Overview

ABSTRACT

The National Sample Survey Organisation (NSSO) has been carrying out All-India surveys on consumer expenditure. While some of these smaller-scale surveys are spread over a full year and others over six months only, the quinquennial (full-scale) surveys have all been of a full year's duration. Household consumer expenditure is measured as the expenditure incurred by a household on domestic account during a specified period, called reference period. It includes the imputed values of goods and services, which are not purchased but procured otherwise for consumption. In other words, it is the sum total of monetary values of all the items (i.e. goods and services) consumed by the household on domestic account during the reference period. Any expenditure incurred towards the productive enterprises of the households is also excluded from household consumer expenditure. To minimise recall errors, a very detailed item classification is adopted to collect information, including items of food, items of fuel, items of clothing, bedding and footwear, items of educational and medical expenses, items of durable goods and other items. The schedule has also collected some other household particulars including age, sex and educational level etc. of each household member.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Randomly selected households based on sampling procedure and members of the household

Scope

NOTES

Schedule 1.0 of the 56th NSS round consists of the following blocks:

Block 0: Descriptive identification of sample household: This block is meant for recording descriptive identification particulars of a sample household.

Block 1: Identification of sample household

Block 2: Particulars of field operation: The identity of the Investigator, Assistant Superintendent and Superintendent associated, date of survey/inspection/scrutiny of schedules, despatch, etc., has been recorded in this block against the appropriate items in the relevant columns.

Block 3: Household characteristics:

Characteristics which are mainly intended to be used to classify the households for tabulation has been recorded in this

block.

Block 4: Demographic and other particulars of household members: All members of the sample household will be listed in this block. Demographic particulars (viz., relation to head, sex, age, marital status and general education), working status, type of income received and number of meals taken will be recorded for each member using one line for one member.

Block 5: Consumption of food, pan, tobacco and intoxicants. Information on an item has been recorded only if it is consumed.

Block 5.1: Consumption of fuel and light. Information on an item has been recorded only if it is consumed.

Block 6: Consumption of clothing, bedding, etc. Value of an item has been recorded only if it is brought into first-use during the reference period.

Block 7: Consumption of footwear. Value of an item has been recorded only if it is brought into first-use during the reference period.

Block 8.1: Expenditure on education & medical (institutional) goods and services. Expenditure has been recorded if it is incurred on any item during the reference period.

Block 8.2: Expenditure on miscellaneous goods and services including medical (non-institutional), rents and taxes. Expenditure has been recorded if it is incurred on any item during the reference period.

Block 9: Expenditure for purchase and construction (including repair and maintenance) of durable goods for domestic use. Expenditure has been recorded if it is incurred on any item during the reference period.

Block 10: Perception of household regarding sufficiency of food

Block 11: Summary of consumer expenditure: This block is meant to derive the value of household per capita consumption expenditure for a period of 30 days. Most entries in this block are transfer entries from blocks 5 to 9.

Coverage

GEOGRAPHIC COVERAGE

The survey covered the whole of the Indian Union except (i) Leh and Kargil districts of Jammu & Kashmir, (ii) interior villages of Nagaland situated beyond five kilometres of the bus route and (iii) villages in Andaman and Nicobar Islands which remain inaccessible throughout the year.

UNIVERSE

The survey used the interview method of data collection from a sample of randomly selected households and members of the household.

Sampling

Sampling Procedure

An outline of sampling design:

A stratified sampling design has been adopted for selection of the sample first-stage units (FSU's). The FSU's are villages (panchayat wards for Kerala) for rural areas and Urban Frame Survey (UFS) blocks for urban areas. The Ultimate stage units (USU's) are households which are selected by the method of circular systematic sampling from the corresponding frame in the FSU. Large FSU's are subdivided into hamlet groups (rural)/ sub-blocks (urban), that are grouped into two segments, and USU's are selected independently from each of these segments.

Sampling Frame:

List of villages (panchayat wards for Kerala) as per 1991 Census and latest lists of UFS blocks are respectively used for selection of rural and urban sample FSU's. For selection of sample villages from the State of Jammu & Kashmir, list of villages as per 1981 Census has been used as the sampling frame.

Sample size (FSU's):

The total sample size for Central Sample was fixed at 15032. Total State sample size was fixed at 17096 taking care of prevalent matching pattern for almost all states. Sample size for the whole round for each State/UT x Sector (i.e. rural/ urban) are allocated equally among the 4 sub-rounds. Sample FSU's for each sub-round are selected afresh in the form of 2 independent sub-samples.

Selection of FSU's:

For each sub-round, sample FSU's from each stratum are selected in the form of 2 independent sub-samples by following circular systematic sampling with (a) probability proportional to population for all rural strata other than stratum 1, and (b) equal probability for rural stratum 1 as well as all urban strata.

Deviations from Sample Design

There was no deviation from the original sampling design.

Questionnaires

Overview

Schedule 1.0 of the 56th NSS round consists of the following blocks:

Block 0: Descriptive identification of sample household: This block is meant for recording descriptive identification particulars of a sample household.

Block 1: Identification of sample household

Block 2: Particulars of field operation: The identity of the Investigator, Assistant Superintendent and Superintendent associated, date of survey/inspection/scrutiny of schedules, despatch, etc., has been recorded in this block against the appropriate items in the relevant columns.

Block 3: Household characteristics:

Characteristics which are mainly intended to be used to classify the households for tabulation has been recorded in this block.

Block 4: Demographic and other particulars of household members: All members of the sample household will be listed in this block. Demographic particulars (viz., relation to head, sex, age, marital status and general education), working status, type of income received and number of meals taken will be recorded for each member using one line for one member.

Block 5: Consumption of food, pan, tobacco and intoxicants. Information on an item has been recorded only if it is consumed.

Block 5.1: Consumption of fuel and light. Information on an item has been recorded only if it is consumed.

Block 6: Consumption of clothing, bedding, etc. Value of an item has been recorded only if it is brought into first-use during the reference period.

Block 7: Consumption of footwear. Value of an item has been recorded only if it is brought into first-use during the reference period.

Block 8.1: Expenditure on education & medical (institutional) goods and services. Expenditure has been recorded if it is incurred on any item during the reference period.

Block 8.2: Expenditure on miscellaneous goods and services including medical (non-institutional), rents and taxes. Expenditure has been recorded if it is incurred on any item during the reference period.

Block 9: Expenditure for purchase and construction (including repair and maintenance) of durable goods for domestic use. Expenditure has been recorded if it is incurred on any item during the reference period.

Block 10: Perception of household regarding sufficiency of food

Block 11: Summary of consumer expenditure: This block is meant to derive the value of household per capita consumption expenditure for a period of 30 days. Most entries in this block are transfer entries from blocks 5 to 9.

Type: Discrete

Valid cases: 81500

Format: character

Invalid: 0

Width: 1

Description

The survey period of one year of this round was divided into four sub-rounds of three months duration. Equal number of sample villages and blocks were allotted for survey in each of these four sub-rounds.

SS Revised (SS_Revised)**File: Blocks 1,3,10_Household characteristics and perception of household regarding sufficiency of food****Overview**

Type: Discrete

Valid cases: 81500

Format: character

Invalid: 0

Width: 1

Description

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub-sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Serial no of village / Block (Vill_Blk_Slno)**File: Blocks 1,3,10_Household characteristics and perception of household regarding sufficiency of food****Overview**

Type: Discrete

Valid cases: 81500

Format: character

Invalid: 0

Width: 5

Description

The first-stage units are census villages in the rural sector and the NSSO urban frame survey (UFS) blocks in the urban sector. This variable indicates the serial number assigned to such units.

Segment number (SegmentNo)

File: Blocks 1,3,10_Household characteristics and perception of household regarding sufficiency of food

Survey Code (Survey_Code)

File: Blocks 1,3,10_Household characteristics and perception of household regarding sufficiency of food

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 81434
Invalid: 0

Description

The item records whether the originally selected household or a substitute household has been surveyed or no household could be surveyed. The entries have been made in terms of codes.

Interviewer instructions

Whether the originally selected sample household has been surveyed or a substituted household has been surveyed will be indicated against this item by recording '1' if it is the originally selected sample household, and '2' if it is the substituted one. If neither the originally selected household nor the substituted household can be surveyed i.e., if the sample household is a casualty, code '3' will be recorded. In such cases only blocks 0, 1, 2, 12 and 13 will be filled-in and on the top of the front page of the schedule the word 'CASUALTY' will be written and underlined.

Substitution Code (Substn_Code)

File: Blocks 1,3,10_Household characteristics and perception of household regarding sufficiency of food

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 4029
Invalid: 0

Description

If the originally selected household could not be surveyed, irrespective of whether a substituted household could be surveyed or not, the reason for the one originally selected becoming a casualty has been recorded against this item in terms of codes.

Interviewer instructions

For an originally selected sample household which could not be surveyed, irrespective of whether a substituted household could be surveyed or not, the reason for not surveying the original household will be recorded against item 18 in terms of the specified codes.

NSS (NSS)

Mean: 459891.1
Standard deviation: 1900570.6

Household Size (B3_q1)

File: Blocks 1,3,10_Household characteristics and perception of household regarding sufficiency of food

Overview

Type: Continuous
Format: numeric
Width: 2
Decimals: 0

Valid cases: 81500
Invalid: 0

Description

A group of persons normally living together and taking food from a common kitchen constitutes a household. The word "normally" means that temporary visitors are excluded but temporary stay-aways are included. Thus a son or daughter residing in a hostel for studies is excluded from the household of his/her parents, but a resident employee or resident domestic servant or paying guest (but not just a tenant in the house) is included in the employer/host's household. "Living together" is usually given more importance than "sharing food from a common kitchen" in drawing the boundaries of a household in case the two criteria are in conflict; however, in the special case of a person taking food with his family but sleeping elsewhere (say in a shop or a different house) due to space shortage, the household formed by such a person's family members is taken to include the person also. Each inmate of a mess, hotel, boarding and lodging house, hostel, etc. is considered as a single-member household except that a family living in a hotel (say) is considered as one household only; the same applies to residential staff of such establishments.

Literal question

How many members are there in the household?

Interviewer instructions

Household Size (B3_q1)

File: Blocks 1,3,10_Household characteristics and perception of household regarding sufficiency of food

The size of the sample household i.e., the total number of persons normally residing together (i.e., under the same roof) and taking food from the same kitchen (including temporary stayaways and excluding temporary visitors) will be recorded against this item. This number will be same as the last serial number recorded in column 1 of block 4.

Monthly per capita expenditure (B3_q17)

File: Blocks 1,3,10_Household characteristics and perception of household regarding sufficiency of food

Overview

Type: Continuous	Valid cases: 81500
Format: numeric	Invalid: 0
Width: 8	Minimum: 5.5

Household type (B3_q4)

File: Blocks 1,3,10_Household characteristics and perception of household regarding sufficiency of food

Overview

Type: Discrete	Valid cases: 81347
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

Household type (B3_q4)

File: Blocks 1,3,10_Household characteristics and perception of household regarding sufficiency of food

The household type code based on the means of livelihood of a household will be decided on the basis of the source of the household's income during the 365 days preceding the date of survey. For this purpose, only the household's income (net income and not gross income) from economic activities will be considered; but the incomes of servants and paying guests will not be taken into account.

Sector wise household type (HH_Type)

File: Blocks 1,3,10_Household characteristics and perception of household regarding sufficiency of food

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 81500
Invalid: 0

Religion (B3_q5)

File: Blocks 1,3,10_Household characteristics and perception of household regarding sufficiency of food

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 81489
Invalid: 0

Literal question

Which religion does the household belong to?

Interviewer instructions

The religion of the household will be recorded against this item in codes. If different members of the household claim to belong to different religions, the religion of the head of the household will be considered as the religion of the household.

Social Group (B3_q6)

File: Blocks 1,3,10_Household characteristics and perception of household regarding sufficiency of food

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 81462
Invalid: 0

Literal question

Which social group does the household belong to?

Interviewer instructions

Whether or not the household belongs to scheduled tribe, scheduled caste or other backward class will be indicated against this item in terms of the specified codes which are:

scheduled tribe - 1, scheduled caste - 2, other backward class - 3, others - 9.

Those who do not come under any one of the first three social groups will be assigned code 9 meant to cover all other categories. In case different members belong to different social groups, the group to which the head of the household belongs will be considered as the 'social group' of the household.

Land possessed code (B3_q7)

File: Blocks 1,3,10_Household characteristics and perception of household regarding sufficiency of food

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 81141
Invalid: 0

Literal question

How much land does the household possess?

Interviewer instructions

The area of land possessed will include land 'owned', 'leased in' and (encroached) 'land neither owned nor leased in' by the household but exclude land 'leased out'. The total land area possessed by the household as on the date of survey will be worked out and recorded against this item in code.

Dwelling unit code (B3_q8)

File: Blocks 1,3,10_Household characteristics and perception of household regarding sufficiency of food

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 81479
Invalid: 0

Description

This item refers only to the dwelling unit or the actual residence of the sample household. The dwelling unit may be an entire structure or may be only a part of a structure.

Literal question

Do you own the dwelling unit? Or is it hired or otherwise occupied?

Interviewer instructions

This item of the block refers only to the dwelling unit or the actual residence of the sample household. The dwelling unit may be the entire structure for one household or may be only a part of it. Accordingly, the investigator will ask the informant if it is owned, hired or otherwise occupied. If the dwelling unit is owned by the occupant, code 1 will be recorded against item 8. If it is taken on rent, code 2 will be entered and if it is occupied otherwise, code 9 will apply. However, if any household is found living under trees, bridges, in pipes, etc. it will not be treated as living in dwelling unit. For such households code 3 will be recorded and in such cases a cross 'x' mark will be put against the items 9, 10 and 11 of the block. It may be noted that a dwelling unit constructed on a plot of land which is taken under long-term lease, usually 30 years or more, will be considered as being held under owner-like possession. Similarly, a dwelling unit itself possessed by a household under a long-term lease may be treated as under owner-like possession and code 1 will be applicable in such cases also.

Type of dwelling code (B3_q9)

File: Blocks 1,3,10_Household characteristics and perception of household regarding sufficiency of food

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 81314
Invalid: 0

Literal question

What is the type of dwelling of the household? Is it an independent house or a flat or any other type of dwelling?

Interviewer instructions

A dwelling unit may be in a chawl or bustee, or an independent house or a flat. Code for each type of dwelling is given in the schedule and the applicable code will be entered against this item.

Type of structure (B3_q10)

File: Blocks 1,3,10_Household characteristics and perception of household regarding sufficiency of food

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 81314
Invalid: 0

Literal question

What is the type of structure of the dwelling?

Interviewer instructions

The structures have been classified into three categories, namely, pucca, semi-pucca and katcha on the basis of materials used for construction.

Covered area (sq. metre) (B3_q11)

File: Blocks 1,3,10_Household characteristics and perception of household regarding sufficiency of food

Overview

Type: Continuous
Format: numeric
Width: 5
Decimals: 0
Range: 0-92136

Valid cases: 81500
Invalid: 0
Minimum: 0
Maximum: 92136
Mean: 45.2
Standard deviation: 465.8

Literal question

How much is the covered area of the dwelling?

Interviewer instructions

This will be the sum of the floor areas of all the rooms, kitchen, etc., and verandah of the building. The area will be recorded (to nearest integer) in square metres. The verandah will mean a roofed space adjacent to living/other rooms and not walled from all sides. In other words, at least one side of such space is either open or walled only to some height or protected by grille, net, etc.

Cooking code (B3_q12)

File: Blocks 1,3,10_Household characteristics and perception of household regarding sufficiency of food

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 81434
Invalid: 0

Literal question

What is the primary source of energy that is being used by the household for cooking?

Interviewer instructions

Against these two items, the code corresponding to the primary source of energy that is used by the household for cooking and lighting during last 30 days preceding the date of survey, will be recorded. If more than one type of energy is utilised, the primary or principal one on the basis of its use will have to be identified and the corresponding code will be noted in the appropriate box.

Lighting code (B3_q13)

File: Blocks 1,3,10_Household characteristics and perception of household regarding sufficiency of food

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 81427
Invalid: 0

Literal question

What is the primary source of energy that is being used by the household for lighting?

Interviewer instructions

Against these two items, the code corresponding to the primary source of energy that is used by the household for cooking and lighting during last 30 days preceding the date of survey, will be recorded. If more than one type of energy is utilised, the primary or principal one on the basis of its use will have to be identified and the corresponding code will be noted in the appropriate box.

Whether Meals outside? (B3_q14)

File: Blocks 1,3,10_Household characteristics and perception of household regarding sufficiency of food

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 81478
Invalid: 0

Interviewer instructions

If any member of the household has taken meals from outside, with or without payment, during last 30 days preceding the date of enquiry, code 1 will be recorded against this item, otherwise code 2 will be entered.

Whether Ceremony? (B3_q15)

File: Blocks 1,3,10_Household characteristics and perception of household regarding sufficiency of food

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 81482
Invalid: 0

Description

Ceremonies are performed to solemnise some events of life, e.g. birth, marriage, etc. Members of a household may have to perform some religious rites consequent upon the death of a person. For various religions, faiths, there are some days in a year, which are observed with ceremonial performances like offering puja, prayer, ritual performances, etc. Some of such ceremonies may be performed by household members as required under the social/religious customs without incurring expenditure for entertaining guests. On the other hand, some households may spend some amount of money for entertaining guests with meals, which are considered as an essential part of the ceremonies performed by them.

Literal question

Did the household perform any ceremony during the last 30 days?

Interviewer instructions

Code 1 will be entered in the box space provided against this item if the household had performed at least one ceremony during the last 30 days preceding the date of enquiry, and code 2 will be entered if the household performed no such ceremony.

Whether Ration? (B3_q16)

File: Blocks 1,3,10_Household characteristics and perception of household regarding sufficiency of food

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 81477
Invalid: 0

Interviewer instructions

4.3.25 The answer against this question will be recorded in codes. The codes are yes-1, no-2. Purchase of foodgrains by workers from shops run by their employer at concessional or subsidised rates (this is prevalent, for example, in tea garden areas) will not be considered as purchase from ration/fair price shop.

Whether Enough food? (B10_q1)

File: Blocks 1,3,10_Household characteristics and perception of household regarding sufficiency of food

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 81351
Invalid: 0

Literal question

Whether household usually eats enough food?

Interviewer instructions

This block will be filled after completion of the enquiry on all the preceding blocks. The expression in item 1 - 'getting enough food everyday' - as used in common parlance, conveys that the concerned person gets, by and large, sufficient food to eat. This question is asked in order to know the perception of the household regarding sufficiency of food. While putting this question to the informant, it is thus presumed that the informant has a clear understanding of its meaning. There are equivalent phrases conveying the same meaning in regional languages. It is, therefore, important to put the proper question in the local language and record the answer given by the informant in the appropriate code.

Care should be taken to see that the informant is not offended by this question. The question should, in fact, not be asked to those whose reported consumption would obviously indicate that they get sufficient food to eat. In item 1, if the members of the household are reported as getting enough food everyday throughout the year, the code to be entered in the box space of this block is 1. If adequate food is available in only a few months of the year code 2 will be noted. Code 3 will indicate that the household does not usually get enough food everyday for all its members. Here the reference period is last 12 calendar months preceding the date of enquiry.

Month code when not enough food (B10_q2_1)

Literal question

In which months of the year the household does not get enough food?

Interviewer instructions

If adequate food was available in only some months of the year i.e. if code 2 is recorded in item 1, those calendar months in which all members of the household did not have enough food everyday will be recorded in the cells provided against item 2 in codes. For example, suppose all members of a sample household did not have enough food everyday in the months of January and March during the reference period. The entries to be made are 01 & 03 in the first two cells of the first row out of the 11 cells provided in the block against item 2.

SS Revised (SS_Revised)

File: Block 4_Person records

Overview

Type: Discrete	Valid cases: 388836
Format: character	Invalid: 0
Width: 1	

Description

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub-sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Literal question

Sex of the member

Sex Code (B4_q4)

File: Block 4_Person records

Interviewer instructions

For each and every member of the household, sex in terms of the code (male-1, female-2) will be recorded in this column. For eunuch, code '1' will be recorded.

Age (B4_q5)

File: Block 4_Person records

Overview

Type: Continuous	Valid cases: 388756
Format: numeric	Invalid: 80
Width: 2	Minimum: 0
Decimals: 0	Maximum: 99
Range: 0-99	Mean: 26.3
	Standard deviation: 18.7

Literal question

Age of the member

Interviewer instructions

The age in completed years of all the members listed will be ascertained and recorded in column (5). For infants below one year of age at the time of listing, '0' will be entered in column (5). Similarly, for persons of age 99 years or more, 99 will be entered in this column.

Marital Status Code (B4_q6)

File: Block 4_Person records

Overview

Type: Discrete	Valid cases: 388763
Format: character	Invalid: 0
Width: 1	

Literal question

Marital status of the member

Interviewer instructions

The marital status of each member will be recorded in terms of the specified code in this column.

General Education Code (B4_q7)

File: Block 4_Person records

Overview

Type: Discrete	Valid cases: 388836
Format: character	Invalid: 0
Width: 2	

Literal question

Education of the member

Interviewer instructions

Information regarding the level of general education attained by the members of the household listed will be recorded in column (7) in terms of the specified code. For the purpose of making entries in this column, only the course successfully completed will be considered. For instance, for a person who has studied up to say, first year B.A., his/her educational attainment will be considered as higher secondary (code 9). For a person who has studied up to 12th standard but has not appeared for the final examination or has failed, his/her educational attainment will be considered under 'secondary' (code 8).

Usual Activity. Principal Status (B4_q8)

File: Block 4_Person records

Overview

Type: Discrete
 Format: character
 Width: 2

Valid cases: 388836
 Invalid: 0

Interviewer instructions

Classification of each individual into a unique status poses a problem when more than one of the three activity statuses listed above concurrently obtain for a person. In such an eventuality, the identification uniquely under any one of the three activity statuses is done by adopting either the major time or priority criterion. The former is used for classification of persons under 'usual activity status' and the latter for classification of persons under 'current activity status'. The three major activity statuses have been further sub-divided into several detailed activity categories. If a person categorised as engaged in economic/non-economic activity, by adopting one of the two criteria mentioned above, is found to be pursuing more than one economic/non-economic activity during the reference period, the appropriate detailed status code will relate to the activity in which relatively more time has been spent.

Days Stayed away (B4_q14)

File: Block 4_Person records

Overview

Days Stayed away (B4_q14)

File: Block 4_Person records

Type: Continuous
 Format: numeric
 Width: 2
 Decimals: 0
 Range: 0-30

Valid cases: 108018
 Invalid: 280818
 Minimum: 0
 Maximum: 30
 Mean: 2
 Standard deviation: 5.1

Literal question

How many days a member has stayed away from the household?

Interviewer instructions

The number of days for which the member 'stayed away from home' during the 30 days preceding the date of enquiry should be recorded here. A continuous absence from home for 24 hours will be reckoned as a 'day stayed away'. That is, the entry will be made in completed number of days and any fraction of a day will be ignored. The location of the place where the person stayed, having been away from his/her own household, may also be within the same village/town and staying away will not only mean physical absence but also non- participation in food consumption from his/her own household.

No. of Meals per day (B4_q15)

File: Block 4_Person records

Description

A 'meal' is composed of one or more readily eatable (generally cooked) items of food, the usually major constituent of which is cereals. The meals consumed by a person twice or thrice a day provide him/her the required energy (calorie) and other nutrients for living and for pursuing his/her normal avocations. A 'meal', as opposed to 'snacks', 'nashta' or 'high tea', contains larger quantum and variety of food. In rare cases, a full meal may contain larger quantity of non-cereal food. Even then, if the quantum of food in a plate is heavy as a meal, the contents of the food plate will also be considered as a 'meal'. Sometimes the contents of a 'nashta' may not be very different from the contents of a 'meal'. The difference in quantity will therefore be the guiding factor for deciding whether the plate is to be labelled as a 'meal' or a 'nashta'.

Literal question

How many meals do you usually take in a day?

Interviewer instructions

The number of meals consumed by a person is usually reported as 2 or 3. In rare cases, one may come across a person who may be taking food only once in a day or more than three times a day. While in the former case the number of meals for the person will be 1 per day, in the latter case, however, only 3 should be entered. That is, in this column, the recorded number of meals taken in a day, even if it is reported to be higher, should not exceed 3. A breast-fed baby does not directly share the food consumed by members of the household. Hence for such babies the entry in this column will be '0'. To have a clear idea of what constitutes a meal, the following three paragraphs may be referred to.

Meals (School) (B4_q16)

Description

The survey period of one year of this round was divided into four sub-rounds of three months duration. Equal number of sample villages and blocks were allotted for survey in each of these four sub-rounds.

SS Revised (SS_Revised)**File: Block 5_Monthly household expenditure on food and non-food items****Overview**

Type: Discrete
 Format: character
 Width: 1

Valid cases: 3707564
 Invalid: 0

Description

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub-sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Serial no of village / Block (Vill_Blkc_Slno)**File: Block 5_Monthly household expenditure on food and non-food items****Overview**

Type: Discrete

Description

The survey period of one year of this round was divided into four sub-rounds of three months duration. Equal number of sample villages and blocks were allotted for survey in each of these four sub-rounds.

SS Revised (SS_Revised)

File: Block 7_Annual household expenditure on footwear

Overview

Type: Discrete
 Format: character
 Width: 1

Valid cases: 243446
 Invalid: 0

Description

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub-sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Serial no of village / Block (Vill_Blk_Slno)

Width: 2	

Round Schedule (RoundSchedule)

File: Block 9_Annual household expenditure on durables

Overview

Type: Discrete	Valid cases: 902441
Format: character	Invalid: 0
Width: 3	

Description

Indicates the NSS round and schedule number of this survey.

SS_Original (SS_Original)

File: Block 9_Annual household expenditure on durables

Overview

Type: Discrete	Valid cases: 902441
Format: character	Invalid: 0
Width: 1	

Sector (Sector)

File: Block 9_Annual household expenditure on durables

Overview

Type: Discrete	Valid cases: 902441
Format: character	Invalid: 0
Width: 1	

Description

Sector : A word used for the rural-urban demarcation.

State region (State_region)

File: Block 9_Annual household expenditure on durables

Overview

State region (State_region)

File: Block 9_Annual household expenditure on durables

Type: Discrete

Valid cases: 902441

Format: character

Invalid: 0

Width: 3

Description

Regions are hierarchical domains of study below the level of State/ Union Territory in the NSS.

State (State)

File: Block 9_Annual household expenditure on durables

Overview

Type: Discrete

Valid cases: 902441

Format: character

Invalid: 0

Width: 2

Stratum number (Stratum)

File: Block 9_Annual household expenditure on durables

Overview

Type: Discrete

Valid cases: 902441

Format: character

Invalid: 0

Width: 2

Description

Within each district of a State/ UT, two basic strata were formed:

- (i) rural stratum comprising of all rural areas of the district and
- (ii) urban stratum comprising of all the urban areas of the district.

Sub Stratum (SubStratum)

Sub Round (SubRound)

File: Block 9_Annual household expenditure on durables

Overview

Sub Round (SubRound)

File: Block 9_Annual household expenditure on durables

Type: Discrete
 Format: character
 Width: 1

Valid cases: 902441
 Invalid: 0

Description

The survey period of one year of this round was divided into four sub-rounds of three months duration. Equal number of sample villages and blocks were allotted for survey in each of these four sub-rounds.

SS Revised (SS_Revised)

File: Block 9_Annual household expenditure on durables

Overview

Type: Discrete
 Format: character
 Width: 1

Valid cases: 902441
 Invalid: 0

Description

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub-sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Serial no of village / Block (Vill_Blk_Slno)

File: Block 9_Annual household expenditure on durables

Overview

Type: Discrete
 Format: character
 Width: 5

Valid cases: 902441
 Invalid: 0

Description

The first-stage units are census villages in the rural sector and the NSSO urban frame survey (UFS) blocks in the urban sector. This variable indicates the serial number assigned to such units.

Segment number (SegmentNo)
