Overview

ABSTRACT
The National Sample Survey Organisation (NSSO) has been carrying out All-India surveys on consumer expenditure. While some of these smaller-scale surveys are spread over a full year and others over six months only, the quinquennial (full-scale) surveys have all been of a full year's duration. Household consumer expenditure is measured as the expenditure incurred by a household on domestic account during a specified period, called reference period. It includes the imputed values of goods and services, which are not purchased but procured otherwise for consumption. In other words, it is the sum total of monetary values of all the items (i.e. goods and services) consumed by the household on domestic account during the reference period. Any expenditure incurred towards the productive enterprises of the households is also excluded from household consumer expenditure. To minimise recall errors, a very detailed item classification is adopted to collect information, including items of food, items of fuel, items of clothing, bedding and footwear, items of educational and medical expenses, items of durable goods and other items. The schedule has also collected some other household particulars including age, sex and educational level etc. of each household member. The schedule design for the survey is more or less similar to that adopted in the previous rounds.

KIND OF DATA
Sample survey data [ssd]

UNITS OF ANALYSIS
Randomly selected households based on sampling procedure and members of the household

Scope

NOTES
The NSSO surveys on consumer expenditure aim to measure the household consumer expenditure in quantitative terms disaggregated by various household characteristics.

The data for this survey is collected in the NSS Schedule 1.0 used for household consumer expenditure. For this round, the schedule had 11 blocks.

Blocks 1 and 2 - are similar to the ones used in usual NSS rounds. These are used to record identification of sample households and particulars of field operations.

Block-3: Household characteristics like, household size, principal industry-occupation, social group, land possessed, primary source of energy used for cooking and lighting etc. have been recorded in this block.

Block-4: In this block detailed demographic particulars including age, sex, educational level, marital status, number of meals

usually taken in a day etc. have been recorded.

Block-5: In this block cash purchase and household consumption of food, pan, tobacco, intoxicants and fuel & light during the last 30 days have been recorded.

Block-6: Household consumption of clothing during the last 30 has been recorded in this block.

Block-7: Household consumption of footwear during the last 30 has been recorded in this block.

Block-8 : Household expenditure on miscellaneous goods and services and rents and taxes during the last 30 days has been recorded in this block.

Block-9 : Household expenditure for purchase and construction (including repairs) of durable goods for domestic use during the last 30 days has been recorded here.

Block-10 : Perception of households regarding sufficiency of food has been recorded here.

Block-11 : Summary of household consumer expenditure during the last 30 days has been recorded here.

Coverage

UNIVERSE
The survey used the interview method of data collection from a sample of randomly selected households and members of the household.

Questionnaires

Overview

The data for this survey is collected in the NSS Schedule 1.0 used for household consumer expenditure. For this round, the schedule had 11 blocks.

Blocks 1 and 2 - are similar to the ones used in usual NSS rounds. These are used to record identification of sample households and particulars of field operations.

Block-3: Household characteristics like, household size, principal industry-occupation, social group, land possessed, primary source of energy used for cooking and lighting etc. have been recorded in this block.

Block-4: In this block detailed demographic particulars including age, sex, educational level, marital status, number of meals usually taken in a day etc. have been recorded.

Block-5: In this block cash purchase and household consumption of food, pan, tobacco, intoxicants and fuel & light during the last 30 days have been recorded.

Block-6: Household consumption of clothing during the last 30 has been recorded in this block.

Block-7: Household consumption of footwear during the last 30 has been recorded in this block.

Block-8 : Household expenditure on miscellaneous goods and services and rents and taxes during the last 30 days has been recorded in this block.

Block-9 : Household expenditure for purchase and construction (including repairs) of durable goods for domestic use during the last 30 days has been recorded here.

Block-10 : Perception of households regarding sufficiency of food has been recorded here.

Block-11 : Summary of household consumer expenditure during the last 30 days has been recorded here.

Sub Sample (SubSample)
File: Blocks 1,3,10_Household Characteristics

Overview	
Type: Discrete	Valid cases: 13647
Format: character	Invalid: 0
Width: 1	

Description

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub- sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Literal question

Response Code

Interviewer instructions

The type of informant, considering his cooperation and capability in providing the required information, will be recorded against this item in terms of specified response codes.

Survey Code (Survey_Code)
File: Blocks 1,3,10_Household Characteristics

Overview	
Type: Discrete	Valid cases: 13600
Format: character	Invalid: 0
Width: 1	

Literal question

Survey Code

Interviewer instructions

Survey code : Whether the originally selected sample household has been surveyed or a substituted household has been surveyed will be indicated against this item by recording '1' if it is the originally selected sample household, and '2' if it is the substituted one. If neither the originally selected household nor the substituted household could be surveyed i.e., if the sample household was a casualty, code '3' would be recorded. In such cases only blocks 0,1, 2, 13 and 14 will be filled up and on the top of the front page of the schedule the word 'CASUALTY' will be written and underlined.

Reason for substitution (Substn_Code)
File: Blocks 1,3,10_Household Characteristics

Overview	

Type: Discrete
Format: character
Width: 1

Valid cases: 265
Invalid: 0

Literal question

Reason for substitution

Interviewer instructions

Reason for substitution : For the originally selected sample household which could not be surveyed, the reason for its becoming a casualty will be recorded against this item in terms of the specified codes.

Household size (B3_q1)
File: Blocks 1,3,10_Household Characteristics

Overview	

Type: Continuous
Format: numeric
Width: 2
Decimals: 0

Valid cases: 13647
Invalid: 0

Description

Household :

A group of persons normally living together and taking food from a common kitchen constitutes a household. The word "normally" means that temporary visitors are excluded but temporary stay-aways are included.Thus a son or daughter residing in a hostel for studies is excluded from the household of his/her parents, but a resident employee or resident domestic servant or paying guest (but not just a tenant in the house) is included in the employer/host's household. "Living together" is usually given more importance than "sharing food from a common kitchen" in drawing the boundaries of a household in case the two criteria are in conflict; however, in the special case of a person taking food with his family but sleeping elsewhere (say in a shop or a different house) due to space shortage, the household formed by such a person's family members is taken to include the person also. Each inmate of a mess, hotel, boarding and lodging house, hostel, etc. is considered as a single-member household except that a family living in a hotel (say) is considered as one household only; the same applies to residential staff of such establishments.

Household size :
The size of a household is the total number of persons in the household.

Literal question

How many members are there in the household?

Interviewer instructions

The size of the sample household i.e., the total number of persons normally residing together (i.e., under the same roof) and taking food from the same kitchen (including temporary stayaways and excluding temporary visitors) will be recorded against this item. This number will be same as the last serial number recorded in column 1 of block 4.

NIC Code (B3_q2a)
File: Blocks 1,3,10_Household Characteristics

Overview	

Type: Discrete
Format: character
Width: 3

Valid cases: 12593
Invalid: 0

Literal question

Which industry are the members of the household working in?

Interviewer instructions

NIC Code (B3_q2a)
File: Blocks 1,3,10_Household Characteristics

The description of the principal household industry-occupation will be recorded in the space provided. The right hand side of item 2 has been divided into two lines. The appropriate three digited industry code of the NIC 1987 will be recorded in the first line and the relevant occupation family of the NCO 1968 will be entered in the second line.

To determine the principal household industry-occupation, the general procedure to be followed is to list all the gainful occupations pursued by the members of the household excluding those employed by the household and paying guests (who in view of their staying and taking food in the household are considered as its normal members) during the one year period preceding the date of survey, no matter whether such occupations are pursued by the members in their principal or subsidiary (on the basis of earnings) capacity. Out of the occupations listed, that one which fetched the maximum earnings to the household during the last 365 days preceding the date of survey would be considered as the principal household occupation. It is quite possible that the household occupation, thus determined as the principal one, may be pursued in different industries by one or more members of the household. In such cases, the particular industry out of all the different industries corresponding to the principal occupation, which fetched the maximum earnings, should be considered as the principal industry of the household . In extreme cases, the earnings may be equal in two different occupations or industry- occupation combinations. By convention, in such cases, priority will be given to the occupation or industry-occupation combination of the senior most among the participating members. For households deriving income from non-gainful activities only, a dash (-) may be put against this item.

NCO Code (B3_q2b)
File: Blocks 1,3,10_Household Characteristics

Overview

Type: Discrete
Format: character
Width: 3

Valid cases: 12688
Invalid: 0

Literal question

What is the occupation of the members of the household?

Household type (B3_q3)
File: Blocks 1,3,10_Household Characteristics

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 13622
Invalid: 0

Interviewer instructions

The household type code based on the means of livelihood of a household will be decided on the basis of the source of the household's income during the 365 days preceding the date of survey. For this purpose, only the household's income (net income and not gross income) from gainful employment will be considered; but the incomes of servants and paying guests will not be taken into account.

Sector wise household type (HH_Type)

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 13633
Invalid: 0

Literal question

Which social group do you belong to?
Do you come under scheduled caste or scheduled tribe or others category?

Interviewer instructions

Whether or not the household belongs to scheduled tribe or scheduled caste will be indicated against this item in terms of the specified codes.

Land possessed code (B3_q5)
File: Blocks 1,3,10_Household Characteristics

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 13593
Invalid: 0

Literal question

How much land does the household own?

Interviewer instructions

The area of land possessed will include land 'owned', 'leased in' and 'neither owned nor leased in' by the household but exclude land 'leased out'. The total land area possessed by the household as on the date of survey will be worked out and recorded against this item in code.

Percapita monthly expenditure (B3_q6)
File: Blocks 1,3,10_Household Characteristics

Overview

Type: Continuous
Format: numeric
Width: 8
Decimals: 2
Range: 8-33994.83

Valid cases: 13643
Invalid: 4
Minimum: 8
Maximum: 33994.8
Mean: 332.3
Standard deviation: 578

Description

Household consumer expenditure :
The expenditure incurred by a household on domestic consumption during the reference period is the household's consumer expenditure. The household consumer expenditure is the total of the monetary values of consumption of various groups of items namely (i) food, pan (betel leaves), tobacco, intoxicants and fuel & light, (ii) clothing and footwear and (iii) miscellaneous goods and services and durable articles.

Monthly per capita expenditure (MPCE) :
For a household, this is household consumer expenditure over a period of 30 days divided by household size. A person's MPCE is understood as that of the household to which he/she belongs.

Dwelling unit (B3_q7)
File: Blocks 1,3,10_Household Characteristics

Overview

Dwelling unit (B3_q7)
File: Blocks 1,3,10_Household Characteristics

Type: Discrete
Format: character
Width: 1

Valid cases: 13641
Invalid: 0

Description

Dwelling unit :
This item refers only to the dwelling unit or the actual residence of the sample household. The dwelling unit may be an entire structure or may be only a part of a structure.

Literal question

What is the dwelling unit status of the household? Is it owned, hired or anything else?

Type of dwelling (B3_q8)
File: Blocks 1,3,10_Household Characteristics

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 13635
Invalid: 0

Literal question

What is the type of dwelling unit? Is it an independent house or flat or anything else?

Interviewer instructions

A dwelling unit may be in a chawl or bustee, or an independent house or a flat. Applicable code for each type of dwelling will be entered against this item.

Type of structure (B3_q9)
File: Blocks 1,3,10_Household Characteristics

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 13634
Invalid: 0

Literal question

What kind of structure the dwelling unit has? Is it katcha or semi-pucca or pucca?

Interviewer instructions

The structures have been classified into three categories, namely, pucca, semi-pucca and katcha on the basis of materials used for construction.

Covered area (sq. mt.) (B3_q10)
File: Blocks 1,3,10_Household Characteristics

Overview

Type: Continuous
Format: numeric
Width: 6
Decimals: 0
Range: 0-255900

Valid cases: 13600
Invalid: 47
Minimum: 0
Maximum: 255900
Mean: 85.5
Standard deviation: 2518.8

Literal question

How much is the covered are of the dwelling unit?

Interviewer instructions

Covered area (sq. mt.) (B3_q10)
File: Blocks 1,3,10_Household Characteristics

This will be the sum of the floor areas of all the rooms, kitchen etc., and covered and/or uncovered verandah of the building. The area will be recorded (to nearest integer) in square meters. The verandah will mean the space adjacent to rooms (both living and other)which is used as an access to the rooms of the dwelling unit. Verandah will not, however, cover a passage or a corridor used mainly as an access to the dwelling unit itself. A verandah covered on four sides by walls with a roof above, is a covered verandah. But the verandah not surrounded by walls on four sides is an uncovered verandah, irrespective of whether there is a roof or not.

Source of energy for cooking (B3_q11)
File: Blocks 1,3,10_Household Characteristics

Overview	
Type: Discrete	Valid cases: 13624
Format: character	Invalid: 0
Width: 2	

Literal question

What is the primary source of energy that is being used by the household for cooking?

Interviewer instructions

Items : primary source of energy used for cooking and lighting : Against these two items, the code corresponding to the primary source of energy that is being used by the household for the purpose of cooking and for lighting, will have to be recorded. If more than one type of energy is utilized, the primary or principal one on the basis of its use will have to be identified and the corresponding code will be noted in the appropriate box.

Source of energy for lighting (B3_q12)
File: Blocks 1,3,10_Household Characteristics

Overview	
Type: Discrete	Valid cases: 13647
Format: character	Invalid: 0
Width: 1	

Literal question

What is the primary source of energy that is being used by the household for lighting?

Interviewer instructions

Items : primary source of energy used for cooking and lighting : Against these two items, the code corresponding to the primary source of energy that is being used by the household for the purpose of cooking and for lighting, will have to be recorded. If more than one type of energy is utilized, the primary or principal one on the basis of its use will have to be identified and the corresponding code will be noted in the appropriate box.

Member taken meal outside (B3_q13)
File: Blocks 1,3,10_Household Characteristics

Overview	
Type: Discrete	Valid cases: 13647
Format: character	Invalid: 0
Width: 1	

Literal question

Do the members of the household take meals outside?

Interviewer instructions

If any member of the household has taken meals from outside, with or without payment, during last 30 days preceding the date of enquiry, code 1 will be recorded against this item, otherwise code 2 will be entered.

Ceremony performed (B3_q14)
File: Blocks 1,3,10_Household Characteristics

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 13644
Invalid: 0

Literal question

Does the household perform any ceremony?

Interviewer instructions

Ceremonies are performed to solemnize some events of life, e.g. birth, marriage etc. Members of a household may have to perform some religious rites consequent upon the death of a person. For various religions, faiths, there are some days in a year which are observed with ceremonial performances like offering puja, prayer, ritual performances etc. Some of such ceremonies may be performed by household members as required under the
social/religious customs without incurring expenditure for entertaining guests. On the other hand, some households may spend some amount of money for entertaining guests with meals which are considered as an essential part of the ceremonies performed by them. Code 1 will be entered in the box space provided against this item if at least one ceremony had been performed by the household during the last 30 days preceding the date of enquiry, and code 2 will be entered if no such ceremony was performed by the household.

Purchase from ration shop (B3_q15)
File: Blocks 1,3,10_Household Characteristics

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 13638
Invalid: 0

Literal question

Does the household purchase things from ration shop?

Interviewer instructions

Item : did the household purchase any cereal from ration/fair price shop during last 30 days ? : The answer against this question will be recorded in codes. The codes are yes-1, no-2. Purchase of food grains by workers from shops run by their employer at concessional or subsidised rates (this is prevalent, for example, in tea garden areas) will come under the coverage of this item. If any such purchase has been made, code 1 will be recorded.

Do all members get two square meals? (B10_q1)
File: Blocks 1,3,10_Household Characteristics

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 13623
Invalid: 0

Literal question

Do all members get two square meals?

Interviewer instructions

The expression 'getting two square meals a day', as is used in common parlance, conveys that the concerned person get, by and large, enough food to eat. While putting this question to the informant, it is thus presumed that the informant has a clear understanding about the meaning of it. There are equivalent phrases conveying the same meaning in regional languages. It is, therefore, important to put the proper question in the local language and record the answer given by the informant in terms of prescribed code numbers.

Care should however be taken to see that the informant is not offended with this question. Neither this question should be asked to those whose reported consumption would obviously indicate that they get enough to eat.

Whether the question(Do all members get two square meals?)was actually asked from the informant (B10_q2)

Weekly Activity. Status (B4_q8)
File: Block 4_Person records

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 67756
Invalid: 0

Literal question

Which industry has the member of the household worked in during the last 7 days?

Interviewer instructions

The current weekly activity status of a person will be the activity status obtaining for a person during a reference period of seven days preceding the date of survey. Irrespective of the usual activity pursued by a person, his/her current weekly activity will be determined strictly on the basis of the activities pursued by the person during the reference period of seven days preceding the date of survey adopting the priority criterion. Even for self-employed persons, one need not prejudge and take for granted that the current activity situation for them will be identical with the usual activity situation. A careful probe on the part of the investigator regarding the various activities pursued by the person during the seven days preceding the date of survey is, therefore, necessary for ascertaining his/her current weekly activity status. In defining the 'activity status', it has already been mentioned that the activities are grouped broadly into three categories, namely :

(i) working,
(ii) not working but seeking and/or available for work, and
(iii) neither working nor available for work.

According to the priority criterion, the status of ' working' gets priority over the status 'not working but seeking and/or available for work' which in turn gets priority over the status of 'neither working nor available for work'. In the category, 'not working but seeking and/or available for work', the status 'seeking' gets priority over the status of 'not seeking but available for work'. A person would be considered 'working (or employed)' if he/she while pursuing any economic activity had worked for at least one hour on any one day during the week preceding the date of survey. A person would be considered 'seeking and/or available for work (or unemployed)' if during the reference week no 'work' was done by the person but he or she had made efforts to get work or had been available for work during the reference week though not actively seeking work, in the belief that no work was available. A person who had neither worked nor was available for work will be considered to be engaged in non-economic activities (or not in labour force).

Weekly Activity NIC code (B4_q9)
File: Block 4_Person records

Overview	
Type: Discrete	Valid cases: 25136
Format: character	Invalid: 0
Width: 1	

Literal question

Which industry has the member of the household worked in during the last 7 days?

Interviewer instructions

For persons categorised as 'working' the industry section code corresponding to the activity status will be entered in this column.

Usual Activity. Principal Status (B4_q10)
File: Block 4_Person records

Overview	
Type: Discrete	Valid cases: 67756
Format: character	Invalid: 0
Width: 2	

Description

The usual activity status relates to the activity status of a person during the reference period of 365 days preceding the date of survey. The activity status on which a person spent relatively longer time (major time criterion) during the 365 days preceding the date of survey is considered the principal usual activity status of the person.

Literal question

Which industry has the member of the household usually worked in during the last one year?

Interviewer instructions

In the first instance the broad principal usual activity of the person will be identified based on the various activities pursued by the person during the reference period of last 365 days adopting a relatively long time (or major time) criterion, not necessarily for a continuous period. The broad principal usual activity status will be one of the three categories viz. 'employed' (working), 'unemployed' (available for work) or 'not in labour force' (neither willing nor available for work). It is to be noted that in deciding this, only the normal working hours available for pursuing various activities need be considered, and not the 24 hours of a day. The broad principal usual activity status will be obtained on the basis of a two- stage dichotomous classification depending on the major time spent. Persons will be classified in the first stage into
(i)those who are engaged in any economic activity (i.e., employed) and/or available for any economic activity (i.e. unemployed) and
(ii) who are not engaged and not available for any economic activity i.e. the persons will be first classified as those in the labour force and those not in the labour force depending on in which of these two statuses the person spent major part of the year.

In the second stage, those who are found in the labour force will be further classified into working (i.e., engaged in economic activity or employed) and seeking and/or available for work (i.e., unemployed) based on the major time spent.

Usual Activity. Principal NIC code (B4_q11)
File: Block 4_Person records

Overview	
Type: Discrete	Valid cases: 25324
Format: character	Invalid: 0
Width: 1	

Literal question

Which industry has the member of the household worked in during the last one year?

Interviewer instructions

Usual Activity. Principal NIC code (B4_q11)
File: Block 4_Person records

For the persons categorised 'working' (i.e., those with status codes 11-51), the corresponding 'industry section' will be recorded in terms of the specified codes. The codes are ;

description code

agriculture, hunting, forestry & fishing 0
mining and quarrying 1
manufacturing 2/3
electricity, gas and water 4
construction 5
wholesale and retail trade, restaurants & hotels 6
transport, storage & communication services 7
financial, insurance, real estate and business services 8
community, social & personal services 9

Usual Activity. Subsidiary Status (B4_q12)
File: Block 4_Person records

Overview	
Type: Discrete	Valid cases: 5507
Format: character	Invalid: 0
Width: 2	

Literal question

Which industry has the member of the household worked in subsidiary capacity during the last one year?

Interviewer instructions

For each person listed in this block, it has to be ascertained whether he or she worked in a subsidiary capacity during the 365 days preceding the date of survey or not; in other words, whether he or she had a subsidiary economic usual status. This has to be ascertained for all the three broad categories of persons initially classified as 'employed', unemployed' and 'not in labour force'. To illustrate, a person categorised as working and assigned the principal usual activity status 'self-employed' may also be engaged for a relatively shorter time during the year as casual wage labour. In such a case, he will be considered to have worked also in a subsidiary capacity(i.e.,having a subsidiary economic status which is different from the principal status). On the other hand, a person may be self-employed in trade for a
relatively longer period and simultaneously also engaged in agricultural production for a relatively minor time. In such a case, the principal usual activity status will be 'self-employed in trade' and subsidiary economic status, 'self-employed in agriculture'. Similarly, persons categorised as 'unemployed' or 'not in labour force' on the basis of 'relatively longer time' criterion might have pursued some economic activity for relatively shorter time during the year. In all the above cases, they will be treated to have had subsidiary economic usual status. It may be noted that engagement in work in subsidiary capacity may arise out of two situations :
(i) a person may be engaged for a relatively longer period during the 365 days in one economic activity/non-economic activity and for a relatively shorter period in another economic activity;
(ii) a person may be pursuing one economic activity/non- economic activity almost throughout the year in the principal status and also simultaneously pursuing another economic activity for relatively shorter time in a subsidiary capacity.

Usual Activity. Subsidiary NIC code (B4_q13)
File: Block 4_Person records

Overview	
Type: Discrete	Valid cases: 5738
Format: character	Invalid: 0
Width: 1	

Literal question

Which industry has the member of the household worked in subsidiary capacity during the last one year?

Interviewer instructions

Usual Activity. Subsidiary NIC code (B4_q13)
File: Block 4_Person records

For all persons engaged in any 'work' in subsidiary capacity, the status codes of the economic activities pursued by them in their subsidiary capacity will be recorded and the corresponding 'industry section' codes will be recorded in next column. In the situation where a person has been found to have pursued more than one economic activity during the last 365 days in his or her subsidiary capacity, the activity on which more time has been spent would be considered for recording entry in this column. Columns are to be filled in for each and every member of the household irrespective of whether the person's principal status is economic activity or not. For those reporting no subsidiary economic activity, 'X' may be recorded in both the columns.

Days Stayed away (B4_q14)
File: Block 4_Person records

Overview

Type: Continuous
Format: numeric
Width: 2
Decimals: 0
Range: 0-30

Valid cases: 21236
Invalid: 46520
Minimum: 0
Maximum: 30
Mean: 1.3
Standard deviation: 4.2

Pre question

Has any member stayed away from home during the last 30 days?

Literal question

How many days has the member stayed away from home during the last 30 days?

Interviewer instructions

The number of days for which the member 'stayed away from home ' during the 30 days preceding the date of enquiry should be recorded here. A continuous absence from home for 24 hours will be reckoned as a 'day stayed away'. That is, the entry will be made in completed number of days and any fraction of a day will be ignored. The location of the place where the person stayed, having been away from his/her own household, may also be within the same village/town and staying away will not only mean physical absence but also non- participation in food consumption from his/her own household.

No. of Meals per day (B4_q15)
File: Block 4_Person records

Overview

Type: Continuous
Format: numeric
Width: 1
Decimals: 0
Range: 0-3

Valid cases: 67756
Invalid: 0

Description

Meal
A 'Meal' is composed of one of more readily cat able (generally cooked) items of food, the usual major constituent of which is cereal food. The meals consumed by a person twice or thrice a day provide him/her the required energy of (calorie) and other nutrients for living and for pursuing his/her normal avocations. A 'meal' as opposed to 'snacks ' as opposed to 'snacks', 'nasta' or 'high tea' , contains larger quantum and variety of food. In rare cases, a full meal may contain larger quantity of non-cereal food. Even that, if the total quantum of food in plate is heavy as a meal, the contents of the food plate will also be considered as a real. Sometimes the contents of a 'nasta' may not be very different from the contents of a 'meal'. The difference in quantity will there be the guiding factor for deciding whether the plate is to be led as a 'meal ' or a nasta.

Literal question

How many meals does the household usually take every day?

Interviewer instructions

No. of Meals per day (B4_q15)
File: Block 4_Person records

The number of meals consumed by a person is usually reported as 2 or 3. In rare cases, one may come across a person who may be taking food only once in a day or more than three times a day. While in the former case the number of meals for the person will be 1 per day, in the latter case, however, only 3 should be entered. That is, in this column, the recorded number of meals taken in a day, even if it is reported to be higher, should not exceed 3. A breast-fed baby does not directly share the food consumed by members of the household. Hence for such babies the entry in this column will be '0'.

Meals (School) (B4_q16)

Sometimes the contents of a 'nasta' may not be very different from the contents of a 'meal'. The difference in quantity will there be the guiding factor for deciding whether the plate is to be led as a 'meal ' or a nasta.

Literal question

How many free meals do the members of the household usually take from school?

Interviewer instructions

Number of meals taken outside home on payment and at home during last 30 days preceding the date of survey, for each member of the household will be recorded here. There are schools/balwadis etc., which provide standard food to all or some students as midday meal, tiffin etc., free or at subsidised rate. Such meals are to be considered as meals taken away from home. If such food is received free it will be recorded in column "Meals (School)" . Meals received at subsidised rate will be recorded in column "Meals (Payment)". There are institutions which provide canteen facilities to their students. Students can purchase food of their choice and to their requirements from those canteens on payment. In such cases also entry will be made in column "Meals (Payment)".

Meals (Employer) (B4_q17)
File: Block 4_Person records

Literal question

How many free meals do the members of the household usually take from the employer?

Interviewer instructions

Sometimes meals are provided by the employer. These may be as perquisites or as part of wages in kind. These meals are generally consumed at the place of work and are to be considered as meals taken away from home. It may not be rare that meals provided by the employer are brought home by the employees and consumed there. Such meals are also to be considered as meals taken away from home. In this column the number of such meals received and consumed during the reference period by an individual member will be recorded.

File: Block 5_Monthly household expenditure on food and non-food items

Overview	
Type: Discrete	Valid cases: 705835
Format: character	Invalid: 0
Width: 1	

Description

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub- sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Sub Sample (SubSample)
File: Block 6_Monthly household expenditure on clothing

Sub Sample (SubSample)
File: Block 6_Monthly household expenditure on clothing

Overview	
Type: Discrete	Valid cases: 10628
Format: character	Invalid: 0
Width: 1	

Description

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub- sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Literal question

How much was spent by the household in cash towards the cost of raw material, service & repair in the last 30 days?

Interviewer instructions

This column is for recording expenditure on materials and services for construction, assemblage, repair and maintenance of all durable goods - first-hand as well as second-hand. Value of durable goods constructed will comprise value of raw materials, services and/or labour charges and any other charges. The total value of raw materials, services and labour charges will be recorded in this block. Here, expenditure incurred towards repair and maintenance of items purchased on second-hand will also be accounted.

Cost of Raw material,service & repair - in cash & kind (B9_q8)
File: Block 9_Monthly household expenditure on durables
