Overview

ABSTRACT

In the 47th round ,data on literacy was collected and a test was carried out to test literacy for the persons who claim to be literate. This literacy test was undertaken only for those who claim to be literate in any of the 30 languages (including the languages listed in the constitution) in which instructions at the primary level are imparted in various states/U.T's. For the conduct of test separate forms were framed.

Duration of the 47th round was of 6 months from 1st July 1991 to 31st December 1991.

In the absence of an electronic/hard copy of 'manual of instructions to the field staff', more details could not be furnished.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Randomly selected household and its members

Scope

NOTES

For this survey , a literate person was defined as one who could read and write a simple message in any language with understanding. Besides this, a test was introduced to access the literacy status of a person. In a sub-sample of household a verification test for literacy was conducted for those who claimed to be literate but had less than five years of schooling and whose age exceeded 14 years. The test was conducted with the aid of a set of simple passage in any one of the 31 languages of the country. The respondents were required to read the passage to test their comprehension. Information was also collected on persons who lapsed into illiteracy and level of their schooling, reading habits and knowledge of number system i.e certain aspects of numeracy. Also, questions were asked about counting, reading writing of numbers and ability to perform simple arithmetic operations.

In the absence of an electronic/hard copy of the manual of instructions to the field staff more details could not be provided

Sampling

Sampling Procedure

A two stage stratified design was adopted for the survey. The first stage units(FSU) were villages in the rural areas and urban blocks in the urban areas. The second stage units were households in both the areas.

In the absence of an electronic/hard copy of the 'Sampling design and estimation procedure' details could not be provided

Deviations from Sample Design

There was no deviation from the original sample deviation.

Weighting

Sample weights were calculated and included in each of the data files

Variable 'Wgt_SS' refers to Multiplier for each Subsample.

Variable 'Wgt_Combined' refers to Combined Multiplier.

Questionnaires

Overview

The schedule consists of 8 blocks as follows:-

Block-1: Identification of sample household

Block-2: Particulars of field operations.

Block-3: Household particulars.

Block-4: Demographic particulars of household members.

Block-5: Literacy particulars of household members of age 5 years and above.

Block-6: Particulars of participation of household members of 5 years and above in cultural activities.

Block-7: Time spent on cultural activities participated/witnessed/visited by household members of age 5 years and above.

Block-8: Consumer expenditure (Rs) of the household on cultural items.

A copy of the schedule is attached as external resource.
