full day if he/she had worked for 4 hours or more during the day.
- iii) If a person was engaged in more than one of the economic activities for 4 hours or more on a day, he/she was assigned two out of the various economic activities on which he/she devoted relatively long time on the reference day. In such cases, an intensity of 0.5 was given for each of these two economic activities.
- iv) If the person had worked for 1 hour or more but less than 4 hours, he/she was considered 'working' (employed) for half-day and 'seeking or available for work' (unemployed) or 'neither seeking nor available for work' (not in labour force) for the other half of the day depending on whether he was seeking/available for work or not.
- v) If a person was not engaged in any 'work' even for 1 hour on a day but was seeking/available for work for 4 hours or more, he was considered 'unemployed' for the entire day. But if he was 'seeking/available for work' for more than 1 hour and less than 4 hours only, he was considered 'unemployed' for half day and 'not in labour force' for the other half of the day.

- vi) A person who neither had any 'work' to do nor was available for 'work' even for half a day was considered 'not in labour force' for the entire day and was assigned one or two of the detailed non-economic activity statuses depending upon the activities pursued during the reference day.

1.14.1 The current weekly status of a person is derived from the intensities assigned for the daily activities performed by a person during the 7 days of the reference week.

1.15 **Industry and occupation of the work activity:** For the employed persons, to record the industry of work, 5-digit classification of NIC-2008 was used and to record the type of occupation, 3-digit classification of NCO-2004 was used. To identify certain category of workers under Division 97 (Activities of households as employers of domestic personnel) of NIC-2008, eight additional codes were used in the survey viz., housemaid /servant (97001), cook (97002), gardener (97003), gatekeeper/chowkidar/watchman (97004), governess/baby-sitter (97005), tutor (97006), driver (97007) and 'others' (97009). Broad structure of NIC-2008 (Sections and Divisions) and description of occupation divisions/sub-divisions of NCO-2004 have been presented at the end of this Chapter.

1.16 **Procedure followed for collecting employment and unemployment particulars in different NSS rounds:** In the annual rounds from 45<sup>th</sup> (July 1989-June 1990) to 59<sup>th</sup> (January to December 2003), only activity status and industry of work according to usual principal status, subsidiary status and current weekly status approach were collected through a few columns of the demographic block of the Consumer Expenditure Schedule (Schedule 1.0). Particulars of employment and unemployment according to the usual principal status and usual subsidiary status were collected in the annual rounds by following a similar approach as in the quinquennial rounds. In the quinquennial rounds, particulars of current daily status of the household members are collected and current weekly status is derived from them, whereas in the annual rounds, current weekly status has been obtained through a direct query. In the 60<sup>th</sup> round (January-June 2004), a separate schedule on employment and unemployment was canvassed for the first time in an annual round and particulars on employment and unemployment was collected in the same manner as that of the quinquennial rounds. In NSS 62<sup>nd</sup> round (July 2005 - June 2006) also a separate schedule, similar to the one canvassed during NSS 60<sup>th</sup> round, on employment and unemployment was canvassed and in this round also particulars on employment and unemployment was collected in the same manner as that of the quinquennial rounds. In the NSS 64<sup>th</sup> round (July 2007-June 2008) a separate schedule was also used to collect data on employment and unemployment. The scope of the schedule was further enhanced with the inclusion information on the some particulars of the migrant households, migrant household members and out-migrants. In this round also particulars on employment and unemployment was collected in the same manner as that of the quinquennial rounds.

**BROAD STRUCTURE of NIC -2008  
(SECTIONS AND DIVISIONS)**

**Section A: Agriculture, forestry and fishing**

Division 01: Crop and animal production, hunting and related service activities

Division 02: Forestry and logging

**Section B: Mining and quarrying**

Division 05: Mining of coal and lignite

Division 06: Extraction of crude petroleum and natural gas

Division 07: Mining of metal ores

Division 08: Other mining and quarrying

Division 09: Mining support service activities

**Section C: Manufacturing**

Division 10: Manufacture of food products

Division 11: Manufacture of beverages

Division 12: Manufacture of tobacco products

Division 13: Manufacture of textiles

Division 14: Manufacture of wearing apparel

Division 15: Manufacture of leather and related products

Division 16: Manufacture of wood and products of wood and cork, except furniture;  
manufacture of articles of straw and plaiting materials

Division 17: Manufacture of paper and paper products

Division 18: Printing and reproduction of recorded media

Division 19: Manufacture of coke and refined petroleum products

Division 20: Manufacture of chemicals and chemical products

Division 21: Manufacture of pharmaceuticals, medicinal chemical and botanical products

Division 22: Manufacture of rubber and plastics products

Division 23: Manufacture of other non-metallic mineral products

Division 24: Manufacture of basic metals

Division 25: Manufacture of fabricated metal products, except machinery and equipment

Division 26: Manufacture of computer, electronic and optical products

Division 27: Manufacture of electrical equipment

Division 28: Manufacture of machinery and equipment n.e.c.

Division 29: Manufacture of motor vehicles, trailers and semi-trailers

Division 30: Manufacture of other transport equipment

Division 31: Manufacture of furniture

Division 32: Other manufacturing

Division 33: Repair and installation of machinery and equipment

**Section D: Electricity, gas, steam and air conditioning supply**

Division 35: Electricity, gas, steam and air conditioning supply

### **Section E: Water supply; sewerage, waste management and remediation activities**

Division 36: Water collection, treatment and supply

Division 37: Sewerage

Division 38: Waste collection, treatment and disposal activities; materials recovery

Division 39: Remediation activities and other waste management services

### **Section F: Construction**

Division 41: Construction of buildings

Division 42: Civil engineering

Division 43: Specialized construction activities

### **Section G: Wholesale and retail trade; repair of motor vehicles and motorcycles**

Division 45: Wholesale and retail trade and repair of motor vehicles and motorcycles

Division 46: Wholesale trade, except of motor vehicles and motorcycles

Division 47: Retail trade, except of motor vehicles and motorcycles

### **Section H: Transportation and storage**

Division 49: Land transport and transport via pipelines

Division 50: Water transport

Division 51: Air transport

Division 52: Warehousing and support activities for transportation

Division 53: Postal and courier activities

### **Section I: Accommodation and Food service activities**

Division 55: Accommodation

Division 56 Food and beverage service activities

### **Section J: Information and communication**

Division 58: Publishing activities

Division 59: Motion picture, video and television programme production, sound recording  
and music publishing activities

Division 60: Broadcasting and programming activities

Division 61: Telecommunications

Division 62: Computer programming, consultancy and related activities

Division 63: Information service activities

### **Section K: Financial and insurance activities**

Division 64: Financial service activities, except insurance and pension funding

Division 65: Insurance, reinsurance and pension funding, except compulsory social security

Division 66: Other financial activities

### **Section L: Real estate activities**

Division 68: Real estate activities

**Section M: Professional, scientific and technical activities**

- Division 69: Legal and accounting activities
- Division 70: Activities of head offices; management consultancy activities
- Division 71: Architecture and engineering activities; technical testing and analysis
- Division 72: Scientific research and development
- Division 73: Advertising and market research
- Division 74: Other professional, scientific and technical activities
- Division 75: Veterinary activities

**Section N: Administrative and support service activities**

- Division 77: Rental and leasing activities
- Division 78: Employment activities
- Division 79: Travel agency, tour operator and other reservation service activities
- Division 80: Security and investigation activities
- Division 81: Services to buildings and landscape activities
- Division 82: Office administrative, office support and other business support activities

**Section O: Public administration and defence; compulsory social security**

- Division 84: Public administration and defence; compulsory social security

**Section P: Education**

- Division 85: Education

**Section Q: Human health and social work activities**

- Division 86: Human health activities
- Division 87: Residential care activities
- Division 88: Social work activities without accommodation

**Section R: Arts, entertainment and recreation**

- Division 90: Creative, arts and entertainment activities
- Division 91: Libraries, archives, museums and other cultural activities
- Division 92: Gambling and betting activities
- Division 93: Sports activities and amusement and recreation activities

**Section S: Other service activities**

- Division 94: Activities of membership organizations
- Division 95: Repair of computers and personal and household goods
- Division 96: Other personal service activities

**Section T: Activities of households as employers; undifferentiated goods- and services producing activities of households for own use**

- Division 97: Activities of households as employers of domestic personnel
- Division 98: Undifferentiated goods- and services-producing activities of private households for own use

**Section U: Activities of extraterritorial organizations and bodies**

- Division 99: Activities of extraterritorial organizations and bodies

**Description of Occupation Divisions and sub-divisions of  
National Classification of Occupations-2004**

<b>division</b>	<b>sub-division</b>	<b>description</b>
<b>1</b>		<b>Legislators, Senior Officials and Managers</b>
	11	Legislators and Senior Officials
	12	Corporate Managers
	13	General Managers
<b>2</b>		<b>Professionals</b>
	21	Physical, Mathematical and Engineering Science Professionals
	22	Life Science and Health Professionals
	23	Teaching Professionals
	24	Other Professionals
<b>3</b>		<b>Technicians and Associate Professionals</b>
	31	Physical and Engineering Science Associate Professionals.

	X1	Workers Reporting Occupations Unidentifiable or Inadequately Described
	X9	Workers Not Reporting Any Occupations

## **Appendix B**

### **Sample Design and Estimation Procedure**

## Appendix - B

### Sample Design and Estimation Procedure

#### 1. Introduction

1.1 The 68<sup>th</sup> round (July 2011-June 2012) of NSS was earmarked for survey on 'Household Consumer Expenditure' and 'Employment and Unemployment'. The survey covered the whole of the Indian Union *except* (i) interior villages of Nagaland situated beyond five kilometres of the bus route and (ii) villages in Andaman and Nicobar Islands which remain inaccessible throughout the year. The period of survey was of one year duration starting on 1<sup>st</sup> July 2011 and ending on 30<sup>th</sup> June 2012. The survey period of this round was divided into four sub-rounds of three months' duration each - 1<sup>st</sup> sub-round: July to September 2009; 2<sup>nd</sup> sub-round: October to December 2009; and so on. In each of these four sub-rounds equal number of sample villages/ blocks (FSUs) was allotted for survey with a view to ensure uniform spread of sample FSUs over the entire survey period.

#### 2 Sample Design

2.1 A stratified multi-stage design was adopted for the 68th round survey. The first stage units (FSU) were the 2001 census villages (Panchayat wards in case of Kerala) in the rural areas and Urban Frame Survey (UFS) blocks in the urban areas. The ultimate stage units (USU) were households in both the sectors. In case of large FSUs, one intermediate stage of sampling was the selection of two hamlet-groups (hgs)/ sub-blocks (sbs) from these FSUs.

2.2 *Selection of the first-stage units:* The sampling frame and the sampling technique used for selection of the FSUs are stated in the following paragraphs.

2.2.1 *Sampling Frame for First Stage Units:* For the rural sector, the list of 2001 census villages (Panchayat wards in case of Kerala) constituted the sampling frame. For the urban sector, the list of latest available UFS blocks (2007-12) constituted the sampling frame.

2.2.2 *Stratification of the first stage units:* Within each district of a State/ UT, two basic strata were formed as follows:

- i) rural stratum comprising all rural areas of the district and
- (ii) urban stratum comprising all the urban areas of the district.

However, within the urban areas of a district, if there were one or more towns with population 10 lakhs or more as per population census 2001 in a district, each of them formed a separate basic stratum and the remaining urban areas of the district were considered as another basic stratum.

2.2.3 *Sub-stratification*: Procedure followed for sub-stratification in each of rural and urban sectors are stated below.

2.2.3.1 *Rural sector*: If 'r' was the sample size allocated for a rural stratum, 'r/4' sub-strata were formed in that stratum. The villages within a district as per frame were first arranged in ascending order of population and then sub-strata 1 to 'r/4' were demarcated in such a way that each sub-stratum comprised a group of villages of the arranged frame and had more or less equal population.

2.2.3.2 *Urban sector*: If 'u' was the sample size for an urban stratum, 'u/4' sub-strata were formed in that stratum. In case u/4 was more than 1, implying formation of 2 or more sub-strata, this was done by first arranging the towns in ascending order of total number of households in the town as per UFS phase 2007-12 and then arranging the IV units of each town and blocks within each IV unit in ascending order of their numbers. From this arranged frame of UFS blocks of all the towns/million plus cities of a stratum, 'u/4' number of sub-strata were formed in such a way that each sub-stratum had more or less equal number of households as per UFS 2007-12.

2.2.4 *Allocation of FSU's among Strata*: At the all-India level, a total number of 12784 FSUs (7,508 villages and 5,276 urban blocks) were allocated for survey in the central sample. The total number of sample FSUs was allocated to the States and UTs in proportion to population as per census 2001 subject to the availability of field investigators and ensuring minimum sample allocation to each State/ UT. The State/ UT level sample size was allocated between rural and urban sectors in proportion to population as per *census 2001* with double weightage to urban sector subject to the restriction that urban sample size for bigger states like Maharashtra, Tamil Nadu, etc. did not exceed the rural sample size. A minimum of 16 FSUs (minimum 8 for each of rural and urban sector) was allocated to each state/ UT. Within each sector of a State/ UT, the respective sample size was allocated to the different strata/ sub-strata in proportion to the population as per census 2001. Allocations at stratum/ sub-stratum level were adjusted to multiples of 4 with a minimum sample size of 4 and equal number of samples was allocated among the four sub rounds. Allocations at stratum level were adjusted to multiples of 4 with a minimum sample size of 4. Allocation for each sub-stratum was 4. Equal number of samples was allocated in each of the four sub-rounds.

2.2.5 *Selection of first-stage units*: For the rural sector, from each stratum/ sub-stratum, required number of sample villages was selected by probability proportional to size with replacement (PPSWR), size being the population of the village as per Census 2001. From each stratum of the urban sector, FSUs were selected by using Simple Random Sampling Without Replacement (SRSWOR). Both rural and urban samples were drawn in the form of two independent sub-samples.

2.3 *Selection of Ultimate Stage Units (USU) within a FSU*: The procedures followed for selection of USUs within an FSU are stated in the remaining paragraphs of this sub-section.

2.3.1 *Formation and Selection of hamlet-groups/sub-blocks:* Sample FSUs with approximate population 1200 or more were divided into a suitable number (say, D) of ‘hamlet-groups’ in the rural sector and ‘sub-blocks’ in the urban sector as stated below.

approximate present population of the sample FSU	no. of hgs/sbs to be formed
less than 1200 (no hamlet-groups/sub-blocks)	1
1200 to 1799	3
1800 to 2399	4
2400 to 2999	5
3000 to 3599	6
.....and so on	

For rural areas of Himachal Pradesh, Sikkim, Uttarakhand (except four districts Dehradun (Plains), Nainital (Plains), Hardwar and Udham Singh Nagar), Poonch, Rajouri, Udhampur, Doda, Leh (Ladakh), Kargil districts of Jammu and Kashmir and Idukki district of Kerala, the number of hamlet-groups formed was as follows:

approximate present population of the sample village	no. of hgs to be formed
less than 600 (no hamlet-groups)	1
600 to 899	3
900 to 1199	4
1200 to 1499	5
.....and so on	

Hamlet-groups/ sub-blocks were formed in the sample FSU by more or less equalising populations. Two hamlet-groups (hgs)/ sub-blocks (sbs) were selected from a large FSU, wherever hamlet-groups/ sub-blocks were formed. This was done in the following manner – one hg/ sb with maximum percentage share of population was always selected and was termed as hg/ sb 1; one more hg/sb was selected from the remaining hamlet-groups/ sub-blocks by simple random sampling (SRS) and was termed as hg/sb 2. Listing and selection of the households was done independently in the two selected hamlet-groups/ sub-blocks. For the FSUs where no hg/sb formation was done, the hg/sb number was assigned as 1.

2.3.2 *Sampling frame of households:* All households listed in a village/UFS block where no hamlet-group/sub-block formation was done, or the households listed in the two selected hamlet-groups/sub-blocks of the village/UFS block where hamlet-group/sub-block formation was done, constituted the sampling frame of households.

2.3.3 *Formation of second stage strata (SSS) and allocation of households in different SSS:* For employment and unemployment survey of NSS 68<sup>th</sup> round, all households listed in the selected FSU/hamlet groups/sub-blocks were stratified into three second stage strata (SSS). The three second-stage-strata (SSS) formed in each of rural and urban areas and the number of households surveyed from each of the three SSS are specified below:

SSS	composition of SSS	No. of households surveyed	
		FSU without hg/sb formation	for each hg/sb for FSUs with hg/sb formation
<b>Rural</b>			
SSS 1	relatively affluent households	2	1
SSS 2	of the remaining, households having principal earning from non- agricultural activity	4	2
SSS 3	other households	2	1
<b>Urban</b>			
SSS 1	households having MPCE of top 10% of urban population (MPCE > B)	2	1
SSS 2	households having MPCE of middle 60% of urban population ( $A \leq MPCE \leq B$ )	4	2
SSS 3	households having MPCE of bottom 30% of urban population (MPCE < A)	2	1

2.3.4 In the rural areas, identification of affluent households was done by taking into account factors generally associated with affluent households such as: ownership of motor car/ jeep/ tractor/ combine-harvester/ truck/ bus/ etc.; consumer durables like refrigerator/ washing machine etc.; ownership of large business/ highly remunerative profession/ high salaried income etc.; ownership of spacious pucca house in good condition; ownership of 7 hectares or more of cultivable land; ownership of 3.5 hectares or more of irrigated land; ownership of 10 or more cattle, buffaloes and camels. In the urban areas, two cut-off points 'A' and 'B' (in Rs.) were determined from NSS 66<sup>th</sup> round data for each NSS region in such a way that top 10% of the population had MPCE more than 'B' and bottom 30% of the population had MPCE less than A.

2.3.5 *Selection of households:* For employment-unemployment survey, a total of 8 households were selected from each FSU. In both rural and urban areas, in case no hamlet-group/sub-block formation was done in the village/block, a number of 2, 4 and 2 households were selected from the second stage strata SSS1, SSS2 and SSS3, respectively. In case hamlet-groups/sub-blocks were formed in the village/block, a number of 1, 2 and 1 households were selected respectively from the second stage strata SSS1, SSS2 and SSS3 of each of the hamlet-groups/sub-blocks. The sample households from each of the second stage strata were selected by SRSWOR.

2.4 Number of village/blocks allotted for survey in the NSS 68<sup>th</sup> round along with the number of villages/blocks actually surveyed and number of persons enumerated in employment and unemployment survey are given for different states and union territories in Table B1 at the end of Appendix-B.

### 3. Estimation Procedure

Procedures for obtaining estimates of aggregates, ratios and their RSEs are briefly indicated below:

#### 3.1 Notations:

s = subscript for s-th stratum

t = subscript for t-th sub-stratum (only for rural sector)

m = subscript for sub-sample (m = 1, 2)

i = subscript for i-th FSU [village (panchayat ward)/ block/ non-UFS town]

d = subscript for a hamlet-group/ sub-block (d = 1, 2)

j = subscript for j-th second stage stratum in an FSU/ hg/sb [j = 1, 2 or 3]

k = subscript for k-th sample household under a particular second stage stratum within an FSU/ hg/sb

D = total number of hgs/ sbs formed in the sample FSU

$D^* = 0$  if  $D = 1$ ; and

$= (D - 1)$  for FSUs with  $D > 1$

N = total number of FSUs in any urban sub-stratum

Z = total size of a rural sub-stratum (= sum of sizes for all the FSUs of a sub-stratum)

z = size of sample village used for selection

n = number of sample FSUs surveyed including 'zero cases' but excluding casualty for a particular sub-sample and sub-stratum

H = total number of households listed in a second-stage stratum of an FSU/ hamlet-group/ sub-block of sample FSU

h = number of households surveyed in a second-stage stratum of an FSU/ hamlet-group or sub-block of sample FSU

x, y = observed value of characteristics x, y under estimation

$\hat{X}$ ,  $\hat{Y}$  = estimates of population total X, Y for the characteristics x, y

Under the above symbols,

$y_{stmijk}$  = observed value of the characteristic y for the k-th household in the j-th second stage stratum of the d-th hg/sb (d = 1, 2) of the i-th FSU belonging to the m-th sub-sample for the t-th sub-stratum of s-th stratum.

For ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

3.2 Estimation of aggregates for a particular sub-sample ( $m$ ) of a stratum ( $s$ ):

3.2.1 rural areas:

Estimate of population total ( $Y$ ) of the characteristic  $y$  for the  $j$ -th SSS of a sub-stratum within a stratum denoted by  $\hat{Y}_j$  is obtained as

$$\hat{Y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left[ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \times \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

Estimate of aggregates for  $t$ -th sub-stratum of  $s$ -th stratum denoted by  $\hat{Y}_{st}$  is obtained as

$$\hat{Y}_{st} = \sum_j \hat{Y}_j$$

Sub-sample estimate for a stratum ( $\hat{Y}_{sm}$ ) is obtained by adding sub-sample wise estimates of all the sub-strata ( $\hat{Y}_{st}$ ) of the stratum.

3.2.2 urban areas:

Estimate of aggregates for  $j$ -th second stage stratum of a stratum ( $\hat{Y}_j$ ) is obtained as

$$\hat{Y}_j = \frac{N}{n_j} \sum_{i=1}^{n_j} \left[ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \times \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

Estimate of aggregates for  $t$ -th sub-stratum of  $s$ -th stratum denoted by  $\hat{Y}_{st}$  is obtained as

$$\hat{Y}_{st} = \sum_j \hat{Y}_j$$

Sub-sample estimate for a stratum ( $\hat{Y}_{sm}$ ) is obtained by adding sub-sample wise estimates of all the sub-strata ( $\hat{Y}_{st}$ ) of the stratum.

3.3 Overall Estimate for Aggregates: Overall estimate for aggregates for a stratum ( $\hat{Y}_s$ ) based on two sub-samples is obtained as:

$$\hat{Y}_s = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{sm}$$

3.4 Overall Estimate of Aggregates at State/UT/all-India level:

The overall estimate  $\hat{Y}$  at the State/ UT/ all-India level is obtained by summing the stratum estimates  $\hat{Y}_s$  over all strata belonging to the State/ UT/ all-India.

3.5 Estimates of Ratios:  $\hat{Y}$  and  $\hat{X}$  being the overall estimates of the aggregates Y and X for two characteristics y and x, respectively at the State/ UT/ all-India level, the combined ratio estimate ( $\hat{R}$ ) of the ratio ( $R = \frac{Y}{X}$ ) is obtained as  $\hat{R} = \frac{\hat{Y}}{\hat{X}}$ .

3.6 Estimates of Error: The estimated variances of the above estimates are obtained as follows:

3.6.1 For aggregate  $\hat{Y}$ :

$V\hat{a}r(\hat{Y}) = \sum_s V\hat{a}r(\hat{Y}_s)$  where  $V\hat{a}r(\hat{Y}_s)$  is given by

$V\hat{a}r(\hat{Y}_s) = \sum_t \frac{1}{4} (\hat{Y}_{st1} - \hat{Y}_{st2})^2$ , where  $\hat{Y}_{st1}$  and  $\hat{Y}_{st2}$  are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's' and sub-stratum 't'.

3.6.2 For ratio  $\hat{R}$ :

$$M\hat{S}E(\hat{R}) = \frac{1}{4\hat{X}^2} \sum_s \sum_t \left[ (\hat{Y}_{st1} - \hat{Y}_{st2})^2 + \hat{R}^2 (\hat{X}_{st1} - \hat{X}_{st2})^2 - 2\hat{R}(\hat{Y}_{st1} - \hat{Y}_{st2})(\hat{X}_{st1} - \hat{X}_{st2}) \right]$$

3.6.3 Estimates of Relative Standard Error (RSE):

$$R\hat{S}E(\hat{Y}) = \frac{\sqrt{V\hat{a}r(\hat{Y})}}{\hat{Y}} \times 100$$

$$R\hat{S}E(\hat{R}) = \frac{\sqrt{M\hat{S}E(\hat{R})}}{\hat{R}} \times 100$$

Table B1: Number of FSUs (villages/urban blocks) allotted, number of FSUs surveyed and number of persons enumerated in different states and union territories

State/UT	villages/blocks				persons enumerated	
	allotted		surveyed		rural	urban
	rural	urban	rural	urban		
(1)	(2)	(3)	(4)	(5)	(6)	(7)
Andhra Pradesh	492	372	491	372	14991	10667
Arunachal Pradesh	140	76	136	76	5155	2445
Assam	328	104	326	104	12455	3348

2.	date(s) of :		DD	MM	YY	DD	MM	YY			
	(i) survey/ inspection										
	(ii) receipt										
	(iii) scrutiny										
	(iv) despatch										
3.	number of additional sheets attached										
4.	total time taken to canvass	Schedule 10									
5.	(in minutes)	block 8 of Schedule 10									
6.	whether the schedule contains remarks (yes -1, no-2)		(i) in block 9/ 10								
			(ii) elsewhere in the schedule								
7.	signature										

[9] remarks by investigator/assistant superintending officer

[10] comments by supervisory officer (s)

[3] household characteristics										
1.	household size						7.	land owned as on the date of survey (0.000 hectares)		
2.	principal industry (NIC-2008)	description:					8.	land possessed as on the date of survey (0.000 hectares)		
		code (5-digit)					9.	land cultivated (including orchard and plantation) during July 2010– June 2011 (0.000 hectares)		
3.	principal occupation (NCO-2004)	description:					10.	for rural areas, if 1 in item 10,	whether the household has MGNREG job card (yes-1, no-2)	
		code (3-digit)					11.		number of MGNREG job cards issued to the household	
4.	household type (code)						12.	whether any member of the household has any bank/post office account <sup>#</sup> (yes-1, no-2)		
5.	religion (code)									
6.	social group (code)									

*Note: 1 acre = 0.4047 hectare, 1 hectare=10,000 sq. metre*

*#: Including accounts held in bank/post offices for payment of wages earned in MGNREG work.*

### **Codes for Block 3**

*item 4: household type:*

*for rural areas: self-employed in: agriculture-1, non-agriculture -2; regular wage/salary earning-3, casual labour in: agriculture-4, non-agriculture -5; others -9.*

*for urban areas: self-employed -1, regular wage/salary earning -2, casual labour -3, others -9.*

*item 5: religion: Hinduism -1, Islam -2, Christianity -3, Sikhism -4, Jainism -5, Buddhism -6, Zoroastrianism -7, others -9.*

*item 6: social group: scheduled tribe -1, scheduled caste -2, other backward class -3, others -9.*

**Codes for Block 4****col. (3): relation to head:**

self -1, spouse of head -2, married child -3, spouse of married child -4, unmarried child -5, grandchild -6, father/ mother/ father-in-law/ mother-in-law -7, brother/ sister/ brother-in-law/ sister-in-law/ other relatives -8, servants/ employees/ other non-relatives -9.

**col. (6): marital status:**

never married -1, currently married -2, widowed -3, divorced/separated -4.

**col. (7): educational level - general:**

not literate -01, literate without formal schooling: EGS/ NFEC/ AEC -02, TLC -03, others -04; literate: below primary -05, primary -06, middle -07, secondary -08, higher secondary -10, diploma/certificate course -11, graduate -12, postgraduate and above -13.

**col. (8): educational level - technical:**

no technical education -01, technical degree in agriculture/ engineering/ technology/ medicine, etc. -02, diploma or certificate (below graduate level) in: agriculture -03, engineering/ technology -04, medicine -05, crafts -06, other subjects -07; diploma or certificate (graduate and above level) in: agriculture -08, engineering/ technology -09, medicine -10, crafts -11, other subjects -12.

**col. (9): status of current attendance:**

currently not attending:  
never attended: school too far -01, to supplement household income -02, education not considered necessary -03, to attend domestic chores -04, others -05;  
ever attended but currently not attending: school too far -11, to supplement household income -12, education not considered necessary -13, to attend domestic chores -14, others -15;  
currently attending in: EGS/ NFEC/ AEC -21, TLC -22, pre-primary (nursery/ Kindergarten, etc.) -23, primary (class I to IV/ V) -24, middle -25, secondary-26, higher secondary-27, graduate in: agriculture -28, engineering/ technology -29, medicine -30, other subjects -31; post graduate and above -32, diploma or certificate (below graduate level) in: agriculture -33, engineering/ technology -34, medicine -35, crafts -36, other subjects -37; diploma or certificate (graduate level) in: agriculture -38, engineering/ technology -39, medicine -40, crafts -41, other subjects -42; diploma or certificate in post graduate and above level- 43.

col. (10): **type of institution:** government -1, local body -2, private and aided -3, private and unaided -4, not known -5.

col. (11): **whether currently registered with any placement agency:** registered: only in government employment exchanges-1, only in private placement agencies-2, in both government employment exchanges and private placement agencies-3; not registered -4.

**col. (12): whether receiving/received any vocational training:**

yes: receiving formal vocational training -1; received vocational training: formal -2, non-formal: hereditary-3, self-learning-4, learning on the job-5, others -6; did not receive any vocational training -7.

**col. (13): field of training:**

mechanical engineering trades -01, electrical and electronic engineering trades -02, computer trades -03, civil engineering and building construction related works -04, chemical engineering trades -05, leather related work -06, textile related work -07, catering, nutrition, hotels and restaurant related work -08, artisan/ craftsman/ handicraft and cottage based production work -09, creative arts/ artists -10, agriculture and crop production related skills and food preservation related work -11, non-crop based agricultural and other related activities -12, health and paramedical services related work -13, office and business related work -14, driving and motor mechanic work -15, beautician, hairdressing & related work -16, work related to tour operators/ travel managers -17, photography and related work -18, work related to childcare, nutrition, pre-schools and crèche -19, journalism, mass communication and media related work -20, printing technology related work -21, other -99.

**col. (15): whether worked in MGNREG works during last 365 days:**

worked-1, sought but did not get work-2, did not seek work-3.

<b>[4] demographic particulars of household members</b>														
srl. no.	name of member	relation to head (code)	sex (male-1, female - 2)	age (years)	marital status (code)	educational level		for persons of age 0-29 years, current attendance in educational institution		for persons of age 15 to 45 years, whether currently registered with any placement agency (code)	for persons of age 15 to 59 years		for persons of age 18 years and above in rural households with MGNREG job card,	
						general (code)	technical (code)	status of current attendance (code)	for codes 21-43 in col. 9, type of institution (code)		whether receiving/received any vocational training (code)	for codes 1 & 2 in col. 12, field of training (code)	whether registered in any MGNREG job card (yes-1, no-2)	for 1 in col. 14, whether worked in MGNREG works during last 365 days (code)
