Overview

ABSTRACT
The Employment and Unemployment surveys of National sample Survey (NSS) are primary sources of data on various indicators of labour force at National and State levels. These are used for planning, policy formulation, decision support and as input for further statistical exercises by various Government organizations, academicians, researchers and scholars. NSS surveys on employment and un-employment with large sample size of households have been conducted quinquennially from 27th. round(October'1972 - September'1973) onwards. Cotinuing in this series the fifth such all-india survey on the situation of employment and unemployment in India was carried out during the period july 1993 - june 1994 . In this survey, a nation-wide enquiry was conducted to provide estimates on various characteristics pertaining to employment and unemployment in India and some characteristics associated with them at the national and state levels. Information on various facets of employment and unemployment in India was collected through a schedule of enquiry (schedule 10). Apart from the information usually collected in the quinquennial rounds, information on some new items were also collected.

With the experience gained from the past four quinquennial surveys behind, keeping in view the need for further refinements in the concepts and procedures and wider coverage in the light of international practices, certain modifications/ changes were made in this survey the 50th round, without affecting its comparability with the past surveys. These are briefly cited below:

(i) In the past surveys, the current weekly status (CWS) of a person was first assigned on the basis of the response to the questions relating to his participation in gainful activities (non-gainful activities) and thereafter the daily time disposition data was collected only for those in the labour force as per the CWS. In this round,the daily time disposition for all the persons surveyed were collected and the CWS was determined based on the time disposition data so collected, without probing any further on this point.

(ii) Certain probing questions were introduced to all persons who were unemployed on all the days of the days of the reference week. These include educational background of unemployed, spell of unemployment, industry-occupation of the last employment, reason for leaving the employment, etc.

(iii) A set of probing questions were framed to get the profile of the children (5-14 years) particularly their economic activities.

(iv) As information on migration were collected extensively in the 49th round, items relating to migration were not collected in this 50th round.

(v) The probing questions meant for the employed persons according to usual status were modified to obtain a better view of the underemployment situation.

(vi) Hitherto, in NSS, work was identified with the performing of 'gainful activity'. As the international standards use the term 'economic activity' rather than 'gainful activity', the concept of economic activity was introduced in the fiftieth round. However, the coverage of activities under the new term was kept the same as in the earlier surveys, except, for the inclusion of 'own account production of fixed assets' as a work related activity.

(vii) In the NSS quinquennial surveys the identification of usual status involved a trichotomous classification of persons into 'employed', 'unemployed' and 'out of labour force' based on the major time criterion. In this round, the procedure prescribed

was a two stage dichotomous procedure which involves a classification into 'labour force' and 'out of labour force' in the first stage and the labour force into 'employed' and 'unemployed' in the second stage.

Work Programme: The survey period of one year was divided into four sub-rounds of three months duration each as below.

sub-round period of survey

1 July-September, 1993

2 October- December, 1993

3 January-March, 1994

4 April-June, 1994

Period of Survey for the Four Sub-Rounds Equal number of sample villages and blocks was allotted for survey in each of these sub--rounds. However in Andaman and Nicobar Islands , Lakshadweep, and rural areas of Arunachal Pradesh and Nagaland, the re-striction of surveying the allotted households during the sub-round period was not strictly enforced.The survey used the interview method of data collection from a sample of randomly selected households.

KIND OF DATA
Sample survey data [ssd]

UNITS OF ANALYSIS
Randomly selected households based on sampling procedure and members of the household

Scope

NOTES
The NSSO surveys on employment and unemployment aim to measure the extent of 'employment' and 'unemployment' in quantitative terms disaggregated by various household and population characteristics . The persons surveyed are classified in to various activity categories on the basis of the activities pursue d by them during certain specified reference periods. Three reference periods are used in thes e surveys. These are (i) one year (ii) one week and (iii) each day of the week. Based on these th ree periods three different measures are arrived at. These are termed as usual status, current we ekly status ,and the current daily status .In the present survey, apart from the collection of data on employment and unemployment efforts were also made to collect data on the activity profiles of children. This is hoped to make available useful information relating to child labour and its causes. Another new dimension added to the present survey was in the probing questions to the unemployed regarding their educational background, past employment, nature of efforts made and sectors in which employment is sought. The probing questions on the employed to understand the extent of under utilisation of labour time was further expanded to acquire more specific information from the employed. There were also some questions on the qualitative aspects of employment like occupational changes, availability of trade unions, nature of employer etc.

The data for this survey was collected in the NSS Schedule 10 used for employment surveys. For this round, the schedule had 8 core blocks out of 13 blocks.

Blocks 0, 1 and 2 - were similar to the ones used in usual NSS rounds. These were used to record identification of sample households and particulars of field operations.

Block-3: Household characteristics like, household size, principal industry-occupation, social group, land possessed and cultivated, use of hired labour, monthl y per capita expenditure etc. were recorded in ths block.

Block-4: In this Block the detailed demographic particulars including age, sex, educational level school attendan ce, principal and subsidiary statuses, the industry, occupation of the employed, distance to place of work etc. were re corded.

Block-5: This was used to record the daily time disposition. Apart form recording the different activities from among the various status codes explained in the earlier part of this section, the i ndustry and type of 'operation' for rural areas were also recorded. For a day utmost two activity statuses could be recorded, an activity status getting an intensity of 'half or full' depending on the time spent on it. No limits on the number of activities that could be reported in a week was specified. The current weekly status of the person derived form the various daily activity statuses followed in the week and the

corresponding industry-occupation was also recorded in this block. Besi des the above, the wage and salary earnings were also entered in this block.

Block-6: Block 6 was used to record the answers to certain probing questions to the unemployed. The unemployed for this purpose were those who had not worked on any day of the reference week. These probing questions included among other things the academic performance, particulars of work sought, details of past employment, reasons for unemployment, length of spell of unemployment, type of efforts made etc.

Block-7 : Further probing questions on the usually employed on the qualitative aspects of employment were made in Block 7. These included occupational mobility, availability for additional work and reasons, extent of under utilisation of labour time, membership of trade unions, nature of employer, permanency of employment etc..

Block-8: A major innovation in this survey was the attempt to specifically collect information on the activity profiles of children. In order to build up the profile, the school attendance status of the hildren,reason for non-attendance, extent of participation in household chores, information on the type of work done and the industry in which worked, reason for working, economic benefits derived by the household from such work , its effect on studies etc. were ascertained for all children aged in the 5-14 years age group in the sample household. All this information was reco rded in Block 8.

Block-9: In Block 9, the follow up questions were asked to or about those who reportedly were engaged in domestic duties. This block was canvassed as in th e previous surveys .

Block-10: Block 10 was canvassed as part of the rural labour enquiry being undertaken for the Labour Bureau by the NSSO and which is integrated with the employment survey.

Blocks 11 & 12: used for recording the remarks of the investigator and comments of supervisory officers respectively.

TOPICS

Topic	Vocabulary	URI
Labor Markets	World Bank	http://www.surveynetwork.org/toolkit

KEYWORDS

Employment, Unemployment, Indebtedness of rural labour, Usual principal activity, Usual subsidiary activity, Time disposition during the week, Unemloyed persons on all the 7 days of the week, Change of nature of work, Change of establishment

Coverage

GEOGRAPHIC COVERAGE

The fifth quinquennial survey was conducted during the 50th round survey operations from July 1993 to June, 1994. Generally the NSSO surveys cover the entire country with the exception of certain interior areas of Nagala nd and the Andaman & Nicobar Islands. However in this round besides the above, in the state of Jammu & Kashmir out of the 12 Districts, only three Districts could be surveyed. These Districts viz. Jammu, Kathua and Udhampur are however included in the all India estimates..

UNIVERSE

The survey used the interview method of data collection from a sample of randomly selected households and members of the household

Sampling

Sampling Procedure

The sample design adopted for this round of survey was similar to that followed in the past surveys in its general aspects. The ge neral scheme was a two stage stratified design with the first stage units being villages in the rural areas and urban frame survey blocks(UFS) in the urban areas. The second stage units were the households.

Sampling frame for first stage units:

The frame used for selection of first stage units in the rural sector was the 1991 census list of villages for all the four sub-rounds for 8 states/u.t.s viz. Andhra Pradesh, Assam, Kerala, Madhya Pradesh, Orissa, Uttar Pradesh, West Bengal and Chandigarh. However for Agra district of U.P. and the three districts, viz.Durg, Sagar, and Morena of M.P., samples were drawn using 1981 census list of villages. For Jammu & Kashmir samples for all the 4 sub-rounds were drawn using the 1981 census list as the 1991 census was not conducted in the st ate. For the remaining 23 states/u.t.s, the frame was 1991 census list for sub-rounds 2 to 4 and 1981 census list for sub-round 1 as the 1991 census list was not available for use at the time of drawing the samples.
As usual, for Nagaland the list of villages within 5 kms. of the bus route and for Andaman and Nicobar Islands the list of accessible villages constituted the frame. In the case of urban sector the frame consisted of the UFS blocks and, for some newly declared towns where these were not available, the 1991 census enumeration blocks were used.

Region formation and stratification:
States were divided into regions by grouping contiguous districts similar in respect of population density and cropping pattern. In rural sector each district was treated a separate stratum if the population was below 2 million and where it exceeded 2 million, it was split into two or more strata. This cut off point of population was taken as 1.8 million (in place of 2 million) for the purpose of stratification for districts for which the 1981 census frame wa s used. In the urban sector, strata were formed, within each NSS region on the basis of population size class of towns. However for towns with population of 4 lakhs or more the urban blocks were divided into two classes viz. one consisting of blocks inhabited by affluent section of the population and the other consisting of the remaining blocks.

Selection of first stage units :

Selection of sample villages was done circular systematically with probability proportional to population and sample blocks circular system-atically with equal probability. Both the sample villages and the sample blocks were selected in the form of two or more independent sub-samples. In Arunachal Pradesh the procedure of cluster sampling has been followed. Further large villages/blocks having present population of 1200 or more were divided into a suitable number of hamlet- groups/ sub-blocks having equal population content. Two hamlet- groups were selected from the
larger villages while one sub-block was selected in urban sector for larger blocks.

Selection of households :

While listing the households in the selected villages, certain relatively affluent households were identified and considered as second stage stratum 1 and the rest as second stage stratum 2.
A total of 10 households were surveyed from the selected village/hamlet-groups, 2 from the fi rst category and remaining from the second.
Further in the second stage stratum-2, the households were arranged according to the means of livelihood. The means of livelihood were identified on the basis of the major source of income as i) self-employed in non-agricultu re, ii) rural labour and iii) others. The land possessed by the households was also ascertained and the frame for selection was arranged on the basis of this information.
The households were selected circular systematically from both the second stage strata.

In the urban blocks a different method was used for arranging the households for selection. This involved the identification means of livelihood of households as any one of a) self-employed, b)regular salaried/wage earnings, c) casual labour, d) others. Further the average household monthly per capita consumer expenditure (mpce) was also ascertained. All households with MPCE of (i) Rs. 1200/- or more (in towns with population less than 10 lakhs or (ii) Rs. 1500/- or more (in towns with population 10 lakh or more) formed second-stage stratum 1 and the rest, second-stage stratum 2.The households of second-stage stratum 2 were arranged according to means of livelihood class and MPCE ranges before selection of sample households. A total of 10 households were selected from each sample block as follows
(i) For affluent strata/classes : 4 households from second- stage stratum 1 and 6 households from second-stage stratum 2

(ii) For other strata/classes : 2 households from second-stage stratum 1 and 8 from second-stage stratum 2.
Households were then selected circular systematically w ith a random start.

Shortfall in the required number of household in any second-stage st ratum was made up by ncreasing the quota for the other second stage stratum.

A total of 7284 sample villages (Rural) and 4792 sample blocks (Urban) were allotted in central sample. 6983 sample villages and 470 sample blocks were successfullly surveyed covering 356351 persons in sample villages and 208389 persons in sample blocks.

Deviations from Sample Design

There was no deviation from the original sampling design

Weighting

Three different weightsare provided in each record of filess in the data set. Deatils are as follows:-

1. Weight for each sub-round (Sub-round wise weight) is stored in Variable name : WGT_SubSsample
2. Weight for each subsample (Sub-sample wise weight) is stored in Variable name : WGT_Subround
3. Weight for all Subrounds pooled and combined subsample weight is stored in Variable name : WGT_Pooled

Questionnaires

Overview

Summary description of the schedule : The schedule 10 on employment-unemployment for NSS50th round consisted of 13 blocks as given below.

Blocks 0, 1 and 2 - identification of sample households and particulars of field operations.
Block 3 - Household Characteristics.
Block 4 - Demographic and usual activity particulars.
Block 5 - Time disposition during the week.
Block 6 - Follow-up questions for persons unemployed on all the seven days of the week.
Block 7 - Follow up questions for persons employed either in the principal or subsidiary status 11-51.
Block 8 - Follow-up questions for children aged 5-14 years.
Block 9 - Follow up questions for persons with principal usual activity status codes 92 & 93 (i.e. those engaged in domestic duties).
Block 10 - Household indebtedness Collected only for rural labour households.
Blocks 11 & 12 - used for recording the remarks of the investigator and comments of supervisory officers respectively.

The the linkage between different blocks are shown in the block diagram given below.

Block 0.1 &2
Block 3 ---> Block 10

V283	B5_q6	Operation Code (for rural only)	discrete	character	The actual working operation of Current Day Activity performed by the persons
V317	B5_q7	Seventh Day-(Intensity of Activity	contin	numeric	Intensity of activity-Seventh day)(Full=1.0 ; Half=0.5 ; No=0.0)
V285	B5_q8	Sixth day	contin	numeric	Intensity of activity-Sixth day)(Full=1.0 ; Half=0.5 ; No=0.0)
V286	B5_q9	Fifth Day	contin	numeric	Intensity of activity-fifth day)(Full=1.0 ; Half=0.5 ; No=0.0)
V287	B5_q10	Fourth Day	contin	numeric	Intensity of activity-fourth day)(Full=1.0 ; Half=0.5 ; No=0.0)

ID	Name	Label	Type	Format	Question
V288	B5_q11	Third Day	contin	numeric	Intensity of activity-Third day)(Full=1.0 ; Half=0.5 ; No=0.0)
V289	B5_q12	Second Day	contin	numeric	Intensity of activity-Second day)(Full=1.0 ; Half=0.5 ; No=0.0)
V290	B5_q13	First Day	contin	numeric	Intensity of activity-first day)(Full=1.0 ; Half=0.5 ; No=0.0)
V291	B5_q14	Total Days in each activity (0.0)	contin	numeric	Total No. of Days in each activity during the reference week (0.0)
V292	B5_q15	CASH Wages/salary (Rs0.00)	contin	numeric	CASH Wages/salary received/receivable for work done during the week(Rs.0.00)
V293	B5_q16	KIND Wages/salary(Rs.0.00)	contin	numeric	Kind wages and salary earnings
V294	B5_q17	TOTAL Wages/salary(Rs.0.00)	contin	numeric	Total wages and salary earnings
V544	B5_q18	No. of Days with Nominal work	contin	numeric	Total number of days with nominal work
V277	B5_q19	Current Weekly activity Status(code)	discrete	character	Current Weekly activity particulars - Status(code)
V278	B5_q20	NIC code for current weekly activity	discrete	character	Principal Ind.code (NIC) For currently weekly Status codes 11-72
V279	B5_q21	NCO ode For current weekly activity	discrete	character	Principal occupation.code (NIC) For currently weekly Status codes 11-72
V281	B5_q22	Unemployed for the week?	discrete	character	Whether Unemployed for all the 7 days of the week (Yes-1,No-2)
V309	Spl_cd	Special codes (1,2,3) **	discrete	character	
V311	WGT_SubSsample	Multiplier-I(Sub Samplewise)(0.00)	contin	numeric	
V312	WGT_Subround	Multiplier-II (Sub Roundwise)(0.00)	contin	numeric	
V313	WGT_Pooled	Multiplier-III(Sub-rounds Pooled / Combined Sub-Sample)(0.00)	contin	numeric	

Block-6-Unemployed-Persons-Rcds

Content	Information on persons who are found to be unemployed on all the seven days of the week preceding the date of survey
Cases	7827
Variable(s)	38
Structure	Type: relational Keys: Person_key(Unique key to identify a person in household), Hhold_Key(Key to identify household)
Version	
Producer	National Sample Survey Office
Missing Data	

Variables

ID	Name	Label	Type	Format	Question
V553	Hhold_Key	Key to identify household	discrete	character	
V559	Person_key	Unique key to identify a person in household	discrete	character	
V318	Round	Round No.	discrete	character	Round number
V319	Sample	Sample	discrete	character	Sample
V320	Sector	Sector	discrete	character	Sector code
V321	State	State	discrete	character	State code
V322	Region	Region	discrete	character	Region
V323	Stratum	Stratum no.	discrete	character	Stratum
V324	SubSample	Subsample	discrete	character	Subsample
V325	SubRound	Sub-Round	discrete	character	Sub-Round
V326	Vill_Blk_Slno	Serial no. of village/block	discrete	character	Serial no of village/Block
V327	Stage2_Stratum	Second-stage stratum	discrete	character	Second stage stratum
V328	Hhold_no	Sample Household no.	discrete	character	Sample Household number
V329	Prsn_slno	Serial no. of person(Block-6,Q.1)	discrete	character	Serial no. of person as in block-5
V540	B6_q2	Age (In years)	contin	numeric	Age (In years) as block-5
V331	B6_q3	General Education (Code)	discrete	character	General educational standard as recorded in Q.7 of block-4
V332	B6_q4	Subject (code)	discrete	character	Subject corresponding to he attainment of highest educational standard code 8-13 in Q.3
V333	B6_q5	Performance in the cert./degree obtained (code)	discrete	character	Performancein the cert./degree obtained (code) for codes 8-13 in Q.3
V334	B6_q6	Any tech.certificate/diploma	discrete	character	Whether obtained any tech.certificate/diploma [For persons unemployed on all the 7 days of the week]
V335	B6_q7	Subject code of technical cert/diploma obtained	discrete	character	Subject of technical certificates/diploma obtained

ID	Name	Label	Type	Format	Question
V336	B6_q8	Duration of employment (code)	discrete	character	Duration of present spell of unemployment
V337	B6_q9	Type of work sought (code)	discrete	character	Particulars of work sought/available--type of work
V338	B6_q10	Full time/part time work sought (code)	discrete	character	Particulars of work sought/available-full time work or part time work. Code may be recorded.
V339	B6_q11	Sector of activity sought k(code)	discrete	character	Particulars of work sought/available-Sector of activity
V340	B6_q12	Any efforts made to get work (code)	discrete	character	Whether efforts made to get work
V341	B6_q13	Nature of efforts made k(code)	discrete	character	If efforts made to get work then, Nature of efforts made
V342	B6_q14	Whether appeared in an interview? k(code)	discrete	character	Whether appeared in an interview/written test
V343	B6_q15	Reason for not seeking work k(code)	discrete	character	If no efforts made to seek work, Reason for not seeking work(code)
V344	B6_q16	Whether ever worked k(code)	discrete	character	Whether ever worked (yes-1,No-2)
V345	B6_q17	Llast employment Duration (code)	discrete	character	If ever worked - Particulars of last employment Duration
V346	B6_q18	Llast employment Status(Code)	discrete	character	If ever worked -Particulars of last employment Status(Code)
V347	B6_q19	Last employment Industry (3-digit code in NIC-1987)	discrete	character	Industry code of last employment?
V348	B6_q20	Llast employment Occupation (3 digit code in NCO-1968)	discrete	character	Occupation code of last employment?
V349	B6_q21	Reason for break in employment k(code)	discrete	character	If ever worked - Reason for break in employment code
V350	B6_q22	If quitted job, reason for quitting job k(code)	discrete	character	If quitted job, reason for quitting job
V351	WGT_SubSsample	Multiplier-I(Sub-sample-1)(0.00)	contin	numeric	
V352	WGT_Subround	Multiplier-II(Sub-roundwise)(0.00)	contin	numeric	
V353	WGT_Pooled	Multiplier-III(Sub-roundspooled / combined sub-sample)(0.00)	contin	numeric	

Block-7-Employed-Persons-Rcds

Content	Information on certain qualitative aspects of the employment of those who are categorised as employed either in the principal or subsidiary status.
Cases	226275
Variable(s)	36

Unque identifier for a household (Hhold_Key)
File: Block-1-3-Household-Records

Overview	
Type: Discrete	Valid cases: 115409
Format: character	Invalid: 0
Width: 8	

Round no. (Round)
File: Block-1-3-Household-Records

Overview	
Type: Discrete	Valid cases: 115409
Format: character	Invalid: 0
Width: 2	

Description

Indicates the NSS round number of this survey

Literal question

Round no.

Sample (Sample)
File: Block-1-3-Household-Records

Overview	
Type: Discrete	Valid cases: 115409
Format: character	Invalid: 0
Width: 1	

Description

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Literal question

Sample

Interviewer instructions

Record 1 or 2 depending on whether the selected sample village/block is central sample or state sample

Sector (Sector)
File: Block-1-3-Household-Records

Overview	
Type: Discrete	Valid cases: 115409
Format: character	Invalid: 0
Width: 1	

Literal question

Sector code

Interviewer instructions

Record 1 or 2 depending on whether the selected sample village/block is classified as Rural or Urban.

State (State)
File: Block-1-3-Household-Records

State (State)
File: Block-1-3-Household-Records

Overview	
Type: Discrete	Valid cases: 115409
Format: character	Invalid: 0
Width: 2	

Literal question

State code

Interviewer instructions

State to which the sample village/block belongs to will be recorded here as per the code list.

Region (Region)
File: Block-1-3-Household-Records

Overview	
Type: Discrete	Valid cases: 115409
Format: character	Invalid: 0
Width: 1	

Description

Regions are hierarchical domains of study below the level of State/ Union T erritory in the NSS.

Literal question

Region

Stratum (Stratum)
File: Block-1-3-Household-Records

Overview	
Type: Discrete	Valid cases: 115409
Format: character	Invalid: 0
Width: 2	

Description

In the rural sector, each district is treated as a separate stratum. However, if the census population of the districts is greater than or equal to 1.8 million or 2 million (depending upon whether 1981 or 1991 census frame is used for selection of villages), the district has been split into two or more strata, by grouping contiguous tehsils to form strata. In Gujarat, in the cases of districts extending over more than one region the part of a district falling in each region constitues a separate strsatum. In the urban sector, strata are formed within NSS region on the basis of the population size class of towns.
See INSTRUCTIONS TO FIELD STAFF : VOLUME- I (find attached as external resource attachment)

Literal question

Stratum

Sub-sample (SubSample)
File: Block-1-3-Household-Records

Overview	
Type: Discrete	Valid cases: 115409
Format: character	Invalid: 0
Width: 1	

Description

Sub-sample (SubSample)
File: Block-1-3-Household-Records

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenet rating sub-samples. Each sub- sample is drawn by the same sampling scheme and is capable of provid ing valid estimat es of the population parameters. The comparison of sub-sample wise es timates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-s amples have been us ed in NSS (i) to obtain valid estimates from each sub-round (season) of the survey r ound, an d (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

Literal question

Sub-sample

Sub-round (SubRound)
File: Block-1-3-Household-Records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 115409
Invalid: 0

Description

The survey period of one year of this round was divided into four sub-rounds of three months duration.Equal number of sample villages and blocks were allotted for survey in each of these four sub-rounds. See INSTRUCTIONS TO FIELD STAFF : VOLUME- I (find attached as external resource attachment)

Literal question

Sub-round

Serial no of village/Block (Vill_Blk_Slno)
File: Block-1-3-Household-Records

Overview

Type: Discrete

Width: 5

Valid cases: 115409
Invalid: 0

Description

The first-stage units are census villages in the rural sector and the NSSO urban frame survey (UFS) blocks in the urban sector. However, for some of the newly declared towns of 1991 census for which UFS frame has not been received, the 1991 census enumeration blocks are the first-stage units.This variable indicates the serial number assigned to such units. See INSTRUCTIONS TO FIELD STAFF : VOLUME- I (find attached as external resource attachment)

Literal question

Serial no of village/Block

Second stage stratum (Stage2_Stratum)

Reason for casualty/1st substitution code

Household size (Block3-Q1) (B3_q1_hh_size)
File: Block-1-3-Household-Records

Overview	
Type: Continuous	Valid cases: 115409
Format: numeric	Invalid: 0
Width: 2	Minimum: 1
Decimals: 0	Maximum: 64
Range: 1-64	Mean: 4.9
	Standard deviation: 2.6

Literal question

Household size

Interviewer instructions

The number of normally resident members of a household is its size. It will include temporary stay-aways but exclude temporary visitors and guests. Even though the determina tion of the actual composition of a household will be left to the judgement of the head of the household.

Industry (3digit)Occupation(3digit) code (B3_q2)
File: Block-1-3-Household-Records

Overview	
Type: Discrete	Valid cases: 110855
Format: character	Invalid: 0
Width: 6	

Description

INDUSTRY
The industry is defined as the sector of economic activity in which a person works.National Industrial Classification (NIC)-1987 was used for classifying the industry to which a person is attached.The NIC 1987 classifications are present ed generally in terms of 4 digited c odes in which t he left-most digit describes the 'industry section'; the left-most two digits together describes the 'industry division'; the left-most three digits together describes the 'industry group' and al l the four digits toget her pinpoints the ultimate industry class.

OCCUPATION
The nature of economic activity performed by a person is his/ her occupation. For classifying the occupation of a person the 'National Classification of Occupations (NCO 1968)' is used

Literal question

Hhold Principal Industry (3digit) and Occupation(3digit) code

Interviewer instructions

Industry (3digit)Occupation(3digit) code (B3_q2)
File: Block-1-3-Household-Records

To determine the principal industry-occupation of the household, the general rule to be followed is to list all the gainful occupations pursued by the members of the household during the period of 365 days preceding the date of survey, no matter whether such occupations were pursued by the members as their principal or subsidiary (on the basis of income) occupations. Out of the occupations listed, the one which fetched the maximum earnings to the household in the reference year will be considered as the principal household occupation. The industry in which this principal occupation is pursued by one or more members of the household will usually be the household industry. But it may so happen that this principal occupation is pursued by more than one member and they do so in different industries. In such a case, the industry which fetched the maximum earnings should be considered as the principal industry. In extreme cases, the earnings may be equal in two occupations or in two industry - occupation combinations. By convention, in such cases, priority will be given to the occupation or industry-occupation combination of the senior most among the participating members.

Type(Code) (B3_q3)
File: Block-1-3-Household-Records

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 11-29

Valid cases: 115409
Invalid: 0

Literal question

Household Type Code

Interviewer instructions

The household type, based on the means of livelihood of a household, is decided on the basis of the sources of the household's income during the 365 days preceding the date of survey. For this purpose, only the household's income (net income and not gross income) from economic activities is to be considered; but the incomes of servants and paying guests are not to be taken into account.

Religion (Code)(Block3_Q4) (B3_q4_relgn_cd)
File: Block-1-3-Household-Records

Overview

Type: Discrete

Region

Stratum no. (Stratum)
File: Block-4-Persons-Records

Overview	
Type: Discrete	Valid cases: 564740
Format: character	Invalid: 0
Width: 2	

Description

In the rural sector, each district is treated as a separate stratum. However, if the census population of the districts is greater than or equal to 1.8 million or 2 million (depending upon whether 1981 or 1991 census frame is used for selection of villages), the district has been split into two or more strata, by grouping contiguous tehsils to form strata. In Gujarat, in the cases of districts extending over more than one region the part of a district falling in each region constitues a separate strsatum. In the urban sector, strata are formed within NSS region on the basis of the population size class of towns.

Literal question

General Educational standard (Code)

Interviewer instructions

General Education (Code) (B4_q7)
File: Block-4-Persons-Records

Highest level of general education of the members will be recorded in codes .For the purpose of making entries in this column, only the course successfully completed will be considered. For instance for a person who has studied upto say, first year B.A. or has failed in the final B.A. examination, his educational attainment will be considered only as 'higher secondary.

A person who can read and write a simple message in any language with understanding is considered literate. Those who cannot do so will be treated as not literate and will be assigned code 01. Some persons achieve literacy by attending Non-formal Education Courses (NFEC) or Adult Education Centres (AEC). Such persons will be given code 02. During the last two years under the National Literacy Mission, in many parts of India, Total Literacy Campaigns (TLC) are being organised. Persons who have become literate through attending TLC will be given code 03. Persons who are literate through means other than formal schooling or the two above enumerated ways will be given code 04. Those who are by definition literate but are yet to pass primary standard examination but have attended or are attending formal school classes will be assigned code 05. Codes 06, 07, 08, and 09 will be assigned to those who have passed the appropriate levels. The criteria for deciding primary, middle, secondary etc. levels will be that followed in the concerned states/u.ts. A graduate will get one of the codes 10 to 13 depending on the subject in which he/she has graduated. For code 12, medical graduates belonging to school of medicine other than allopathic, are also to be considered. In case the person has graduated in more than one discipline and if more than one of the codes 10 to 13 are applicable, then the following procedure may be followed :

(i) when code 13 as well as one of the code 10 to 12 are relevant, code 13 will not be considered.

(ii) where more than one of the codes 10 to 12 are relevant the code indicating the degree last obtained will be considered. Persons who have attained proficiency in languages like Sanskrit, Persian etc. through formal but not the general type of education will be classified appropriately at the equivalent level of general education standard.

Technical Education (code) (B4_q8)
File: Block-4-Persons-Records

Overview	
Type: Discrete	Valid cases: 564740

Literal question

Technical Education (code)

Interviewer instructions

echnical education standard achieved by the members of the household will be recorded in one of the following codes. (This will be in addition to those covered in genera education standard).
If more than one of the codes are applicable, the code indicating the diploma/certificate last received will be considered.

Current attendance (code) (B4_q9)
File: Block-4-Persons-Records

Overview	
Type: Discrete	Valid cases: 564454
Format: character	Invalid: 0
Width: 2	

Literal question

Current attendance in educational institution and course of study(code)

Interviewer instructions

For all persons listed in column(1), it will be first ascertained if the person is currently attending any educational institutions (government or private) or not. Persons who are registered for any regular correspondence courses or distance education courses for a stipulated period at the end of which, are allowed to appear in the examination for the course, will also be considered as "currently attending educational institutions". For those who are found currently attending, the course of study pursued by them will be further ascertained. Persons who are not currently attending any educational institutions will be given code 01. For others, codes will be assigned depending on the course of study pursued by them.

Skill (code)

Interviewer instructions

Skill is defined as any marketable expertise and the information as to whether the person has acquired any of the listed skills as on the date of survey is to be recorded in this column. It is not necessary that such skill is acquired in any formal manner nor is it necessary that the person is actually marketing it or intends to market it. When a person has acquired skill in more than one of the listed skills, the skill in which the person is more proficient will be considered. Skill will be recorded irrespective of the level of general and technical education. The list of skills to be considered and the codes to be used are given in code list.

Principal activity Status (code) (B4_q12)
File: Block-4-Persons-Records

Overview	
Type: Discrete	Valid cases: 564740
Format: character	Invalid: 0
Width: 2	

Description

Activity status: It is the activity situation in which a person is found during a reference period which oncerns with the person's participation in economic and non-economic activities. According to this, a person will be in one or a combination of the following three statuses during a reference period :
(i) working or being engaged in economic activity (work)
(ii) being not engaged in economic activity (work) and either making tangible efforts to seek 'work' or being available for 'work' if the 'work' is available and
(iii) being not engaged in any economic activity (work) and also not available for 'work'.Activity statuses mentioned in (i) & (ii) above are associated with 'being in labour force' and the last with 'not being in the labour force'. Within the labour force activity status (i) is associated with 'employment' and that of (ii) with 'unemployment'.

The usual activity status relates to the activity status of a person during the reference period of 365 days preceding the date of survey. The activity status on which a person spent relatively longer time (major time criterion) during the 365 days preceding the date of survey is considered the principal usual activity status of the person. To decide the principal usual activity of a person, he/she is first categorised as belonging to the labour force or not, during the reference period on the basis of major time criterion. Persons thus adjudged as not belonging to the labour force are assigned the broad activity status 'neither working nor available for work'.

Source of information

Instructions to the Field staff,Section Five (Attached as Manual-2 in the external resources)

Literal question

Principal usual activity status (code)

Interviewer instructions

Principal activity Status (code) (B4_q12)
File: Block-4-Persons-Records

For each of the members, the principal usual activity status will be recorded in this column. In the first instance the broad principal usual activity of the person will be identified based on the various activities pursued by the person during the reference period of last 365 days adopting a 'relatively long time (or major time)' criterion, not necessarily for a continuous period. The broad principal usual activity status will be one of the three categories viz. 'employed'(working), 'unemployed' (available for work) or 'not in labour force' (neither willing nor available for work). It is to be noted that in deciding this, only the normal working hours available for pursuing various activities need be considered, and not the 24 hours of a day. Identification of this broad usual status category is explained below. The broad principal usual activity status will be obtained on the basis of a two stage dichotomous classification depending on the major time spent. Persons will be classified in the first stage into (i) those who are engaged in any economic activity (i.e. employed) and / or available for any economic activity (i.e. unemployed) and (ii) who are not engaged and not available for any economic activity i.e., the persons will be first classified as those in the labour force and those not in the labour force depending on in which of these two statuses the person spent major part of the year. In the second stage, those who are found in the labour force will be further classified into working (i.e., engaged in economic activity or employed) and seeking and/or available for work (i.e. unemployed) based on the major time spent. Thus we can obtain the broad principal usual status as one of the three viz. employed, unemployed and out of labour force.

Industry code(NIC) (B4_q14)
File: Block-4-Persons-Records

Overview	
Type: Discrete	Valid cases: 202277
Format: character	Invalid: 0
Width: 3	

Literal question

Principal Industry (NIC)

Interviewer instructions

The description of the industry-occupation relevant to the type of economic activity pursued by the person in the status recorded in Q.(12) will be given inQl. (13). The corresponding 3 digit industry group code (NIC 1987)entered in Q. (14). In case, two or moreindustry-occupation combinations corresponding to the status code given in Q. (12) have been reported by a person, the principal industry- occupation will be the one, in which relatively more time has been spent during the preceding 365 days by the person.

Occupation code (NCO) (B4_q15)
File: Block-4-Persons-Records

Overview	
Type: Discrete	Valid cases: 202182
Format: character	Invalid: 0
Width: 3	

Literal question

Principal Occupation(NCO)

Interviewer instructions

The description of the industry-occupation relevant to the type of economic activity pursued by the person in the status recorded in Q.(12) will be given inQl. (13). 3 digit occupation family code (NCO 1968) will be entered in Q.(15). In case, two or more industry-occupation combinations corresponding to the status code given in Q. (12) have been reported by a person, the principal industry- occupation will be the one, in which relatively more time has been spent during the preceding 365 days by the person.

Place of work (code) (B4_q16)
File: Block-4-Persons-Records

Overview	

Place of work (code) (B4_q16)
File: Block-4-Persons-Records

Type: Discrete
Format: character
Width: 1

Valid cases: 202349
Invalid: 0

Pre question

Check status code recorded in in col. (12)? if code is 11-51 then ask.

Literal question

Place of work code

Post question

If status codes not 11-51 in col. (12) then go to next question

Interviewer instructions

For all persons assigned work status codes i.e., codes 11-51 in col. (12) information on their usual place of work vis-a-vis their place of stay will be collected. First the place of work viz., same village/town or another village or another town will be identified. Thereafter codes will be given according to the distance to be commuted to the place of work. For persons who do not have a fixed place of work like itinerant vendors, hawkers etc., the place of work may be taken same as their place of stay. In the case of taxi-drivers/rickshaw pullers etc. the taxi/rickshaw stand or the garage may be taken as the place of work.

Work in subsidiary activity? (B4_q17)
File: Block-4-Persons-Records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 564740
Invalid: 0

Pre question

Check Whether engaged in any work in subsidiary capacity? If Yes ask:

Literal question

Whether engaged in any work in a subsidiary capacity?

Post question

If answer is NO go to Q.23(i.e Col.23)

Interviewer instructions

For each member of the household listed in this block, it has to be ascertained whether he/she worked in a subsidiary capacity during the 365 days preceding the date of survey or in other words if he had any subsidiary economic status. Code 1 or 2 will be recorded accordingly. The identification of those working in a subsidiary capacity will be done as follows. To illustrate, (i) a person categorised as working and assigned the principal usual activity status as own account worker may also be engaged for a relatively minor time during the reference year as casual wage labour (as in the case of 'A' quoted earlier). In such a case he will be considered to have worked also in a subsidiary capacity i.e. having a subsidiary economic status which is different from the principal economic status. A person may be own account worker in trade for a relatively longer period and simultaneously also engaged in agricultural production for a relatively minor time. In such cases, the principal usual status will be own account worker in trade and subsidiary economic status-own account worker in agriculture (ii) Similarly, persons categorised as 'unemployed' or 'not in labour force' on the basis of relatively long time criterion might have pursued some economic activity for relatively minor time during the year. In such cases, they will be treated as having subsidiary economic status and code 1 will be recorded in column (17). It may be noted that engagement in work in subsidiary capacity may arise out of two situations (i) a person may be engaged in a relatively long period during the 365 days in economic (non-economic activity) and for a relatively minor period in another economic activity (any economic activity), (ii) a person may be pursuing an economic activity (non-economic activity) almost throughout the year in the principal status and also simultaneously pursuing another economic activity (any economic activity) for relatively shorter time in a subsidiary capacity.

Subsidiary activity status (code) (B4_q18)
File: Block-4-Persons-Records

Overview

Subsidiary activity status (code) (B4_q18)
File: Block-4-Persons-Records

Type: Discrete
Format: character
Width: 2

Valid cases: 69956
Invalid: 0

Description

A person whose principal usual status is determined on the basis of the major time criterion may have pursued some economic activity for a relatively shorter time (minor time) during the reference period of 365 days preceding the date of survey. The status in which such economic activity is pursued is the subsidiary economic activity status of the person.

Source of information

Instructions to the Field staff,Section Five (Attached as Manual-2 in the external resources)

Literal question

Usual subsidiary gainful activity status(code)

Interviewer instructions

For persons having code 1 in column (17), the status codes of the economic activities pursued by them in the subsidiary capacity will be recorded in column (18) in terms of codes already specified for col.(12). In cases where a person is found to have pursued more than one type of economic activity in his/her subsidiary capacity, the activity on which more time was spent will be considered for recording the entries in this column. As only economic activity statuses are to be recorded, only codes 11-51 will be applicable.

Description

In the rural sector, each district is treated as a separate stratum. However, if the census population of the districts is greater than or equal to 1.8 million or 2 million (depending upon whether 1981 or 1991 census frame is used for selection of villages), the district has been split into two or more strata, by grouping contiguous tehsils to form strata. In Gujarat, in the cases of districts extending over more than one region the part of a district falling in each region constitues a separate strsatum. In the urban sector, strata are formed within NSS region on the basis of the population size class of towns. Literal question

Age(in years)

Interviewer instructions

The age corresponding each person listed in block 4 will be copied from columns (5) of block 4.

Serial no. of Activity (B5_q3)
File: Block-5-Persons-Activity-Records

Overview	
Type: Discrete	Valid cases: 874780
Format: character	Invalid: 0
Width: 1	

Literal question

Serial no. of Activity

Interviewer instructions

For each persons listed in column (1) of this block the different activities pursued by them during all the seven days of the reference week will be serially numbered and this serial number of activity will be recorded..Presuming that the likelihood of one person pursuing more than four different activities in a week is rather remote, only four lines are provided for each person. if a person pursue more than four different activities, the lines meant for the next person may be utilised.
The current activity of a person in the rural areas is denoted by his status-cum-industry-cum-operation. Thus for a person with the same status, if the industry (at the section level) or operation are different on the same or different days, he will be considered to have pursued different activities and these activities will be entered in different lines. Similarly for the urban areas the current activity of a person is denoted by his status-cum-industry.

Status (Code) (B5_q4)

Overview

TOTAL Wages/salary(Rs.0.00) (B5_q17)
File: Block-5-Persons-Activity-Records

Type: Continuous
Format: numeric
Width: 8
Decimals: 2
Range: 0-21210

Valid cases: 320166
Invalid: 554614
Minimum: 0
Maximum: 21210
Mean: 165.9
Standard deviation: 297.9

Literal question

Total wages and salary earnings

Interviewer instructions

The wage and salary earnings (not total earnings) receivable for the wage/salaried work done during the reference week, separately for each of the relevant activities pursued by each person, will be recorded in these columns. The relevant status codes for which wages & salary earnings are to be recorded are 31, 41, 51, 71 and 72.

No. of Days with Nominal work (B5_q18)
File: Block-5-Persons-Activity-Records

Overview

Type: Continuous
Format: numeric
Width: 1
Decimals: 0

Valid cases: 288366
Invalid: 586414

Literal question

Total number of days with nominal work

Interviewer instructions

Some of the person reporting days with half intensity of work might have had work only for say, 1-2 hours on certain days out of them. Such days would be considered as days with nominal work. For each person, total number of days out of the 7 days reference period with only nominal work would be recorded in this column against the relevant person.

Current Weekly activity Status(code) (B5_q19)
File: Block-5-Persons-Activity-Records

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 874606
Invalid: 0

Literal question

Current Weekly activity particulars - Status(code)

Interviewer instructions

the activity statuses of a person falls into one of three broad categories, viz. employed (any of codes 11-72), unemployed (any of codes 81 or 82) and out of labour force (any of codes 91-98).If any of these is a work related activity code i.e., any of 11 to 72 the person will fall in the employed category on the current weekly status. In other words, if the person is found to have been assigned a work status code on any of the day of the last week he will be considered as working in the current weekly status. For assigning the unemployed status code (i.e., either 81 or 82) to a person as his weekly activity status code, the person should not have had any work activity status codes on any of the days of the last week but should have one of codes 81 or 82 on at least one day of the last week (i.e., the entry in column (4) should not be any of 11-72 but should be 81 or 82 against one of the serial nos. of activity). Persons without any of codes 11-82 in column (4) will be those who will be treated as out of labour force in the current weekly status.

NIC code for current weekly activity (B5_q20)
File: Block-5-Persons-Activity-Records

Region

Stratum no. (Stratum)
File: Block-6-Unemployed-Persons-Rcds

Overview	
Type: Discrete	Valid cases: 7827
Format: character	Invalid: 0
Width: 2	

Description

In the rural sector, each district is treated as a separate stratum. However, if the census population of the districts is greater than or equal to 1.8 million or 2 million (depending upon whether 1981 or 1991 census frame is used for selection of villages), the district has been split into two or more strata, by grouping contiguous tehsils to form strata. In Gujarat, in the cases of districts extending over more than one region the part of a district falling in each region constitues a separate strsatum. In the urban sector, strata are formed within NSS region on the basis of the population size class of towns.
See INSTRUCTIONS TO FIELD STAFF : VOLUME- I (find attached as external resource attachment)

Sub-Round (SubRound)
File: Block-6-Unemployed-Persons-Rcds

Overview

Type: Discrete

Format: character

Width: 1

Valid cases: 7827

Invalid: 0

Description

The survey period of one year of this round was divided into four sub-rounds of three months duration.Equal number of sample villages and blocks were allotted for survey in each of these four sub-rounds.
See INSTRUCTIONS TO FIELD STAFF : VOLUME- I (find attached as external resource attachment)

Literal question

Sub-Round

Serial no. of village/block (Vill_Blk_Slno)
File: Block-6-Unemployed-Persons-Rcds

Overview

Type: Discrete

Format: character

Width: 5

Valid cases: 7827

Invalid: 0

Description

The first-stage units are census villages in the rural sector and the NSSO urban frame survey (UFS) blocks in the urban sector. However, for some of the newly declared towns of 1991 census for which UFS frame has not been received, the 1991 census enumeration blocks are the first-stage units.This variable indicates the serial number assigned to such units.
See INSTRUCTIONS TO FIELD STAFF : VOLUME- I (find attached as external resource attachment)

Literal question

Serial no of village/Block

Second-stage stratum (Stage2_Stratum)

Format: character	Invalid: 0
Width: 1	

Universe

Applicable to persons unemployed for 7 days of the week.Such persons will be identified on the basis of the daily time disposition recorded in block 5, and column (22) of block 5 will have code 1 for such persons.

Pre question

Ask the Question only to persons unemployed for 7 days of the week preceding the date of survey

Literal question

Duration of present spell of unemployment

Post question

If no persons unemployed for 7 days of the week then skip to next block

Interviewer instructions

The spell of unemployment means the continuous period for which the person remained unemployed. The present spell will, therefore, refer to the period starting from the day the person became unemployed to the survey date. In the case of persons who are first entrants to the labour force the present spell will be equal to the entire length of unemployment starting from the day such person joined the labour force i.e. the day since when he/she was seeking/available for work and for those who had any previous employment the present spell will be the period starting from the day they were seeking or available for work after closing their employment to the survey date. The spell will be recorded in codes indicating various durations.

Type of work sought (code) (B6_q9)

Literal question

Region

Stratum no. (Stratum)
File: Block-7-Employed-Persons-Rcds

Overview

Type: Discrete	Valid cases: 226275
Format: character	Invalid: 0
Width: 2	

Description

In the rural sector, each district is treated as a separate stratum. However, if the census population of the districts is greater than or equal to 1.8 million or 2 million (depending upon whether 1981 or 1991 census frame is used for selection of villages), the district has been split into two or more strata, by grouping contiguous tehsils to form strata. In Gujarat, in the cases of districts extending over more than one region the part of a district falling in each region constiues a separate strsatum. In the urban sector, strata are formed within NSS region on the basis of the population size class of towns.

Whether changed work(code) (B7_q5)
File: Block-7-Employed-Persons-Rcds

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 202979
Invalid: 0

Literal question

Whether changed nature of work and/or establishment during last 2 years(code)

Interviewer instructions

Question (5) to (7) will be filled in only for those who are employed in the principal usual status (i.e. persons with code 11-51 in column (3).
The 'nature of work' will be based on the criterion of type of work performed by the person and can be taken as the occupation pursued by him/her. The term establishment is used in a broad sense and will include all producing units including household enterprises. In this sense, a person changing from one government department or organisation to another on a routine transfer/promotion posting will not be considered as having changed establishment. However, if his nature of work has changed consequent to this, code 1 will be given. In case he/she has lost or quit the earlier job and taken up a fresh job in another department or organisation, it will be taken as a change in establishment as such changes are an indication of occupational mobility. The reference period for this item will be preceding two years from the date of survey. Code 3 will be applicable even where the change in nature of work and change in establishment has taken place at two different time points within the reference period of two years.

Reason for change (code) (B7_q6)
File: Block-7-Employed-Persons-Rcds

Overview

Reason for change (code) (B7_q6)
File: Block-7-Employed-Persons-Rcds

Type: Discrete
Format: character
Width: 1

Valid cases: 6826
Invalid: 0

Literal question

If changed work, reason for change (code)

Interviewer instructions

In this column, the reason for change will be recorded for those who have changed nature of work or establishment or both i.e., those with codes 1,2 or 3 in col.(5) of this block. If during the last two years more than one change of work or establishment is reported the reason for the last change will be recorded. If more than one code is applicable to a person, of the relevant codes the one which appears first in the code list will be recorded.

Last occupation (code)(2 digited NCO-1968) (B7_q7)
File: Block-7-Employed-Persons-Rcds

Overview

Type: Discrete
Format: character
Width: 2

Invalid: 0

Literal question

Last occupations (2 digited NCO-1968)

Interviewer instructions

For those who have changed their nature of work in occupation, the occupation group (i.e., 2 digit level NCO) in which they were engaged prior to this change will be recorded in this column.

Full time or part time work (code) (B7_q8)
File: Block-7-Employed-Persons-Rcds

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 222537
Invalid: 0

Literal question

Whether engagedin mostly in full time or part time work during last 365 days

Interviewer instructions

Columns (8) to (18) will be filled in for all those who are employed either in the principal or subsidiary status. In column (8) it will be ascertained if the person was engaged mostly in full time work or part time work. Those who are mostly engaged in full time work will be given code-1 and those who are mostly engaged in part time work will be given code

Worked regularly? (code) (B7_q9)
File: Block-7-Employed-Persons-Rcds

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 226275
Invalid: 0

Literal question

Whether worked more or less regularly during last 365 days

Interviewer instructions

Worked regularly? (code) (B7_q9)
File: Block-7-Employed-Persons-Rcds

: According to the principal usual status approach, the broad activities category has been determined on the basis of the major time criterion. Thus, the persons who are 'employed' in their principal status may or may not be employed throughout the last 365 days. By virtue of the procedure adopted for classification of activity statuses it is possible that some of them were not employed for considerable length of time. In the case of those who were employed only in the subsidiary status this will be the situation most often. Thus, this item will be filled in for both principal and subsidiary status employed. Those who have worked more or less regularly during the reference year will be given code 1. Others will be given code 2.

No.of months without work (B7_q10)
File: Block-7-Employed-Persons-Rcds

Overview

Type: Continuous
Format: numeric
Width: 2
Decimals: 0

Valid cases: 22517
Invalid: 203758

Literal question

If not worked regularly, approximately, no.of months without work

Interviewer instructions

Columns (10) to (12) will be filled in for those who have not worked more or less regularly during the reference year. In column (10), the number of months such persons were without work will be recorded. The months without work need not be continuous. It is quite possible that a person was without any work for a couple of months, then in employment for some months and again out of work for a couple of months. The total of all the months out of work will be recorded here will include months in which person was unemployed and also months in which he/she was out of labour force i.e. neither seeking/available for work. The actual number of months will be recorded. Part of month will be rounded off to the nearest month.

sought work?(code) (B7_q11)
File: Block-7-Employed-Persons-Rcds

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 23229
Invalid: 0

Literal question

Whether sought/available for work during those months without work

Any efforts to get work (code) (B7_q12)
File: Block-7-Employed-Persons-Rcds

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 21951
Invalid: 0

Literal question

Whether made any efforts to get work

Interviewer instructions

For those who were at work more or less regularly, the efforts made by them to get work viz. whether they registered in the employment exchange, or made other efforts, will be recorded here. Relevant codes as given in bracket above will be entered in this column.

sought additional work (code) (B7_q13)
File: Block-7-Employed-Persons-Rcds

Overview	
Type: Discrete	Valid cases: 222830
Format: character	Invalid: 0
Width: 1	

Literal question

Whether sought/available for additional work during the days he/she had work

Interviewer instructions

As already mentioned in the column heading, the time reference to record whether the person was seeking/available for additional work will be that period of last 365 days during which the person was employed. Thus for a person whose principal usual status is unemployed but had subsidiary work for a relatively short period, the availability for additional work will refer only to the short period he/she working. This criterion will be applicable to column (15) also. The entries will be made in codes as given in the column heading.

Rreasons for seeking additional work (code) (B7_q14)
File: Block-7-Employed-Persons-Rcds

Overview	
Type: Discrete	Valid cases: 12433
Format: character	Invalid: 0
Width: 1	

Literal question

If seeking additional work then Rreasons (code)

Interviewer instructions

The reason for seeking/available for additional work will be entered in this column in terms of codes

Sought for alternative work (code) (B7_q15)
File: Block-7-Employed-Persons-Rcds

Overview	
Type: Discrete	Valid cases: 226275
Format: character	Invalid: 0
Width: 1	

Literal question

Whether sought/available for alternative work during the days he/she had work

Interviewer instructions

As in the case of availability for additional work, information in respect of a person's availability for alternative work will be collected with reference to that period of last 365 days during which he/she was employed. The entry will be made in codes as given in the column heading. Alternative work will mean alternative occupation.

Reasons for seeking alternative work (code) (B7_q16)
File: Block-7-Employed-Persons-Rcds

Overview	
Type: Discrete	Valid cases: 10212
Format: character	Invalid: 0
Width: 1	

Literal question

Interviewer instructions

Reasons for seeking alternative work (code) (B7_q16)
File: Block-7-Employed-Persons-Rcds

For those who 'sought/available' for alternative work at least for some days the reason for doing so will be recorded

Any union/associations in your trade? (code) (B7_q17)
File: Block-7-Employed-Persons-Rcds

Overview

Type: Discrete	Valid cases: 221581
Format: character	Invalid: 0
Width: 1	

Literal question

Is there any union/associations in your trade?

Interviewer instructions

Union/association will mean any registered/recognised body whose membership is open to a section of those engaged in a specific trade and whose main objective is to look into the interests of its members. 'Trade'refers to any occupation under the activity statuses 11-51. Thus besides the usual trade unions, association of owners, self-employed persons etc. will also be covered. The union/association sometimes may be a large body like a factory union looking after the welfare of different types/levels of workers. Depending on the respondents reply, codes 1, 2 or 3 will be recorded in this column. It is to be noted that even if a self employed person is aware of an association which looks after the interests of those of his kind, the answer to the question will be 'no' (code-2) if the membership of such an association is not open to him or the association does not cover the locality where he/she runs the enterprise. It is possible that some of the self-employed persons are not aware of the existence of any association of the kind described above relating to his trade. In such cases, code 3 will be entered in column (17).

Member of trade union/associations (code) (B7_q18)
File: Block-7-Employed-Persons-Rcds

Overview

Type: Discrete	Valid cases: 41894
Format: character	Invalid: 0
Width: 1	

Literal question

Whether a member of union/associations in your trade

Interviewer instructions

If the respondent reports that a union/association as discussed in para 5.7.15 is exists in his trade, it is to be ascertained if he/she is a member of that union/association, code 1 or 2 will be recorded

Nature of employment (code) (B7_q19)
File: Block-7-Employed-Persons-Rcds

Overview

Type: Discrete	Valid cases: 39401
Format: character	Invalid: 0
Width: 1	

Literal question

if principal status or subsidiary status=31 - Nature of employment

Interviewer instructions

Questions(19) & (20) will be filled in for those who are wage/salaried employees only i.e., those whose activity status code in col.(3) or (4) is 31. In column (19), the nature of employment (i.e., whether permanent or temporary) will be recorded in terms of code. Nature of employment will be considered as permanent if the person is in normal course likely to continue in the same employment. Code 1 or 2 will be given if the employment is permanent or temporary respectively.

Nature of employer (code) (B7_q20)
File: Block-7-Employed-Persons-Rcds

Overview	
Type: Discrete	Valid cases: 39389
Format: character	Invalid: 0
Width: 1	

Literal question

if principal status or subsidiary status=31 - Nature of employer

Interviewer instructions

The nature of employer is classified into public, semi-public or private depending on the ownership of the enterprise employ in the regular wage/salaried person. Enterprises owned (i) wholly by central Govt., (ii) wholly by state and/or Local Govt. and (iii) jointly by central Govt. and state and or/local Govt. will be called 'public'. Enterprises wholly owned by private bodies (i.e., individual, partnership, limited companies or co-operatives etc.) will be 'private', 'semi public' will be those joint enterprises in which besides private share holders government (central/state/local bodies etc.) also hold some shares no matter who had the majority of shares.

Description
In the rural sector, each district is treated as a separate stratum. However, if the census population of the districts is greater than or equal to 1.8 million or 2 million (depending upon whether 1981 or 1991 census frame is used for selection of villages), the district has been split into two or more strata, by grouping contiguous tehsils to form strata. In Gujarat, in the cases of districts extending over more than one region the part of a district falling in each region constitues a separate strsatum. In the urban sector, strata are formed within NSS region on the basis of the population size class of towns.

Format: character	Invalid: 0
Width: 1	

Literal question

school attendance

Interviewer instructions

School attendance (code) (B8_q3)
File: Block-8-Children-Records

School attendance for the purpose of this column will be include those attending classes I to X in a formal educational/institution/school. However, if it is found that some children in this age group are still attending kindergarten or similar pre-primary classes they may be treated as 'currently attending'. 'Currently attending' will have the same meaning as for making entry in column (9) of block 4 where current attendance in educational institution will be recorded. 'Dropped out' will be those have attended at least for some days in an educ ational institution/school but is not currently attending any school. 'Never attended' are those who have never attended any formal school and are not currently attending any pre-primary classes. Codes 1,2, or 3 will be recorded in this column as the case may be. As a special case, children who have completed class X and are currently attending higher classes/courses will be treated as currently attending and code 1 will be entered against them. Those who have completed class X and are not pursuing higher education will be given code-2 i.e., dropped out.

Helps in household work? (code) (B8_q4)
File: Block-8-Children-Records

Overview	
Type: Discrete	Valid cases: 128636
Format: character	Invalid: 0
Width: 1	

Literal question

Whether helps in household work

Interviewer instructions

This column will be filled in for all children. For those children who more or less regularly helps in the hh. chores (domestic work) will be given code 1, for 'yes' and those who do not will be given code 2.

Working? (code) (B8_q5)
File: Block-8-Children-Records

Overview	
Type: Discrete	Valid cases: 96804
Format: character	Invalid: 0
Width: 1	

Literal question

Whether attending school and also working

Interviewer instructions

For children who are currently attending school, i.e. code 1 in column (3), their activity particulars with reference to 'work' and its effects on their studies will be recorded in columns (5) to (12). For children who are not currently attending i.e., either dropped out or never attended, the particulars of their economic activity will be recorded in columns (13) to (21). Thus, either columns (5) - (12_ or columns (13)-(21) only be filled in this block for a particular child. It should be noted that a domestic servant engaged in household chores in return of wages in case and/or kind will be considered 'working'. Hence, code-2 will be given in col.(4) against him/her, although he/she regularly helps in the household chores.

Code 1 or 2 will be recorded depending on whether the child is normally working or not. As the child is also currently attending school, such 'work' is not expected to be any 'full time' work over a long period. The work may be outside the school hours or during the school hours on a seasonal basis.

Bringing water from outside village (only for rural areas)?(code) (B9_q19)
File: Block-9-Domestic duties-Persons-Recocds

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 68250
Invalid: 0

Literal question

See Question-6 for details

Interviewer instructions

Item 19 will be filled in for rural areas only

Water at distance (in kms) (B9_q20)
File: Block-9-Domestic duties-Persons-Recocds

Overview

Type: Continuous
Format: numeric
Width: 3
Decimals: 0

Valid cases: 1509
Invalid: 111510

Literal question

If Bringing water from outside village, the distance (in kms)

Interviewer instructions

If for a particular person the answer to the question listed against item 19, i.e. whether the person brings water from outside the village, is 'yes' (code 1), the distance (rounded off) to the nearest kilometre) the person had to travel from the household premises to the point of the source of water will be recorded against this item.

Accept work ?(code) (B9_q21)
File: Block-9-Domestic duties-Persons-Recocds

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 113019
Invalid: 0

Literal question

Are you willing to accept work if made available?

Interviewer instructions

For all those categorised 'usually engaged in domestic duties' and listed against item '1' it will be ascertained whether they will be prepared to accept work if work is made available at their household premises. If the answer is in the affirmative, code 1 and if the answer is in the negative, code 2 will be recorded against this item.

Nature of work acceptable(code) (B9_q22)
File: Block-9-Domestic duties-Persons-Recocds

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 31141
Invalid: 0

Literal question

If willing to work - nature of work acceptable(code)

Interviewer instructions

Nature of work acceptable(code) (B9_q22)
File: Block-9-Domestic duties-Persons-Recocds

The questions listed against these items will be put only to those who have answered in the affirmative for the question listed against item 21(i.e. persons with entry 1 against item 21). The codes appropriate for the answers obtained will be recorded against the relevant items. For items 22, 23 and 25, if more than one code is found to be applicable, the code which appears first in the code list only will be recorded.

Type of work acceptable(code) (B9_q23)
File: Block-9-Domestic duties-Persons-Recocds

Overview	
Type: Discrete	Valid cases: 31141

Literal question

Sector code

Interviewer instructions

Sector (Sector)
File: Block-10-Loan_Records

Record 1 or 2 depending on whether the selected sample village/block is classified as Rural or Urban.

State Code (State)
File: Block-10-Loan_Records

Overview	
Type: Discrete	Valid cases: 30940
Format: character	Invalid: 0
Width: 2	

Literal question

State code

Interviewer instructions

State to which the sample village/block belongs to will be recorded here as per the code list.

Region (Region)
File: Block-10-Loan_Records

Overview	
Type: Discrete	Valid cases: 30940
Format: character	Invalid: 0
Width: 1	

Literal question

Region

Stratum (Stratum)
File: Block-10-Loan_Records

Overview	
Type: Discrete	Valid cases: 30940
Format: character	Invalid: 0
Width: 2	

Description

In the rural sector, each district is treated as a separate stratum. However, if the census population of the districts is greater than or equal to 1.8 million or 2 million (depending upon whether 1981 or 1991 census frame is used for selection of villages), the district has been split into two or more strata, by grouping contiguous tehsils to form strata. In Gujarat, in the cases of districts extending over more than one region the part of a district falling in each region constitues a separate strsatum. In the urban sector, strata are formed within NSS region on the basis of the population size class of towns.
See INSTRUCTIONS TO FIELD STAFF : VOLUME- I (find attached as external resource attachment)

Literal question

Stratum

Subsample (SubSample)
File: Block-10-Loan_Records

Overview	
Type: Discrete	Valid cases: 30940
Format: character	Invalid: 0
Width: 1	

Subsample (SubSample)
File: Block-10-Loan_Records

Literal question

Sub-sample

Sub Round (SubRound)
File: Block-10-Loan_Records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 30940
Invalid: 0

Description

The survey period of one year of this round was divided into four sub-rounds of three months duration.Equal number of sample villages and blocks were allotted for survey in each of these four sub-rounds. see INSTRUCTIONS TO FIELD STAFF : VOLUME- I (find attached as external resource attachment)

Literal question

Sub Round

Serial no.of village/Block (Vill_Blk_slno)
File: Block-10-Loan_Records

Overview

Type: Discrete
Format: character
Width: 5

Valid cases: 30940
Invalid: 0

Description

The first-stage units are census villages in the rural sector and the NSSO urban frame survey (UFS) blocks in the urban sector. However, for some of the newly declared towns of 1991 census for which UFS frame has not been received, the 1991 census enumeration blocks are the first-stage units.This variable indicates the serial number assigned to such units. See INSTRUCTIONS TO FIELD STAFF : VOLUME- I (find attached as external resource attachment)

Literal question

Serial no of village/Block

Second Stage stratum (Stage2_stratum)
File: Block-10-Loan_Records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 30940
Invalid: 0

Literal question

Second stage stratum

Sample household no. (Hhold_no)
File: Block-10-Loan_Records

Overview

Sample household no. (Hhold_no)
File: Block-10-Loan_Records

Type: Discrete
Format: character
Width: 2

Valid cases: 30940

Invalid: 0

Literal question

Sample household no.

Serial no.of loan (999 indicates total lloan fo the hhold) (Loan_Slno)
File: Block-10-Loan_Records

Overview

Type: Discrete
Format: character
Width: 3

Valid cases: 30940

Invalid: 0

Universe

For Rural Households only

Literal question

Serial no.of loan

Interviewer instructions

Each Loan outstanding on the date of survey will get a separate serial number and that has to be recorded under this column.
If only one loan is recorded, the amount of that loan should be repeated in the 'total' line. In the case of multiple loans recorded in two or more lines, the total amount of all such loan taken together should be recorded in the 'total' line. Against total line, serial number 999 is pre-printed.

Nature of loan/debt (B10_q2)
File: Block-10-Loan_Records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 9080

Invalid: 0

Universe

For Rural Households only

Literal question

Nature of loan/debt

Interviewer instructions

For each loan listed in column (1), the 'nature of loan' in terms of code numbers will be recorded in this column.

Amount outstanding including interest (B10_q3)
File: Block-10-Loan_Records

Overview

Type: Continuous
Format: numeric
Width: 6
Decimals: 0
Range: 0-175000

Valid cases: 16478
Invalid: 14462
Minimum: 0
Maximum: 175000
Mean: 2775
Standard deviation: 5801.9

Universe

For Rural Households only

Amount outstanding including interest (B10_q3)
File: Block-10-Loan_Records

Literal question

Amount outstanding including interest on the date of survey

Interviewer instructions

For each loan, the total amount due on the date of enquiry (i.e. the outstanding principal plus the interest due) will be recorded . Initial discount allowed if any, in the principal should be taken into account while recording the total amount of loan outstanding on the date of survey.
If only one loan is recorded in this, the amount of that loan should be repeated in the 'total' line. In the case of multiple loans recorded in two or more lines, the total amount of all such loan taken together should be recorded in the 'total' line.

Source of loan/debt (B10_q4)
File: Block-10-Loan_Records

Overview

Type: Discrete   Valid cases: 9079
Format: character   Invalid: 0
Width: 1

Universe

For Rural Households only

Literal question

Source of loan/debt

Interviewer instructions

The information regarding the source of each loan will be recorded in this column in terms of code numbers
It may be noted that the loan taken from LTC will be given source code-1. If any relative/friend charges interest, the proper source code should be 5 and not 7

Purpose of loan/debt (B10_q5)
File: Block-10-Loan_Records

Overview

Type: Discrete   Valid cases: 9076
Format: character   Invalid: 0
Width: 1

Universe

For Rural Households only

Literal question

Purpose of loan/debt

Interviewer instructions

The purpose for which the loan has been contracted by the household will be recorded in this column in terms of codes.If a particular loan is taken to meet more than one purpose, the purpose for which large part of the loan is intended to be utilised will be considered for recording entries against this column.
The purpose of loan taken for legal expenses to be incurred towards enterprise account will get code 7. While code 4 will cover for loans taken for the purpose of food consumption, consumption of clothing, purchase of durable goods, etc.

Indebt code(Loan Taken=1,No Loan=2) (Indebt_cd)
