Overview

ABSTRACT

The Land and Livestock Holdings survey (LHS) of NSSO is one of the main sources of information on livestock and poultry held by the household sector of the economy. It also provides estimates of two basic distributions of land holdings, viz., distribution of land owned by households and that of agriculturally operated land. The survey of Land and Livestock Holdings carried out in the 59th round (January-December 2003) of the National Sample Survey (NSS) is the sixth in the series of similar surveys conducted so far by the NSS. The objective of these surveys has been to generate basic quantitative information on the agrarian structure of the country, which is relevant to land policy. In the 59th round, information on various aspects of ownership and operational holdings was collected for both rural and urban areas. Each sample household was visited twice during the period of survey with a gap of four to eight months. Two different schedules of enquiry were canvassed in the two visits. The first visit was made during January to August 2003 and the second, during September to December 2003. The survey was conducted in both rural and urban areas.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Randomly selected households based on sampling procedure and members of the household

Scope

NOTES

In the Land and Livestock Holdings surveys of the NSSO, two types of holdings, namely, household ownership holdings and operational holdings, are enumerated by interviewing the sample households. Data are also collected on the livestock and agricultural

implements owned by households. In the present survey, however, data on agricultural implements of households were not collected, as this was being done in another NSS survey called "Situation Assessment Survey of Farmers", carried out concurrently.

There were four subjects of enquiry in the 59th round of NSS: Land and Livestock Holdings, Debt and Investment, Consumer Expenditure, and Situation Assessment Survey (SAS) of Farmers. With the exception of consumer expenditure, all the enquiries required two visits to each sample household for collection of data: one during January to August and the other during September to December. Accordingly, each sample first-stage unit (village or block) was visited twice by the investigator to whom it was allotted. A small proportion of households could not be surveyed a second time due to varying reasons; for these, only one set of data could be collected.

Some items of information were in any case collected in the first visit only; these included general household characteristics, age, sex, educational level and other characteristics of household members. Also, importantly, information on livestock owned was collected only in

the first visit. The field work during the first visit included the canvassing of the listing schedule (Sch. 0.0) and selection of the sample households.

Items of enquiry: Particulars of land owned, land leased out and leased in, and types and terms of lease formed the main body of information for the study of ownership holdings. For the operational holdings, data were collected on size, composition, tenurial form, land use, extent of irrigation, fragmentation of holding, drainage facilities and other related aspects. Further, for each operational holding, information on its size, composition, tenurial form, main use, agricultural activities and attached farm workers were collected for each agricultural season as well as for the whole agricultural year of 2002-03.

Reference period: The survey was conducted in two visits and some items of information were be collected in only one of them. The formats of different blocks were made in such a way that they remain the same for schedules of both the visits. Information on holdings operated during the Kharif season of the agricultural year 2002-03 was collected in first visit, and on holdings operated during the Rabi season, in the second visit. In addition, some general information on operational holdings with the agricultural year 2002-03 as the reference period was also collected in the second visit. This information did not, however, include the area of the operational holding with the entire agricultural year as reference period. Households have therefore been classified in this report, for the purpose of presentation of livestock data, by size of holding for the Kharif season (from data collected in the first visit), and not by size of holding with the entire agricultural year as reference period as was done in the 48th round. It may be noted that the data on livestock were collected during the first visit to the sample households. For land without crop, July to December 2002 will be treated as Kharif season and January to June 2003 as Rabi season.

TOPICS

Topic	Vocabulary	URI
Labor Markets	World Bank	http://www.surveynetwork.org/toolkit

KEYWORDS

Employment, Unemployment, Indebtedness of rural labour, Usual principal activity, Usual subsidiary activity, Time disposition during the week, Migration

Coverage

GEOGRAPHIC COVERAGE

The survey covered the whole of the Indian Union except (i) Leh (Ladakh) and Kargil districts of Jammu & Kashmir, (ii) interior villages of Nagaland situated beyond five kilometres of the bus route and (iii) villages in Andaman and Nicobar Islands which remain inaccessible throughout the year.

UNIVERSE

The survey used the interview method of data collection from a sample of randomly selected households and members of the household

Sampling

Sampling Procedure

A stratified multi-stage design was adopted for the 59th round survey. The first-stage units (FSU) were the census villages (panchayat wards in Kerala) in the rural sector and UFS blocks in the urban sector. In both sectors, the ultimate stage units were households. In

large villages/ blocks, an intermediate stage unit called hamlet-group/ sub-block was also involved.

Sampling frame for first-stage units: The list of villages (panchayat wards for Kerala) as per Population Census 1991 was used as sampling frame in rural areas; for urban areas, the latest UFS frame was used.

Allocation and selection of sample households: Eight sample households were allocated to each sample FSU. In case of no hamlet-group formation, two households were selected from each of the four second-stage strata. In case of hamlet-group formation, one household was

selected from each SSS of each hamlet-group. Sample households were selected by SRSWOR in each SSS of each hamlet-group.

The procedure for selection of fsus given in detail in Appendix B of the report no.493 attached as external resources.

Deviations from Sample Design

There was no deviation from the original sample deviation.

Response Rate

6760 villages and 3824 urban blocks were allocated at all-India level for the Central sample.cjvInformation was collected from a sample of 52,265 rural households and 29,893 urban households spread over 6553 villages and 3757 urban blocks through personal interviews.

Weighting

For generating any estimate, one has to extract relevant portion of the data, and aggregate after applying the weights.

Weights (or multipliers) VARIABLES are given at the end of record of each dataset. The weights (multipliers) are WGT_SS for Sub-sample-wise estimation and WGT_Combined for combined subsample estimates.

All records of a household will have same weight figure. In case of those Blocks/Levels, where Item/Person Sl.No. is not applicable the field is filled up with 00000.

Use of subsample-wise weights (multipliers)

For generating subsample-wise estimates based on data of all subrounds taken together, either Subsample-1 households or Subsample-2 households are to be considered at one time. Subsample code is available in the dataset For generating subsample-combined estimates based on data of all subrounds taken together all households are to be considered.

Questionnaires

Overview

The schedule consisted of the following blocks:

Block 0: descriptive identification of sample household

Block 1: identification of sample household

Block 2: particulars of field operation

Block 3: household characteristics (only in visit 1)

Block 4: demographic and other particulars of household members (only in visit 1)

Block 5: particulars of land of the household as on the date of survey

Block 6: some general information of operational holdings for Kharif / Rabi

Block 7: number of cattle and buffaloes owned on the date of survey (only in visit 1)

Block 8: number of other livestock & poultry owned on the date of survey (only in visit 1)

Block 9: some general information of operational holdings for agricultural year 2002-03 (only in visit 2)

Block 10: remarks by investigator

Block 11: remarks by supervisory officer(s)

Data Collection

Data Collection Dates

Start	End	Cycle
2003-01-01	2003-03-31	subround-1
2003-04-01	2003-06-30	subround-2
2003-07-01	2003-09-30	subround-3
2003-10-01	2003-12-31	subround-4

Data Collection Mode

Face-to-face [f2f]

Data Collection Notes

The information for Land and Livestock Holdings survey was collected from a sample of households by the interview method. Each sample household was visited twice during the period of survey with a gap of four to eight months. Two different schedules of enquiry were canvassed in the two visits.

The survey period for the 59th round survey was the calendar year 2003. To reduce recall error, particulars relating to the entire agricultural year were collected by visiting each sample household twice during the survey period. The first visit to a sample household was made during the period January to August, while the second visit was made during the period September to December. The longer period for the first visit reflected the higher workload for the field staff during this visit compared to the second visit.

The survey period of the round was divided into two sub-rounds. Sub-round one consisted of the first half of the survey period of each visit while sub-round two consisted of the remaining period. Equal numbers of sample villages/blocks were allotted to each sub-round and a village/block was normally surveyed in the sub-round to which it was allotted. Because of arduous field conditions, this restriction was not strictly enforced in Andaman and Nicobar Islands, Lakshadweep, and rural areas of Arunachal Pradesh and Nagaland.

Questionnaires

The schedule consisted of the following blocks:

Block 0: descriptive identification of sample household

Block 1: identification of sample household

Block 2: particulars of field operation

Block 3: household characteristics (only in visit 1)

Block 4: demographic and other particulars of household members (only in visit 1)

Block 5: particulars of land of the household as on the date of survey

Block 6: some general information of operational holdings for Kharif / Rabi

Block 7: number of cattle and buffaloes owned on the date of survey (only in visit 1)

Block 8: number of other livestock & poultry owned on the date of survey (only in visit 1)

Block 9: some general information of operational holdings for agricultural year 2002-03 (only in visit 2)

Block 10: remarks by investigator

Block 11: remarks by supervisory officer(s)

Interviewer instructions

The serial number of the person recorded in column (1) of block 4, schedule 18.1 from whom the bulk of the information is collected will be entered. Information is to be collected from members of the household. Sometimes some persons although not a member of the household may give correct information e.g. head of the household who is staying away from home for his job/business. In some other cases, due to practical difficulty, the informant may not strictly be a member of the household and collection of information from such informants may be justified. In all such cases, code '99' is to be reported against this item. However, if during the second visit information is not collected from the person who supplied information in the first visit, '99' will be recorded.

Response Code (B1_q17)

File: Block-1-identification of sample household-records-visit-1

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 80216
Invalid: 0

Interviewer instructions

This item is to be filled after canvassing the schedule. The type of informant, considering his co-operation and capability in providing the required information, will be recorded against this item in terms of specified response codes.

Survey Code (B1_q18)

File: Block-1-identification of sample household-records-visit-1

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 81053
Invalid: 0

Interviewer instructions

Whether the originally selected sample household has been surveyed or a substituted household has been surveyed or no household could be surveyed will be indicated against this item. During visit 1, code 1 will be recorded if it is the originally selected sample household and 2 if it is the substituted one and if neither the originally selected household nor the substituted household can be surveyed i.e. if the sample household is a casualty, code 3 will be recorded.

Substitution Code (B1_q19)

File: Block-1-identification of sample household-records-visit-1

Overview

Substitution Code (B1_q19)

File: Block-1-identification of sample household-records-visit-1

Type: Discrete
 Format: character
 Width: 1

Valid cases: 1006
 Invalid: 0

Interviewer instructions

The description of this item in schedules is different in different visits although the list of codes is same. The description of the item for visit 1 is 'reason for first substitution of original household', and for visit 2, it is 'reason for casualty of household'. For an originally selected sample household which could not be surveyed in visit 1, irrespective of whether a substituted household could be surveyed or not, the reason for not surveying the original household will be recorded against item 19 in terms of code. If the household surveyed in visit 1 becomes casualty in visit 2, then this item will be filled.

No. of partitioned hhlds (for visit-2) (B1_q20)

File: Block-1-identification of sample household-records-visit-1

Overview

Type: Continuous
 Format: numeric
 Width: 2
 Decimals: 0

Valid cases: 274
 Invalid: 80779

Interviewer instructions

This item will be filled during visit 2 only. It is generally not expected that a household surveyed in the first visit will be partitioned during the period intervening the two visits. On rare occasions, when it is found to have been partitioned in the second visit, total number of households formed from the parent household due to partition will be entered against this item. In all other cases, a dash (-) will be put against this item. In case, a household of visit 1 is partitioned before visit 2, the partitioned household with the senior most household member of the parent household living in the sample village / block will be surveyed.

Date of Survey (B2_q2i)

File: Block-1-identification of sample household-records-visit-1

Interviewer instructions

A running serial number will be given to each of the plots in the specified order mentioned above. For all the plots which are found in second visit but not included in first visit, serial numbers will be listed after the plots reported in visit 1 and given after the last serial number of the plots of first visit irrespective of their 'kind of possession'. However, all such additional plots will be arranged among themselves in the prescribed order. In no case, a serial number assigned to a plot in first visit will be altered in second visit. Three serial numbers 97, 98 and 99 have already been printed in last three rows of the block. Serial numbers 97 and 98 are meant for homestead land. The part of homestead land which has been operated in the agricultural year 2002-03 will be reported against '97' and the remaining land, against '98'. The row with serial number '99' will give the column totals for the relevant columns. If in visit 2, it is found that a plot was missed in visit 1 for one reason or the other, necessary corrections may be intimated to DP Centre for modifying visit 1 schedule. However, in such cases, 'sl. no.' to be assigned to such plot will be the next to the highest serial number given during visit 1.

Kind of possession (B5_c3)

File: Block-5-particulars-land-household-records-visit-2

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 200441

Area of land (0.000) (B5_c4)

File: Block-5-particulars-land-household-records-visit-2

Interviewer instructions

The total geographical area of the plot will be recorded in this column in hectare in three places of decimals. This column is split vertically into two parts to record the integral part of area in the left-hand part and the decimal part (which is to be recorded in three places) in the right-hand part

Included in operational holdings? (B5_c5)

File: Block-5-particulars-land-household-records-visit-2

Overview

Type: Discrete

Format: character

Width: 1

Valid cases: 200975

Invalid: 0

Interviewer instructions

Whether the plot is included in one of the operational holdings of the household during the Kharif season for visit 1 or agricultural year 2002-03 for visit 2 may be assessed and reported in codes - yes: Kharif only -1, Rabi only-2, both Kharif and Rabi-3, no -4. If the plot of land is possessed for more than three months during the agricultural year 2002-03 and the household has operated some land, then code will be 1, 2 or 3. Otherwise code 4 will be recorded against this item.

Soil type (B5_c6)

File: Block-5-particulars-land-household-records-visit-2

Overview

Type: Discrete

Format: character

Width: 1

Valid cases: 1

Invalid: 0

Interviewer instructions

Soil type indicates texture of the soil. Three important factors which determine the soil texture are sand, silt and clay. Depending on their quantum in the soil, the soil can be divided into five groups, viz., sand, loam, silt, clay and clay-loam. This column will be filled in terms of code.

Type of possession (B5_c7)

File: Block-5-particulars-land-household-records-visit-2

Overview

Type: Discrete

Format: character

Width: 1

Valid cases: 22312

Invalid: 0

Interviewer instructions

For plots with code 2, 4 or 5 in column (3), it will be ascertained whether the portion of land held by the household is taken on lease or otherwise possessed. A lease contract may be written or oral. Hence, whether or not the lease is recorded will also be ascertained and appropriate entries will be made in this column in terms of codes

Duration of possession (B5_c8)

Format: character

Width: 1

Valid cases: 22414

Invalid: 0

Duration of possession (B5_c8)

File: Block-5-particulars-land-household-records-visit-2

Interviewer instructions

The period for which the leased-in or otherwise possessed land is actually possessed by the household without break will be considered as the 'duration of possession'. It will be recorded in terms of codes

No.of lessor/lessee households (B5_c9)

File: Block-5-particulars-land-household-records-visit-2

Overview

Type: Continuous	Valid cases: 22218
Format: numeric	Invalid: 258519
Width: 3	
Decimals: 0	

Interviewer instructions

Columns (9) - (11): particulars of leased-in or out: These columns will be filled only for the plots either leased-in or leased-out i.e. where kind of possession code is either 2 or 3.

The number of households to which a plot is leased out or leased in by the household, as the case may be, will be recorded in this column. In most cases, a plot is leased out (or leased in) to (by) a single household. Entry in all such cases against this item will be 1. On the rare occasions when it is leased out to (or leased in by) two or more households, the number of lessee (or lessor) households, which will be more than one, will be entered.

Recoded type of lessor (B5_c10)

Format: character	Invalid: 0
Width: 1	

Interviewer instructions

Columns (9) - (11): particulars of leased-in or out: These columns will be filled only for the plots either leased-in or leased-out i.e. where kind of possession code is either 2 or 3.

The terms of lease on which the area is leased out to the lessee household or leased in by the lessor household will be recorded in this column in terms of code.

Water-logged? (B5_c12)

File: Block-5-particulars-land-household-records-visit-2

Overview

Type: Discrete	Valid cases: 194783
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

Water-logged? (B5_c12)

File: Block-5-particulars-land-household-records-visit-2

Information on availability of drainage facility will be ascertained for the plots of the operational holding which are generally affected by water-logging and recorded in codes - yes -1, no -2. The information has to be collected for Kharif season during visit 1 and for Rabi season during visit 2. If a plot, or a part of it, is affected by water-logging over a certain period of the reference agricultural season, code 1 will be recorded. If a part of a plot remained water-logged, the plot will be considered as water-logged if the area of the plot under water-log is more than the remaining area of the plot.

Land use (B5_c13)

File: Block-5-particulars-land-household-records-visit-2

Overview

Type: Discrete

Format: character

Width: 2

Valid cases: 195622

Invalid: 0

Interviewer instructions

Each plot will be classified by its use in terms of code. The reference period for determining the appropriate land use code will be Kharif season of the agricultural year 2002- 03 for visit 1 a

Whether irrigated (B5_c14)

File: Block-5-particulars-land-household-records-visit-2

Overview

Type: Discrete

Format: character

Width: 1

Valid cases: 63424

Invalid: 0

Interviewer instructions

This column will be filled only if the 'land use' code is '01' to '12' i.e., the land is used for cultivation of orchard, plantation and seasonal crops like cereals, pulses, oilseeds, mixed crop, sugarcane, other crop, vegetables, fibre crop and fodder. Irrigation refers to purposely providing land with water, other than rain, for improving pastures or crop production. Uncontrolled land flooding by overflowing of rivers or streams is not considered irrigation. However, when rainwater or uncontrolled overflow from rivers and streams is collected and later used on the land for crop or pasture production, it is considered irrigation. If the plot is irrigated during the reference agricultural season (Kharif or Rabi), code 1 will be recorded, otherwise, code 2. Like water-logging, the plot will be considered as irrigated if the major part of the plot is irrigated.

Source of irrigation (B5_c15)

File: Block-5-particulars-land-household-records-visit-2

Overview

Type: Discrete

Format: character

Width: 1

Valid cases: 39898

Invalid: 0

Interviewer instructions

If a plot is irrigated then the corresponding source of irrigation will be recorded in this column in terms of code. It may be noted that if operated area of a plot is irrigated by two or more different sources of irrigation during the reference agricultural season, the code for the source attributable to the largest share of the gross area will be considered for making entry. If a whole plot is irrigated twice from the source 'tank' and once from 'well', then code 2 (tank) will be assigned.

Agriculture Production (B5_c16)

File: Block-5-particulars-land-household-records-visit-2

Overview

Agriculture Production (B5_c16)

File: Block-5-particulars-land-household-records-visit-2

Type: Discrete
Format: character
Width: 1

Valid cases: 196288
Invalid: 0

Interviewer instructions

For each plot listed in this block, it will be ascertained whether any agricultural production, as defined in Chapter One, is carried out during the reference agricultural season in the plot included in the operational holding. If the answer is in affirmative, code will be 1, otherwise code will be 2.

Possessed for the major part? (B5_c17)

Literal question

whether possessed for major part the period July - December 2002/ January-June 2003:

Interviewer instructions

For each plot with 'kind of possession' code 1, 2, 4 or 5, it will be ascertained whether any agricultural production is carried out for the major part of the reference period. The reference period for the item is July to December 2002 for visit 1 and January to June 2003 for visit 2. It means that the plot should be in possession for at least 3 months of the reference period (which is six months for both the visits). If the answer is affirmative, code 1 will be recorded, otherwise code 2.

No. of parcels (B6_c16)

File:

Block-6-general-information-operational-holdings-Rabi-records-visit-2

Overview

Type: Continuous	Valid cases: 32606
Format: numeric	Invalid: 7904
Width: 4	Minimum: 1
Decimals: 0	Maximum: 300
Range: 1-496	Mean: 2.7
	Standard deviation: 3

Interviewer instructions

As defined in Chapter One, a parcel of an operational holding is a piece of land surrounded by land not included in the holding. A parcel of land may consist of one or more plots. The number of parcels constituting the operational holding will be recorded in this column separately for each operational holding.

Workers against wage in cash/kind (B6_c17)

File:

Block-6-general-information-operational-holdings-Rabi-records-visit-2

Overview

Type: Continuous	Valid cases: 2698
Format: numeric	Invalid: 37812
Width: 4	Minimum: 0
Decimals: 0	Maximum: 6930
Range: 0-8500	Mean: 13.3
	Standard deviation: 178.5

Interviewer instructions

The number of permanent attached farm workers engaged in the operational holding during the Kharif season. In ascertaining the number of such workers, the period during which various agricultural operations (from preparation of soil to storing of grains) in respect of crop of the reference season are carried out will be taken into consideration. The number of attached farm workers so determined will be classified into two groups depending on the mode of payment. If the payment is a fixed amount to be paid in cash or kind, the attached farm worker will be enumerated against item 17.

Workers against share of produce (B6_c18)

File:

Block-6-general-information-operational-holdings-Rabi-records-visit-2

Overview

Type: Continuous	Valid cases: 1566
Format: numeric	Invalid: 38944
Width: 4	
Decimals: 0	
Range: 0-1000	

Interviewer instructions

The number of permanent attached farm workers engaged in the operational holding during the Kharif season. In ascertaining the number of such workers, the period during which various agricultural operations (from preparation of soil to storing of grains) in respect of crop of the reference season are carried out will be taken into consideration. The number of attached farm workers so determined will be classified into two groups depending on the mode of payment. If a worker gets a share of produce in lieu of the services rendered by him/her, he/she will be accounted for against item 18. It should be borne in mind that those who get a share of produce as remuneration for services rendered by them will not be classified as share croppers. While a permanent attached farm worker is only employed in the operational holding, a share-cropper organises, conducts and participates in the agricultural operations carried out in the holding. Share-cropping is a term of lease.

Weight combined (wgt_combined)

File:
