Overview

ABSTRACT

The NSS 70th round survey on land and livestock holdings (LHS) was conducted in rural areas of the country. The main objective of the survey on Land and Livestock Holdings (LHS) is to generate basic quantitative information on the agrarian structure of the country, which is relevant to land policy. The quantitative information to be collected in the land and livestock holdings survey can be categorised into the three broad aspects of land ownership holdings, operational holdings and ownership of livestock. The survey on Land and Livestock Holding has been designed to collect information on (i) particulars of land (owned, leased-out, leased-in and otherwise possessed) of the household, (ii) location of land, (iii) area, (iv) duration of possession, (v) number of lessor/lessee households, (vi) terms of lease, (vii) land use during July 2012 to December 2012/January 2013 to June 2013/whole agricultural year (July 2012 to June 2013), (viii) whether irrigated, (ix) sources of irrigation, etc. Information on number of livestock, poultry, duckery, etc., owned by the household as on the date of survey will also be collected. Besides collection of information on land and livestock, information will be collected on some household characteristics such as (i) household classification, (ii) social group, (iii) religion, (iv) whether the household operated any land on Jhum cultivation during last 365 days, etc. Some information on demographic particulars from each of the household members will also be collected such as (i) sex, (ii) age, (iii) general education level, (iv) whether associated with the household operational holding, etc.

Using the information collected in this survey, different indicators of ownership holding, operational holding, pattern in land use, detailed types of crop production/animal farming activities of the households, seasonal variation in household operational holding, ownership of livestock, poultry, duckery, etc., can be generated for the rural areas of the country.

These statistical indicators are required for planning, policy formulation and decision making at various levels within the government and outside. The results of the survey will be of use to the Department of Agriculture & Cooperation, Department of Animal Husbandry, Dairying & Fisheries, National Accounts Division, etc. These will also be used by various users, researchers and policy makers.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Randomly selected households based on sampling procedure and members of the household

Scope

NOTES

The 70th round (January 2013 - December 2013) of NSS is earmarked for surveys on land and livestock holdings, debt and investment and situation assessment survey of agricultural households. The last survey on these subjects was conducted in

59th round of NSS (January 2003 - December 2003).

Geographical coverage: The survey covered the rural area of the whole of the Indian Union.

Population coverage: The following rules were adhered to:

1. Floating population, i.e., persons without any normal residence, was excluded. But persons residing in open space, roadside shelter, under a bridge, etc., more or less regularly in the same place were covered.
2. Foreign nationals were excluded, as well as their domestic servants, if by definition the latter belonged to the foreign national's household.
3. Persons residing in barracks of military and paramilitary forces (like police, BSF etc.) were kept outside the survey coverage. However, the civilian population residing in their neighbourhood, including the family quarters of service personnel, was covered.
4. Orphanages, rescue homes, ashrams and vagrant houses were outside the survey coverage. However, the persons staying in old age homes, the students staying in

ashram/hostels and the residential staff (other than monks/nuns) of these ashrams were covered. Although orphans living in orphanages were excluded, the persons looking

after them and staying there were covered. Convicted prisoners undergoing sentence were outside the coverage of the survey.

Sample size

First stage Units: A total of 4529 villages were surveyed as First stage Units (FSUs) in NSS 70th round for the Central sample at all-India level. In addition to this, State samples are also surveyed by the State/UT Governments who participated in this survey. The results presented in this document are based on Central sample alone.

Second Stage Units: Since, this schedule was canvassed in the rural areas only, the first stage units (FSU) were the census villages (Panchayat wards in case of Kerala), and the Second Stage Units (SSU) were the households. For the purpose of selection in case of Sch.18.1, all households in a sample village were classified into four Second Stage Strata (SSS) based on area of land possessed viz. less than 0.005 hectare-1, equal to or more than 0.005 hectare but less than 1.000 hectare -2, equal to or more than 1.000 hectare but less than 2.000 hectares -3, equal to or more than 2.000 hectares -4. Thereafter, 8 households were surveyed from each sample village, taking 2 household from each SSS.

Each of the sample households were visited once in visit-1 and in visit-2. However, a few households of visit-1 became 'casualty' while surveying in visit-2. At all-India level, a total of 35604 households were surveyed in visit-1 and 35337 of them could be surveyed in visit-2.

TOPICS

Topic	Vocabulary	URI
Labor Markets	World Bank	http://www.surveynetwork.org/toolkit

KEYWORDS

Household Operational Holding, Household ownership Holding, Pattern in land use of Households, Crop production of Households, Animal Farming of Households, Seasonal variation in household operational holding, ownership of livestock, poultry, duckery, etc

Coverage

GEOGRAPHIC COVERAGE

The survey covered the rural area of the whole of the Indian Union.

UNIVERSE

The survey used the interview method of data collection from a sample of randomly selected households and members of

the household

Sampling

Sampling Procedure

A stratified multi-stage design has been adopted for the 70th round survey. The first stage units (FSU) are the census villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. The ultimate stage units (USU) are households in both the sectors. In case of large FSUs, one intermediate stage of sampling is the selection of two hamlet-groups (hgs)/ sub-blocks (sbs) from each rural/ urban FSU.

Sampling Frame for First Stage Units: For the rural sector, the list of 2001 census villages updated by excluding the villages urbanised and including the towns de-urbanised after 2001 census (henceforth the term 'village' would mean Panchayat wards for Kerala) constitutes the sampling frame. For the urban sector, the latest updated list of UFS blocks (2007-12) is considered as the sampling frame.

Stratification:

(a) Stratum has been formed at district level. Within each district of a State/ UT, generally speaking, two basic strata have been formed: i) rural stratum comprising of all rural areas of the district and (ii) urban stratum comprising all the urban areas of the district. However, within the urban areas of a district, if there were one or more towns with population 10 lakhs or more as per population census 2011 in a district, each of them formed a separate basic stratum and the remaining urban areas of the district was considered as another basic stratum.

(b) However, a special stratum in the rural sector only was formed at State/UT level before district- strata were formed in case of each of the following 20 States/UTs: Andaman & Nicobar Islands, Andhra Pradesh, Assam, Bihar, Chhattisgarh, Delhi, Goa, Gujarat, Haryana, Jharkhand, Karnataka, Lakshadweep, Madhya Pradesh, Maharashtra, Odisha, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh and West Bengal. This stratum will comprise all the villages of the State with population less than 50 as per census 2001.

(c) In case of rural sectors of Nagaland one special stratum has been formed within the State consisting of all the interior and inaccessible villages. Similarly, for Andaman & Nicobar Islands, one more special stratum has been formed within the UT consisting of all inaccessible villages. Thus for Andaman & Nicobar Islands, two special strata have been formed at the UT level:

(i) special stratum 1 comprising all the interior and inaccessible villages

(ii) special stratum 2 containing all the villages, other than those in special stratum 1, having population less than 50 as per census 2001.

Sub-stratification:

Rural sector: Different sub-stratifications are done for 'hilly' States and other States. Ten (10) States are considered as hilly States. They are: Jammu & Kashmir, Himachal Pradesh, Uttarakhand, Sikkim, Meghalaya, Tripura, Mizoram, Manipur, Nagaland and Arunachal Pradesh.

(a) sub-stratification for hilly States: If 'r' be the sample size allocated for a rural stratum, the number of sub-strata formed was ' $r/2$ '. The villages within a district as per frame have been first arranged in ascending order of population. Then sub-strata 1 to ' $r/2$ ' have been demarcated in such a way that each sub-stratum comprised a group of villages of the arranged frame and have more or less equal population.

(b) sub-stratification for other States (non-hilly States except Kerala): The villages within a district as per frame were first arranged in ascending order of proportion of irrigated area in the cultivated area of the village. Then sub-strata 1 to ' $r/2$ ' have been demarcated in such a way that each sub-stratum comprised a group of villages of the arranged frame and have more or less equal cultivated area. The information on irrigated area and cultivated area was obtained from the village directory of census 2001.

(c) sub-stratification for Kerala: Although Kerala is a non-hilly State but because of non-availability of information on irrigation at FSU (Panchayat Ward) level, sub-stratification by proportion of irrigated area was not possible. Hence the procedure for sub-stratification was same as that of hilly States in case of Kerala.

Urban sector: There was no sub-stratification for the strata of million plus cities. For other strata, each district was divided into 2 sub-strata as follows:

sub-stratum 1: all towns of the district with population less than 50000 as per census 2011

sub-stratum 2: remaining non-million plus towns of the district

Total sample size (FSUs): 8042 FSUs have been allocated for the central sample at all-India level. For the state sample, there are 8998 FSUs allocated for all-India.

Allocation of total sample to States and UTs: The total number of sample FSUs have been allocated to the States and UTs in proportion to population as per census 2011 subject to a minimum sample allocation to each State/ UT. While doing so, the resource availability in terms of number of field investigators as well as comparability with previous round of survey on the same subjects has been kept in view.

Allocation of State/ UT level sample to rural and urban sectors: State/ UT level sample size has been allocated between two sectors in proportion to population as per census 2011 with double weightage to urban sector subject to the restriction that urban sample size for bigger states like Maharashtra, Tamil Nadu etc. should not exceed the rural sample size. A minimum of 16 FSUs (minimum 8 each for rural and urban sector separately) is allocated to each state/ UT.

Allocation to strata: Within each sector of a State/ UT, the respective sample size has been allocated to the different strata in proportion to the population as per census 2011. Allocations at stratum level are adjusted to multiples of 2 with a minimum sample size of 2.

For special stratum formed in the rural areas of 20 States/UTs, 2 FSUs were allocated to each.

For special stratum 1 in the rural areas of Nagaland and Andaman & Nicobar Islands, 4 and 2 FSUs were allocated respectively.

Allocation to sub-strata:

Rural: Allocation is 2 for each sub-stratum in rural.

Urban: Stratum allocations have been distributed among the two sub-strata in proportion to the number of FSUs in the sub-strata. Minimum allocation for each sub-stratum is 2

Deviations from Sample Design

There was no deviation from the original sample deviation.

Response Rate

No. of Second stage units (s.s.u's) is 35337

Weighting

For generating any estimate, one has to extract relevant portion of the data, and aggregate after applying the weights.

Weights (or multipliers) VARIABLES are given at the end of record of each dataset. The weights (multipliers) are WGT_SS for Sub-sample-wise estimation and WGT_Combined for combined subsample estimates.

All records of a household will have same weight figure. In case of those Blocks/Levels, where Item/Person Sl.No. is not applicable the field is filled up with 00000.

Use of subsample-wise weights (multipliers)

For generating subsample-wise estimates based on data of all subrounds taken together, either Subsample-1 households or Subsample-2 households are to be considered at one time. Subsample code is available in the dataset For generating subsample-combined estimates based on data of all subrounds taken together all households are to be considered.

Questionnaires

Overview

Broad structure of the Schedule for collection of information in visit 1 and visit 2 are given below:

Block 0: descriptive identification of sample household

Block 1: identification of sample household

Block 2: particulars of field operation

Block 3: household characteristics (only in visit 1)

Block 4: demographic and other particulars of household members (only in visit 1)

Block 5: particulars of land of the household and its operation during July 2012 to December 2012/January 2013 to June 2013

Block 6: some general information of operational holdings for July 2012 to December 2012/January 2013 to June 2013

Block 7: livestock, poultry, duckery, etc., owned by the household as on the date of survey (only in visit 1)

Block 8: some general information of household operational holding for the whole agricultural year: July 2012- June 2013(only in visit 2)

Block 9: remarks by investigator

Block 10: Comments by supervisory officer(s)

Data Collection

Data Collection Dates

Start	End	Cycle

2013-04-16	2013-07-31	subround-2, Visit-1
2013-08-01	2013-10-15	subround-1, Visit-2
2013-10-16	2013-12-31	subround-2, Visit-2

Data Collection Mode

Face-to-face [f2f]

Data Collection Notes

The 70th round (January 2013 - December 2013) of NSS is earmarked for surveys on land and livestock holdings, debt and investment and situation assessment survey of agricultural households. Each sample FSU is being visited twice during this round. Since the workload of the first visit (i.e. visit 1) is more, the first visit continues till the end of July 2013. Thus, period of the first visit is January - July 2013 and that of the second visit (i.e. visit 2) is August - December 2013.

The survey period of the round are divided into two sub-rounds. Sub-round one will consist of the first half of the survey period of each visit i.e. 1st Jan -15th April 2013 for visit 1 and 1st August - 15th October 2013 for visit 2 while sub-round two consists of the remaining period of the respective visits. Thus, each sub-round are three and a half months for visit 1 and two and a half months for visit 2.

Questionnaires

Broad structure of the Schedule for collection of information in visit 1 and visit 2 are given below:

Block 0: descriptive identification of sample household

Block 1: identification of sample household

Block 2: particulars of field operation

Block 3: household characteristics (only in visit 1)

Block 4: demographic and other particulars of household members (only in visit 1)

Block 5: particulars of land of the household and its operation during July 2012 to December 2012/January 2013 to June 2013

Block 6: some general information of operational holdings for July 2012 to December 2012/January 2013 to June 2013

Block 7: livestock, poultry, duckery, etc., owned by the household as on the date of survey (only in visit 1)

Block 8: some general information of household operational holding for the whole agricultural year: July 2012- June 2013(only in visit 2)

Block 9: remarks by investigator

Block 10: Comments by supervisory officer(s)

Block-6 Level-05 Some general information of household operational holding - Visit-2

Content	This block contains dataset of some general information on the household operational holding. In visit 1, information is relate to the household operational holding of July 2012 to December 2012. Information relating to the household operational holding of January 2013 to June 2013 has been recorded in visit 2. In visit 1, information on household operational holdings for July 2012 to December 2012 has been collected and the area possessed by the holding during the major part of the period (3 months or more) July 2012 to December 2012 will be considered to constitute the household operational holding for July 2012 to December 2012.

Household Identification (HH_ID)

File: Block-1- Level -01-Identification of sample household-records-visit-1

Overview

Type: Continuous	Valid cases: 35337
Format: numeric	Invalid: 0
Width: 9	
Decimals: 0	
Range: 200001101-299482401	

Description

1. Common Primary Key for identification of a Household is:
 FSU Serial Number 5 bytes
 Segment Number/Hemlet group 1 byte
 Second Stage Stratum Number 1 byte
 household Number 2 byte

centre (centre)

File: Block-1- Level -01-Identification of sample household-records-visit-1

Range: 1-2	

Remarks in Schedules (remark4)

File: Block-2 - Level-08 Particulars of field operations

Remarks in Schedules (remark4)

File: Block-2 - Level-08 Particulars of field operations

Overview

Type: Discrete	Valid cases: 35296
Format: numeric	Invalid: 4
Width: 1	
Decimals: 0	
Range: 1-2	

Special Character of OK stamp (sp_char_ok)

File: Block-2 - Level-08 Particulars of field operations

Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 35300
Width: 1	
Decimals: 0	

NSS (nss)

File: Block-2 - Level-08 Particulars of field operations

Overview

Type: Discrete	Valid cases: 35300
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 1-9	

NSC (nsc)

File: Block-2 - Level-08 Particulars of field operations

Overview

Type: Discrete	Valid cases: 35300
Format: numeric	Invalid: 0
Width: 2	
Decimals: 0	
Range: 1-18	

Multiplier Posted (mlt)

File: Block-2 - Level-08 Particulars of field operations

Overview

Type: Continuous	Valid cases: 35300
Format: numeric	Invalid: 0
Width: 8	Minimum: 200
Decimals: 0	Maximum: 97200000
Range: 200-97200000	Mean: 882296.5
	Standard deviation: 2299731.7

Multiplier Sub Sample (wgt_ss)

File: Block-2 - Level-08 Particulars of field operations

Overview

Type: Continuous	Valid cases: 35300
Format: numeric	Invalid: 0
Width: 9	Minimum: 2
Decimals: 2	Maximum: 972000
Range: 2-972000	Mean: 8823
	Standard deviation: 22997.3

Description

sub-sample wise estimates
wgt_ss = MLT/100

Multiplier Combined (wgt_combined)

File: Block-2 - Level-08 Particulars of field operations

Overview

Type: Continuous	Valid cases: 35300
Format: numeric	Invalid: 0
Width: 9	
Decimals: 2	
Range: 1-486000	

Description

For sub-sample combined estimates
wgt_combined = MLT/100, if NSS=NSC
= MLT/200 otherwise.
