Overview

ABSTRACT

The Employment and Unemployment surveys of National sample Survey (NSS) are primary sources of data on various indicators of labour force at National and State levels. These are used for planning, policy formulation, decision support and as input for further statistical exercises by various Government organizations, academicians, researchers and scholars. NSS surveys on employment and un-employment with large sample size of households have been conducted quinquennially from 27th. round(October'1972 - September'1973) onwards. Continuing in this series the fourth such all-india survey on the situation of employment and unemployment in India was carried out during the period July 1987 - June 1988 .

The working Group set up for planning of the entire scheme of the survey, among other things, examined also in detail some of the key results generated from the 38th round data and recommended some stream-lining of the 38th round schedule for the use in the 43rd round. Further, it felt no need for changing the engaging the existing conceptual frame work. However, some additional items were recommended to be included in the schedule to obtain the necessary and relevant information for generating results to see the effects on participation rates in view of the ILO suggestions.5.0.1. The NSSO Governing Council approved the recommendations of the working Group and also the schedule of enquiry in its 44th meeting held on 16 January, 1987. In this survey, a nation-wide enquiry was conducted to provide estimates on various characteristics pertaining to employment and unemployment in India and some characteristics associated with them at the national and state levels. Information on various facets of employment and unemployment in India was collected through a schedule of enquiry (schedule 10).

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Randomly selected households based on sampling procedure and members of the household

Scope

NOTES

The NSSO surveys on employment and unemployment aim to measure the extent of 'employment' and 'unemployment' in quantitative terms disaggregated by various household and population characteristics . The persons surveyed are classified in to various activity categories on the basis of the activities pursued by them during certain specified reference periods. Three reference periods are used in these surveys. These are (i) one year (ii) one week and (iii) each day of the week. Based on these three periods three different measures are arrived at. These are termed as usual status, current weekly status ,and the current daily status .The Schedule on employment and unemployment (Schedule 10) framed for the 43rd round survey consisted of 11 blocks.

Block-1: Identification particulars of the sample village/block and the sample households in which the survey schedules to be canvassed were recorded in block 1.

Block-2: was meant for recording the particulars of field operations.

Block-3: certain characteristics of the sample household meant to be used as classificatory variables in the tabulation of data and information as to whether the sample household has received any assistance under IRDP, employment generation scheme, etc., were recorded in this block.

Block-4: This block covered the demographic particulars, such as, age, sex, marital status, educational standard, etc., and the particulars of current weekly activity obtaining during the seven days preceding the date of survey of all the normally resident members of the household.

Block-5: was meant for recording detailed day-to-day disposition of labour time of those classified as in the labour force according to current weekly activity status i.e., information on the various activities pursued on different days of the reference week by household members reported as 'working' and 'seeking and/or available for work' and the intensity in quantitative terms, namely 'full' and 'half' of such activity.

Block-6: The particulars of usual activity of each normally resident member of the sample household, information on the subsidiary gainful activity status of those classified as 'working' as well as 'not working', migration status and for those identified as migrants, the various migration characteristics such as, period since migrated, reason for migration, type of last usual place of residence, etc., were collected in block 6.

Block-7: The follow up questions (probing questions) pertaining to the availability for 'work'/'additional work'/'alternative work' meant to be put to those classified as 'working', 'students', 'person engaged in domestic duties' and 'pensioners'/renters, etc., were collected through block 7.

Block-8: For persons classified as 'engaged in domestic duties', some further follow up questions are formulated and listed in block 8 with a view to collecting some additional information which might explain as to whether their usual attachment to domestic duties is voluntary or involuntary and also throw light on their participation in some specified activities for family gain.

Block-9: Particulars regarding the household indebtedness, such as amount of loan, its nature, source of borrowing, etc., were collected in block 9 only for the rural labour households.

Block-10 & 11 : Any relevant remarks of the investigators were recorded in block 10 and the comments by the supervisory officers in block 11.

TOPICS

Topic	Vocabulary	URI
Labor Markets	World Bank	http://www.surveynetwork.org/toolkit

KEYWORDS

Employment, Unemployment, Indebtedness of rural labour, Usual principal activity, Usual subsidiary activity, Time disposition during the week, Migration

Coverage

GEOGRAPHIC COVERAGE

The survey covered the whole of Indian Union excepting

- i) Ladakh and Kargil districts of Jammu & Kashmir
- ii) Rural areas of Nagaland

UNIVERSE

The survey used the interview method of data collection from a sample of randomly selected households and members of the household

Sampling

Sampling Procedure

It may be mentioned here that in order to net more households of the upper income bracket in the Sample, significant changes have been made in the sample design in this round (compares to the design of the 38th round).

SAMPLE DESIGN AND SAMPLE SIZE

The survey had a two-stage stratified design. The first stage units (f.s.u.'s) are villages in the rural sector and urban blocks in the urban sector. The second stage units are households in both the sectors.

Sampling frame for f.s.u.'s : The lists of 1981 census villages constituted the sampling frame for rural sector in most districts. But the 1981 census frame could not be used for a few districts because, either the 1981 census was not held there or the list of 1981 census villages could not be obtained or the lists obtained from the census authorities were found to be grossly incomplete. In such cases 1971 census frame were used. In the urban sector, the Urban Frame Survey (U.F.S.) blocks constituted the sampling frame.

STRATIFICATION : States were first divided into agro-economic regions which are groups of contiguous districts, similar with respect to population density and crop pattern. In Gujarat, however, some districts have been split for the purpose of region formation in consideration of the location of dry areas and the distribution of the tribal population in the state. The composition of the regions is given in the Appendix.

RURAL SECTOR: In the rural sector, within each region, each district with 1981 Census rural population less 1.8 million formed a single stratum. Districts with larger population were divided into two or more strata, depending on population, by grouping contiguous tehsils similar, as far as possible, in respect of rural population Density and crop pattern. (In Gujarat, however, in the case of districts extending over more than one region, even if the rural population was less than 1.8 million, the portion of a district falling in each region constituted a separate stratum. Further, in Assam the old "basic strata" formed on the basis of 1971 census rural population exactly in the above manner, but with cut-off population as 1.5 million have been retained as the strata for rural sampling.)

URBAN SECTOR : In the urban sector, strata were formed, again within NSS region, on the basis of the population size class of towns. Each city with population 10 lakhs or more is self-representative, as in the earlier rounds. For the purpose of stratification, in towns with '81 census population 4 lakhs or more, the blocks have been divided into two categories, viz. : One consisting of blocks in areas inhabited by the relatively affluent section of the population and the other consisting of the remaining blocks. The strata within each region were constituted as follows :

Table (1.2) : Composition of urban strata

Stratum population class of town
number

(1) (2)

- 1 all towns with population less than 50,000
- 2 -do- 50,000 - 199,999
- 3 -do- 200,000 - 399,999
- 4 -do- 400,000 - 999,999 (affluent area)
- 5 (other area)
- 6 a single city with population 1 million and above (affluent area)
- 7 " (other area)
- 8 another city with population 1 million and above
- 9 " (other area)

Note : There is no region with more than one city with population 1 million and above. The stratum number have been retained as above even if in some regions some of the strata are empty.

Allocation for first stage units : The total all-India sample size was allocated to the states /U.T.'s proportionate to the strength of central field staff. This was allocated to the rural and urban sectors considering the relative size of the rural and urban population. Now the rural samples were allocated to the rural strata in proportion to rural population. The urban samples were allocated to the urban strata in proportion to urban population with double weight age given to those strata of towns with population 4 lakhs or more which lie in area inhabited by the relatively affluent section. All allocations have been adjusted such that the sample size for stratum was at least a multiple of 4 (preferably multiple of 8) and the total sample size of a region is a multiple of 8 for the rural and urban sectors separately.

Selection of f.s.u.'s : The sample villages have been selected circular systematically with probability proportional to

population in the form of two independent interpenetrating sub-samples (IPNS) . The sample blocks have been selected circular systematically with equal probability , also in the form of two IPNS' s.

As regards the rural areas of Arunachal Pradesh, the procedure of 'cluster sampling' was:- The field staff will be supplied with a list of the nucleus villages of each cluster and they selected the remaining villages of the cluster according to the procedure described in Section Two. The nucleus villages were selected circular systematically with equal probability, in the form of two IPNS 's.

Hamlet-group and sub-blocks : Large villages and blocks were sub- divided into a suitable number of hamlet-groups and sub-blocks respectively having equal population convent and one them was selected at random for surveys.

Hamlet-group and sub-blocks : Large villages and blocks were sub- divided into a suitable number of hamlet-groups and sub-blocks respectively having equal population convent and one them was selected at random for surveys.

Selection of households : rural : In order to have adequate number of sample households from the affluent section of the society, some new procedures were introduced for selection of sample households, both in the rural and urban sectors. In the rural sector , while listing households, the investigator identified the households in village/ selected hamlet- group which may be considered to be relatively more affluent than the rest. This was done largely on the basis of his own judgment but while exercising his judgment considered factors generally associated with rich people in the locality such as : living in large pucca house in well-maintained state, ownership/possession of cultivated/irrigated land in excess of certain norms. (e.g.20 acres of cultivated land or 10 acres of irrigated land), ownership of motor vehicles and costly consumer durables like T.V. , VCR, VCP AND refrigerator, ownership of large business establishment , etc. Now these "rich" households will form sub-stratum 1. (If the total number of households listed is 80 or more , 10 relatively most affluent households will form sub-stratum 1. If it is below 80, 8 such households will form sub-stratum 1. The remaining households will 'constitute sub-stratum 2. At the time of listing, information relating to each household' s major sources of income will be collected, on the basis of which its means of livelihood will be identified as one of the following : "self-employed in non-agriculture " "rural labour" and "others" (see section Two for definition of these terms) . Also the area of land possessed as on date of survey will be ascertained from all households while listing. Now the households of sub-stratum 2 will be arranged in the order : (1)self-employed in non-agriculture, (2) rural labour, other households, with land possessed (acres) : (3) less than 1.00 (4) 1.00-2.49,(5)2.50-4.99, (6) 5.00-9.99 and (7) 10.00 or more. 2 sample households will be selected from sub-stratum 1 circular systematically with a random start. In the case of sub-stratum 2,8 households will be selected from the arranged frame, also circular systematically with random start.

Selection of households : Urban: At the time of listing, information on the major sources of income will be ascertained from each household, based on which its mean of livelihood class will be identified as one of the following : (a) self-employed , (b) regular wage/ salaried employee , (c) casual labour and (d) others. Further , the average monthly consumer expenditure and the household size will also be ascertained from each household from which its (average monthly) per capita expenditure (pce) will be obtained . Now , in all towns except those with population 10 lakhs or more all households with pce Rs. 800/-or more will from sub-stratum 1 (the affluent or rich section) and the rest , sub-stratum 2. In towns with population 10 lakhs or more , households with pce Rs.1000/-or more will constitute sub-stratum 1 and the others, sub-stratum 2 Households of sub-stratum to m.1. classes (a) and (b) above will be assigned to one of the three pce classes : (1) less than 'A' , (2) 'A' to 'B' : A and B have been determined at states / U.T. level such that the above three pce classes will roughly include , respectively , the lowest 30 % , the middle 60% and the top 10% of the population for state/U.T. The values of A and B are given state wise in Section 2). The households of sub-stratum 2 will be arranged by means of livelihood x pce class thus : a-1, a-2, a-3, b-3,b-2, b-1, c, d where a,b,c and d stand for the m.1. classes and 1,2 and 3 for the pce classes as given above . Now, in the affluent strata of towns with population 4 lakhs or more, households will be selected from sub-stratum 1 and 6 from sub-stratum 2 . In the remaining strata , 2 household will be selected from sub-stratum 1 and 8 from sub-stratum 2 as in the rural sector . The required number of sample households will be selected separately from each sub-stratum circular systematically with a random start .

Sample size (central sample) : The all India sample in respect of the central sample consisted of 8518 villages and 4648 blocks

Weighting

Three different weights are provided in each record of files in the data set. Details are as follows:-

1. Weight at stratum level is stored in Variable name : Wgt1_Statm.
2. Weight for each sub-round (Sub-round wise weight) is stored in Variable name : Wgt2_SS
3. Weight for each subsample (Sub-sample wise weight) is stored in Variable name : Wgt3_SR.
4. Weight for all Subrounds pooled and combined subsample weight is stored in Variable name : Wgt4_Pooled

Questionnaires

Overview

Summary description of the schedule : The schedule 10 on employment-unemployment for NSS43rd round consisted of 11 blocks as given below.

Blocks 1 and 2 - identification of sample households and particulars of field operations.

Block 3 - Household Characteristics.

Block 4 - Demographic and current activity particulars for the week.

Block 5 - Time disposition during the reference week.

Block 6 - Usual activity and migration particulars.

Block 7 - Follow-up questions for the persons with usual activity status codes 11-94.

Block 8 - Follow up questions for persons having usual activity status codes 92 & 93 (i.e. those engaged in domestic duties).

Block 9 - Household indebtedness collected only for rural labour households.

Blocks 10 & 11 - used for recording the remarks of the investigator and comments of supervisory officers respectively.

Key to identify household (Hhold_key)

File: Block-1-3-Household-Records

Overview

Type: Discrete
 Format: character
 Width: 8

Valid cases: 129194
 Invalid: 0

Sample (Sample)

File: Block-1-3-Household-Records

Overview

Type: Discrete
 Format: character
 Width: 1

Valid cases: 129194
 Invalid: 0

Description

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Literal question

Central or State sample?

Interviewer instructions

Record 1 or 2 depending on whether the selected sample village/block is central sample or state sample

Sector (Sector)

File: Block-1-3-Household-Records

Overview

Type: Discrete
 Format: character
 Width: 1

Valid cases: 129194
 Invalid: 0

Literal question

Sector code

Interviewer instructions

Record 1 or 2 depending on whether the selected sample village/block is classified as Rural or Urban

State (State)

File: Block-1-3-Household-Records

Overview

Type: Discrete
 Format: character
 Width: 2

Valid cases: 129194
 Invalid: 0

Literal question

State Code

Interviewer instructions

State to which the sample village/block belongs to will be recorded here as per the code list

Region (Region)

File: Block-1-3-Household-Records

Region (Region)

File: Block-1-3-Household-Records

Overview

Type: Discrete	Valid cases: 129194
Format: character	Invalid: 0
Width: 1	

Description

Regions are hierarchical domains of study below the level of State/ Union Territory in the NSS.

Literal question

Region Code

Interviewer instructions

Code this item as per code list

District code (District)

File: Block-1-3-Household-Records

Overview

Type: Discrete	Valid cases: 129131
Format: character	Invalid: 0
Width: 2	

Literal question

District code

Interviewer instructions

District to which the State belongs to will be coded here as per code list

Sample Village/Block No. (Vill_Blk_No)

File: Block-1-3-Household-Records

Overview

Type: Discrete	Valid cases: 129194
Format: character	Invalid: 0
Width: 3	

Stratum (Stratum)

File: Block-1-3-Household-Records

Overview

Width: 2	

Sub-sample (Subsample)

File: Block-1-3-Household-Records

Overview

Type: Discrete	Valid cases: 129194
Format: character	Invalid: 0
Width: 1	

Description

Sub-sample (Subsample)

File: Block-1-3-Household-Records

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub-sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

Literal question

Sub-Sample

Sub-round (Subround)

File: Block-1-3-Household-Records

Overview

Type: Discrete

Format: character

Width: 1

Valid cases: 129194

Invalid: 0

Description

The survey period of one year of this round was divided into four sub-rounds of three months duration. Equal number of sample villages and blocks were allotted for survey in each of these four sub-rounds.

Literal question

Sub round

Village/Block Serial No(First Stage Unit) (FSU) (FSU_SINo)

File: Block-1-3-Household-Records

Overview

Type: Discrete

Format: character

Width: 5

Valid cases: 129194

Invalid: 0

Description

The first-stage units (FSU) are census villages in the rural sector and the NSSO urban frame survey (UFS) blocks in the urban sector. This variable indicates the serial number assigned to such units

Literal question

Serial number of village/block

Sub-stratum (Sub_stratum)

File: Block-1-3-Household-Records

Overview

Type: Discrete

Format: character

Width: 1

Valid cases: 129194

Invalid: 0

Household Serial no. (Hhold_No)

File: Block-1-3-Household-Records

Overview

Household Serial no. (Hhold_No)

File: Block-1-3-Household-Records

Type: Discrete
Format: character
Width: 2

Valid cases: 129194
Invalid: 0

Description

A group of persons normally living together and taking food from a common kitchen will constitute a household. The members of a household may or may not be related by blood to one another.

Literal question

Serial number of sample Household

Sex of Head of Hhold (B1_q12)

File: Block-1-3-Household-Records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 129194
Invalid: 0

Literal question

Sex code of head of Household

Interviewer instructions

The sex of the head of the household in terms of codes (male - 1, female - 2) in to be recorded against this item. The entry will be same as the one entered in col. (4) against line 1 in block 4.

Survey sequence code (B1_q19)

File: Block-1-3-Household-Records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 129194
Invalid: 0

Literal question

Suvey sequence code

Informant code (B1_q20)

File: Block-1-3-Household-Records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 129057
Invalid: 0

Literal question

Who is the informant?

Interviewer instructions

Whether the primary informant is the head of the household or any other member of the household will be indicated against this item in terms of code '1' and code '2' respectively. If the primary informant is not a member of the household, code '9' will be recorded

Type of informant code (B1_q21)

File: Block-1-3-Household-Records

Overview

Type: Discrete	Valid cases: 129015
Format: character	Invalid: 0
Width: 1	

Literal question

Type of Informant

Interviewer instructions

The type of the primary informant, i.e., whether he is co-operative, busy, etc., will be recorded against this item in terms of the specified codes

Survey code (B1_q22)

File: Block-1-3-Household-Records

Overview

Type: Discrete	Valid cases: 128874
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

5.1.1 Whether the originally selected household has been surveyed or a substituted household has been surveyed will be indicated against this item by recording '1', if it is the originally selected sample and '2', if it is the substituted sample. If neither the originally selected household nor the substituted household could be surveyed, i.e., if the sample household was casualty, code '3' would be recorded. In such case only block 1 and 2 will be filled up and on the top of the front page of the schedule, the word 'casualty' will be written and underlined.

Reason for casualty code (B1_q23)

File: Block-1-3-Household-Records

Overview

Type: Discrete	Valid cases: 2546
Format: character	Invalid: 0
Width: 1	

Literal question

Reason for casualty c(ode)

Interviewer instructions

For the originally selected sample household which could not be surveyed, the reason for its becoming a casualty will be recorded against this item in terms of the specified code.

Hhold size (B3_q1_Hhsize)

File: Block-1-3-Household-Records

Overview

Type: Continuous	Valid cases: 129194
Format: numeric	Invalid: 0
Width: 2	Minimum: 0
Decimals: 0	Maximum: 44
Range: 0-44	Mean: 5.2
	Standard deviation: 2.7

Literal question

Household Size

Interviewer instructions

Hhold size (B3_q1_Hhsize)

File: Block-1-3-Household-Records

The number of normally resident members of a household is its size. It will include temporary stay-aways but exclude temporary visitors and guests. Even though the determination of the actual composition of a household will be left to the judgement of the head of the household. This number will be the same as the last serial number recorded in column (1) of block 4.

Hhold NIC-NCO code (B3_q2)

File: Block-1-3-Household-Records

Overview

Type: Discrete	Valid cases: 123711
Format: character	Invalid: 0
Width: 6	

Description

The industry is defined as the sector of economic activity in which a person works. National Industrial Classification (NIC)-1970 was used for classifying the industry to which a person is attached. The NIC 1970 classifications are presented generally in terms of 4 digit codes in which the left-most digit describes the 'industry section'; the left-most two digits together describes the 'industry division'; the left-most three digits together describes the 'industry group' and all the four digits together pinpoints the ultimate industry class.

OCCUPATION

The nature of economic activity performed by a person is his/ her occupation. For classifying the occupation of a person the 'National Classification of Occupations (NCO 1968)' is used.

Literal question

Industry and Occupation of the Household as per codelist

Interviewer instructions

The entry against this item will be recorded in terms of six digit code numbers of which the first three left hand digits will refer to the appropriate 'industry group' and the next three to the relevant 'occupation family' of the NIC, 1970 and NCO, 1968 respectively. The description of the principal household industry-occupation will be recorded in the space provided along with the item description.

Household type code (B3_q3)

File: Block-1-3-Household-Records

Overview

Type: Discrete	Valid cases: 128943
Format: character	Invalid: 0
Width: 2	

Literal question

Household Type

Interviewer instructions

At the listing stage, for the rural areas, all the households are assigned codes 1, 2 or 9 in col. 5 of block 6 (sch. 0.1) according to whether they belong to the three groups, namely (i) households self-employed in non-agriculture, (ii) rural labour household and (iii) other households, decided on the basis of their means of livelihood. But at the time of detailed enquiry (i.e. when schedules 10 and 1.0 will be canvassed in the sample households), each of the sample households will be assigned a 'type' code, the one appropriate for the sample household will be chosen. For details see Instruction Manual (section-5) attached as external source

Hhold religion code (B3_q4_Relgn)

File: Block-1-3-Household-Records

Overview

Hhold religion code (B3_q4_Relgn)

File: Block-1-3-Household-Records

Type: Discrete
 Format: character
 Width: 1

Valid cases: 128963
 Invalid: 0

Literal question

Household Religion (code)

Interviewer instructions

The religion of the household in terms of the specified code will be recorded against this item. If different members of the household claim to belong to different religions, though such an eventuality is likely to be rare, the religion of the head of the household will be considered as the religion of the household.

Hhold group code (B3_q5_Hgrup)

File: Block-1-3-Household-Records

Overview

Type: Discrete
 Format: character
 Width: 1

Valid cases: 129150
 Invalid: 0

Interviewer instructions

Whether or not the household belong to scheduled tribe or scheduled caste or neo-Buddhists will be indicated against this item in terms of the specified codes. Those who do not come under any of first three groups will be assigned code 9 meant to cover all other categories. In case, different members belong to different household groups, the group to which the head of the household belongs will be considered as the 'household group' and the group code appropriate for the head of the household will be assigned.

Homestead code (B3_q6)

File: Block-1-3-Household-Records

Overview

Type: Discrete
 Format: character
 Width: 1

Valid cases: 129139
 Invalid: 0

Interviewer instructions

Information regarding the type of the homestead (house and house site) will be recorded against this item. If the homestead is owned by the household code 1 and if otherwise possessed, code 9 will be recorded. In the cases where the homestead is partly owned and partly otherwise possessed, code 9 will be recorded.

Land owned(0.00) (B3_q7)

 Width: 5
 Decimals: 2
 Range: 0-99.99

Valid cases: 104500
 Invalid: 24694
 Minimum: 0
 Maximum: 100
 Mean: 1.4
 Standard deviation: 3.2

Description

The total land area possessed by the household will be worked out as question 7+8+9-10 and recorded against this item 2 places of decimal. A piece of land is considered to be owned by the household if permanent heritable possession with or without the right to transfer the title is vested in a member or the members of the household. Land held in owner like possession say, under perpetual lease, hereditary tenure, long term leases for 30 years or more, etc., will also be considered as land owned. For a piece of land under the possession of the household, if the household lacks title of ownership and also it does not have any lease agreement for the use of land transacted either verbally or in writing, such land will be considered as neither owned nor 1 seed in.

Literal question

Land Total possessed(0.00)

Interviewer instructions

For each person assigned the 'work' status codes (i.e. codes 11-72) in column (11), the description of the principal industry-occupation relevant t the type of gainful activity pursued by the person' during the reference week will be recorded in column (13). The corresponding three digit occupation family code (NCO 1968) will be recorded in column (15). In case more than one occupation is assignable to a person, the principal occupation relevant to the person will be the one, in which relatively more time has been spent during the reference week, in pursuing such gainful activities.

Engaged in own account Construction? (B4_q16)

Overview

Engaged in own account Construction? (B4_q16)

File: Block-4-Persons-Demographic-current-weekly-activity- Records

Type: Discrete
Format: character
Width: 1

Valid cases: 667848
Invalid: 0

Literal question

Whether engaged in own account Construction during the week ?

Interviewer instructions

For each member of the household, it will be ascertained whether he or she was engaged in 'own account construction' activity at any time during the week or not. Own account construction activity includes construction of own houses, roads and well, etc., and also construction of any private or community facilities, but free of charge (more details in Instruction manual attached as external resource)

Literal question

Serial no. of current day activity

Interviewer instructions

Serial no. of current day activity(Block-5-Q.2) (Activity_Slno)

File: Block-5-Persons-Daily- activity- time-disposion-Records

5.5.2 For each person listed in column 1, the different activities pursued by them during all the seven days of the reference week will be serially number of activity will be recorded in this column. Presuming that the likelihood of one person pursuing more than four different activities in a week is rather remote, only four lines are provided for each person. It is mentioned earlier that the current activity of a person in the rural areas is denoted by his status-cum-industry-cum-operation. Thus, for a person with the same status, if the industry (at the division level) or operation are different on the same or different days, he will be considered to have pursued different activities and these activities will be entered in different lines. Similarly, for the urban areas the current activity of a person is denoted by his status-cum-industry. Thus, if a person ploughs his own field in the first half of the day and sow in the second half of the day, for urban areas, he will be considered to have only one activity, during the day. But for rural areas he will be considered to have pursued two activities.

Current day Activity Status (CDAS) code (B5_q3)

File: Block-5-Persons-Daily- activity- time-disposion-Records

Overview

Type: Discrete

Format: character

Width: 2

Valid cases: 764944

Invalid: 0

Literal question

Current day Activity Status (CDAS) code

Interviewer instructions

The current activity 'status' codes corresponding to the serial number of activity entered in column (2) will be recorded in this column. Although it may be theoretically possible that on a particular day of the reference week, a person may have any number of activities, the particulars relating to two activities need only be considered for making entries in this column. (more details may be seen in instruction manual attached as external resource)

CDAS Industry division code (B5_q4)

File: Block-5-Persons-Daily- activity- time-disposion-Records

Overview

Type: Discrete

Format: character

Width: 1

Valid cases: 297290

Invalid: 0

Interviewer instructions

For each status code grouped under the activity category 'working' (i.e. for the status codes 11-72 recorded in column 3), the sector of activity i.e., the industry division will be entered in column (4) in terms of the specified code numbers.

CDAS Operation code(Rural Hhold only) (B5_q5)

File: Block-5-Persons-Daily- activity- time-disposion-Records

Overview

Format: character

Width: 2

Valid cases: 198927

Invalid: 0

Pre question

Is sector code = 1 (rural)? If yes ask.

Post question

If sector code other than 1 skip to next Question.

Interviewer instructions

CDAS Operation code(Rural Hhold only) (B5_q5)

File: Block-5-Persons-Daily- activity- time-disposion-Records

This column will be filled in for persons belonging to the rural households only. The actual working operation performed by the persons relevant to the status codes grouped under the activity category working (i.e., status codes 11-72) will be entered in terms of code numbers in this column.

Seventh day -Intensity of activity(0.0) (B5_q6)

File: Block-5-Persons-Daily- activity- time-disposion-Records

Overview

Type: Continuous	Valid cases: 764944
Format: numeric	Invalid: 240919
Width: 3	Minimum: 0
Decimals: 1	Maximum: 5
Range: 0-1	Mean: 0.9
	Standard deviation: 0.3

Interviewer instructions

Although it may be theoretically possible that on a particular day of the reference week, a person may have any number of activities, the particulars relating to two activities need only be considered for making entries in this column. Thus, on a day, a person may either have only one activity with 'full' intensity or two activities with 'half' intensity for each. If the activity is pursued with intensity 'half' on a particular day, the entry will be 0.5 against that activity and if that is pursued with intensity more than half, 1.0 will be recorded against that activity in the relevant columns (6) - (12). The decision whether the intensity to be recorded for a activity will be 0.5 or 1.0 has to be taken by the investigating staff making careful probes into the actual situation obtaining for the person on a particular day (For more details see Instruction manual attached as external resources).

For each activity recorded in column (3), the intensity with which the particular activity is performed on the different days of the reference week will be recorded in quantitative terms 'half' or 'full' in these columns

Fifth day-Intensity of activity(0.0) (B5_q8)

	Standard deviation: 0.3

Literal question

Intensity of activity - first day

Interviewer instructions

For each activity recorded in column (3), the intensity with which the particular activity is performed on the different days of the reference week will be recorded in quantitative terms 'half' or 'full' in this column.

Total no. of days in each activity(0.0) (B5_q13)

File: Block-5-Persons-Daily- activity- time-disposion-Records

Overview

Type: Continuous	Valid cases: 764944
Format: numeric	Invalid: 240919
Width: 3	Minimum: 0
Decimals: 1	Maximum: 7
Range: 0-7	Mean: 6.1
	Standard deviation: 1.8

Literal question

Total no. of days in each activity

Interviewer instructions

The number of days for which a particular activity was pursued during the seven days, i.e., the total of columns (6) - (12) will be recorded in one place of decimal in column (13) separately for each activity status listed in column (2). It may be noted that the total number of days for all the activities together should always be 7.0 for each individual entered in column (1).

Wages/Salary cash (B5_q14)

File: Block-5-Persons-Daily- activity- time-disposion-Records

Overview

Type: Continuous	Valid cases: 337982
Format: numeric	Invalid: 667881
Width: 8	Minimum: 0
Decimals: 2	Maximum: 75830
Range: 0-75830	Mean: 35.3
	Standard deviation: 453.8

Literal question

CASH - Wage and salary earnings (received or receivable) for the work done during the week

Interviewer instructions

The wage and salary earning (not total earnings) receivable for the wages/salaried work done during the reference week, separately for each of the relevant activities pursued by each person, will be recorded in these columns. The relevant status codes for which wage & salary earnings are to be recorded are 31, 41, 51, 71 and 72. The wages and salaries for the work done during the reference week may be already received or may be receivable in cash or in kind or partly in cash and partly in kind. The total wage or salary received or receivable for the week in cash will be recorded in column (14) and the value (evaluated at the current retain price) of salary or wages in kind received or receivable will be recorded in column (15). The total of columns (14) and (15) will be entered in column (16).

Wages/Salary - kind (B5_q15)

File: Block-5-Persons-Daily- activity- time-disposion-Records

Overview

Type: Continuous	Valid cases: 337982
Format: numeric	Invalid: 667881
Width: 8	Minimum: 0
Decimals: 2	Maximum: 90000
Range: 0-80000	Mean: 4.1
	Standard deviation: 423.6

Literal question

KIND - Wage and salary earnings (received or receivable) for the work done during the week

Interviewer instructions

as given in Q.q14

Reported Salary Kind (B5_q15)
 File: Block-5-Persons-Daily- activity- time-disposion-Records

Total no. of days with nominal work (B5_q17)

File: Block-5-Persons-Daily- activity- time-disposion-Records

Overview

Type: Continuous	Valid cases: 356869
Format: numeric	Invalid: 648994
Width: 1	
Decimals: 0	
Range: 0-7	

Literal question

Total no. of days with nominal (1-2 hours) work

Interviewer instructions

Some of the persons reporting days with half intensity of work might have had work only for say, 1-2 hours on certain days out of them. Such days would be considered as days with nominal work. For each person, total number of days out of the 7 days' reference period with only nominal work would recorded in this column against the relevant person.

Duration of unemployment (for CWAS-81,82) (B5_q18)

File: Block-5-Persons-Daily- activity- time-disposion-Records

Overview

Type: Continuous	Valid cases: 23560
Format: numeric	Invalid: 982303
Width: 1	
Decimals: 0	

Literal question

For persons unemployed on all the seven days : Duration of unemployment (for CWAS-81,82)

Interviewer instructions

For each person reported as unemployed on all the seven days of the week, the duration of the current continuous spell of unemployment will be recorded in this column against the relevant person in terms of the specified code

Days worked in a week (CDAScode 01-71) (Days_Wrkd)

File: Block-5-Persons-Daily- activity- time-disposion-Records

Special codes (1,2,3) ** (spl_cd)

File: Block-5-Persons-Daily- activity- time-disposion-Records

Overview

Type: Discrete	Valid cases: 1005863
Format: character	Invalid: 0
Width: 1	

Description

Creation of Activity File (Rural/Urban) with Special Codes 1,2&3

Both rural and urban, consist of 3 types of records with Special Codes 1, 2 or 3, as outlined below:-

i) When Daily Activity Status Code in block-5 is 11 to 82, or 91 to 99 in combination with 01-82, such activity record has been created with Special Code 1.

ii) When Daily Activity Status Code in block-5 is 91 to 99 and total Intensity of Activity is 7.0, such activity record has been created with Special Code 3.

iii) When Daily Activity Status Code in block-5 is 11 to 82, one consolidated record of all the daily activities the person was engaged with, has been created with Special Code 2. In such cases, the information fields can also be either all spaces or summation of items wherever applicable and the serial no. of activity was recorded as '1'.

iv) In other words, records with with Special Code 1 and 3 represent the total number daily activities and records with Special Code 2 and 3 represent the total number of persons.

Serial no. of person as in block-4

Interviewer instructions

All the normally resident members of the household enumerated in block 4 will again be listed in this column in the same serial order as that of column (1) of block 4. In fact, the serial number assigned for each member in block 4 will be copied in this column in the same order as done for block 4.

Principal Usual Activity Status (PUAS) Code (B6_q2)

File: Block-6--Persons-Usual-activity- migration-Records

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 667848
Invalid: 0

Literal question

Principal Usual Activity Status (PUAS) Code

Interviewer instructions

Usual activity status of a person will be determined on the basis of the various activities pursued by the person during the reference period of 365 days adopting 'relatively long time (or major time)' criterion. As mentioned earlier, the activities are grouped into, three major categories - 'working', 'not working but seeking and /or available for work' and 'neither working nor available for work'. For determining the 'usual activity status' of a person, he or she has to be first classified into any one of the above three broad category groups on the basis of the time spent on them during the reference period of 365 days. Thus, the broad activity status of a person will be the one out of the three, 'working', 'available for work', 'neither working nor available for work', on which the person spent relatively long period during the 365 days. In deciding this, one should consider only the normal working time available for pursuing the various activities and not 24 hrs. of each day. After deciding the broad usual status of the person, the detailed activity, status within the broad group will be determined adopting again the 'relatively long' or 'major time' criterion. The detailed activity status, thus determined, will be the principal usual activity status of the person.

Work in subsidiary capacity? (B6_q7)

File: Block-6--Persons-Usual-activity- migration-Records

Overview

Type: Discrete

Format: character

Width: 1

Valid cases: 667804

Invalid: 0

Literal question

Whether engaged in any work in a subsidiary capacity?

Interviewer instructions

For each person listed in this block, it has to be ascertained whether he or she worked in a subsidiary capacity during the 365 days preceding the date of survey or not. This has to be ascertained for all the broad categories of persons initially classified as 'employed', 'unemployed' and 'not in labour force' and coded accordingly in column (2) of the block.

Usual subsidiary activity status (B6_q8)

Literal question

Place of work(code)

Interviewer instructions

For all persons assigned work status codes (ie.), codes 11-51 in column (2), information on their usual places of work vis-à-vis their places of stay will be collected and recorded in this column in terms of the specified codes.

Place of enumeration different? (B6_q14)

File: Block-6--Persons-Usual-activity- migration-Records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 666247
Invalid: 0

Literal question

Whether place of enumeration different from last usual residence?

Interviewer instructions

For obtaining the appropriate response to the question, it has to be ascertained for each member of the household listed in this block, whether his/her place of enumeration is different from his last (previous) usual residence, if any, the usual residence for the purpose of this survey being defined as a place (village or town) where the person has stayed continuously for a period of six months or more. (For more details refer instruction manual attached as external resource)

Period since leaving the residence (in years) (B6_q15)

File: Block-6--Persons-Usual-activity- migration-Records

Overview

Type: Continuous
Format: numeric
Width: 2
Decimals: 0

Valid cases: 159828
Invalid: 508020

Pre question

If code=1 in Q.14, then proceed.

Literal question

Period since leaving the last usual residence (in years)

Post question

Q.14 code is not =1 skip to Q22

Interviewer instructions

The period elapsed since leaving the last usual residence will be recorded in years rounded off to the nearest integer in this column. For working out this, the period of temporary stay (less than six months) in other places after leaving the last usual residence and ultimately moving into the place of enumeration will also be included. If the period elapsed since leaving the last usual residence is less than 6 months, then their entry will be '0'.

Last usual residence State (code)

Interviewer instructions

State (code) to which the last usual residence belonged will be recorded in in column (18). The relevant codes are to be taken from the list of NSS regions, and their composition given in the Appendix.

Last Usual activity status(UAS) code (B6_q19)

File: Block-6--Persons-Usual-activity- migration-Records

Overview

Type: Discrete

Valid cases: 159776

Format: character

Invalid: 0

Width: 2

Literal question

Last Usual activity status(UAS) code

Interviewer instructions

For determining the usual activity status of a migrant at the time of migration, the reference period to be adopted will be 365 days preceding the day of migration. The determination of the person's usual activity status will be done adopting the 'relatively long time criterion' as described in para 5.6.2. The usual activity status of the person will, naturally, relate to the principal status. After determining the 'usual status' of a migrant the code relevant to the status assigned for the person will be recorded in column 19.

Last UAS Industry division code (B6_q20)

File: Block-6--Persons-Usual-activity- migration-Records

Interviewer instructions

Last UAS Industry division code (B6_q20)

File: Block-6--Persons-Usual-activity- migration-Records

For the persons assigned the activity status codes 11-51 (i.e., those categorized working), the appropriate industry division code will be recorded in column (20).

Reason for leaving the last usual residence (code) (B6_q21)

File: Block-6--Persons-Usual-activity- migration-Records

Overview

Type: Discrete	Valid cases: 160538
Format: character	Invalid: 0
Width: 1	

Literal question

Reason for leaving the last usual residence (code)

Interviewer instructions

The reason for moving out of the last usual residence will be ascertained for each migrant member and entered in terms of the specified codes in this column. It may so happen that a person had moved out of his last usual residence for a particular reason, stayed in a different village/town for a short period (less than 6 months; if this period is 6 months or more that place will become his last usual residence) and then moved to the place of enumeration (a village or town other than the previous one) for a different reason. In such a case only the reason which motivated his/her first movement will be recorded.

Economically active code (B6_q22)

File: Block-6--Persons-Usual-activity- migration-Records

Overview

Type: Discrete	Valid cases: 667848
Format: character	Invalid: 0
Width: 1	

Literal question

Whether usually Economically active (code)

Interviewer instructions

It may be recalled that for determining the usual activity status of a person, the three broad categories of activities obtainable for a person (during the reference period) i.e., 'employment', 'unemployment' and the status of being 'not in the labour force' are to be considered. Then, by adopting a 'relatively long time' spent criterion, one of the above three situation is assigned for the person. A person is considered to be economically active if he/she is either 'employed' for 'available for employment'(unemployment) and is considered to be usually economically active if during the 365 days preceding the date of survey, the period under 'employment' and unemployment' taken together for him/her is found to be more than (or equal to) the period for which he or she was not available for work (or not in labour force). It may be noted that for classifying a person either as 'usually economically active' or not, no additional information need be collected. The information already gathered for assigning the principal usual activity status will be used for the purpose. The investigator, based on the already collected information will decide whether the person is 'usually economically active' or not and record the appropriate code 1 or 2 in column (22).

Literal question

seeking extra work (B7_q8)

File: Block-7-Persons- usual-activity-statuscode-11to94-Records

Were you seeking or available for work/additional work/ alternative work during last 365 days

Interviewer instructions

This particular question will be put to all the person with usual activity status code 11-94. It may be noted that the persons for whom this set of follow-up questions are meant can broadly be divided into two groups - (i) those who had some work during the reference year (i.e., persons with usual status codes 11-51 and 81-94 with some usual subsidiary gainful activity) and (ii) those who had no work during the reference year (i.e., persons with usual activity status codes 81-94 with no usual subsidiary gainful activity). It is expected that the first group, if at all willing, will normally opt for 'additional work or 'alternative work' to this group, therefore, the question should be put in such a way as to reflect both the possibilities. To the second group, naturally, the question 'whether they were seeking or available for work' will be asked. Depending on the answer obtained, the entry will be made against this item interims of the code numbers 1, 2, 3, or 4. The codes are :

NIC division to be copied from block-6,column-9

Spent most time on domestic duties ? (B8_q4)

File: Block-8-Domestic-duties-Persons Records

Overview

Type: Discrete	Valid cases: 126429
Format: character	Invalid: 0
Width: 1	

Literal question

Were you required to spend most of your time on domestic duties almost throughout the last 365 days? (yes-1, no-2)

Interviewer instructions

It will be ascertained whether the relevant persons are required to spend most of their time during 365 days preceding the date of survey on domestic duties. If the answer is in the affirmative code 1 and if the answer is in the negative, code 2 will be recorded against 4 for each of the relevant members. If the answer is 'yes', the reason for his/her participation in the household duties will be ascertained and recorded in terms of the specified code numbers against item 5. For such a person, item 6 will be left blank. On the other hand, if the entry against item 4 is code '2' for a person, (i.e., such participation was not required but still the person participated in the household chores) the reason for his/her voluntary participation in household chores will be ascertained and the code relevant to the answer obtained will be recorded against item 6. In such a case, item 5 will be left blank.
