Overview

ABSTRACT

The survey on Land and Livestock Holdings carried out in the forty-eighth round (January-December 1992) of the National Sample Survey Organization (NSSO) is the fifth in the series of similar surveys conducted so far by the NSSO. The objective of these surveys has been to generate the basic quantitative information on the agrarian structure of the country, which is relevant to land policy. A large part of the information is collected mainly along the lines suggested in World Agricultural Census Programme of the Food and Agricultural Organisation

(FAO) and thus serves the purpose of international comparison as well.

In the present Land and Livestock Holdings survey of the NSSO, two types of holdings, namely, household ownership holdings and operational holdings, are enumerated by interviewing the sample households. Data are collected on the size (in terms of area), type, utilisation, tenurial status and other related aspects of both types of holdings.

The information for Land and Livestock holdings survey was collected from a sample of households by interview method. Each sample

household was visited twice during the period of survey with a gap of four to eight months. Two different schedules of enquiry were canvassed in the two visits.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Randomly selected households based on sampling procedure.

Scope

NOTES

In the 48th round, information on various aspects of ownership and operational holdings was collected for both rural and urban areas.

Particulars of land owned, land leased out, types and terms of lease formed the main body of information for the study of ownership holdings. Further, particulars of land leased in were also collected to ascertain the land possessed by the households. For the operational

holdings, data on size, composition, tenurial form, land use, extent of irrigation by source, fragmentation of holding,

drainage facilities and other related aspects of holdings were collected. Since livestock and agricultural machinery form the basic resources for agricultural operations, an inventory of these assets owned by the households on the date of survey was also obtained.

In the land holdings part of the survey, data collected on ownership and operational holdings. Particulars of land owned and land leased-out by terms of lease and type of lessee, together with area of land owned by type of land, were collected plot wise for each ownership holding. Besides these, particulars of land leased-in was also collected from each sample household. As for the operational holdings, information on their size, composition, tenural form, land use, fragmentation, irrigation practices, drainage drain age facilities and agricultural activities were collected for each agricultural season as well as the agricultural year 1991-92. In the part relating to livestock holding, an inventory of livestock and agricultural machinery were taken from each sample household. In addition to the particulars of land and livestock holdings, information were also collected on exploitation of trees owned by the sample households.

STRUCTURE OF THE SCHEDULE: As stated in the preceding paragraphs, the survey was conducted in two visits and some items of information were collected in only one of them. The schedules of enquiry for the two visits are structured accordingly. In all, the schedule consists of 19 blocks (including two sub-blocks). Of these, blocks 0 to 4 and 10 were common to the schedules for both the visits and had exactly the same formats. However, since block 10 was meant for recording some auxiliary information about operational holdings of an agricultural season, it had Kharif and Rabi seasons as the reference periods in visit one and two respectively. Blocks 5 and 9 also appear in the schedules for both the visits, but their formats were not the same. Of the remaining blocks, six appear only in the schedule for visit-1 and five (including two sub-blocks) in only that for visit-2.

Coverage

GEOGRAPHIC COVERAGE

The forty-eighth round was planned to cover the whole of Indian Union excepting

(i) Ladakh and Kargil districts of Jammu & Kashmir; (ii) 768 interior villages of Nagaland (out of a total of 1119 villages) located beyond 5 kms. of a bus route,

(iii) 172 villages in Andaman & Nicobar Islands (out of a total of 520 villages) which are inaccessible throughout the year.

However, the survey could not be conducted in six districts of Jammu & Kashmir viz., Anantnag, Pulwana, Srinagar, Badgam, Baramula and

Kupwara, and in the district of Amritsar in Punjab due to unfavourable field conditions.

Sampling

Sampling Procedure

The sample design adopted for the survey was essentially a stratified two stage design, with census villages and urban blocks as first stage units (FSUs) for the rural and urban sectors respectively, and households as the second stage sampling units (SSUs) in both the sectors. The selection of villages was done with probability proportional to population (with replacement), mainly based on the 1981 census list of villages. The selection of urban blocks was done with equal probability without replacement based on Urban Frame Survey (UFS) conducted by the NSSO as an on-going activity. The details of sample design and estimation procedure adopted for the survey are given in chapter-2 of the Report 407 attached as external attachment.

Deviations from Sample Design

There was no deviation from the original sample deviation.

Response Rate

In all 9052 villages were planned to be surveyed in this round. Of these, 4328 villages were allocated to the central sample - the part surveyed mainly by the NSSO field staff - and the rest to the state sample - the part surveyed by the state agencies. In the urban sector, the allocations for the central and state samples were 2484 and 3076 blocks respectively. The number of villages and urban blocks actually surveyed under the central sample was 4231 and 2420 respectively. Sample size - second stage units :Plan was to survey 8 households from each sample village and 9 households from each sample urban block. In the central sample, the actual number of households surveyed was 33289 in the rural sector and 20592 in the urban sector.

Weighting

Sample weights were calculated and included in each of the data files
Variable 'Wgt_SS' refers to Multiplier for each Subsample.
Variable 'Wgt_Combined' refers to Combined Multiplier.

Questionnaires

Overview

STRUCTURE OF THE SCHEDULE: As already stated, the survey was conducted in two visits and some items of information were collected in only one of them. The schedules of enquiry for the two visits were structured accordingly. In all, the schedule consisted of 19 blocks (including two sub-blocks). Of these, blocks 0 to 4 and 10 were common to the schedules for both the visits and had exactly the same formats. However, since block 10 is meant for recording some auxiliary information about operational holdings of an agricultural season, it had Kharif and Rabi seasons as the reference periods in visit one and two respectively. Blocks 5 and 9 also appeared in the schedules for both the visits, but their formats were not the same. Of the remaining blocks, six appeared only in the schedule for visit-1 and five (including two sub-blocks) in only that for visit-2. The detailed structures of the visit-1 and visit-2 schedules, along with the reference periods are indicated below:-

 Block block heading appearing in reference
 no. the schedule for date/period

(1) (2) (3) (4)

0 - descriptive identification of sample household visit 1 & 2 -
 1 - identification of sample household visit 1 & 2 -
 2 - particulars of field operation visit 1 & 2 -
 3 - remarks by investigator visit 1 & 2 -
 4 - remarks by supervisory officer(s) visit 1 & 2 -
 5 - household characteristics visit 1 & 2(different formats) various
 5.1 -particulars of partitioned households visit 2 only Rabi
 6 - household members & their activity particulars visit 1 only various
 7 - particulars of area owned(other than homestead visit 1 only date of survey
 land) and particulars of area leased out by the
 household as on the date of survey
 8 - particulars of area leased in/otherwise possessed visit 1 only date of survey
 (other than homestead land) by the household.
 9 - particulars of plots possessed by operational visit 1 Kharif
 holding during major part of Kharif/Rabi visit 2 Rabi
 (different formats)
 9.1 - particulars of plots included in operational visit 2 only Rabi
 holding of Kharif but not in rabi
 10 - some general information of operational holdings visit 1 Kharif
 for Kharif/rabi visit 2 Rabi
 11 - number of cattle and buffaloes owned visit 1 only date of survey
 12 - number of other livestock & poultry owned visit 1 only date of survey
 13 - particulars of agricultural machinery and visit 1 only date of survey
 implements owned on the date of survey
 14 - particulars of plots possessed by operational visit 2 only agr. year
 holding no..during major part of 1991-92
 15 - some general information of operational holdings visit 2 only agr. year
 for agri-cultural year 1991-92
 16 - ownership and exploitation of trees visit 2 only date of survey & 365 days
 preceding the date of survey.

Data Collection

Data Collection Mode

Face-to-face [f2f]

Data Collection Notes

The survey period for the forty-eighth round survey was the calendar year 1992. In order to reduce recall error, particulars relating to the entire agricultural year were collected by visiting each sample household twice during the survey period. The first visits to the sample households were made during January to August, while the second visits were made during September to December. The longer period for the first visit reflected the higher workload for the field staff during this visit compared to the second visit.

The information on holdings operated during the Kharif season of the agricultural year 1991-92 was collected in first visit, while that on holdings operated during the Rabi season was collected in the second visit. In addition, particulars of operational holdings with the agricultural year 1991-92 as the reference period were also collected in the second visit.

Questionnaires

STRUCTURE OF THE SCHEDULE: As already stated, the survey was conducted in two visits and some items of information were collected in only one of them. The schedules of enquiry for the two visits were structured accordingly. In all, the schedule consisted of 19 blocks (including two sub-blocks). Of these, blocks 0 to 4 and 10 were common to the schedules for both the visits and had exactly the same formats. However, since block 10 is meant for recording some auxiliary information about operational holdings of an agricultural season, it had Kharif and Rabi seasons as the reference periods in visit one and two respectively. Blocks 5 and 9 also appeared in the schedules for both the visits, but their formats were not the same. Of the remaining blocks, six appeared only in the schedule for visit-1 and five (including two sub-blocks) in only that for visit-2. The detailed structures of the visit-1 and visit-2 schedules, along with the reference periods are indicated below:-

Interviewer instructions

The entry against this item is to be made after collecting all the required information for all the items in the schedule. The entry will be made in terms of codes on the basis of the impression formed by the investigator regarding the overall quality of response of the informant.

Survey code (B1_q18)

File: Block-1-5-household-characteristics--visit2-records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 53541
Invalid: 0

Interviewer instructions

Survey code (B1_q18)

File: Block-1-5-household-characteristics--visit2-records

when the household surveyed in the first visit, be it the originally selected one or a substitute, is surveyed in the second visit also, the entry against this item will be code '1'. When the household surveyed in the first visit cannot be surveyed in the second, a substitute household will be selected for canvassing the visit-2 schedule, according to the procedure laid down in para 3.14.2. In such cases, the entry against this item of visit-2 schedule will be code '2' and entries in blocks 5. 9 and 9.1 will be made through direct enquiry. If the substitute household is not surveyed, then it will be treated as a casualty and the entry will be code '3' against this item. As in visit one schedule, only the blocks 0 to 4 are to be filled in such cases and the work 'casualty' is to be written in block capitals on the top of the front page of the schedule. When neither the originally selected household nor its substitute is surveyed in the first visit, i.e., it is a casualty in visit-1, efforts should be made in the second visit to locate the originally selected household. If the household (originally selected household in visit-1) is found available for survey in the second visit, both visit-1 and visit-2 schedules will be canvassed in the household during the second visit. In such cases, the entry against survey code in the visit-2 schedule will be code '4' and that in the visit-1 schedule will be code '1'.

Reason for substitution (B1_q19)

File: Block-1-5-household-characteristics--visit2-records

Overview

Type: Discrete	Valid cases: 756

Interviewer instructions

Whether pesticides used during agr.Yr.1991-92(Y/N) (B5_q6)

File: Block-1-5-household-characteristics--visit2-records

These items are meant for recording the use of pesticides by the household during the agricultural year 1991-92 . Pesticides are generally used for preventing, destroying, repelling or mitigating insects, rodents, fungi, weeds and other harmful forms of plants and animal life, both for agricultural and other purposes. If the household is reported to have used any pesticide during the agricultural year 1991-92, code '1' will be recorded in item 6; otherwise the entry will be code '2'. Items 7 to 9 will be filled in when code '1' is recorded in item 6.

The purpose of use will be recorded in item 7 in terms of codes

The type of pesticides used for agriculture and other purposes will be recorded respectively in items 8 and 9, in terms of codes

Whether the hh is partitioned (B5_q10)

File: Block-1-5-household-characteristics--visit2-records

Overview

Type: Discrete	Valid cases: 53559
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

Whether the hh is partitioned (B5_q10)

File: Block-1-5-household-characteristics--visit2-records

(i) It is generally not expected that a household surveyed in the first visit will be partitioned during the period intervening the two visits. On rare occasions, when it is found to have been partitioned in the second visit, code '1' will be entered in this item. In all other cases the entry in this item will be code '2'.

(ii) However, for the purpose of this survey, a household will be considered to have been partitioned only when some of the household members, as enumerated in the first visit, are found to have left the parent household and established a separate new household and consequent to this split, land and other assets held by the parent household during the first visit is also found to have been partitioned.

No. of partitioned hh formed etc. (B5_q11)

File: Block-1-5-household-characteristics--visit2-records

Overview

Type: Continuous	Valid cases: 169
Format: numeric	Invalid: 53390
Width: 1	
Decimals: 0	

Interviewer instructions

when the household surveyed in the first visit is found to have been partitioned into two or more households in the second visit, as per the conditions stated in para 5.5.20, the total number of households formed from partitioning of the parent household will be recorded in item 11. These households are henceforth referred to as 'partitioned households'. The number of partitioned households staying within the sample village/block during the second visit will be recorded in item 12. It may be noted that items 11 & 12 will be filled in only when the entry in item 10 is code '1' otherwise these will be left blank.

File: Block-5dot1-Partitioned household-visit2-records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 155
Invalid: 0

Interviewer instructions

Of the partitioned households formed from the sample household of visit-1, all those residing in the sample village/block will be assigned a running serial number starting from 1. of these partitioned households, the one in which the head of the household (as reported in visit-1 schedule) is found to be residing will be given serial number '1'. However, if the head of the parent household is not reported to be a member of any of these households, then the household with the senior most member among the members of the household listed in the first visit will be given serial number '1'. The name of the head of each of the partitioned households will be recorded in col. (2) against the corresponding serial numbers. The name of the head of the parent household, as reported in visit one, will be recorded against serial number '1' if he/she is found to belong to a partitioned household residing in the sample village/block.

No. of members of partitioned hh (B51_c3)

File: Block-5dot1-Partitioned household-visit2-records

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 153
Invalid: 0

Interviewer instructions

For each of the partitioned households listed in this block, the number of its members who were also members of the parent household during visit one will be recorded in this column.

Whether the partitioned hh formed before 30.6.92 (B51_c4)

File: Block-5dot1-Partitioned household-visit2-records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 149
Invalid: 0

Interviewer instructions

It may be specially noted that for the partitioned household with serial number '1', the entry in col. (4) will always be '1'. For the rest of the partitioned households listed in this block, it will be enquired whether it was formed before or after 30.6.92. The entry in col. (4) will be code '1' if the household was formed before 30.6.92, otherwise it will be code '2'.

Col. (5) will be filled in only for the households with code '1' in col. (4). For each such household it will be enquired whether the household has operated any land during Rabi season of the agricultural year 1991-92, as per the definition of operational holding given in para 2.2.11. Code '1' will be recorded in col. (5) if the answer is in affirmative, otherwise the entry will be code '2'.

It is essential to note that the procedure of filling in blocks 9, 9.1, 10, 14, 15 and 16 will be different when the household surveyed in the first visit is found to have been partitioned in the second visit.

Whether any area operated by hh (B51_c5)

Interviewer instructions

These columns are meant for recording references for plots listed here, in terms of operational holding number and plot number of this plots which were part of kharif holdings. The serial number of the operational holding to which a plot listed in sub-block "X" belonged (wholly or partly) in kharif season will be recorded in col. (2). For each plot in sub-block "X", the serial number of the plot, as recorded in the corresponding block 9 of visit-1 schedule, will be copied in col. (3). For the plots listed in sub-block "Y", "9" and "X" are already printed in cols. (2) & (3) respectively.

Srl.No.of plot (B91_c1)

File: Block-9dot1-Particulars-plots-not-included-in-RABI-visit2-records

Overview

Type: Discrete
 Format: character
 Width: 3

Valid cases: 32293
 Invalid: 0

Interviewer instructions

For each operational holding reported in the first visit (kharif holding), a separate block 9.1 will be filled in during the second visit, provided that some of the area constituting the kharif holding is holding of Rabi season. The operational holding number of the holding to which a block 9.1 pertains will be recorded in box-space provided at the top of the block. For an operational holding, all plots listed in block 9 of visit-1 schedule but not included in the corresponding Rabi holding thus not listed in block 9 of visit-2 schedule) will be listed in the block 9.1 for that operational holding. If however, a plot included in a kharif holding be partitioned into two or more parts and only one of the parts remains in the corresponding Rabi holding, the plot will be listed in this block as well as in block 9 of visit-2 schedule. In such cases the letter "S" will be written against the plot in the column for recording survey no. or identification particulars of the plot in both blocks 9 and 9.1 In such case a kharif holding is not operated at all in Rabi season, then all the plots listed for the operational holding in block 9 of visit-1 schedule will be listed in block 9.1.

All plots recorded in this block will be assigned a serial number which will be recorded in col. (1). It may be specially mentioned that if the homestead land is required to be listed in block 9.1, it should be recorded in this last line, where "98" is printed in cols. (1) & (2).

Whether possessed for major part of agrl year 1991-92 (B91_c11)

File: Block-9dot1-Particulars-plots-not-included-in-RABI-visit2-records

Overview

Type: Discrete	Valid cases: 32230
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

For making entry in this column, first, the total period for which the plot of land is held under possession by the parent household and the portioned households taken together will be ascertained. If this period accounts for the major part of the agricultural year 1991-92, the entry in col. (11) will be code '1', otherwise it will be code '2'.

Width: 1

Interviewer instructions

Columns (7) to (15) are meant for collecting information on the types of agricultural activities carried out in the holding during the reference season. There are nine separate activities to be reported upon in these columns, which can be grouped into two classes as follows:

within homestead land: cultivation in kitchen garden, livestock keeping, poultry raising, and other agricultural production;

outside homestead land: orchards, plantation(including forestry plantation), raising field corps, pisciculture, and other agricultural production.

For each of these nine columns, it will be separately ascertained whether the relevant activity has been carried out, even nominally, in the holding during the reference season. For an affirmative answer code '1' will be recorded in the corresponding column, otherwise the entry will be code '2'.

No. of parcels in holding (B10_c16)

File:

Block-10-General-information-operational-holdings-RABI-visit2-record
S**Overview**

Type: Continuous	Valid cases: 27300
Format: numeric	Invalid: 2375
Width: 2	Minimum: 0
Decimals: 0	Maximum: 58
Range: 0-58	Mean: 2.8
	Standard deviation: 2.7

Interviewer instructions

Columns 16 to 18 are meant for collecting information on parcels constituting the operational holding. A parcel of an operational holding is a piece of land surrounded by land not included in the holding. A parcel of land may consist of one or more plots. The number of parcels constituting the operational holding will be recorded in col. (16). The distance of the parcel farthest from the place of residence will be recorded in col. (17) in kilometers rounded off to one place of decimal. Among the parcels constituting the operational holding, all may not be cultivated during the reference period. The number of parcels cultivated during the reference agricultural season will be recorded in col. (18). A parcel will be considered to have been 'cultivated', if it is used for rising field crops or production of horticulture and plantation crops during the reference agricultural season.

Format: numeric	Invalid: 26710
Width: 3	Minimum: 0
Decimals: 0	Maximum: 802
Range: 0-802	Mean: 6
	Standard deviation: 42.9

Interviewer instructions

The number of permanent attached farm workers engaged in the operational holding during the Rabi season of agricultural year 1991-92 will be ascertained for making entries in these columns in visit-2 schedule. In ascertaining the number of such workers, the period during which various agricultural operations (from preparation of soils to storing of grains) in respect of crop of the reference season are carried out will be taken into consideration. The number of attached farm workers so determined will be classified into two groups depending on the mode of payment. If the payment is a fixed amount to be paid in cash or kind, the attached farm worker will be enumerated in col. (19). On the other hand, if a worker gets a share of produce in lieu of the services rendered by him/her, he/she will be accounted for in col. (20). It should be borne in mind that those who get a share of produce as remuneration for services rendered by them will not be classified as share croppers. While a permanent attached farm worker is only employed in the operational holding, a share-cropper organizes, conducts and participates in the agricultural operations carried out in the holding. Share cropping is a term of lease.

Kharif (B14_c24)

File:

Block-14-Particulars-operational-holdings-agricultural-year-visit2-records

Overview

Type: Discrete
 Format: character
 Width: 1

Valid cases: 116467
 Invalid: 0

Literal question

Whether agricultural production carried out during agricultural year 1991-92 - Kharif

Interviewer instructions

For each plot of land listed in this block, it will be ascertained whether any agricultural production was carried out on the portion of the plot included in the operational holding during the kharif and Rabi seasons. If the answer is in the affirmative for the kharif season, code '1' will be recorded in col. (24), otherwise the entry will be code '2'. The entry in col. (25) will be similarly recorded

Except for cols. (16) & (17), all the other columns of this block are repetition of the columns of block 10 (visit2). The procedure for recording entries in these columns will therefore be the same. The only difference is that while the reference period for block 10 is the respective agricultural season, that for block 15 is the whole of the agricultural year 1991-92. It is, therefore, imperative on the part of the investigator to ascertain the particulars separately for this block with the agricultural year as the reference period.

In case of partitioning of the household surveyed in the first visit, block (15) will be filled in only for the partitioned household with serial number '1'

Interviewer instructions

The household which takes the major decisions on the various agricultural operations carried out in an operational holding is considered to possess the operational holding. Such operators or holders of the operational holding may not stay at the site of the holding but may manage the affairs of the holding through others. According to this procedure of recording the information on operational holdings, the particulars of a holding will be collected through household of the operator in block 14. The area of this holding operated through relatives/ representative/hired managers looking after the day to day work of the holding will be ascertained for the household of the operator. For each operational holding possessed, individually or jointly, by this household, the area of such holdings located in rural areas will be recorded in col. (16) and that of such holdings located in urban area will be recorded in col. (17). The entries will be recorded in acres rounded off to two places of decimal.

Interviewer instructions

The first two columns of this block are meant for listing the species of trees reported to be owned on the date of survey or to have been exploited or felled during the 365 days preceding the date of survey. Fifteen different species of trees, each assigned with a code, is given at the foot of the block. The name of the species(type of tree) reported to be owned and exploited or felled by the household will be recorded in the blank spaces provided in col. (2) and the code corresponding to it will be entered in col. (1).

No. of trees standing Grown during last 365 days (B16_C3)

File: Block-16-Type-of-wood-records

Overview

Type: Continuous	Valid cases: 15535
Format: numeric	Invalid: 63333
Width: 3	Minimum: 0
Decimals: 0	Maximum: 999
Range: 0-999	Mean: 15.5
	Standard deviation: 51

Interviewer instructions

The trees of a particular species owned by the household on the date of survey will be classified into two groups, viz. 'those grown during last 365 days' and 'those standing for more than one year'. The number of trees belonging to the former category will be recorded in col. (3) and that for the latter in col. (4). All the species, except bamboo, will be enumerated as individual trees, but for bamboo enumeration will be in terms of groves.

No. of trees standing Grown fFor more than 1 year (B16_C4)

File: Block-16-Type-of-wood-records

Overview

Type: Continuous	Valid cases: 76605
Format: numeric	Invalid: 2263
Width: 3	Minimum: 0
Decimals: 0	Maximum: 999
Range: 0-999	Mean: 20
	Standard deviation: 68.9

Interviewer instructions

As given in C3

No. of trees felled/ exploited during last last 365 days (B16_C5)

File: Block-16-Type-of-wood-records

Overview

Type: Continuous	Valid cases: 13156
Format: numeric	Invalid: 65712
Width: 3	Minimum: 0
Decimals: 0	Maximum: 999
Range: 0-999	Mean: 12.6
	Standard deviation: 49.3

Interviewer instructions

The number of trees owned by the household which are either felled or exploited during the 365 days preceding the date of survey will be recorded in col. (5), with respective code and description in cols. (1) & (2). A tree will be considered to have been exploited if any of the main branches of the tree is cut or broken willfully. All the entries in this column will made in whole numbers.

Multiplier-I for sub-sample estimates (0.00) (WGT_ss)

File: Block-16-Type-of-wood-records

Overview

Type: Continuous	Valid cases: 78868
Format: numeric	Invalid: 0
Width: 9	Minimum: 8.8
Decimals: 2	Maximum: 133604.1
Range: 8.75-133604.14	Mean: 5454.3
	Standard deviation: 5844.1

Multiplier-II for combined estimates (0.00) (WGT_Combined)

File: Block-16-Type-of-wood-records

Overview

Type: Continuous	Valid cases: 78868
Format: numeric	Invalid: 0
Width: 8	Minimum: 4.4
Decimals: 2	Maximum: 66802.1
Range: 4.38-66802.07	Mean: 2727.1
	Standard deviation: 2922.1
